> 21. Simpler "Operator" class that does not include practical circuits.
> (I bet with a more difficult test, many coders will end up here instead
> of Extras).

A matter of personal preference.

>
> 22. Real Emergency communications training,
> (must demonstrate on actual equipment), instead of just written test.

Impractical, and costly to implement.

> 23. Field day preparation meetings so everyone can do their best on field day.

To me, field day is nothing more than a contest. I have no interest in contests, as do many other hams. I would suggest a alternative to field day, that would not put emphasis on making as many contacts as possible, but rather emphasize creative solutions to emergency operations. (Solar power, homebrew equipment, etc.)

>
> 24. More real skill building activities
> 25. New awards. Instead of WAS and other volume based awards, recognition for
> WAB(Worked All Bands), Distance awards, station setup time awards, etc.

A rose by any other name? Pick any facet of ham radio, and I'm sure you could come up with an award for it.

Dave

Very helpful, Lelnad. This guys doesn't know cable from coax
characteristics or else he wouldn't have asked and you give him a song
and dance. Then to top it off, you suggest he build impedance
transformers. Let me guess, you desperately hoped he would inquire as to
how one is constructed and you would be more than happy to
oblige......why not just tell him the bottom line..... cable coax sucks
for all practical cb purposes. Go to rat shack and buy some rg 8 or 58,
it's cheap enough. Whatever you do, do not listen to Lelnad and company.
They have been known to intentionally give advice that will fry cb
radios. We validate them when we're bored for entertainment purposes
only.

Sure, Lelnad. I'll invoke the good spirit of Dick pointing out to the
hammie community what a parasite you are to hammie radio, and everyone
knows Dick's opinion was respected by both sides. He had a knack for
truth and a zero tolerance for your bullshit..... below is a post from
rec.radio.amateur.policy, which everyone remembers Lelnad KC8LDO whining
and crying for me to follow him to. When I refused to follow him to a
hammie room, he took to forging me there along with Doug Adair N8WWM.
Below is
an entry by Dick, followed by the forge of myself. When Dick points out
it was Lelnad C. Scott KC8LDO forging, Lelnad suddenly attacks Dick,
telling him it's DICK that's being messed with. Riiiight! Then, right on
time and on the heels of Lelnad's post of denial, a post by Dogie
miraculously shows up and appears immediately afterward and attempts to
make *me* the subject of topic in the hammie room where Lelnad couldn't
get me to follow him in the first place. Finally,, at the bottom, Dick
gives his final say in the matter.

Your posts never held one iota of truth.
My comparison was clearly indicative of 10 meter modes, nothing more.
Here is my quote, verbatim, now watch closely:

"Being a ham doesn't offer any of the above
with the exception to more spectrum. One can operate all the modes one
wishes on 11, they work just as well on 11 as they do 10. Some run as
much power as they wish."

As usual, you are running off at the mouth and having one hell of a time
comprehending what was posted...your deficit in communicating
manifests......culminating in the irony, of you being licensed for that
of which you demonstrate a repeated ineptness for. Couple it with your
fondness for namecalling and the picture-perfect lid is suddenly
conjured.....a parasite to hammie radio.

Does that van have the plastic or fiberglass extended roof? If not...I would go in with a Wilson or another good base load in the center of the roof.. Feed it with RG-213 if possible. Also....is the radio and other accessories grounded well? Not just the DC power ground, but good braid to the chassis. That should stop it, if there isn't another issue.

Money? No one said anything of the such except you.
****
>No shit sherlock why do you sell something? >uh to make money,

Since you contend there is MUCH money to be made in such a line of
activity, why are you asking me? You seem capable of providing your own
answers to your own questions. Matter of fact, the rest of can ignore
you while you carry on a conversation with yourself, if that's what
pleases you.

>Answer the question Jr,<

I'm not JR. JR is a sometimes angry hammie, struggling with the forces
of good and evil, ambivalent,....shadow boxing the apocalypse.

One topic at a time...
****
>Is that all you can handle?<

It's all you can focus on.

>you say Hams can use em legally Answer me >that Batman.

Answer you WHAT?
You didn't ask anything.

>They are a front for the Xforce line of amps.<

Galaxy radios? Who conked you on the head?

>In fact Carriage
>Car@aol.com wash who used to post here >has become one of the owners.
>Amazing the info you find out in these CB >forums LOL

And this upsets or pleasures you why?

>Why, of course<

But....why?

>You don't feel that way?<

I find my pleasures not at the expense of others.
****
>Yes at your own hands right. Self gratification I >think they call
that.

Gee, you lie like Dave Hall N3CVJ, your personal attacks and flames are of a sexual nature like Dogie NWWM AND Lelnad KC8LDO .....you really were hurt by my leaving your name out of my cb dog kennel. Let us look at Arrons infamous members.

So far we have Dave Hall N3CVJ who told us without inquiry of owning a cb hack shop with a sex pervert who he claimed is a good friend......we have Dogie N8WWM who has lost countless ISP's for flooding the group with sexually graphic porn spam, and we have Lelnad C Scott KC8LDO,, who has made over 100 off-topic posts to this group concerning his fetish of handling younger men's jockstraps. Making inquiries of another man's underwear, shooting cbers, and insults about molesting children (such a matter is NO joke and one who would use such a topic as their choice of insult and flame troll bait is a scurvy degenerate)
isn't exactly conducive to hammie radio.

Unfortunately, the bad elements are the ones that gain attention. It is the behavior exhibited such as this that is ruining hammie radio, and is of little wonder people such as this need another to point to for blame....."those garsh darn cbers make us degenerate lowlives call them all sorts of homo names cuz they deserve it fer braken laww".
The fact that you have readily and vehemently defended all of the above when they have clearly been in the wrong, and are now beginning to make comments of a sexual nature yourself to another man....well, if it walks

like a duck.............

It appears it isn''t cb and nocode status that this little fun group of yours has in common. Never could figure out why you and Hall would fall into Adair's and "Nad's nocode bullshit, but as of late it has become crystal clear.....each and everyone of you, and it appears ONLY limited to you losers named by arron, has a repeated fondess for cracks of a sexual nature. Deviant dogie adair came in here espusing such trash talk and you few took to him immediately...birds of a feather.

"Live and learn."
****
*

>Back to Movie trivia huh, it was "Live and let >die" James Bond

Who sang the original theme song?
Paul McCartney (I think).
Anyhooo...you are getting your posts confused again. I didn't say "Live and Learn".

He can use it on ssb
****
>He sure can, but that was never really even >mentioned.

Sure it was...by me in retort to your false claim that a hammie couldn't use it legally.
****
>he can't you just can accept that fact.

Still haven't checked that, huh?
That's cool. You're the only one on this group that believes that...guaranteed.
---
and that's where all the 10 meter activity is..

>28.085 yep those damn truckers, thats exactly >where one of those Galaxy radios will put him.

What do truckers have to do with anything
concerning us? You still seem to be confused about the law. You definitely are incorrect concerning useage of a Galaxy radio by a hammie.
****
>you are misinformed on many things my >friend,

Actually, I'm not, hence you and the dog-ladies attacking me personally and not my posts. You effectively reiterate that point on a daily basis along with Lelnad and Hall.

>what a hammie can use is the least of your >worries.

I have no worries. I merely point out your lies and incorrect bullshit you try to ply as factual.

>Don't sweat it it is on a need
>to know basis and you really don't need to >know.

Then why did you bother to bring it up?I certainly didn't ask, as I already knew.
I suggest a refresher course in radio law. Maybe Jerry will take pity on you and perform the Heimlich on you for that crow you are asphyxiating on :)

>your captains license?<

Hahhhaa......it only took you, what....almost 4 years? Maybe in 4 more you can actually narrow it down to the few thousand on this coast.
****
>where are you heading this time not North I >hope? too cold

I get north once a year or so these days. Even went through your neck of the woods a few years ago...played in Lancaster, did the Amish buggy ride, ate at Zinn's on 30...
****
>Is that where we will find you?<

Yea, I'll go back there..good food.

>LOL To the batcave!<

It's good you revel in fantasy. It helps those in doubt understand your posts.

"maybe the ARRL"
****
>Thinking of becoming a member?<

Maybe I already am.

Jerry will spell it out
****
>I thought he did last week for you, hmm you >still don't understand? (chuckle)

You illustrated perfectly you not only don't understand, but incorrectly interpreted what Jerry said. He never claimed what you attributed him. At least you don't limit your lies to cbers by deliberately misattributing what they say..you extend that courtesy to your fellow hammies, as well. How many manufacturers of hammie rigs can you name that currently are made here in the US besides Ten-Tec..hmm?
****
>Any of the licensed hams in the usa can build >there own. Do I win a prize?

Maybe.......if you can answer the question. Building a rig doesn't constitute manufacturing. There. Now you have several erroneous claims that you can educate yourself on and a new sexual identity crisis we wern't aware of and really didn't need to know, but it does shed light on why you are so sympathetic to the troubled few among us.

Whip
: on a
: > gutter mount mounted to the rear roof lip.
:

: At great risk of getting flamed here, but once again did you talk with
your
: CB tech about your antenna.

If worried about flames chose your words carefully. he asked everyone in
the group what antenna to use.

: Did he/she suggest the gutter mount?

Apparently some one suggested it since he has one.

:Did he/she suggest that you run a Francis with a 400 watt TS?

I hope not since amplifiers are Illegal.

:And did he/she really sell you a DX959. Oh, sorry. Disappointing radio
for me.

No he won it at a Bingo auction, why how many have you blown up?

:
: Anyways, I never suggest a Francis with power. But that is because, even
: though some have told me they run over a 1000 watts through one, I am
pretty
: sure that it won't hold up to the abuse.

So are those people Lieing to you then? at texas star 400 won't do 1kw he has no worries.

: After all, it is the smallest copper wire antenna made.

there are many different size of Francis antennas.

:It is not rated for power at all.

Depends which one he has.

: You are probably having an RF Breakdown because of the antenna.

No sounds like lack of ground and rf is getting back into the radio

: Or you can put an antenna that is rated for the power you want to run, on
: the front somewhere. There are plenty of mounts out there that will adapts.
: Get a good ground.

Well what are the mounts that he can use that are an option?

:9 out of 10 times it has nothing to do with the equipment inside unless you have a
: jumper breaking down in between the radio and amp. It is outside.

Did you build his jumpers? How do jumpers break down? Could the coax from the antenna break down as well?

: These are strictly my opinions of years of working with this equipment.

Here is another tip, DON'T hold on to the antenna when you key up.
: It gets hot.

where would we be without you.

Yes there are many different sizes of Francis but is the wire different size
inside? That up to the 6 footer is all I have seen. When tuning them, the
wire inside appears to be the same guage. But I could be wrong. I have,
afterall, been wrong before.

> knowledge about ham radio.
>
We have a generation of kids that are used to the overwhelming sensory
experiences of video games, and even the WWW. In order to gain more
participants, it seems to me that the issue of 'attractiveness' is more
fundamental than the licensing qualifications.

In a way, it makes little sense to decrease the qualifications if they are
already so low, and even that slight impediment is stopping participation.

People today have so many opportunities for day-to-day communications,
that there is even a bit of a movement to hide from the on-demand
communications distractions. Ham radio already has alot of competition
from other communications systems. I am not claiming that current
communications systems are equivalent to Ham Radio, but because there
is a little bit of a 'dream' that is satisfied by Cellular or the WWW (for
example) that makes the results of Ham Radio superficially less exotic
and appear to be less of a challenge. (Of course, that isn't quite true,
but appearances are sometimes more important than reality.)

Ham radio will tend to draw more interest when it can provide a compelling
and glitzy 'features.' This is a difficult thing to decide, because some of the
'best' glitzy things to do might take LOTS of bandwidth and/or might not even be
applicable to ham radio.

I suspect that there are the 'ham radio' club marketing (e.g. ARRL) are
trying to figure out some killer applications for the hobby. Of course, it is
a different kind of killer application than 'Spreadsheet', 'Video games' or
somesuch, but I suspect that there is something out there.

Ham radio already has SOME applications (contests, emergency communications,
casual communications, electronics hobby), but additional *generationally relevent*
applications need to be found.

From what I see on the outside, Ham Radio isn't dying, but given the powerful
tools available, it seems odd that more appropriate high visibility hobby
applications havent been found (or publicized much.)

John

Much the same as when people flaunt illegal radio operation, like a badge of honor, yet complain to others' ISP's when someone rains on their parade.

>
> Yes Scooter Tramp, you must realize you are in RRCB now, where

> thinking falls into the category of "Federal Criminal" or "Keyclown".

It has nothing to do with anyone's "thinking". Whether you like it or not, agree with it or not, enjoy it or disdain it, operating a radio outside the legal limits set forth in part 95, is a violation of federal radio regulations. You really need to come to terms with this. If the fact that you're a federal lawbreaker, is not an issue with you then fine. But also note that just because you choose to thumb your nose at the government, and the FCC, does not immunize you against criticism from your peers, who may not share your anarchistic view of radio hobbies.

> This used to be a good group back in the early 90's where free speech
> was allowed and the hammies and policeman want-to-be's didn't disrupt
> things like they do nowdays.

I agree, it was much better then, when we could discuss the technical merits of various things (many of which are illegal), and hopefully educate people before they do things the wrong way. It's one thing to operate a radio illegally, it's even worse when it's the R.F. equivilent of the city landfill.

But be that as it may, someone, and I don't remember who, pushed the issue away from one of courtesy, respect, and common sense to illegal

vs. legal. Many of us were willing to overlook certain indiscretions, if they were responsible and careful of how they operated. But if you're going to force everyone to make a choice of whether to ignore the rules totally, or to follow them, I guess I had to side on the rule of law. You can't expect to make a case for following some rules, while ignoring others, and not expect to be viewed as a hypocrite. On the other hand, I can't support a paradigm of anarchy. Rules were put here for a reason. It's irresponsible to ignore them. Such is the mess we're left with.

> There is still a good group for CB
> discussion and technical advice that has not been corrupted by the

Freedom of speech and the ability to express a dissenting opinion, really bothers you doesn't it?

> The disgruntled hams in here are accomplishing nothing except wasting
> bandwidth in the NG because they are able to "push the buttons" of the
> few cb'ers left in the NG and they feel compelled to respond to them.

That works both ways.

> The only way this group
> will ever amount to anything or serve it's intended purpose,

And just what IS its intended purpose? Surely you don't think promoting illegal activities falls under that umbrella, do you?

> is to be reincarnated as a moderated group. I can't believe someone
> hasn't done this already for the good of those who would like to post
> here but don't.

That's a hoot. A moderated newsgroup, that permits illegal discussions (And isn't that a violation of the "rec" catergory of usenet?), but filters out objections based on legal grounds. Don't hold your breath waiting for that one.

Well it's going to be tough to get
at least 5 mile range, even on a cb.
A stock cb, even on a good day will
get maybe a max of 5 miles give or take
a couple mile, that's on a GOOD day.
FRS if you are lucky will get you 2 to
3 miles range. You might want to try
GMRS, but that is a licensing service.
Other options are to get small linear,
maybe 50 to 100 watts to get that sure
5 miles, but as I'm sure you have read
in this group, it is illegal.

Yes since you cannot I have to spell things out for you, your usual MO is to twsit what is said and you are doing a fine job of that.

: Matter of fact, the rest of can ignore you while you carry on a conversation with yourself,

Yes that is what is normally done with you

: if that's what pleases you.

what do you care what please me?

>Answer the question Jr,<

:I'm not JR.

Didn't say you were JR, said you were Jr. your lieing again.

:Answer you WHAT? You didn't ask anything.

I sure did go back and reread it

>They are a front for the Xforce line of amps.<

Galaxy radios? Who conked you on the head?

What are you off the meds again?

>In fact Carriage
>Car@aol.com wash who used to post here >has become one of the owners.
>Amazing the info you find out in these CB >forums LOL

:But....why?

Why do you care?

I find my pleasures not at the expense of others.
****
>Yes at your own hands right. Self gratification I >think they call that.

Gee, you lie like Dave Hall N3CVJ, your personal attacks and flames are of a sexual nature like Dogie NWWM AND Lelnad KC8LDO .....you really were hurt by my leaving your name out of my cb dog kennel. Let us look at Arrons infamous members.

So far we have Dave Hall N3CVJ who told us without inquiry of owning a cb hack shop with a sex pervert who he claimed is a good friend......we have Dogie N8WWM who has lost countless ISP's for flooding the group with sexually graphic porn spam, and we have Lelnad C Scott KC8LDO,, who has made over 100 off-topic posts to this group concerning his fetish of handling younger men's jockstraps. Making inquiries of another man's underwear, shooting cbers, and insults about molesting children (such a matter is NO joke and one who would use such a topic as their choice of insult and flame troll bait is a scurvy degenerate)
isn't exactly conducive to hammie radio.

Unfortunately, the bad elements are the ones that gain attention. It is the behavior exhibited such as this that is ruining hammie radio, and is of little wonder people such as this need another to point to for blame....."those garsh darn cbers make us degenerate lowlives call them all sorts of homo names cuz they deserve it fer braken laww".
The fact that you have readily and vehemently defended all of the above when they have clearly been in the wrong, and are now beginning to make comments of a sexual nature yourself to another man....well, if it walks like a duck.............

It appears it isn''t cb and nocode status that this little fun group of yours has in common. Never could figure out why you and Hall would fall into Adair's and "Nad's nocode bullshit, but as of late it has become crystal clear.....each and everyone of you, and it appears ONLY limited to you losers named by arron, has a repeated fondess for cracks of a sexual nature. Deviant dogie adair came in here espusing such trash talk and you few took to him immediately...birds of a feather.

"Live and learn."
****
*

>Back to Movie trivia huh, it was "Live and let >die" James Bond

Who sang the original theme song?
Paul McCartney (I think).
Anyhooo...you are getting your posts confused again. I didn't say "Live and Learn".

He can use it on ssb
****
>He sure can, but that was never really even >mentioned.

Sure it was...by me in retort to your false claim that a hammie couldn't use it legally.
****
>he can't you just can accept that fact.

Still haven't checked that, huh?
That's cool. You're the only one on this group that believes that...guaranteed.
---
and that's where all the 10 meter activity is..

>28.085 yep those damn truckers, thats exactly >where one of those Galaxy radios will put him.

What do truckers have to do with anything
concerning us? You still seem to be confused about the law. You definitely are incorrect concerning useage of a Galaxy radio by a hammie.
****
>you are misinformed on many things my >friend,

Actually, I'm not, hence you and the dog-ladies attacking me personally and not my posts. You effectively reiterate that point on a daily basis along with Lelnad and Hall.

>what a hammie can use is the least of your >worries.

I have no worries. I merely point out your lies and incorrect bullshit you try to ply as factual.

>Don't sweat it it is on a need
>to know basis and you really don't need to >know.

Then why did you bother to bring it up?I certainly didn't ask, as I already knew.
I suggest a refresher course in radio law. Maybe Jerry will take pity on you and perform the Heimlich on you for that crow you are asphyxiating on :)

>your captains license?<

Hahhhaa......it only took you, what....almost 4 years? Maybe in 4 more you can actually narrow it down to the few thousand on this coast.
****
>where are you heading this time not North I >hope? too cold

I get north once a year or so these days. Even went through your neck of the woods a few years ago...played in Lancaster, did the Amish buggy ride, ate at Zinn's on 30...
****
>Is that where we will find you?<

Yea, I'll go back there..good food.

>LOL To the batcave!<

It's good you revel in fantasy. It helps those in doubt understand your posts.

"maybe the ARRL"
****
>Thinking of becoming a member?<

Maybe I already am.

Jerry will spell it out
****
>I thought he did last week for you, hmm you >still don't understand? (chuckle)

You illustrated perfectly you not only don't understand, but incorrectly interpreted what Jerry said. He never claimed what you attributed him. At least you don't limit your lies to cbers by deliberately misattributing what they say..you extend that courtesy to your fellow hammies, as well. How many manufacturers of hammie rigs can you name that currently are made here in the US besides Ten-Tec..hmm?
****

>Any of the licensed hams in the usa can build >there own. Do I win a prize?

Maybe.......if you can answer the question. Building a rig doesn't constitute manufacturing. There. Now you have several erroneous claims that you can educate yourself on and a new sexual identity crisis we wern't aware of and really didn't need to know, but it does shed light on why you are so sympathetic to the troubled few among us.

> Obviously, some believe that inteference is a sure sign of a "modified"
> radio. When will they wake up from their dream world?

The antenna certainly contributes.

The antenna acts as a filter, if it is resonant. Actually that's a little deceptive. All antennas are resonant somewhere. Usually in multiple frequencies. If the antenna is resonant on the intended frequency, it will be a less efficient radiator on other frequencies.

As an extreme example, I saw a salesman once, selling a discone antenna to go with a new CB radio. Not only is this an extremely bad antenna in the CB band, it would radiate any VHF or UHF noise that the set might produce, fairly well.

Positioning of the antenna is important, if you can increase the distance between the antenna and the equipment that's having the problem, you will cut the signal level proportional to the square of the increase in distance. (double the distance, 1/4 the signal)

Running less power will help as well. For the sorts of interference described here, I would expect to see >100W in use. I run 100W and cause no interference to either of my very close neighbors with a fairly low mounted antenna.

> Inteference to anything that is NOT a reciever (eg. computers,
> cd players, etc) CANNOT possibly be caused by a "dirty"
> signal. NO amount of harmonics can intefere with something
> that is not designed to pick up radio signals.

Not true.
Any device that has semiconductors in it is suceptible to RF interference.
For each device, some band of frequencies will produce interference at a lower level than others.
So, the more splatter you produce, the more likely it is that you'll hit some device's sensitive band(s)

Also, why not clean up your signal? All that junk is costing you power, that isn't available to go into the main carrier and sidebands, where the information is. It's also causing problems, both the ones you know about, and the ones you don't know about.

External filters help, but they are a patch, not a solution.
If you clean up the rig, you'll get better performance, and less interference, a win-win situation.

Consider a few options...

Is the problem very close by..? as in next door or a few doors away..?

Consumer electronics are poorly protected from rf radiation, especially a nearby radio transmitter. You might be up against the wall on this one.

If the equipment getting hosed is far enough (more than right next door) away, chances are your not going to have much radio fun without a lot of work.

If the hosed equipment is close enough, you could try a few things... ie better shielded coax, a balun or un-un on the coax line near the antenna (to keep radiation from comming back down the coaxial line), reposition the antenna away from nearby objects as best possible and to actually try a few different types of antennas.

Consider an original ground plane type of antenna which has its own physical "ground plane" included. The angle of radiation might be enough to keep things under control.

Consider a half wave type or antenna which includes a decoupling sleeve in it's physical construction and operation.

The Shakespear Big Stick is has the type of base feed that I would suggest you look into. Many of us remove the top 1/4 wave radiator and replace it with Francis 5/8 wave (or the 3/4 wave) sections for smoking system.

Well Dave since you brought it up. You and I
have disagreed and also agreed on some things,
but this statement makes no sense. NO ONE just
complains because someone said "don't call me
illegal, I'll turn you in". It's usually when someone
like Doug floods the newsgroup with so much
foul language, BS Posts they report him. Also
Aaron is just a made up persona so someone can
troll this group. You can't lose your ISP unless there
is proof that you did some thing wrong, just like
with the FCC. So if someone lost there ISP, well
they violated the ISP TOS and lost their account,
not because they were pro illegal or pro legal.

>
>

Again, your choice, as is others to break the law and face
it's consequences. The issues got blown out when certain
individuals came into this group, started spouting the "Rules
& Regulations", they knew when they did that it was now
going to be nothing more than them to troll the group, as
they are still doing to this very day.

> You can't expect to make a case for following some rules,
> while ignoring

> It's irresponsible to ignore them. Such is the mess we're left > with.
>

Yes you are correct we are left with a mess, but the rules
(to which there are none in this group) have nothing to do
with the "Trolls" that are in this group now causing the
majority of the harassing, accusing, foul language posts
that are put up here.

> > There is still a good group for CB
> > discussion and technical advice that has not been >corrupted by the

> really bothers you doesn't it?

It might, but would you not agree calling people
names, acusing them of child molesting and such
(including what was said about Frank) is not a dissenting opinion, but
harrasment?

>
>
> > The only way this group
> > will ever amount to anything or serve it's intended >purpose,
>
> And just what IS its intended purpose? Surely you don't t>hink promoting
> illegal activities falls under that umbrella, do you?

Why yes it does, so just the mere discussion of amps
or export radio's is now wrong to talk about? Yes
selling such items are illegal, but talking about how
many watts an antenna will take is not illegal,but some
here (Aaron and a couple others) will say it is.

>
>
> That's a hoot. A moderated newsgroup, that permits illegal > discussions

> waiting for that one.

Well if it's in the newsgroup charter, then it can be moderated,
so his breathing maybe better than you think. I posted a number of groups
that dealt with drugs, speeding, illegal gambling, car groups breaking
federal EPA laws so they
are there, and under Rec. As again for this group
to be moderated, unless 2 to 3 individuals want to take the
responsibility to check each message everyday, good luck.

2497. FA: Robyn mobile CB with base "docking station"

Newsgroup: rec.radio.cb
Date: 2002-11-25 17:39:41 UTC
From: vhfradiobuff@yahoo.com
Message-ID: <1996cb6d.0211250939.783d31be@posting.google.com>
Source record: 144932

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=1501&item=1941085308

This auction is for a truely unique radio circa 1973! It is a Robyn DG-1300 40 channel AM CB with a Robyn SX-7 base module. This allows the CB to be used as a base radio simply by sliding it into the "docking station" and plugging in the speaker and power plugs in the back and attaching an antenna! The power supply and speaker are in the base module!

This radio is COLLECTORS QUALITY! It is PRISTINE. I would give it a 9.9 on a scale of 1-10 only because it isn't brand new in the box.

I got this CB not too long ago with the intention of using it at home, but I never did. It's been kept in the original box. Included is the microphone and some of the original literature that came with the radio.

This radio works 100% and I received great audio reports when tested. It does the full 4 watts legal limit as indicated by the internal power meter and 2 different external power meters.

Since they got all that Dough, have them put
a real radio and antenna in instead of the
"glass antenna". Explain if they really want it
to work right, they will have to use the right
equipment, not the visible pleasing antenna
on the windshield.

Well that's exactly what I tell them. Usually I don't have trouble with the factory mounted antenna on top. But our RV sales place here doesn't seem to get that.

They actually buy the thru the glass antenna's, stick them on the coach, then put a radio in and I am sure double their prices. Then when the customer is mad, they tell them the radio's no good. When in fact its the antenna.

Can't get it through to them.

I agree whole heartedly with you.

I would be all in favour of reserving some slices in the CW band for 5, 10,
20 WPM operators, and having a test to qualify you for using those segments.

> > 18. Real license preparation classes to understand the material.

That's what we do here. No rote memorization, we make sure it makes sense to
you, before we move on to the next thing.

> > 23. Field day preparation meetings so everyone can do their best on
field day.
>
> To me, field day is nothing more than a contest.

It's devolved into that mostly.
Few groups are really interested in setting up emergency stations, as was
the original intent.
The restriction that you can't start building your station until a certain
time is about all that's left of the emergency aspect. Most clubs have
everything pre-staged and ready to go.

> > 24. More real skill building activities
> > 25. New awards. Instead of WAS and other volume based awards,
recognition for
> > WAB(Worked All Bands), Distance awards, station setup time awards, etc.

Distance per watt awards! So it dosen't devolve into "who can spend the
most money".

From: rcranus@hotmail.coms (Tunafish)
"Landshark" <S3Buell@SBCGlobal.Net.> wrote in message news:XetE9.46:
Well Dave since you brought it up. You and I
have disagreed and also agreed on some things, but this statement makes no sense. NO ONE just complains because someone said "don't call me illegal, I'll turn you in". It's usually when someone like Doug floods the newsgroup with so much foul language, BS Posts they report him. Also Aaron is just a made up persona so someone can troll this group. You can't lose your ISP unless there is proof that you did some thing wrong, just like with the FCC. So if someone lost there ISP, well they violated the ISP TOS and lost their account, not because they were pro illegal or pro legal.

>Bullshit, you are looking to silence anyone >who is against Legal radio,

Stop right there. This has never been indicative of anyone here except you girls and your lies don't make it so. You and the other playpen clowns never have a single example, just multitudes of repeated tired old insults and generalities and accusations, but you are very quick to attempt to perpetuate against another what you cry is unfairly, albeit falsely, being done to you.

>you don't turn others in for the same >infractions hence the label of "Hypocrite" is >applied.

Such as been done with several "hammies' lately..Dave Hall lied about everything and still is.....here is a criminal telling another they are breaking the law. How much credibility do you actually think that carries? Paul Lalli lied and said his server was down when it was proved otherwise. As a matter of fact, each and everyone of youkennel members have beecaught in so many lies, yet those who you would acuse and attack of wrong-doings and misdeeds consist of nothing but flames and more of y'alls bullshit.

N3CVJ, the Hypocrite Hall opened with:
>Whether you like it or not, agree with it or not, >enjoy it or disdain it, operating a radio outside >the legal limits set forth in part 95, is a >violation of federal radio regulations.

So is owning an M200 according to you. Then, in a separate post, you claim it is an illegal amp marketed at cbers. Now, you attempt to defend your owning one as saying it is legal as you are a hammie....merely another in along line of self-contradictions and talking out both sdes of your patooie. I like these "crumbs" you speak of, Dave..they assist in illustrating your portrait quite accurately.

>You really need to come to terms with this.<

Have a bib for that bird?.

> If the fact that you're a federal lawbreaker, is >not an issue with you then fine.

Well, it is with you then it isn't with you.
You have posted both in defense of your behavior and against it. A real head case.

>But also note that just because you choose to >thumb your nose at the government, and the >FCC, does not immunize you against criticism >from your peers,

Dave, I have news for you..you would be extremely hard-pressed to call anyone here your "peer" except the usual fewls, and you may now add Doc to it as well, he was feeling mighty froggy and felt like jumping and throwing punches from the dark, only he missed and the momentum spun him all the way around until he became dizzy and fell and bruised his ego.

> who may not share your anarchistic view of >radio hobbies.

Is that what bothers you? That you are in the minority? talk about morals.......

"Criticisms yes, harassment no. I don't know if it's happened to you, but I have received some dozen or so virus infected e mails form some of those "peers" on here, personally I think that's going way beyond just a conversation."

>Never from me, i have only sent 1 email to >someone in this group, but yet you publish >thing like report george to google, aol, >comcast, giganews why?
>I tell you why because you don;t like what I >have to say.

You do the same thing with your lies, boy George. You don't like what someone says or you disagree with their view, you take your attack to a personal level because you can't hold your own with an intelligent debate focusing on mere facts...you can't cite facts so you insult and flame...just like your loser frieneds.

>You can call me a troll perhaps I am but so >are you and dozens of others who are in this >group,

Yet another familiar trait of the trollup brigade (mostly Dave Hall and Lelnad's fave trick)..justify and downplay your own misdeeds by immediately pointing to another.

>yet I have once seen them admit to it.

Because your vision is skewered and in the minorty, as are your heathen friends.

>Again, your choice, as is others to break the >law and face it's consequences.

You guys are of no consequence..never have been...hence the term "i-m-p-o-t-e-n-t" being appropriated.

>Our choice to let the illegals know they are >breaking laws.

Has nothing to do with obeying rules or else connections to this group wouldn't be lost at such a comical rate by those who have cast such huge stones.

"The issues got blown out when certain individuals came into this group, started spouting the "Rules
& Regulations",
Yes the dreaded rules and regulations post
they knew when they did that it was now going to be nothing more than them
to troll the group, as
they are still doing to this very day."

>They may have did it to educate, you and your >band of loonies jumped all over Mark fuller >and anyone who dares speak out against >illegal radio.

I wasn't here when this other loser you speak of was your God, but I still am enamored over being elected to take his place by you and Lelnad and Hall and, gosh, now Doc.

"Yes you are correct we are left with a mess, but the rules (to which there are none in this group) have nothing to do with the "Trolls" that are in this group now causing the majority of the harassing, accusing, foul language posts that are put up here. "

>I wonder why Landwhale<

See,,,,you just can't help yourself.
Juvenile comes to mind.

>is so concerned about foul language and such >in this NG he had one of the foulest mouths in >the NG, wanna see some examples Mark?

Oh, so N3CVJ can claim he has "learned" since his days of posting his criminal endeavors for all to see, but it isn't ok for sharkie to clean up his language?
Thing is, N3CVJ DIDN'T learn, as he defended his ownership of an amp that HE said was illegal to own or sell. See, time is of the essence concerning his posts. He claimed he learned since those days....and very recently has posted that owning such an amp is illegal. But when confronted with his posts (which he laughingly claims he "gave" me, as all have seen him squirming uncomfortably trying to wish away his posts) he claims that it is now LEGAL. What a lying self-contradicting hypocritical hammie..no wonder you and Lelnad have taken such a fondness to him.

"Freedom of speech and the ability to express a dissenting opinion, really bothers you doesn't it?"

>Yes it does<

Then you should get the hell out and leave the country for those of us who cherish it and would die for your right to say it.

Cmon group. Why cant I get you to agree on an antenna? Obviously, my shop is not giving me good advice. So much for the new guy on the block. If you read through the threads of "SWR Advice" you will see that several of you recommended a Francis Whip on a gutter mount - this after I had an SWR problem with my K-40. Lets try this again. I have a 1995 GMC Conversion Van with a fiberglass raised roof. I have a Galaxy DX 959 with a D-104. I have a Texas star DX 400. What antenna does this NG reccomend? Cmon, you are experts.

Shouldn't be hard to figure out my email, so go ahead.
--
>He wants to have a copy of your return path<

Balderdash. But since you brought it up, and according to *you*, this
would be a problem only if he had somehing to hide.

>JJ, he doesn't converse with those he has >such disdain for

Sharkie is right, George, you, are a bonafide liar. I converse with
anyone that doesn't suffer from a communication deficit. You lend the
appearance of one who wishes to keep certain factors separated.

>why all of a sudden your an exception<

Don't be jealous.

>Jealous, don't flatter yourself oh twisted one<

I didn't..you flattered me..even inserting yourself into the equation
when no one was talking to you. Lelnad pleasures himself to such
behavior.

>be careful who you walk with...<

With the amount of pulled ISP's and the current peacefulness in here,
your warning is probably one of the most valid things you have ever out
forth..it even sounds like it's coming from one with that type personal
exerience...your warning assumes JJ guilty of something, otherwise, he
has nothing to fear....

>hmmm didnt you accuse JJ of losing Isp's >too,

Whatsamatter? When you said that one has nothing to worry about if they
are doing nothing wrong, you selectively applying that, we now see.

Anyway, that was Doc when he lied about his server being dead and why he
changed.

>why do you want a Hammies opinion of ?<

A more relevant question is why do you care?

>I thought you didn't like hammies <

That's what you get for attempting to think by yourself concerning another.

>twithed now all of a sudden you are asking >one for help? why not ask >out in the open?

Again, why do you care? The fact that I asked and he responded and you are the only one having a problem with it doesn't change the fact that you are a bonafide liar. It is why the mentioned louses by "aaron" of yourself, Lelnad, Hall, and Gilliland lend each other unconditional support and all lie..thanks for reminding me..that list should have included Doc down in Okie-dokahoma! As I said, it's amazing how this cb thing affects so many hammies on a deep personal level...hi hi!

>were m you have other motives and my >warning to JJ is just that you >are not to be trusted

And is as valid as the rest of your bullshit....personal attacks but no example of
what you claim......exactly liike my fan club church of Lelnad and Hall...vague references, personal opinion, false innuendo, deliberate misattributions and nothing more....nothing of substance...but you losers were pegged long before I came along, George. In addition, you having to warn anyone about anything illustrates your own arrogance in thinking that the person can not handle the situation on their own or without your input or suggestions, but you ought to know with the amount of doo doo on your treaded path.

>yes from all the shit you sling i do have doo >doo on my feet

I believe in returning things to their rightful owners.

Daev Hall N3CVJ said:
>To me, field day is nothing more than a >contest. I have no interest in
>contests, as do many other hams.

You had puh-lenty of interest in long distance communication at one time. You did the dx thing, made your long distant contacts, had your "fill" of it, claiming you became "bored after a while" with it, so you now begrudge all those who enjoy dx and contests just as you look down on those who freeband and/or dx or have amps or do ANY of the stuff that you did and continue to do.....merely but another perfect example in a long, long line of you finding fault with others for doing the exact same thing you did..and many other hams DO enjoy dx..stop looking to others for support..you need only seek as near as the closest cber for validation. If you deserved support from hammies you wouldn't always be looking for it. You're washed up and your tarnished reputation as a hammie is no one's fault but your own.

The rig and mic and such really don't make a difference.
Your K-40 was designed to work with a ground plane, which you haven't got.

There are still a lot of workable options.

You always want to get the antenna up in the clear, as much as possible.
You can't easily use a mag-mount, both because of nothing magnetic to mount
it to, and that you don't have the ground plane.

Marine antennas are designed for this sort of use, and are shorter than full
whips.
A full whip is still an option, bumper or ball mounted, but you compromise
it to the degree that it's covered by the body metal.

There are tuned loop antennas that don't need a ground, and are quite
effective and low profile, but they aren't off-the-shelf items.

In general, when you reduce the physical size of an antenna, you compromise
on something, gain and/or bandwidth usually.

Secret handshake....I had a good laugh over that one. Good
grief...Nothing has ever been secret about morse code. And the funny
part is we hams had nothing to do with implementing a code test. Also,
the license exams are not "know everything or else" types of tests.
They are just meager entrance exams. The usual ham learns much more
AFTER he gets a ticket, not before. Also, it takes many years to learn
all that can be learned about radio, or whatever else related to the
hobby. If thats even possible. I've been farting with this crap for 31
years, and I've still got a long way to go in order to even think I
might know all I need to know. The reality is most will never catch
up. Same with computers, and coding. I've done quite a bit of software
work in regard to flight sims over the years. If I drop out and rest
just for a few months, I fall so far behind the "envelope" that it's
hard to catch up again. The technology progresses that fast. It
progresses almost weekly. When I took my ham test, code was a non
issue. It was part of the test, and you learned it if you wanted a
ticket. Pretty simple really. If they drop the code test totally in
the future, fine. But until then, a 5 wpm test is required, and
whining about it here is not going to make it go away. Sheesh...It
wasn't long ago that 13 and 20 wpm were required. The code whiners
should count their blessings...To me, 5 wpm is no-code for all
practical purposes. It's too slow to be of much use on the air. :/

WA3MOJ came up with:
>Well I am pointing out a spade as a spade. <

Right on, but it has nothing to do with me.

>Ill ask again against my better judgement >since you are doing your
>best fred asatire.

And I will answer your question with integrity.

>What do you call people who sellmarket black >market amps,

How about...."Black market amp sellers"?

>who pay no taxes on I'll gotten gains, <

There you go off topic again letting your partiality obscure sense.

>who sell a product that is against federal laws. >A answer is what is
>needed not a song and dance.

Kind of how I felt when you failed to explain your erroneous comment
about how a Galaxy was reportedy (by you) illegal for a hammie to use on
ten meter.

>Compared to a storefront recognized dealer >that you can go to and not
>hide in the back alley to make a deal.

I made no such comparison, you did.
****
>No shit did I say you said that? your slip is >showing again.

Then why mention it?
And is there anything original you can mine?

>Abut buying from cb web page gurus online or >buying from a reputable
storefront who sells >FCC approved radios.
>If there is so much money to be made and >they are allowed to be sold
and used by hams, >why doesn't HRO or AES , Burkhardt, etc etc >or any
Big Ham dealer sell these radios?

Money? No one said anything of the such except you.
****
>No shit sherlock why do you sell something? >uh to make money,

You seem capable of providing your own answers to your own questions.

>Yes since you cannot I have to spell things out >for you, your usual MO
>is to twsit what is said >and you are doing a >fine job of that.

Spelling out is what Jerry apparently needs to do for you since you can't even comprehend what he writes. Matter of fact, the rest of can ignore you while you carry on a
conversation with yourself,

>Yes that is what is normally done<

Funny, Dave Hall did just that recently...talking to himself to give an illusion of helpfulness among all his hypocritical posts that caused his neck vein to bulge when his lies were shared, enjoyed and consumed by all.

>what do you care what please me?<

I don't.

>Answer the question Jr,<

I'm not JR.

>Didn't say you were JR, said you were Jr. your >lieing again.

As many typos as are usually in your posts, it wasn't a far-fetched mistake......adding on that..you are really stretching the envelope of originality, aintcha? (heehee)

Answer you WHAT? You didn't ask anything.

>I sure did go back and reread it<

I did. You said" Answer me this batman" but never actually asked a question.

>They are a front for the Xforce line of amps.<

Galaxy radios? Who conked you on the head?

>In fact Carriage
>Car@aol.com wash who used to post here >has become one of the owners.
>Amazing the info you find out in these CB >forums LOL

Why do you care? You appear at a loss of words, struggling for a response.

I find my pleasures not at the expense of others.
****
>Yes at your own hands right. Self gratification I >think they call that.

Gee, and keeping true to form, you lie like Dave Hall N3CVJ, your personal attacks and flames are of a sexual nature like Dogie NWWM AND Lelnad KC8LDO .....you really were hurt by my leaving your name out of my cb dog kennel. Let us look at Arrons infamous members.
So far we have Dave Hall N3CVJ who told us without inquiry of owning a cb hack shop with a sex pervert who he claimed is a good friend......we have Dogie N8WWM who has lost countless ISP's for flooding the group with sexually graphic porn spam, and we have Lelnad C Scott KC8LDO,, who

has made over 100 off-topic posts to this group concerning his fetish of handling younger men's jockstraps. Oh, and we now have Doc who was not only caught cowardly throwing punches from the dark, but lost his connection then had the temerity to lie about it.....none of y'all can ever get over yourselves..hahhahah!

Making inquiries of another man's underwear, shooting cbers, and insults about molesting children (such a matter is NO joke and one who would use such a topic as their choice of insult and flame troll bait is a scurvy degenerate) isn't exactly conducive to hammie radio.

Unfortunately, the bad elements are the ones that gain attention. It is the behavior exhibited such as this that is ruining hammie radio, and is of little wonder people such as this need another to point to for blame....."those garsh darn cbers make us degenerate lowlives call them all sorts of homo names cuz they deserve it fer braken laww". The fact that you have readily and vehemently defended all of the above when they have clearly been in the wrong, and are now beginning to make comments of a sexual nature yourself to another man....well, if it walks like a duck.....
It appears it isn''t cb and nocode status that this little fun group of yours has in common. Never could figure out why you and Hall would fall into Adair's and "Nad's nocode bullshit, but as of late it has become crystal clear.....each and everyone of you, and it appears ONLY limited to you losers named by arron, has a repeated fondess for cracks of a sexual nature. Deviant dogie adair came in here espusing such trash talk and you few took to him immediately...birds of a feather.

"Live and learn."
****
*
>Back to Movie trivia huh, it was "Live and let >die" James Bond Who sang the original theme >song?

Paul McCartney (I think).
Anyhooo...you are getting your posts confused again. I didn't say "Live and Learn".
He can use it on ssb
****
>He sure can, but that was never really even >mentioned.

Sure it was...by me in retort to your false claim that a hammie couldn't use it legally.
****
>he can't you just can accept that fact.

Still haven't checked that, huh?
That's cool. You're the only one on this group that believes that...guaranteed.

Yep it has, Mark. W5DXP and W5FQC were the only individuals in
Madisonville High School in the early 50's who knew Morse Code.
We used it quite often to send secret messages that our teachers
couldn't understand and hardly noticed. It was particularly useful
during exams and double dates.

Yes, in the military we called it AIT, or Advanced ID Technique.
Unfortunately, you'd need special equipment to "read" the electronic
fingerprint of each individual radio, then also some way to store that
information on file. This is just a little more unwieldy than using a
digital code.

Tom

manareyouafishhead,
You have two choices, keep using the dummy load, or find
an aternative antenna to an outside one. Of the two, finding
another antenna seems the 'best' way to go.
There are a number of options still open to you. One is to
use an antenna indoors. Another is to stick one out of a window
when in use, bring it back in when not in use. And almost any
thing your imagination can think up (within reason).
So, now it's up to you to decide what you can do (or get away
with).

: Cmon group. Why cant I get you to agree on an antenna? Obviously, my
shop is
: not giving me good advice. So much for the new guy on the block. If you
read
: through the threads of "SWR Advice" you will see that several of you
: recommended a Francis Whip on a gutter mount - this after I had an SWR
problem
: with my K-40. Lets try this again. I have a 1995 GMC Conversion Van with
a
: fiberglass raised roof. I have a Galaxy DX 959 with a D-104. I have a
Texas
: star DX 400. What antenna does this NG reccomend? Cmon, you are
experts.

I gave you an antenna option that will handle the power and be of least problems a 102" whip or similar antenna monted on a ball mount with a spring you will need the spring for the 102 whip, the ball mount can be mounted to the side of vehicle, preferably the back corner either side, you can mount the mount as high as you want your antenna to stick out over your roof, it will provide a good ground plane since it is attached to the vehicle and wil be somewhat directional to the front of vehicle or the area towards where the most metal is. Radio Shck ball mounts work fine, put any type of antenna on it the taller the better. Does the van have a ladder on back? This is also an option.

Hmm... Good idea. I didn't want to hack apart the existing antenna in hopes that it helps, but I guess a piece of coathanger wire would work well enough for a test piece.

:
: >Bullshit, you are looking to silence anyone >who is against Legal
: radio,
:
:
:
: Stop right there.

No you stop right there oh twisted One

: This has never been indicative of anyone here
Just because you say so twityhed doesn't make it true.

:except

always an exception isn't there.

: you girls and your lies

Oh what is this oh twisted one you claim others throw insults well look at
you mad hatter you are no better than those you carry a grudge agaisnt

:don't make it so.

Oh truer words were never spoken just because you say it doesn't ,make it
so.

: You and the other playpen clowns

Oh there you go again with the insults should you be taken with any
credibility if this is what you resort to

>never have a single example,

correct we had numerous examples thanks for pointing that out

> just multitudes of repeated tired old insults and generalities and
accusations,

Yes i see that is what you have resorted to insults and name calling. what a
hypocrite.

:but you are very quick

Yes i have been told.

> to attempt to perpetuate against another what you cry is unfairly,

yes you know exactly what you are doing crying about others and doing the same thing again... Hypocrite and Liar are a few names that come to mind when I think of you.

albeit falsely, being done to you.

what is falsley being done ? your efforts to contact ISP'

: >you don't turn others in for the same infractions hence the label of
: "Hypocrite" is >applied.
:
:
: Such as been done with several "hammies' lately..Dave Hall lied about
: everything and still is.....

> here is a criminal telling another they are breaking the law.

He may "have" been a criminal in the past, does that mean he still is? Perhaps he has seen the light maybe you should too.

> How much credibility do you actually think that carries?

What all your Lies? and hypocritical statements.

>Paul Lalli lied and said his server was down when it was proved otherwise.

who is Paul lalli? and how was it proved just because you say it doesn't make it so.

>As a matter of fact,

You don't speak any fact twity don't even go there

: N3CVJ, the Hypocrite Hall opened with:
: >Whether you like it or not, agree with it or not, >enjoy it or disdain
: it, operating a radio outside >the legal limits set forth in part 95, is
: a >violation of federal radio regulations.

Good sound advise on his part.

: So is owning an M200 according to you. Then, in a separate post, you
: claim it is an illegal amp marketed at cbers. Now, you attempt to defend
: your owning one as saying it is legal as you are a hammie....merely
: another in along line of self-contradictions and talking out both sdes
: of your patooie. I like these "crumbs" you speak of, Dave..they assist
: in illustrating your portrait quite accurately.

: "Criticisms yes, harassment no. I don't know if it's happened to you,
: but I have received some dozen or so virus infected e mails form some of
: those "peers" on here, personally I think that's going way beyond just a
: conversation."
:
:
: >Never from me, i have only sent 1 email to >someone in this group, but
: yet you publish >thing like report george to google, aol, >comcast,
: giganews why?

: >I tell you why because you don;t like what I >have to say.
:
:
:
:
:
: You do the same thing with your lies, boy George. You don't like what
: someone says or you disagree with their view, you take your attack to a
: personal level because you can't hold your own with an intelligent
: debate focusing on mere facts...you can't cite facts so you insult and
: flame...just like your loser frieneds.

Listen to twisty croon as he hurls insults at those he claims do it ... a
real American Hypocrite.
Twisty i only cite facts, just because the facts are those that you don't
agree with them has nothing to do with it being a lie. That word is your
favorite when your getting spanked you throw it around like the boy who
cried wolf.

: Yet another familiar trait of the trollup brigade (mostly Dave Hall and
: Lelnad's fave trick)..justify and downplay your own misdeeds by
: immediately pointing to another.

truth hurts huh twithed.

: >yet I have once seen them admit to it.

: Because your vision is skewered

No I see you for the fool that you are I have perfect vision.

and in the minorty, as are your heathen friends.

more twisty useless drivel
:
:
:
: >Again, your choice, as is others to break the >law and face it's
: consequences.
:
:
:
: You guys are of no consequence..never have been...hence the term
: "i-m-p-o-t-e-n-t" being appropriated.

Just because you say it twisty doesn't make it so, you have a fetish with
impotency I see. Are you on meds for it?

: >Our choice to let the illegals know they are >breaking laws.

: Has nothing to do with obeying rules or else connections to this group
: wouldn't be lost at such a comical rate by those who have cast such huge
: stones.
:

:
:
:
: "The issues got blown out when certain individuals came into this group,
: started spouting the "Rules
: & Regulations",
: Yes the dreaded rules and regulations post
: they knew when they did that it was now going to be nothing more than
: them
: to troll the group, as
: they are still doing to this very day."
:
:
: >They may have did it to educate, you and your >band of loonies jumped
: all over Mark fuller >and anyone who dares speak out against >illegal
: radio.
:
:
:
:
: I wasn't here when this other loser you speak of was your God, but I
: still am enamored over being elected to take his place by you and Lelnad
: and Hall and, gosh, now Doc.

More insults and lies... hypocrite

: >I wonder why Landwhale<

: Juvenile comes to mind.

Yes, I was thinking that as well, perhaps why I called you Jr, you simply
havent grown up or perhaps you did and you are retarted, you claim others
insult people then you do the whole post makes you wonder what is in the
water down there.

:
: >is so concerned about foul language and such >in this NG he had one of
: the foulest mouths in >the NG, wanna see some examples Mark?
:
:
:
: Oh, so N3CVJ can claim he has "learned" since his days of posting his
: criminal endeavors for all to see, but it isn't ok for sharkie to clean
: up his language?

Well according to you what Dave Hall did before should be held agaisnt him
now, which set of rules is it this time .... Jesus friggin Christ Twisty
YOU ARE A
HYPOCRITE!!!
!!!!!!!!!

: Thing is, N3CVJ DIDN'T learn,

just because you say it doesnt make it so

: He claimed he learned since those days....

And I beleive he has as much as landwhale has so which set of rules is it I will ask again. the Hypocrite from Florida rules?

: "Freedom of speech and the ability to express a dissenting opinion,
: really bothers you doesn't it?"
:
:
:
: >Yes it does<

: Then you should get the hell out and leave the country for those of us
: who cherish it and would die for your right to say it.

Wasn't talking about me snapperhead butyou knew that it is just another feeble attempt by you to snip my post and try and change the meaning. If you post the rest that you cut you will see I am not talking about me, you know that, it is just another twisty trick went bad

Also, if a hanger wire won't fit into the top of the coil, you can get a
short piece of wire from Home
Depot that will fit without "boogering" up the hole .

A guy walks into a bar, goes up to the bartender & says, "Give me a shot of whiskey & keep them coming. I just heard some bad news and I need to get drunk."

The bartender says, "What's the problem?"

The guy says, "I just found out that my older brother is gay."

The bartender says, "no problem," and sets him up until he gets toasted.

A few nights later, the same guy walks into the same bar & says, "Keep 'em coming, I got more bad news and I need to get drunk."

The bartender says, "What's the matter now?"

The guy says, "I just found out that my younger brother is gay."

The bartender hooks him up until he gets wasted.

A few nights later, the guy walks in again. "Keep 'em coming, I need to get drunk."

"What's the matter now?" asks the bartender.

"My mom caught my dad in bed with another man," replies the guy.

The bartender keeps the booze flowing.

A few nights later still, the guy straggles in. "You know the drill, keep 'em coming," he tells the bartender.

The bartender asks, "Look man, doesn't anyone in your family like women?"

The guy replies, "Yeah, my sister does."

Good point. In that case, one possibility might be a bad ground at the radio and the whole case might be hot as the ground at the antenna end could be well bonded to the frame of the vehicle.

Music wire (stainless steel) can be had from most hobby shops.
Don't cut it with wire cutters though, you'll break them.
Score with a file, then bend and snap.

To learn the technical TRUTH about CB Radio without all the hype from people who are just plain ignorant, check out the following books from CBC International. They're selling right now at a big discounts on our EBAY & AMAZON stores too.

Check it out! Go to this link:

http://cgi6.ebay.com/aw-cgi/eBayISAPI.dll?ViewSellersOtherItems&userid=lou@cbcintl.com&completed=0&sort=3&since=-1&include=0&page=1&rows=25

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out & Repairing CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB repairs & modifications. Covers peaking of receivers, transmitters, modulation, mike problems, antenna & SWR problems, detailed frequency modifications for both crystal & PLL radios. Loaded with charts, illustrations, and specific instructions for most brands including the new export models. This latest edition also covers slider and broadbanding tricks, FM conversions, and much more!

BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms. How they work, and how to modify them for many more channels. Includes specific PLL block mixing diagrams, truth charts, & IC pin function diagrams for nearly every PLL chip ever used. Covers all the most popular U.S. & export chassis, with specific listings of all models using the chip.

BOOK #3: UNDERSTANDING & REPAIRING CB RADIOS. List $42. Giant 370-page technical book for the professional repairman. Picks up where the "SCREWDRIVER EXPERT'S" GUIDE leaves off. Includes circuit descriptions & troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. Covers test equipment (& where to find it), transistor basics, synthesizers, receivers, transmitters, power supplies, T/R switching, antennas, interference, parts & accessory sources. Over 350 illustrations including schematics, charts, and photos. Huge subject index also lets you look up repairs by symptoms. This is "must" reading for any serious CB technician!

Christ, just go with a 1/4 wave stainless steel whip. It'll handle
any power you're likely to run into it, and if you mount it properly,
it'll be grounded to the frame, eliminating most of your RF feedback
problems.

How to tell when RF is in the shack...
1. The light switches on.
2. The floor starts to slowly rotate.
3. You get a warm feeling... from the inside.
4. As the light goes off, you hear a "ting" sound.
4. After that sound, the door opens and the
light goes on again.

;~)

More likely it will drive people away.

Obviously, some people still believe that all CBers are just
"Ham wannabees".
Let's make this clear for them...

NOT ALL CBers WANT TO BE AMATEURS.

And who will be driven away... those who use it for just "yakkin".
Do they really think that the truckers are interested in theories? They
just want to talk.

Start putting in extra requirements, fees to fulfill those requirements,
licence fees, etc... and you will just drive more people away from CB.

Regards,

Peter.

A few years back, the Radiocommunications Agency stopped making UK CB licences available in "Post Offices" across the country. They said that this cost too much, so they moved it to one central postal request address... SSL (Subscription Services Limited, still part of the Post Office).
That made matters worse... I wonder how many UK CBers know where they can get the licence from, or even that they need one?

The number of licence sales is now so low, that they are considering scrapping it.

Regards,

Peter.

news:arjcdb01cht@enews4.newsguy.com...
> Here's what I'd like to see happen with the "CB" band. With the technology
> we have today, I'd like to see everyone get their license again.

Unless there are enough people willing to pay for something that has been
free for many years, the costs will be higher than the income.
Should the tax payer fund CB use?

> Built into every radio (and non-modifiable) should
> be a unit which broadcasts your call sign with each
> key. Not audible to us, maybe on a different frequency
> or very high beyond our ear's ability to hear.

I see a few problems...
1. Cost of radio. The cost of CBs would go up.
2. Admin. All radios would need to be registered. Departments
would need to be set up specifically to deal with codes and
registration of each radio. Each radio would need a document,
like a vehicle has, which is sent off to re-register the radio to
a new owner if sold.
3. Cost of admin. How much would this cost... whole departments
with staff there just to register every single CB in the country?
Who pays for this... the tax payer?
4. Old radios. Look at how old some of the radios out there are. It
would be at least 20 years before the system was much use.
4. Hacking. Let's face it, the FCC thought that the BCD PLLs were
"unmodifiable"... and even the UK ones are got around easily. There
will be hackers, getting into the systems and changing codes or
deleting
them. A CB not transmitting a code would have to be assumed to be
an old one.
4. Enforcement. How do you check that every radio is with it's
registered
owner, every radio has the correct code, every radio made after a
certain date still sends it's code?
You would need to approach it like with vehicles, random checks by
officers. Imagine it, police turning up at your door, pointing guns
at
you, "Please step out from the house. Show us your CB documents.".

Who would pick up the costs of all this admin and enforcement... the tax
payer?

> simple computers could pick up
> the codes, record the transmission, and store them for a short period of

> time, then without complaints...they could be overwritten.

Have you considered the size of such a job... monitoring all CB transmissions in America?
Who would pick up the costs of such a mammoth task... the tax payer?

If you think that CBers would be willing to pay a licence fee that would cover all that "big brother" activity... you are mistaken. If they were willing to pay just a small fee, the licence would not have been dropped in the first place.

Regards,

Peter.

> There's no Utopian answer. A licensing fee however might help fund
> increased enforcement.

It has not brought enforcement over here.
You only have to look back through the "bust" figures. Even back in the
80s, when CB was doing well here, out of 100s of thousands breaking CB rules
(very few were totally legal), the "bust" figure was not in the 5 or 6 digit
figures... think two digits - 20 to 30 per year.
If CBers complained about abuse, it was ignored.

Governments are great at taking your money for one service... then spending
it elsewhere. We have to pay high "road tax" charges for cars, yet the
roads are in a mess and we are being threatened with "tolls" for using the
roads that we have already paid to maintain. They want to tax us for the
roads, then charge us again when we actually use them.

Regards,

Peter.

What about those who do not want to become Amateurs?

> It would also give
> Them the power to police Their own bands and have some recourse against
> quarmers and CB misfits .

Do Amateurs police their own band?
So, what was all that about Amateurs being busted for abusing radio
services.

> As for 11 mtrs , Let em have it . A CB plus license would set a whole new
> standard amongst CBers that honestly want to have decent and meaningful
> conversations on the air.

So, to have a "meaningful conversation", one has to have an understanding of
electronics and RF?
Anyone who does not understand these things is incapable of holding a
"meaningful conversation"... and CB should be restricted to technical
messages only... right?

It seems that you are trying to turn CB into another Amateur service. Those
who want such things will turn to Amateur for them, those who use CB are
just wanting to chat. Some use both, each for it's purpose.
Would you want to see CB disappear into Amateur radio, with the general
(non-technical) public being banned from using it?

Regards,

Peter.

Just a point of clarification; 40 channel radios did not appear until
Jan. 1st, 1977, so it's not quite as old as 1973.....

That may be the case to you and a few others. But there are also those who can't seem to understand that taking a stand against something (ironically, in this case, breaking the law) is not a TOS violation, yet they seem to use that as some sort of threat to silence those who stand up to this nonesense.

> Also Aaron is just a made up persona so someone can
> troll this group.

That may be a popular opinion, but there is no proof that this is the case.

> You can't lose your ISP unless there
> is proof that you did some thing wrong, just like
> with the FCC.

Which is exactly why it was important for Twisty to somehow "prove" that I am using a different ISP, which would lend some credibility to his (However warped) opinion, that denouncing illegal activities is somehow a violation of ISP TOS. But since I am using the same ISP, I guess I haven't done anything wrong ;)

> So if someone lost there ISP, well
> they violated the ISP TOS and lost their account,
> not because they were pro illegal or pro legal.

Yes, that should be the case. But there are some who attempt to take it further. Maybe they share a different opinion on what is considered "spam", and what is considered "trolling"

>

> Criticisms yes, harassment no.

I've never "harassed" anyone. I don't recall Frank, or Aaron or any of
the more vocal opponents of illegal operations, "harassing" anyone
either. Most of the SPAM, and foul messages were posted from an
anonymous source. Many have blamed people like Doug and George for these
messages. But there is really no concrete proof of this either. If one
wished to be anonymous, it's not too hard to take advantage of anonymous
remailers or other tricks.

> I don't know if it's
> happened to you, but I have received some dozen

I would agree. I've only received a few E-mail messages of a "FYI"
nature. Nothing with any viruses in them.

>

> they are still doing to this very day.

A lot revolves around the definition of "trolling". The classic
definition, that I've known for years, was that a troll starts a flame
war for no other reason then entertainment value. I'm not so sure that
those committed to operating within the law, are deliberately "trolling"
for solely entertainment. I truly believe that many of the "pro legal"
side genuinely believe in what they say, and are also equally bothered
that so many people seem to take a cavalier attitude when defying the
law. Many will continue to push on, hoping that either one of two things
will happen; A. that their words will sink in and cause some to rethink
their actions. Or B. that illegals get so frustrated with the fight,
that they leave.
The difference between a cause and trolling is a matter of perspective I
guess.

>

> that are put up here.

I can't say who started what, and who is responsible for which foul
messages and harassment. All I can say is that I stand on my principles,
and will offer up my perspective, as I see it. As always, anyone is free
to disagree, and offer up counterpoints. I do find the efforts of those
who twist words and deliberately obfuscate meanings, to be somewhat
entertaining, and disproportionately consumptive on their parts,
considering the the actual relevance this newsgroup has on the real
world, and indicative of some serious mental issues. But I guess one has
to expect that from a hobby that attracts people from all walks of life.

I would call that childish, and sophomoric, and a sign of someone with
an inability to rationally discuss a topic.

> > > The only way this group

>
> Why yes it does, so just the mere discussion of amps
> or export radio's is now wrong to talk about?

No, not at all. There is nothing wrong with discussing aspects of radio
that would be illegal on CB, if put into practice. But there's a
difference between discussing illegal aspects, and actively promoting in
a positive light.

>

I may be wrong then, but I once read that the "Rec" groups on usenet
were not to be used for any activities that were illegal. That's why
most of the bizzare and questionable subjects full under the "alt"
groups. Yes, even on the "rec" groups, there will be times that an
illegal topic comes up. But it's not to be the main focus of the group.
Plus, I don't know who has responsibility to make sure that all the
groups are conforming.

I agree that being a newsgroup moderator is not a fun job. Besides being
a lot of work, you will ultimately be accused of bias from the first

person who's messages were deleted, which will then call into question the moderator's objectivity when applying the group charter and policy. I used to be a SYSOP of a dial up BBS, 10 years ago, before the internet took off, and I had to deal with these issues then. It's not fun.

just because a bunch of cb'ers have a newsgroup access doesnt make them
experts. you have to do what we've done over the years and thats to try and
test different antennas for yourself and see which works best in your
situation. if you have a metal roof i reccomend a wilson 5000

I never said you did, nor do I think you do.

>I don't recall Frank, or Aaron or any of the more vocal >opponents of
illegal operations, "harassing" anyone
> either.

Well again selective reading I guess. As for Frank, no
he doesn't really harass others, but Aaron is trolling as
is 1 or 2 others.
Question: If Twistedhed responded to practically
everyone of your posts, called you names, accused
you of almost everything you could think, used foul,
language what would you call that?

>Most of the SPAM, and foul messages were posted from an
> anonymous source. Many have blamed people like Doug >and George for these
messages.

Well Dave this again you are being selective on what you
read. Practically every message to me by one of those
people uses obscenities. As for Doug, the proofs been
there for a long time, you just don't want to admit it I
guess, but each to his own.

> But there is really no concrete proof of this either. If one

>

Agreed, when using anonomous remailers. But do a Dejanews
search on "Snapperhead" in Rec.Radio.Cb only and see what
you come up with.

> > I don't know if it's

>
> >

There was on day that Norton caught it some 9 times
trying to be sent to me. I forwarded it to Yahoo and
the account was closed, at least for mail purposes.

>hey do things the wrong way. It's one thing to

That's one definition, another is to continue to fan the
flames. What if I showed you one person was on here
praising me, Tim, Mopar and others and the use of linears, then all of a
sudden, it now wrong.

> truly believe that many of the "pro legal"
> side genuinely believe in what they say, and are also equally bothered

>
> >

Agreed. But lets face it, some that are trolling here and
yes they are trolling, started out with maybe good intentions,
but have found it more fun to be a troll. Doug even said at
the begining, he could flame with the best, so he's a troll
among a couple of others.

> > > You can't expect to make a case for following some rules,

> difference between discussing illegal aspects, and actively promoting in
> a positive light.
>

You didn't see the post a month or so back when someone
was asking about an antenna. It was suggested to get a
Wilson 5000 over the K40 because it could take more
watts. Immediately a couple of those people started throwing
out accusations about people corrupting them into buying
linears, because why would someone need an antenna
that takes that many watts.

Hello all

Bit of help needed please, I am going to buy a new rig for when I am out in Florida next month but I am not sure what I need.

I was thinking of a small Cobra but it doesnt appear to have ssb, do I need ssb?

Can someone please help, thank you.

Kind Regards

Stuart

"Twistedhed" <twistedhed@webtv.net> wrote in message
news:3275-3DE28F93-902@storefull- >Bullshit, you are looking to silence
anyone >who is against Legal radio,

Stop right there.

>No you stop right there oh twisted One

Truth has always been your enemy.... to be snipped and clipped by you,
but never works.
This has never been indicative of anyone here

>Just because you say so twityhed doesn't >make it true.

I didn't say it, YOU did..YOU claimed people here try to silence legal
advocation of radio but as always, can't cite anything,,,anything at all
to back what YOU say. Now, before you get confused and bedeviled again,
try and remember what you say..reminding you of it is akin to schooling
hammies like yourself and Lelnad and Hall and Doc on the finer merits of
the art of communication, for which you have all demonstrated a
preponderance of failure at....none of you were ever taught what
etiquette is let alone how to dispense it and mind your own P's and Q's.
Much of it can be attributed to y'alls upbringing, or lack of.

except
you girls and your lies

>Oh what is this oh twisted one you claim >others throw insults

It's not a claim..it's the bare truth.

>well look at you mad hatter<

I don't get mad at artificial worlds and I certainly don't wear a
hat...I have a complete thick head of hair....185 pounds of twisted
steel and sex appeal, but then again, that may be what attracts you and
Hall and Lelnad to me like a moth to flame...y'all share a divine
penchant for same-sex satiations and comments concerning strangers based
on their cb views...hahah..talk about twisted!!!

> you are no better than those you carry a >grudge agaisnt

I carry no grudge......anything from me is return fire from you losers
that drew first blood. Always has been, always will be.

>Oh truer words were never spoken <

Exactly.

>just because you say it doesn't ,make it so. <

Correct..that's why I always manage to support my posts with proof,,such as the ones where Doc lied...Hall lied, Lelnad forged and lied, you lie.....I say again...amazing what this lil ol cb thing can do in the manner of causing catastrophic psychological breakdowns in poor azzed hammies like yourself and those named who no one will asscociate or claim.

Again,,,,,,the entire truth.
You and the other playpen clowns

>Oh there you go again with the insults <

The insults are all return. I have never done a single thing to anyone in here, the wellknown cowards of yourself and Hall and Doc and Lelnad included. I say again, if you can't take it, don't dish it out. You sound like a woman with your whining.

>should you be taken with any credibility if this >is what you resort to

Hhahaha..what I "resort" to is whupping your azzes with your own game. You gys had no clue the rock you were overturning..like usenet..you can't take it back (roaring with laughter)!

>correct we had numerous examples thanks for >pointing that out

You're welcome..but pointing such things out takes no real effort....you shuold thank those that made the posts that self-contradict...toh, wait a sec..you already DO talk to yourself...so does Hall..hhhahahah!

You hurl multitudes of repeated tired old insults and generalities and accusations,

>Yes i see that is what you have resorted to >insults and name calling. what a hypocrite.

Return fire and it is burning you fast.
You are very quick
to attempt to perpetuate against another what you cry is unfairly,

>yes you know exactly what you are doing

Sure I do. Wrapping you up and presenting you giftwrapped and there ain't a damn single thing you or your impotent clowns can do about it....yuk yuk yuk!!!

>crying about others and doing the same thing >again...

Poor boy George...really reaching aren't you, girl? Hypocrite and Liar are a few names that come to mind when I think of you, Lelnad and Hall and Doc.

>what is falsley being done ? <

Your same old same old lies concerning personal untruths of whoevers view you disagree with.

>your efforts to contact ISP' <

.worked very well,,,thankyouverymuch! In addition, you are the only one crying about it for the fifth day in a row, great to know it really struck a nerve with you. I'll keep it up whenever I can.

>you don't turn others in for the same >infractions hence the label of

I don't turn anyone in who doesn't harass me. AS sharkie noted, if your losers would obey the rules of their ISP, whatever I complain about is irrrelevant..hahhahahhaha! Poor Boy George.

"Hypocrite" is applied...such as been done with several "hammies' lately..Dave Hall lied about everything and still is.....
here is a criminal telling another they are breaking the law.

>He may "have" been a criminal in the past, >does that mean he still is?

Sure he is..a liar too.

>Perhaps he has seen the light maybe you >should too.

Then he wouldn't be defending amps he claimed were illegal only 2 weeks ago, but, alas, he did, so your attempt at lawyering for him is null. How much credibility do you actually think that carries?

>What all your Lies? and hypocritical >statements.

Hall's self-contradictions. The contingency has noted he talks out both sides of his azz/mouth without any assistance from me or you.
Paul Lalli lied and said his server was down when it was proved otherwise.

>who is Paul lalli? and how was it proved just >because you say it doesn't make it so.

Paul is Doc.......you are correct....it doesn't matter what I say,,
Paul is the one that said the server was down (need to see it again?)....after all, how could he know I am in contact with someone around the corner from him? See,,I have hammie friends all around...it's exactly how Lelnad was caught trying to pathetically be heard on the freeband jamming me..how else do you think we know he has his call on his plate? Hammies hammies everywhere and nuthin' you can do about it!!
Anyways, it was an honest mistake on Doc's behalf, but was borne of a malicious and intentional lie. It was very easy to show he is a lying sob just like you and Lelnad and Hall....hahahaha..it was PAULS word that was a lie,,,,,,I just happened to show it with an email that his server works just fine..what I say doesn't matter at all..the proof is in the email.
Now go lay down again and try to stop drooling on my shoe.
As a matter of fact,

>You don't speak any fact twity don't even go >there

Lost ISP;s..fact. Doc lied. Fact. Hall lied. Fact. Lelnad forged and lied. Fact. It isn;t what I say, Boy Georgey, their own posts haunt

them..yet you fewls continue to try and attack the messenger for pointing out your self-contradictory posts..and lies. It's all y'all can do, cause you GOT nuthin' else.
You and the nad man and Hall are bonafide liars and parasites to hammie radio. All facts.
You can sit here and fill the group with your hate that consumes all 3 of you and comment and flame me all you want.....it changes nothing concerning your own actions.

N3CVJ, the Hypocrite Hall opened with:
>Whether you like it or not, agree with it or not, >enjoy it or disdain >it, operating a radio outside the legal limits set >forth in part 95, is a violation of federal radio >regulations.

>Good sound advise on his part.

So is owning an M200 according to you. Then, in a separate post, you claim it is an illegal amp marketed at cbers. Now, you attempt to defend your owning one as saying it is legal as you are a hammie....merely another in along line of self-contradictions and talking out both sdes of your patooie. I like these "crumbs" you speak of, Dave..they assist in illustrating your portrait quite accurately.

Whassamatter BOY GEORGEY?
Is it illegal or isn't it? You can't even give a straight answer concerning Galaxy ownership because of your ignorance in hammie education, how could I possibly expect you to know if Dave HaLL n3cvj's Davemade is legal.
Owwwww..I feel goooood!

"Criticisms yes, harassment no. I don't know if it's happened to you, but I have received some dozen or so virus infected e mails form some of those "peers" on here, personally I think that's going way beyond just a conversation."

>Never from me, i have only sent 1 email to >someone in this group, but >yet you publish thing like report george to >google, aol, comcast, giganews why?
>I tell you why because you don;t like what I >have to say.

You do the same thing with your lies, boy George. You don't like what someone says or you disagree with their view, you take your attack to a personal level because you can't hold your own with an intelligent debate focusing on mere facts...you can't cite facts so you insult and flame...just like your loser frieneds.

>Listen to twisty croon as he hurls insults at >those he claims do it .

Claim? No my son,,,it is no claim..it is a plain simple facts backed by y'alls posts....it's why I love usenet..you girls can't take it back.

>. a
>real American Hypocrite.

Cool sig........maybe I'll attach it to your call.

>Twisty i only cite facts,<

Facts are true statements backed by proof. You have never ever put forth anything but your miserable personal problems...nothing more. ...all vague bullshit from the bullshit meister of rec.radio.cb..hahhahahha! Just your personal feelings and insults. Over 2 years ago I made the correct observation that certain hammies were unable to separate their emotions from logic and you and Nad and Hall epitomize this handicap among those who are allegedly licensed for that of which they possess the greatest deficit.

> and just because the facts are those that you >don't agree with them has nothing to do with it >being a lie.

You have no facts, boy George...everyone knows you are washed up and tired...hell, most don't even read your posts, evidenced by your excessive morphing......you have a serious comprehension deficit and attention problem that clamors for notice...acccording to Hall, this behavior stems from your childhood.

> That word is your favorite when your getting >spanked you throw it around like the boy who >cried wolf.

Gee, Boy George, ...you appear angry.
Don't worry, we won't take your big red bow off your head yet.
Yet another familiar trait of the trollup brigade (mostly Dave Hall and Lelnad's fave trick)..justify and downplay your own misdeeds by immediately pointing to another.

>truth hurts huh twithed.<

It must..you're howling like a coon dog.

>yet I have once seen them admit to it. <

Because your vision is skewered and they muzt be caught in a lie as you losers admit nothing.

>No I see you for the fool that you are I have >perfect vision.

Really? Extend it to your spellcheck so you don't appear as a juvenile with ADD, Parkinsons, and Tourettes Syndrome.

>Again, your choice, as is others to break the >law and face it's >consequences.

You guys are of no consequence..never have been...hence the term "i-m-p-o-t-e-n-t" being appropriated.

>Just because you say it twisty doesn't make it >so,

Oh? And what "consequence" do you speak of? Hhahahahahahahahha...boy George...you have no consequences..you are i-m-p-o-t-e-n-t as Lelnad .

> you have a fetish with impotency I see.

I thought you said you had clear vision....the "fetish" is with Lelnad KCLDO and his posts concerning younger men's underwear.
Laughing at your impotency does not constitute a fetish...as another matter of fact, there would be nothing to laugh about if you girls had a clue or were effective in any of your endeavors, but seeing how y'all are magnificent failures at hammies and human beings,,,,,,,it makes it all worth while to watch you dogs squirm on the floor.

>Are you on meds for it?

You claimed "consequences" for us......failing to produce as usual, highlights the impotency I speak of.

>Our choice to let the illegals know they are >breaking laws.

Has nothing to do with obeying rules or else
connections to this group wouldn't be lost at such a comical rate by those who have cast such huge stones.
Hhahaha..read it again, Boy Georgey.

"The issues got blown out when certain individuals came into this group, started spouting the "Rules
& Regulations",

Yes the dreaded rules and regulations post they knew when they did that it was now going to be nothing more than them
to troll the group, as
they are still doing to this very day."

>They may have did it to educate, you and your >band of loonies jumped >all over Mark fuller and anyone who dares >speak out against illegal radio.

I wasn't here when this other loser you speak of was your God, but I still am enamored over being elected to take his place by you and Lelnad and Hall and, gosh, now Doc.

>More insults and lies... hypocrite<

No really,,,,,everyone knows how ya' losers gravitated toward me..I certainly didn't go looking for you girls.....y'all came to me.....as always..I just sit back and relax and y'all do it to yourselves oh so much better than anyone else ever could :)

>I wonder why Landwhale<

There you go again.....insults for no reason other than you don't like what he says.
Juvenile comes to mind.

>Yes, I was thinking that as well,<

So what are you saying? It's the Tourettes, again?

> perhaps why I called you Jr, you simply >havent grown up or perhaps you did and you >are retarted,

Oooo, dat hoit, Boyy Georgey wa3moj.
Check your spell check, Boy wonder.

.
> you claim others insult people then you do <

>Return fire. Can't take the heat get out of the >kitchen, boy Georgey
wa3moj.

>the whole post makes you wonder what is in >the water down there.

Making you wonder is no feat.

>is so concerned about foul language and such >in this NG he had one of
>the foulest mouths in the NG, wanna see >some examples Mark?

Oh, so N3CVJ can claim he has "learned" since his days of posting his
criminal endeavors for all to see, but it isn't ok for sharkie to clean
up his language?

>Well according to you what Dave Hall did >before should be held agaisnt
him now,

I said nothing of the sort. That is 5 false attributions you attempted
but failed with in this thread, but poor boy Goigey couldn't produce
anything but words.....nothing..nada..not one iota of anything that
can back any of your lies.
hahahahhhaaha!.

> which set of rules is it this time ..... Jesus >friggin Christ
Twisty YOU ARE A
>HYPOCRITE!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
>!!!!!!!!!!

Then show something of substance instead of crying crocodile tears to
usand howling ike a school marm.

Thing is, N3CVJ DIDN'T learn,

>just because you say it doesnt make it so<

Sure it does...especially when Dave Hall said it himself.He claimed he
learned since those days but self-contradicts his own posts from two
weeks ago..complete and polar opposite of what he posted a mere two
weeks ago,,this makes him a liar, con man, lawbreaker, and of cource,
your fave....a hypocrite.
...

>And I beleive he has as much as landwhale

As much WHAT?
Since I have been around, sharkie has done nothing to anyof you but
return the bulshit from whence it came. He is to be commended for not
laying down and taking your bullshit and stuffing it right back down
your sorry throats.

>has so which set of rules is it I will ask again.

Ask what?

>the Hypocrite from Florida rules?

Oh, there is no hypocrisy. I make no bones about dxing and freebanding boy Georgey. Unlike you girls, I have no reason to hide my actions or words.

"Freedom of speech and the ability to express a dissenting opinion, really bothers you doesn't it?"

>Yes it does<

Then you should get the hell out and leave the country for those of us who cherish it and would die for your right to say it.

>Wasn't talking about me snapperhead <

Sure it was...YOU said it.

>butyou knew that it is just another feeble >attempt by you to snip my post and try and >change the meaning.

Look at the posts again, boy Georgey..you are the guilty "snipper" head, not I...ahahahahaha!.

>If you post the rest that you cut you will see I >am not talking about me, you know that, it is >just another twisty trick went bad

Read it again...you said it, I just pointed it out..unlike you, I need not make up anything..merely use y'alls own posts to consistently and constantly remind newbies that the members of AArons pets are not to be trusted. Y'all made your own bed and now you are forced (as in have no choice) to lay in it and stink.

just because a bunch of cb'ers have a newsgroup access doesnt make them experts. you have to do what we've done over the years and thats to try and test different antennas for yourself and see which works best in your situation. if you have a metal roof i reccomend a wilson 5000

>I have a Galaxy DX 959 with a D-104. I have a >Texas star DX 400. What antenna does this >NG reccomend? Cmon, you are experts.

That is a great match.

An opinion poll is not evidence. Besides, how many other people are using a fake "persona", when they communicate on Usenet? I use my real name, but many people hide behind the relative anonymity of a "screen name" or "handle". Is "Aaron Voobner" any more fake than "Landshark", or any of the other "handles" on here? Does the possibility that "Aaron Voobner" may not be his given name, make his comments any less credible than someone named "Twistedhed" or "Professor"?

> selective on what you read.

The latter. When I see a header with something like "So-and-so blows
goats" or such, I usually skip over it, as it can't possibly contain
anything of relative worth. In the discussions that at least start out
with a civil tone, I don't consider someone who sticks to their guns, a
troll, unless they go beyond the scope of this newsgroup, or attempt to
make trouble, beyond the frame of the subject at hand.

Aaron is somewhat rigid, but what he posts, for the most part, are
factual. Sometimes I think he may interpret the law a little too
strictly. But I guess that's his opinion.

> Question: If Twistedhed responded to practically

If you say so, then I'll take your word for it. There's two sides to
every story, and I'm sure that each one of them will say that "the other
side started it".
I'm not saying that there aren't any trolls out here. Yes, there are,
but it's far less than what some other people claim. There are some that
have actually stated (in so many words) that those who stick to the
rules are "trolls", or "ham trolls" etc.

That depends. Many people, as they go through life, re-examine their stance on certain issues. The older I get, the more I appreciate the rule of law, and how necessary it is to maintain a civil society. There are just too many people who would run rampant all over the rest of us, if it weren't for certain laws.

I have had a pretty much "Don't ask, don't tell" policy regarding illegal CB. I've always felt that if people were responsible with their equipment, and didn't draw attention to themselves, then I don't really care either. But when pushed into a corner and given a choice to either wholeheartedly support illegal CB, or not, then I have to take the legal route, because I can't in good conscience, support the rampant proliferation of the "in your face" attitude that seems to be growing with respect to operators running power.

Doug is just one person. There are many more people on the "pro-legal" side who are not trolls.

A little stutter there, but yea, that's basically how I look at it.
There seems to be a whole lot of effort being spent by a nameless few,
to malign certain people's character, or destroy their credibility. All
that tells me is that these people must be saying some really powerful
words to push those few to go through this effort. As far as I'm
concerned, when I turn off the computer, this world ceases to exist, I
doesn't matter to me whether or not I win the "netizen of the year"
award.

>
> And you still don't see the posts that are trolling?

That depends. If the namecalling were done for the sole purpose of
agitating, then yes, I would view that as trolling. But some people
simply don't posses the ability to debate without resorting to childish
banter. Those people simply have a disagreement, and are "debating" it
in the only way they know how. I would not necessarily view that as
trolling.

> that takes that many watts.

Well, it is a valid point. If the only difference between a Wilson 5000
and a K-40, were its power handling capability, would it be worth the
extra money if someone were not intending to run illegal power? Should
that be a consideration? For some yes. Would I make a big deal about it?
Hell no. I guess this "polarization" of the group into strictly legal
and strictly illegal has left little room to play. I see no harm
cautioning someone of that fact. Of course, if I did, I'd have one of my
fan club members conveniently reminding me of what a hypocrite I was
being, for stepping over the line.

Much the same as when people flaunt illegal radio operation, like a
badge of honor, yet complain to others' ISP's when >someone rains on
their parade.

Well Dave since you brought it up. You and I
have disagreed and also agreed on some things, but this statement makes
no sense. NO ONE just complains because someone said "don't call me
illegal, I'll turn you in". It's usually when someone like Doug floods
the newsgroup with so much foul language, BS Posts they report him.

>That may be the case to you and a few others. >But there are also those
who can't seem to >understand that taking a stand against >something
(ironically, in this case, breaking >the law) is not a TOS violation,
yet they seem >to use that as some sort of threat to silence >those who
stand up to this nonesense.

Do you have an example of this? Of course not,,we know where to file
this.

"Also Aaron is just a made up persona so someone can troll this group."

>That may be a popular opinion, but there is no >proof that this is the
case.

Or in your claim above.

"You can't lose your ISP unless there
is proof that you did some thing wrong, just like with the FCC."

>Which is exactly why it was important for >Twisty to somehow "prove"
that I am using a >different ISP, which would lend some >credibility to
his (However warped) opinion, >that denouncing illegal activities is
somehow a >violation of ISP TOS.

(Sigh) That never took place, Hall,,anywhere.
Not just me, but I am certain anyone following this thread would pose
the question to you.."How do you equate using multiple ISP's with speech
that is a violation of TOS agreements?" Be careful, try not to trip
anymore.

>But since I am using the same ISP, I guess I >haven't done anything
wrong ;)

You claimed you used the same access as well, which was shown to be a lie. Youl claimed you "borrowed" an account from Villanova "years ago", but are still posting through their system. You lied. Whether you done something wrong is immaterial and irrelevant to your word.
Besides, I mentioned it once several weeks ago, you denied it, I showed your headers proved other than what you claimed, ONCE, and here you are still whining about it and still attempting to profess your innocence weeks later, andattempting to redirect a post that has nothing to do with me into your personal vendetta. Let's go..I enjoy feeding you.

"So if someone lost there ISP, well
they violated the ISP TOS and lost their account, not because they were pro illegal or pro legal. "

>Yes, that should be the case. But there are >some who attempt to take it further.

Waaaaaah! You want some cheese with your whine, Davey Boy? Heaven knows you can't cite an example. Damage control in full force today, eh? (Giggle),,gotta smile about that!!

>Maybe they share a different opinion on what >is considered "spam", and what is considered >"trolling"

Take it up with the ISPs in question that you seem to be familar with.

>It has nothing to do with anyone's "thinking". >Whether you like it or not, agree with it or not, >enjoy it or disdain it, operating a radio outside >the legal limits set forth in part 95, is a >violation of federal radio regulations. You >really need to come to terms with this. If the >fact that you're a federal lawbreaker, is not an >issue with you then fine. But also note that just >because you choose to thumb your nose at >the government, and the FCC, does not >immunize you against criticism from your >peers, who may not share your anarchistic >view of radio hobbies.

Fine. But you are not our peers...matter of fact you are the furthest thing from "our peers". That term has me busting a gut.."peers"...ahhaahaaahoooohooohoo!
You are in the extreme minority with views shared by only Lelnad, "aaron, Georgey WA3MOJ and a few other malcontents..you are no ones peer here...for God's sake son, you were defending "Arron" a few posts back and he's been TOS'd for awhile now....look at yourself, arguing for the recognition of a name that doesn't exist..it's YOUR view that isn't shared by the majority...which makes you..."peerless." (snort)

"Criticisms yes, harassment no."

>I've never "harassed" anyone. I don't recall >Frank, or Aaron or any of the more vocal >opponents of illegal operations, "harassing" >anyone either.

Now THAT is the mutha of all sigs.
Lemme try it out.......:

I've never "harassed" anyone. I don't recall Frank, or Aaron or any of the more vocal opponents of illegal operations, "harassing" anyone either. -Davey Boy Hall N3CVJ-

>Most of the SPAM, and foul messages were >posted from an anonymous source. Many >have blamed people like Doug and George for >these messages. But there is really no >concrete proof of this either. If one wished to >be anonymous, it's not too hard to take >advantage of anonymous remailers or other >tricks.

But, you claimed you were no internet guru...then you claimed you didn;t know what was in your headers..hahahhaah! See, we always knew had internet "tricks". f only you could see yourself from another, possibly detached point of view.....turning the thread into your soap box defense of "Arron" and N8WWM...hahhahhahahah! You just keep throwing sevens.......

"I don't know if it's
happened to you, but I have received some dozen or so virus infected e mails form some of those "peers" on here, personally I think that's going way beyond just a conversation."

>I would agree.<

Well, GOOD, we agree on something.

I agree, it was much better then, when we could discuss the technical merits of various things (many of which are illegal), and hopefully educate people before they do things the wrong way. It's one thing to operate a radio illegally, it's even worse when it's the R.F. equivilent of the city landfill.

>But be that as it may, someone, and I don't >remember who,

Doug Adair...N8WWM.
Aluminum deficiency can be the root cause of memory loss and the precursor to Alzheimers.

>pushed the issue away from one of courtesy, >respect, and common sense to illegal vs. >legal.

It was Dogie..then Lelnad began fingerpainting his cell wall with smeared feces....it didn't take too long for you to shove him aside and paint your own yellow stripe.

> Many of us were willing to overlook certain >indiscretions, if they were responsible and >careful of how they operated.

Hahhaa......there is NO "many" of you, Hall, you're a one man clown show with a cheerleader or two. Add to that the arrrogance that you feel you somehow aare in a position to determine what is responsible of all other operators. ASSuming more status than you actually have is conducive to one's bruised ego, but your fragility and ignorance concerning such imagined status is what makes you the entertainment with chips and dip.

>But if you're going to force everyone <

Here we go again. Note the power Davey Boy attributes to others mere words. He has accused myself of having this ability to somehow and magically "force" people to do things..such as lose control.

>to make a choice of whether to ignore the >rules totally, or to follow them, I guess I had to >side on the rule of law.

Very enlightening hammie boy Dave. Who "forced" you this time? I wanna know who else you attribute deity-like powers to? I'd love to share my rule over you with as many as I can. It appears to be working already......<g>.

>Again, your choice, as is others to break the >law and face it's consequences.

"The issues got blown out when certain individuals came into this group, started spouting the "Rules & Regulations", they knew when they did that it was now going to be nothing more than them to troll the group, as they are still doing to this very day."

>A lot revolves around the definition of >"trolling".
>The classic definition,

(snip) sorry, but your definitions have been proved incomplete beyond a shadow of a doubt.

> I truly believe that many of the "pro legal" side >genuinely believe in what they say,

You're not prolegal. You have posted polar opposing views on amps within 2 weeks of eachother. The group can draw their own conclusions..but I enjoy it so much more when you attempt to make up their minds for them.

>and are also equally bothered that so many >people seem to take a cavalier attitude when >defying the law.

Can you espouse what constitutes this "cavalier attitude" that apparently pushes your buttons? Again, you can drop the pretext as if speaking for hammies, because your view is the extreme minority...try and speak for yourself and don't look to others for validation. this includes talking to yourselfuner another name to give the illusion you are actually assisting someone. I about freakin' dies from laughing when you typed "Thanks Dave" to yourself...You know you ain't right in the head, don't you Davey Boy?

>Many will continue to push on, hoping that >either one of two things will happen;

Ahahhahaahaha..many wil"push on"? What the hell does that mean?
PUSH on? AS opposed to WHAT other choice, Davey boy?
Sitting around "hoping"? Dude, you have WAYYYYY too much free time on your hands..your mind is melting.

>A. that their words will sink in and cause some >to rethink their actions.

"The Dream police they live inside of my head
the dream police they come to me in my bed
the dream police they're looking for me"
Hahahhaahhahahahaahah!

>Or B. that illegals get so frustrated with the >fight, that they leave.

Wishing won't make it so. Even if it did,,,,you are an illegal, davey boy.

>You can't expect to make a case for following >some rules, while ignoring
>others, and not expect to be viewed as a >hypocrite.

Exactly. Only I never brought rules to anyone, including ISP's until the rules were laid at my doorstep and brought to me...what's good for the goose.....thing is, these few have demonstrated the rat-bastard personality in your little angry clique by taking issue with your fluff shoved back down your throat.

>On the other hand, I can't support a paradigm >of anarchy.

You can't even support your daughter or she would be living with you.

> Rules were put here for a reason.

What rule allows you to use a Dave made on the freeband?

>It's irresponsible to ignore them.<

You are a one hit wonder.

>Such is the mess we're left with.

It's not "we" Davey boy....most hammies find you appalling..trust me on this,,,,,my pulse on the matter has been dead on accurate for years. Using "we" to denote you, Dogie, Nad, and Georgey is fine, and that is what is connotated from such use.

"Yes you are correct we are left with a mess, but the rules (to which there are none in this group) have nothing to do with the "Trolls" that are in this group now causing the majority of the harassing, accusing, foul language posts that are put up here."

>I can't say who started what,<

You damn sure can't..you can't even tell us what is in your headers,,or where you are posting from,,or why is it ok for you to use a Davemade but not another hammie....

>and who is responsible for which foul >messages and harassment. All I can say is >that I stand on my principles, and will offer up >my perspective, as I see it. As always, anyone >is free to disagree, and offer up counterpoints.

Sure, "anyone is free to disagree" but you will attack them on a personal level....I can show you began the namecalling with those who have disagreed with you in the past. I can show where you attacked on a personal level for no reason other than the person held a separate pint of view. You're eyes are brown, aren't they?

>There is still a good group for CB
>discussion and technical advice that has not >been corrupted by the likes of these people, >where all the "good" technicians still answer >questions like in "the good old days" without >all the unwanted comments from those who >don't agree with what is going on.

There has been a great effort at screening out these losers....posting this serves no purpose other than to get invite the vermin.

>Freedom of speech and the ability to express >a dissenting opinion, >really bothers you doesn't it?"

I"t might, but would you not agree calling people names, acusing them of child molesting and such (including what was said about Frank) is not a dissenting opinion, but harrasment?"

>I would call that childish, and sophomoric, and >a sign of someone with an inability to rationally >discuss a topic.

I said that exact thing to Lelnad KC8LDO way before he even mentioned such horrific acts concerning children such as molestation.

>And just what IS its intended purpose? Surely >you don't think promoting illegal activities falls >under that umbrella, do you?

"Why yes it does, so just the mere discussion of amps or export radio's is now wrong to talk about? "

>No, not at all. There is nothing wrong with >discussing aspects of radio that would be >illegal on CB, if put into practice. But there's a >difference between discussing illegal aspects, >and actively promoting in a positive light.

Hahahah!

"That's a hoot. A moderated newsgroup, that permits illegal discussions (And isn't that a violation of the "rec" catergory of usenet?), but filters out objections based on legal grounds. Don't hold your breath waiting for that one."

>Well if it's in the newsgroup charter, then it can >be moderated, so his breathing maybe better >than you think. I posted a number of groups >that dealt with drugs, speeding, illegal >gambling, car groups breaking federal EPA >laws so they
>are there, and under Rec. As again for this >group to be moderated, unless 2 to 3 >individuals want to take the responsibility to >check each message everyday, good luck.
>I may be wrong then, but I once read that the >"Rec" groups on usenet were not to be used >for any activities that were illegal. That's why

>most of the bizzare and questionable subjects >full under the "alt" groups.

Yes, even on the rec" groups, there will be times that an illegal topic comes up. But it's not to be the main focus of the group. Plus, I don't know who has responsibility to make sure that all the groups are conforming.

>I agree that being a newsgroup moderator is >not a fun job.

figures you would say something on that order. You LOVE the job Davey-boy, it's why you cry so loudly in here concerning that of which you disagree.

> Besides being a lot of work, you will ultimately >be accused of bias from the first person who's >messages were deleted, which will then call >into question the moderator's objectivity when >applying the group charter and policy. I used >to be a SYSOP of a dial up BBS, 10 years >ago, before the internet took off, and I had to >deal with these issues then. It's not fun.
>Dave
>"Sandbagger"

You must be a boozer too. I commented about your past bragging of your pc experience and you claimed "Where have I ever done that"? and went into your paltry spin about "limited experience"...as I always say.....it's your own words..the lies-they-keep-a-coming!

This auction is for a truely unique radio circa 1973! It is a Robyn
DG-1300 40 channel AM CB with a Robyn SX-7 base module.

>Just a point of clarification; 40 channel radios >did not appear until
Jan. 1st, 1977, so it's not >quite as old as 1973.....
>Dave
>"Sandbagger"

As usual, it's an incorrect "clarification". Protoypes were avaliable
much earlier. Ask anyone that had a real cb shop.

WA3MOJ wrote:
>How do you figure it is off topic, it was said by >me in reply to you I brought it up in a previous >post and you seem to have a problem >answering that question.

No problem. You appear to have a problem demonstrating a point by failing to isolate a question concerning taxes with ampmakers.
.

>If a guy who pays no taxes on illegal items<

"IF" has been removed from the vernacular of this group. It has been proven to be ineffective and useless.
IF the queen had balls she'd be king.

Kind of how I felt when you failed to explain your erroneous comment about how a Galaxy was reportedy (by you) illegal for a hammie to use on ten meter.

>It sure is Illegal yet you have tried to claim I >lied and offered no proof of your claim, just lip >service remember. "just because you say it >doesn't make it so"

But tell me Mr. hammie wa3moj, how is a galaxy illegal for use on ten meter by a hammie licensed to operate there? If that doesn't turn your gray matter even softer than it is, ponder this...how can a Galaxy be illegal for use but Davey Boy Hall's Davemade be legal?
Don't hurt yourself again, Georgey boy.

>Compared to a storefront recognized dealer >that you can go to and not hide in the back >alley to make a deal.

I made no such comparison, you did.
****
>No shit did I say you said that? your slip is >showing again.

Then why mention it?

>No first lets get back to you claiming, that I >said you made the comparision. another out >right lie by you

I didn't say YOU said I made such a comparison..I merely said..and I quote" I made no such comparison..you did."
Now how did you interpret any of that as me claiming that you claimed that *I* made the comparison? I said YOU made the comparison..and you did.

>I have to spell things out for you,<

Not really, georgey boy,,,you need to crawl before you can walk....you need to learn how to spell for yourself before you worry about others...but that's your life story.

>your usual MO
>is to twsit what is said and you are doing a >fine job of that.
>what do you care what please me?<

I don't.

>You sure do or did you forget what you said? >Ill post what you said just to prove your a liar >again...

"And this upsets or pleasures you why?

>So yes you are concerned about what pleases >me other wise you would not have made it a >point of asking.

You made it a point of allowing us the knowledge that it effected you so profoundly. "Why" was a mere natural curiosity to something you professed. If you don't like to be qestioned on certain things, keep them to yourself.
As many typos as are usually in your posts, it wasn't a far-fetched mistake......

>What did I expect but another excuse or lie >from you . par for this course.

It's not an excuse Georgey boy...your posts are for the most part, ramblings of incoherence, peppered with your personal problems..

Still haven't checked that, huh? That's cool. You're the only one on this
group that believes
that...guaranteed.

>Your right i dont expect a bunch of non hams >to know Ham laws, you don't even abide by >your own operating rules.

Fact: Many cbers are hammies as many hammies are cbers.
Riley isn't coming after non-hammies and hammies that don't use hammie radio. Think about it, Georgey.....gently.

There is no "they", Davey boy..you're washed up.

"Well good luck, but again, unless you do something to violate TOS you can't lose your ISP. "

>You know that, and I know that. But there are >some who evidently don't.

There are no "some" Davey boy.

"Also Aaron is just a made up persona so someone can troll this group."

>That may be a popular opinion, but there is no >proof that this is the case.

"Each to their own, but you hold a poll and you will find that most believe & know that he is a made up persona."

>An opinion poll is not evidence. <

But it damn sure constitutes what I have maintained all along...that you are alone in a sea of hate confusion with Lelnad, Georgey, and Doc as your personal raft guides.

>Besides, how many other people are using a >fake "persona", when they communicate on >Usenet?

Who cares? Only you. These folks don't attempt to pass off something frudulent as authentic, as you are attempting.

>I use my real name, but many people hide >behind the relative anonymity of a "screen >name" or "handle".

That's what one uses on cb....handles.

>Is "Aaron Voobner" any more fake than >"Landshark",

Absolutely. Voobner only existed when we allowed.

>or any of the other "handles" on here?<

Mucho so.

> Does the possibility that "Aaron Voobner" >may not be his given name,

Here is that "aguing both sides" thing that brings the vision of you dining on crow "al-a-Twist". You were defending his authenticity in another post you made today, yet here you acknowledge it "may not be his given name". What a trickstah!

>smake his comments any less credible than >someone named "Twistedhed" or "Professor"?

Absolutely. Many present have talked to myself and the Professor on the air. Never heard no Arron voobner..maybe one of you pizzed upon hammies can use the name to talk to us on the freeband.......

"You can't lose your ISP unless there
is proof that you did some thing wrong, just like with the FCC."

>Which is exactly why it was important for >Twisty

Owww....dance.......dance little sistah dance....

> to somehow "prove" that I am using a >different ISP, which would lend some >credibility to his (However warped) opinion, >that denouncing illegal activities is somehow a >violation of ISP TOS. But since I am using the >same ISP, I guess I haven't done anything >wrong ;)

"You could've changed ISP's, upgraded your service. Decided to go with DSL or Cable a # of reason could be available."

>Again, you know that, and I know that, but >some people look at everything with suspicion >and ulterior motives.

Yea,,,but you didn;t do any of the above....aybe sharkie missed your posted lie claiming you only "borrowed" an account from villanova a few years ago for a short time...but your current headers reveal you still posting through there..so go ahead and ....dance..........danec little sistah dance.....

"So if someone lost there ISP, well
they violated the ISP TOS and lost their account, not because they were pro illegal or pro legal."

>Yes, that should be the case. But there are >some who attempt to take it further. Maybe >they share a different opinion on what is >considered "spam", and what is considered >"trolling"

I guess you don't read many post here or you are very selective on what you read.

>The latter. When I see a header with >something like "So-and-so blows goats" or >such, I usually skip over it,

Which has fast become the norm with you Davey boy. Trust me.....hammies are fed up with your type...there is no room in hammie radio for arrogance and disdain for those who share other aspects of the hobby you no longer enjoy.

>as it can't possibly contain anything of relative >worth. In the discussions that at least start out >with a civil tone, I don't consider someone who >sticks to their guns, a troll, unless they go >beyond the scope of this newsgroup, or >attempt to make trouble, beyond the frame of >the subject at hand.

Well, I certainly consider your name calling and attacks on a personal level to be indicative of your lack of communicative skill.

"Criticisms yes, harassment no."

>I've never "harassed" anyone.<

"Harassed" is a relevant term and totally sophomoric at best.
Most would consider uprovoked personal attacks and name calling by you to be of a harassing nature.

>I never said you did, nor do I think you do.<

Watch your mailbox. How many do you want?

>I don't recall Frank, or Aaron or any of the >more vocal opponents of >illegal operations, "harassing" anyone
>either.

"Well again selective reading I guess."

You're catching on.

"As for Frank, no he doesn't really harass others, but Aaron is trolling as is 1 or 2 others."

>Aaron is somewhat rigid, but what he posts, >for the most part, are factual. Sometimes I >think he may interpret the law a little too >strictly. But I guess that's his opinion.

Factual? Dave, you are a certified looney.

Correct me if I am wrong, but I don't ever remember Twistie or
Landshark ever being against anyone operating legally. Even though
Twistie admits freely that he operates on the freeband, I have
don't think I have ever seen him conned anyone else who operated
legally.

Hello all

My first post to this NG.

I am in need of a 2970 repair person, Money is not the issue as im not cheap!!

I have a NON dx that throws a dead carrier and sometimes no AM audio, you shake it around am audio comes back , got it off ebay (i know you get what you pay for , hence willing to pay to get it fixed) ,.... but never the less its got at least a cold solder , and another problem , throws a GOOD 150 watt dead key , on ssb, 50 am as supposed to no modulation though...

If any of you out there have had a good or better than good experience with someone who takes radios via mail/ups, will pay cash , mo or whatever method they want , paypal ....please

EMAIL

bennyc03@earthlink.net

thanks in advance ,,, community!!

And maybe he does to some degree so congratulations for just insulting the guy. Or is it that you now claim to have the psychic ability to read minds too, something you learned from hanging with the "saucer men"?

> or else he wouldn't have asked and you give him a song
> and dance.

I charge for concert performances. And I wouldn't give you a back stage pass no matter how much you begged me for one. 8-))

>Then to top it off, you suggest he build impedance transformers.

They do work.

> Let me guess,

That's all you ever do Twirted.

>you desperately hoped he would inquire as to
>how one is constructed and you would be more than happy to
>oblige......

He could always use Goolge and look it up on the Internet for himself. Of course you wouldn't think of doing that because its beyond your metal capacity.

>why not just tell him the bottom line...... cable coax sucks
>for all practical cb purposes.

Wow!! You just did. So what's he suppose to use 450 ohm ladder line now?

>Go to rat shack and buy some rg 8 or 58,
>it's cheap enough.

You do know that RG-8 and RG-58 are "cable coax". So why are you now all of a sudden telling him to use cable that "sucks for all practical cb purposes"?

>Whatever you do, do not listen to Lelnad and company.
>They have been known to intentionally give advice that will fry cb
>radios. We validate them when we're bored for entertainment purposes
>only.

When you lose your temper you can't think straight can you Twirted?
Besides why pay attention to you? You don't know anything about
electronics, and that's by your own admission too. Then Prozac summed
things up rather nicely.

Found at http://www.geocities.com/dre_cb/ranger/ranger1.htm:
Wire the radio backwards (reverse polarity) usually causes the power
regulator for AM to short out. This will give
the radio a 40 Watt carrier with no modulation. This is not to be done
intentionally.... just letting you know what
the radio is able to do without power control.

You always manage a way to work your leaglities into the subject.
Please
allow me to displace your bullshit.
Being a ham doesn't offer any of the above with the exception to more
spectrum. One can operate all the modes one wishes on 11, they work
just
as well on 11 as they do 10. Some run as much power as they wish.

<snip irrelevant crap>

Its clear that you do in fact get more as a Ham. Yeti did not confine
his comments to strictly 10m , or any other band. He was speaking
about Ham Radio in general.

Now you opened your mouth and clearly said "One can operate all the
modes one wishes on 11,". So I picked some. Its not my fault that
your ignorant about all of the modes that are in use on the Ham Bands,
then erroneously assuming that they work on 10m, thus they should work
on 11m as well. Nope.

Oh, come on, Larry. That sounds like an excuse to ease your conscious over your own lack of involvement in public service related activities. If you really wanted to do something in that regard, you darn sure wouldn't let something as trivial as someone hogging a microphone stop you.

Besides, on a more humorous note, the lack of a microphone shouldn't bother a CW freak like you at all. Instead, you could sit beside the fellow with the microphone and just tap out the messages on the tabletop with your finger.

By the way, I noticed you've picked up a vanity callsign. Didn't you use to rant against vanity callsigns?

Dwight Stewart (W5NET)

And then there's this one:Search Result 2 From: Dwight Stewart (stewart@sc.rr.com)Subject: Re: "Frequency" -- the movie View: Complete Thread (101 articles) Original Format Newsgroups: rec.radio.amateur.policyDate: 2002-10-26 01:03:35 PST "Larry Roll K3LT" wrote:

> imagine. (snip)

I don't doubt you could be a good coordinator, Larry. Past military NCO's do tend to be fairly good supervisors and managers. They often have experience supervising a fairly large, diverse, workforce, lending a more level-headed approach to their dealings with others. They often routinely dealt with unusual situations. And they were often expected to make quick, but defendable, decisions.

On the other hand, ex-military NCO's are also often pig-headed, opinionated, judgmental, overly-rigid, and somewhat zealous. Those who are able to temper these less desirable traits, and emphasize the more desirable ones, often do well managing people.

> And one thing I would make sure of is that any and
> all radio amateurs with an interest in Public Service

All very nice, but also very routine (most EC's do this). The problem is your jump to the next few lines...

> There would be no entrenched Ham Heroes anywhere in
> sight. Everyone would do everything, and I'd never
> let the same person do the same job twice in a row

> a strict 8-hour shift basis, if there are adequate
> personnel to allow it; otherwise, shifts would be
> adjusted to permit a change of faces and to allow
> more people to get that experience.

This is where we disagree. In an emergency, you want your people in the jobs they do best. This is not the time to be worrying about the feelings of the individual ham. The mission has to come first, not some worry about making everyone feel welcomed or feel a sense of belonging. Certainly you want to rotate as many people as possible. But, if a person isn't good on the radio, now is not the time to hand him the microphone. There are other jobs that person can do. By the same token, if a person is good on the radio, that person should get the microphone as much as possible.

> Now, come up with some more whines and complaints.

There are no complaints, Larry - just a difference in style.

Dwight Stewart (W5NET)

http://www.qsl.net/w5net/----------So George, it appears you are mistaken.BTW, sorry for the HTML.

>Sure, Lelnad. I'll invoke the good spirit of Dick

He would turn over in his grave if he know you were trying to use him to further your misguided agenda. You are one sick puppy. He in fact figured out the post(s) you like to drag out are in fact forgies. I was not the only one on the group who saw through the crap and mentioned it to him. Of course this still does nothing to further your agenda. You still can't prove who is on the sending end of any posted messages, even this one.

So I'll make this easy. Just prove THIS MESSAGE was posted by me Twirted. You'll need the posting logs from my ISP, IP traces etc. To convine anybody you'll have to show that my account was in use at the time this message was posted, AND the IP trace with the logs shows that the IP address in use at that time was in fact assigned to my account. If you can't produce proof for something this simple you sure can't for anything else. For all we know you were the one that forged the posts you keep crying about in a psychotic attempt to boost your own image on the group, and to get the attention you seem to crave.

Get moving Twirted. Time's a'wasting.

Correct JJ, I don't give a hoot in Hell what people
do on the radio, legal or illegal. Heck I don't care about
the Ham vs. CB'r stuff either, twist might, but I don't.

Landshark

--
If you are implying that people, who
hold ham licenses, should be somehow
held to a higher moral standard than
the "common man", then that would
be faulty logic. A ham license is only
a "permit" to use radio, it is not a
"badge of morality".

2604. what antenna for 100,000 watt linear

Newsgroup: rec.radio.cb
Date: 2002-11-27 00:41:52 UTC

whats a good mobile antenna that will support a 100,000 linear? I built a 1/4 wave dipole and it works but not appropriate for mobile use.

ok, and what semi truck are you going to haul the power source on
(tractor trailer). I can tell you right now, it isn't going to be a load
of car batteries. its going to be a 130 KW generator.

as for the antenna. if you are serious, try a copper clad steel shaft 102
inches long on a mount.

Technomage

Source record: 145154

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=1501&item=1941085308

This auction is for a truely unique radio circa 1973! It is a Robyn DG-1300 40 channel AM CB with a Robyn SX-7 base module. This allows the CB to be used as a base radio simply by sliding it into the "docking station" and plugging in the speaker and power plugs in the back and attaching an antenna! The power supply and speaker are in the base module!

This radio is COLLECTORS QUALITY! It is PRISTINE. I would give it a 9.9 on a scale of 1-10 only because it isn't brand new in the box.

I got this CB not too long ago with the intention of using it at home, but I never did. It's been kept in the original box. Included is the microphone and some of the original literature that came with the radio.

This radio works 100% and I received great audio reports when tested. It does the full 4 watts legal limit as indicated by the internal power meter and 2 different external power meters.

Go pedal your spam elsewhere bozo. Now all of a sudden people have to be rightwing kooks to have a hobby like SWL? I don't think so. Many liberals find the American Media far too conserveative now and days and turn to SWL for news from a different country than our own.

Some people just don't know how to think before they speak.

I think for that kind of power you won't be able to have any antenna with an abrupt 'end' or the arcs & sparks syndrome might set in. Either a heavy rod with a ball on the end or some kind of a full size loop ...

73 from Rochester, NY

Used to tinker with CBs before I realized that I was actually better at communicating with them rather than butchering their innards. I was once part of this San Francisco contingent of CB'ers(circa '95-'96), and I was always curious if any of those guys were online somewhere. They probably upgraded all their goods by now..last time I heard they were on the 2 meter band.

I'm not really interested in basic CB radio transmissions, I tend to listen more than talk. I'll never buy another new Base Station, but if I were to I'd love to get another TRC-57 or the 40-channel variant of that Radio Shack model. I had one once but it was toast, worked for about a week. Had all these pretty lights and a little alarm clock too.

Anyone know where I can get one cheap? They're always on eBay for about 150 dollars or more...

Interesting URL. Check out
http://gapantenna.com/superc.htm

If the thing works, it would sure solve problems where antennas are unwelcome. If it works on 10 and 12 meters, it'll sure as heck work on 11.

73 from Rochester, NY
Jim

If you're planning on running a base station then I would recommend going for a rig that has SSB. Gives you the ability to tune in to any legal CB communications with in your reception range. I think for most CB's the cost of a rig with SSB isn't that much different than one with just AM. Broadening your options for communication is well worth the possible extra cost.

Dave

: "Twistedhed" <twistedhed@webtv.net> wrote in message
: news:3275-3DE28F93-902@storefull- >Bullshit, you are looking to silence
: anyone >who is against Legal radio,
:
:
: Stop right there.
:
: >No you stop right there oh twisted One
:
:
: Truth has always been your enemy.... to be snipped and clipped by you,
: but never works.
: This has never been indicative of anyone here
:
:
: >Just because you say so twityhed doesn't >make it true.
:
:
: I didn't say it, YOU did..YOU claimed people here try to silence legal
: advocation of radio but as always, can't cite anything,,,anything at all
: to back what YOU say. Now, before you get confused and bedeviled again,
: try and remember what you say..reminding you of it is akin to schooling
: hammies like yourself and Lelnad and Hall and Doc on the finer merits of
: the art of communication, for which you have all demonstrated a
: preponderance of failure at....none of you were ever taught what
: etiquette is let alone how to dispense it and mind your own P's and Q's.
: Much of it can be attributed to y'alls upbringing, or lack of.
:
:
:
:
: except
: you girls and your lies
:
:
: >Oh what is this oh twisted one you claim >others throw insults
:
:
:
: It's not a claim..it's the bare truth.
:

:
: >well look at you mad hatter<
:
:
: I don't get mad at artificial worlds and I certainly don't wear a
: hat...I have a complete thick head of hair....185 pounds of twisted
: steel and sex appeal, but then again, that may be what attracts you and
: Hall and Lelnad to me like a moth to flame...y'all share a divine
: penchant for same-sex satiations and comments concerning strangers based
: on their cb views...hahah..talk about twisted!!!
:
:
: > you are no better than those you carry a >grudge agaisnt
:
:
:
:
:
: I carry no grudge......anything from me is return fire from you losers
: that drew first blood. Always has been, always will be.
:
:
: >Oh truer words were never spoken <
:
:
: Exactly.
:
:
: >just because you say it doesn't ,make it so. <
:
: Correct..that's why I always manage to support my posts with proof,,such
: as the ones where Doc lied...Hall lied, Lelnad forged and lied, you
: lie.....I say again...amazing what this lil ol cb thing can do in the
: manner of causing catastrophic psychological breakdowns in poor azzed
: hammies like yourself and those named who no one will asscociate or
: claim.
:
:
:
:
:
:
:
:
: Again,,,,,,the entire truth.
: You and the other playpen clowns
:
:
: >Oh there you go again with the insults <

: The insults are all return. I have never done a single thing to anyone
: in here, the wellknown cowards of yourself and Hall and Doc and Lelnad
: included. I say again, if you can't take it, don't dish it out. You
: sound like a woman with your whining
****

Twisty you are the one doing the whining talking about others who you say insult you, and yet you then say how wrong they are for doing it, all in the mean time you return Fire as you say and do the same thing, and yet cry about them doing it, can't you see that your a hypocrite? 2 wrongs don't make you right either. They do it so you do it sounds like your a 10 year old.
:
:
: >should you be taken with any credibility if this >is what you resort to
:
:
:
: Hhahaha..what I "resort" to is whupping your azzes with your own game.

So you say

: You gys had no clue the rock you were overturning..like usenet..you
: can't take it back (roaring with laughter)!

Youare correct on that I knew you crawled from under a rock.

:
: Return fire and it is burning you fast. You are very quick to attempt to perpetuate against another :what you cry is unfairly,

Return fire, nah just hypocritical fire, you cry that those hurl insults then you turn around and do it then get your panties in a bunch when I remind you the jackass you are making yourself out to be.

:Hypocrite and Liar
: are a few names that come to mind when I think of you, Lelnad and Hall
: and Doc.

Hmm those were the exact words I used to describe you a few posts back, I see they made there way back to me so I guess this is return fire to, well he called me it so Ill call him that typical of you twisty. here is a hankie for you, go wash off.

: .worked very well,,,thankyouverymuch! In addition, you are the only one
: crying about it for the fifth day in a row, great to know it really
: struck a nerve with you. I'll keep it up whenever I can.

Keep your own nose clean

: I don't turn anyone in who doesn't harass me. AS sharkie noted, if your
: losers would obey the rules of their ISP, whatever I complain about is
: irrrelevant..hahhahahhaha! Poor Boy George.
:
:

: "Hypocrite" is applied...such as been done with several "hammies'
: lately..Dave Hall lied about everything and still is.....
: here is a criminal telling another they are breaking the law.
:
:
: >He may "have" been a criminal in the past, >does that mean he still is?
:
:
: Sure he is..a liar too.
:
: >Perhaps he has seen the light maybe you >should too.
:
:
:
: Then he wouldn't be defending amps he claimed were illegal only 2 weeks
: ago, but, alas, he did, so your attempt at lawyering for him is null.
: How much credibility do you actually think that carries?
:
:
: >What all your Lies? and hypocritical >statements.
:
:
:
:
: Hall's self-contradictions. The contingency has noted he talks out both
: sides of his azz/mouth without any assistance from me or you.
: Paul Lalli lied and said his server was down when it was proved
: otherwise.
:
: >who is Paul lalli? and how was it proved just >because you say it
: doesn't make it so.
:
:
:
:
: Paul is Doc.......you are correct....it doesn't matter what I say,,

Yes I know I am correct it doesn't matter what you say.

See,,I have hammie friends all around...it's exactly how Lelnad was caught trying to pathetically be heard on the freeband jamming me..

Oh so your saying a Ham heard him on the freeband? and he was saying he was twistedhed? I don't know why he would want to be you of all people. I think that Is a boldface lie. Where is your facts or proof ? Earlier in this post you did say you only post facts. Well prove it otherwise what you say doesn't matter and is to be taken along with the rest of your words an outright lie.

:how else do you think we know he has his call on his plate?

because he said it was.

:Hammies hammies everywhere and nuthin' you can do about it!!

No there is nothing you can do about it.

: It was very easy to show he is a lying sob just like you

really well post some of my lies then, you have given these guys all that attention pos some of the things you say I am lieing about, you do posts facts right? So lets have my lies with something to back up that they are indeed lies. Other than your opinion. OK I am all ears and would love for you to bring my lies out in the open. Father twisty. No rush, and no opinions just facts .. Ill be waiting.

: Lost ISP;s..fact. Doc lied. Fact. Hall lied. Fact. Lelnad forged and
: lied. Fact. It isn;t what I say, Boy Georgey, their own posts haunt
: them..yet you fewls continue to try and attack the messenger for
: pointing out your self-contradictory posts..and lies.

well search the archives and point out my lies with FACTS not opinions can you do that.

It's all y'all can do, cause you GOT nuthin' else.
: You and the nad man and Hall are bonafide liars and parasites to hammie
: radio. All facts.

All Facts?? LOL If they are facts it should be easy to prove I havent lost any isp mail servers or whatever so go ahead and prove a few things.

: and comment and flame me all you want........

Here is a hankie again twisty your crying again, and yet continue the hypocritical approach, hurl insults etc and think that it is ok.

: >Listen to twisty croon as he hurls insults at >those he claims do it .

: Claim? No my son,,,it is no claim..it is a plain simple facts backed by
: y'alls posts....it's why I love usenet..you girls can't take it back.

And neither can you you have insulted all those you accuse and the excuse it is return fire is so lame not one of your keyclown heathen will back you on it.

:
:

: Facts are true statements backed by proof.

Start putting facts forth concerning me otherwise it is lip service and whining.

everyone knows you are washed up and
: tired...hell, most don't even read your posts,

Oh I see they keep you busy my impotent one from florida

: > That word is your favorite when your getting >spanked you throw it
: around like the boy who >cried wolf.

:
:
:
: Gee, Boy George, ...you appear angry.

No more than you dementedhed

: Don't worry,

Me worry? Nah your worthless.

:we won't
who is we?

: Laughing at your impotency does not constitute a fetish...as another
: matter of fact, there would be nothing to laugh about if you girls had a
: clue or were effective in any of your endeavors, but seeing how y'all
: are magnificent failures at hammies and human beings,,,,,,,it makes it
: all worth while to watch you dogs squirm on the floor.
:
:
:
: >Are you on meds for it?
:
:
: You claimed "consequences" for us......failing to produce as usual,
: .

Yes. if you break the law and are caught there are consequences, I am not
the FCC I do not hand out the penalty for operating illegally that is up to
them so yes your illegal operating does have consequences.

:highlights the impotency I speak of

Yes everyone knows by know that you are impotent please keep your personal
life seperate from what goes on in this NG.

:
:
: >Our choice to let the illegals know they are >breaking laws.
:
:
: Has nothing to do with obeying rules or else
: connections to this group wouldn't be lost at such a comical rate by
: those who have cast such huge stones.
: Hhahaha..read it again, Boy Georgey.
:
:
: "The issues got blown out when certain individuals came into this group,
: started spouting the "Rules
: & Regulations",
:
:

: Yes the dreaded rules and regulations post they knew when they did that
: it was now going to be nothing more than them
: to troll the group, as
: they are still doing to this very day."
:
: >They may have did it to educate, you and your >band of loonies jumped
: >all over Mark fuller and anyone who dares >speak out against illegal
: radio.
:
: I wasn't here when this other loser you speak of was your God, but I
: still am enamored over being elected to take his place by you and Lelnad
: and Hall and, gosh, now Doc.
:
: >More insults and lies... hypocrite<
:
:
: No really,,,,,everyone knows how ya' losers gravitated toward me..I
: certainly didn't go looking for you girls.....y'all came to me.....as
: always..I just sit back and relax and y'all do it to yourselves oh so
: much better than anyone else ever could :)
:
:
:
: >I wonder why Landwhale<
:
: There you go again.....insults for no reason other than you don't like
: what he says.
: Juvenile comes to mind.
:
: >Yes, I was thinking that as well,<
:
:
: So what are you saying? It's the Tourettes, again?
:
:
: > perhaps why I called you Jr, you simply >havent grown up or perhaps
: you did and you >are retarted,
:
:
: Oooo, dat hoit, Boyy Georgey wa3moj.
: Check your spell check, Boy wonder.
:
:
:
: .
: > you claim others insult people then you do <
:
:
:
:

: >Return fire. Can't take the heat get out of the >kitchen, boy Georgey
: wa3moj.
:
:
: >the whole post makes you wonder what is in >the water down there.
:
:
: Making you wonder is no feat.
:
:
: >is so concerned about foul language and such >in this NG he had one of
: >the foulest mouths in the NG, wanna see >some examples Mark?
:
:
: Oh, so N3CVJ can claim he has "learned" since his days of posting his
: criminal endeavors for all to see, but it isn't ok for sharkie to clean
: up his language?
:
: >Well according to you what Dave Hall did >before should be held agaisnt
: him now,
:
: I said nothing of the sort. That is 5 false attributions you attempted
: but failed with in this thread, but poor boy Goigey couldn't produce
: anything but words.....nothing..nada..not one iota of anything that
: can back any of your lies.
: hahahahhhaaha!.
:
:
: > which set of rules is it this time ..... Jesus >friggin Christ
: Twisty YOU ARE A
: >HYPOCRITE!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
: >!!!!!!!!!!
:
:
:
:
: Then show something of substance instead of crying crocodile tears to
: usand howling ike a school marm.
:
:
:
:
:
:
: Thing is, N3CVJ DIDN'T learn,
:
:
: >just because you say it doesnt make it so<
:
:

: Sure it does...especially when Dave Hall said it himself.He claimed he
: learned since those days but self-contradicts his own posts from two
: weeks ago..complete and polar opposite of what he posted a mere two
: weeks ago,,this makes him a liar, con man, lawbreaker, and of cource,
: your fave....a hypocrite.
: ...
:
: >And I beleive he has as much as landwhale
:
:
: As much WHAT?
: Since I have been around, sharkie has done nothing to anyof you but
: return the bulshit from whence it came. He is to be commended for not
: laying down and taking your bullshit and stuffing it right back down
: your sorry throats.
:
:
: >has so which set of rules is it I will ask again.
:
:
: Ask what?
:
:
: >the Hypocrite from Florida rules?
:
:
:
: Oh, there is no hypocrisy. I make no bones about dxing and freebanding
: boy Georgey. Unlike you girls, I have no reason to hide my actions or
: words.
:
:
:
: "Freedom of speech and the ability to express a dissenting opinion,
: really bothers you doesn't it?"
:
:
: >Yes it does<
:
:
: Then you should get the hell out and leave the country for those of us
: who cherish it and would die for your right to say it.
:
:
: >Wasn't talking about me snapperhead <
:
:
: Sure it was...YOU said it.
:
:

: >butyou knew that it is just another feeble >attempt by you to snip my
: post and try and >change the meaning.
:
:
: Look at the posts again, boy Georgey..you are the guilty "snipper" head,
: not I...ahahahahaha!.
:
:
: >If you post the rest that you cut you will see I >am not talking about
: me, you know that, it is >just another twisty trick went bad
:
:
:
:
: Read it again...you said it, I just pointed it out..unlike you, I need
: not make up anything..merely use y'alls own posts to consistently and
: constantly remind newbies that the members of AArons pets are not to be
: trusted. Y'all made your own bed and now you are forced (as in have no
: choice) to lay in it and stink.

Very skeptical.

I'd want to see some independent tests before putting any money down on it.

Yeah, it's what I wanted, but the hunger for it has passed by. I still
listen a lot, since I can do something else while doing it. If I have
the cash to buy an HF rig, I won't buy it, I will buy a new PC,or upgrade
one instead. Maybe that will change someday, who knows...

I have seen CBers using 1KW, with no inteference... but I have also
seen CBers have problems with box standard 4Watt FM radios,
even on low power (400mW).

> > Inteference to anything that is NOT a reciever (eg. computers,
> > cd players, etc) CANNOT possibly be caused by a "dirty"
> > signal. NO amount of harmonics can intefere with something
> > that is not designed to pick up radio signals.
>
> Not true.
> Any device that has semiconductors in it is suceptible to RF interference.
> For each device, some band of frequencies will produce interference at a
> lower level than others.

But that is still missing the point... the equipment should NOT
be picking up radio signals. If it can pick up the harmonics of
CB, then it can pick up the transmissions that are supposed
to be on those frequencies.

> Also, why not clean up your signal?

Are your legal CBs not made to a standard, with a very low
harmonic and spurious content?
I know that ours are in the UK. They have undergo Government
testing before approval.

> All that junk is costing you power, that isn't available
> to go into the main carrier and sidebands, where the
> information is.

Unless the set has a serious fault, the few nW of spurious will NOT
make a difference to your distance.
Also, consider that you would be trying to reduce an unwanted
signal from the output... not add to the wanted signal.
Then consider the loss you may get from an external low pass filter,
and how much of that loss may be radiated from the device... the
ones I have seen for CB are not designed too well.

To make a noticeable difference to your distance, your signal would
need to be extremely "dirty"... like losind half it's power in unwanted
frequencies.
Now, I have seen this happen... but with an illegal and seriously poor
modification. The radio was putting out signals all over 10 and
11 Metres, due to mixing in the PLL section of additional xtals.

> It's also causing problems, both the ones you know about,
> and the ones you don't know about.
>
> External filters help, but they are a patch, not a solution.
> If you clean up the rig, you'll get better performance, and less
> interference, a win-win situation.

Front end overload cannot be cured by "cleaning up your signal". In the UK,
the "RA" (Radiocommunications Agency" and the "RIS" (Radio Investigation
Service) both seem to accept that the most common cause of inteference in
overloading of poorly designed domestic equipment.

As the person has said that space and location of antenna are a problem... I
would suspect an overload problem. If he is already running a legal system,
I would not suspect a "dirty" signal... unless your FCC allows the sale of
"dirty" CBs.
Reducing the power may cure it, but there is no guarantee. He may
already be running legal power, as are so many others who intefere.

Regards,

Peter.

Hey,

How about a big one, mounted on a boat. Sunk in to saltwater. Maybe out in the middle of the Pacific ocean (whew been a long time since I spelled that). Or would the Atlantic be better. MMM

But it has to be in the Middle. Then the radiation suit may be readily available giving the current status of our current events.

We can all sit on the beach and watch for the glow. And say, now there is a person who cares about his neighbors. :)

What kind of filters could he find to keep that from coming across the microwave. I will have that guy calling me and talking for an hour on the toll free line telling me how he hears his refrigerator talk, and toaster, and microwave. It think he told me he heard his silverware talking the last time he called.

Yeah.

You're on drugs again. If someone wanted to "make" their own crystalled
out 40 channel radio, they certainly could. But the FCC did not
authorize 40 channel radios to be legally sold until Jan 1st, 1977.
That's a fact, told to you from someone who was there then.

Don't waste your time. Twisty believes what he wants to believe, no matter what facts or logical conclusions another person may provide to discredit him.

His poor comprehension of networking protocols, and internet routing, allows him to make false conclusions about where certain people post from. When you try to set him straight, he accuses you of lieing.

His inability to follow analogies or to comprehend (which may be partially the fault of that lame webTV) ideas, allows him to draw incorrect conclusions. Note how his replies often mix quoted text from several different people in the reply chain, and is difficult to follow for those of us with "real" newsreaders.

This, of course, leads to his enevitable twisting of words or the assumption of implied meanings that may or may not be there. He then substitutes his implied conclusion for fact, which further clouds his objectivity. When you attempt to correct this incorrect assumption, he calls you a liar. Go figure. He also has a very annoying habit of not being able to stay focussed on the topic, instead spending too much time on nuances, and going off on tangents, that are only remotely related to the original subject. When you attempt to bring the train back on track, he then accuses *you* of changing the subject.

His fragile ego, which needs constant validation from others, real or imagined, drives him to make statements like "The majority of hams agree with me", or "The majority of the newsgroup agrees with me", etc. This constant need to align himself with this silent "majority" illustates the importance to him, that his views be accepted by some large group. The fact that he relies on this imagined "majority", for acceptance also underscores how poorly his ideals stand on their own. I suspect that in real life, quite the opposite is true, as he is likely a loner, finding

little in common with anyone. Any rational person would realize that speaking for the majority of any group is an impossible statement to make, since he's not in a position to know what anyone, outside of his small circle of malcontents, thinks at all, much less a "majority". Yet Twisty's view is always in the majority, despite the fact that no one else has ever spoken up publically and offered up their support for his "view" of things. But it must be true, because he says so. He's a legend in his own mind.

The realization, that some people know him and his particular psychosis, only too well, makes him very uncomfortable, which causes him to lash out with much vitriol and ad-hominem attacks. This also drives him to spend an inordinate amount of time sifting through archived messages to fuel his quest. Where most rational, mature people, would simply ignore others who do not share their vision, twisty devotes much time and effort in maligning them instead. This is also indicative of an obsession, which is further evidence of mental psychosis.

His "proof" is nothing more than a warped opinion, based on invalid conclusions, derived from a general inability to fully comprehend the subject at hand. Yet he'll accuse his opposition of the very same thing.

You could tell him a bunch of facts and he'll just accuse you of "lieing". Such is the nature of the beast.

Try to tell a nut that he's nuts, and he'll swear that you're crazy. Which is why I find it more rewarding to argue with a brick wall. In the end, you accomplish the same thing, but it's much less messy and it might save him from finally snapping and going postal or such. Good thing he lives in the swampland of Florida, and not in a well populated place like New York City.

That's why I've chosen to ignore his feeble attempts at maligning me. I care little about what he thinks of me. I would trust that the others on here, that have been around as long as I have been, also know better.

Of course, if you're just taking a shot at the punch clown, for pure entertainment, then ignore what I've just said, and have at it....

> Wilson makes an excellent antenna but the van has a fiberglass roof. Now what?

20 years ago, I had a Ford conversion van with the raised fiberglass roof. I ran a gutter mount at the rear gutter, where the original van roof ended and the fiberglass top started. I used a 4 foot fiberglass whip, with good results. Your pattern will be somewhat directional toward the front of the van, but SWR was good, and it seemed to perform well. A Wilson 2000 will work well in that application too.

I noticed the same thing. His attacks have become more venomous and more intense as of late. I guess when the holiday season approaches and you have no one to spend quality time with, it brings out negative feelings. Some people get depressed, some turn to anger.

I agree. I was hoping someone had tried it. I received a nice e-mail stating essentially the same thing. I saw the IEEE papers on a theoretical antenna that could become vanishingly small - and yet work. However, since the theory, there have been a number of antennas - some commercial installations. So far it seems the commercial antennas appear to work, but as the field strength measurements appear to have been 'fudged' a bit, not as well, perhaps, as advertised. Other designs have appeared, yet no individual seems to have been able to reliably duplicate the claims.

Thanks for the input & 73 from Rochester, NY
Jim

> to be on those frequencies.

True.
Still, making sure you are only radiating the intended signals is a very
good first step in troubleshooting. I've seen cases where amps have gone
into spurious oscillation, being a transmitter all by themselves on some
uncontrolled frequency. Sucks your power down, and causes serious
interference.

> Are your legal CBs not made to a standard, with a very low
> harmonic and spurious content?
> I know that ours are in the UK. They have undergo Government
> testing before approval.

Yes, but non-approved ones are on the shelf, and aftermarket mods, and
"linear" amps that aren't linear are quite common. The amps are illegal full

stop, but that hasn't prevented them from being available.

> To make a noticeable difference to your distance, your signal would

> Now, I have seen this happen... but with an illegal and seriously poor
> modification. The radio was putting out signals all over 10 and
> 11 Metres, due to mixing in the PLL section of additional xtals.

Me too, which is why I mention it.

> Front end overload cannot be cured by "cleaning up your signal". In the
UK,
> the "RA" (Radiocommunications Agency" and the "RIS" (Radio Investigation
> Service) both seem to accept that the most common cause of inteference in
> overloading of poorly designed domestic equipment.

Without knowing exactly what sort of interference is happening, it's hard to be specific on cleanup steps. I don't know that front end overloading is the problem in this case.

> As the person has said that space and location of antenna are a problem...
I
> would suspect an overload problem. If he is already running a legal
system,

It's not legal, but they are sold, and of course after-sale mods are common.

"Dave Hall" <nojunk_n3cvj@worldlynx.net> wrote in message

: Don't waste your time. Twisty believes what he wants to believe, no
: matter what facts or logical conclusions another person may provide to
: discredit him.

Dave you are correct it is a waste of time like arguing with a mental
patient from Bellevue.

: When you try to set him straight, he accuses you of lieing.

Yes, I have seen this first hand. His non comprehension of things means the
person who siad it is lieing LOL

: Note how his replies often mix quoted text from
: several different people in the reply chain, and is difficult to follow
: for those of us with "real" newsreaders.

Dave that is all part of the twisted persona/MO baffle us with bullshit.

:
: This, of course, leads to his enevitable twisting of words or the
: assumption of implied meanings that may or may not be there. He then
: substitutes his implied conclusion for fact, which further clouds his
: objectivity. When you attempt to correct this incorrect assumption, he
: calls you a liar. Go figure.

Dave absolutly, here is a example of how he twists the context of a sentence

I would say something like " I don't think the sky looks red today, it looks
blue to me.

Twisted's repy would be to twist it out of context like this " the sky
looks red today" and he will then say I said "the sky looks red, classic
example of twisty at work.

:He also has a very annoying habit of not
: being able to stay focussed on the topic, instead spending too much time
: on nuances, and going off on tangents, that are only remotely related
: to the original subject. When you attempt to bring the train back on
: track, he then accuses *you* of changing the subject.

LOL Dave you have sure got him bagged and tagged, damn to a "T"

:
:
: His fragile ego, which needs constant validation from others, real or
: imagined, drives him to make statements like "The majority of hams agree

: with me", or "The majority of the newsgroup agrees with me", etc.

I have yet to see the NG jump in to help twisty he is out there alone, I
think they also think he is a whack job.

: Yet
: Twisty's view is always in the majority, despite the fact that no one
: else has ever spoken up publically and offered up their support for his
: "view" of things. But it must be true, because he says so. He's a legend
: in his own mind.

Dave what he says doesn't matter he has admitted to being a troll remember
his statement of " return fire" that means he also is a troll. If someone
else does it he will do it LOL kinda childish.

:
: The realization, that some people know him and his particular psychosis,
: only too well, makes him very uncomfortable, which causes him to lash
: out with much vitriol and ad-hominem attacks. This also drives him to
: spend an inordinate amount of time sifting through archived messages to
: fuel his quest.

Yes, I have him scouring the archives now, he says he has facts that I lied
I am waiting for them, not just his twisted opinion.

Where most rational, mature people, would simply ignore
: others who do not share their vision, twisty devotes much time and
: effort in maligning them instead.

rational and twisty don't go together.

: His "proof" is nothing more than a warped opinion, based on invalid
: conclusions, derived from a general inability to fully comprehend the
: subject at hand. Yet he'll accuse his opposition of the very same thing.

Ah , so we think the same of this vermin, his proof is exactly as you say
his opinion, LOL
dave LOL it is only return fire.

: You could tell him a bunch of facts and he'll just accuse you of
: "lieing". Such is the nature of the beast.

Dave, people like twisty who are a liar, accuse others of doing that
because they need to justify there own lies and think everyone else is like
they are a liar.

: Try to tell a nut that he's nuts, and he'll swear that you're crazy.
: Which is why I find it more rewarding to argue with a brick wall. In the
: end, you accomplish the same thing, but it's much less messy and it
: might save him from finally snapping and going postal or such. Good
: thing he lives in the swampland of Florida, and not in a well populated
: place like New York City.
:

Oh boy I couldn't imagine this fruit loop running the streets of NY, he would probably fit in though

: That's why I've chosen to ignore his feeble attempts at maligning me.

Dave hey he is allowed return fire remember, it is ok for him to do it.

: Of course, if you're just taking a shot at the punch clown, for pure
: entertainment, then ignore what I've just said, and have at it....

Dave it is somewhat entertaining listening to him babble and twist and fabricate lies, you would think people like twisty are locked up, yet they are walking the streets hide your children.

I agree. Some folk just got
shit-fer-brains. (mostly republicans of late)
The GOP constantly promotes
freedom of choice. (unless a unwed mom's
fetus is concerned of course...)

You can also get Kriegsmarine Georg":

http://www.actionfiguresspain.com/wwiileaders/georgcaps.htm

"Kamakazie Pilot Hiro Hosushi":

http://www.actionfiguresspain.com/wwiileaders/jap.htm

"Baron Von Richthoffen":

http://www.actionfiguresspain.com/wwi/baronrojo.htm

..or even BUFFY the Vampyre Slayer!! (I kid U not..)

http://www.actionfiguresspain.com/chicas/buffy.htm

I just wish that I'd thought of these
"Action-Figures" first - what a cash
cow this could be for the creators!

Finally, can't you really *just imagine* George W Bush
locked away in the Lincoln Bedroom at 2 AM, with the
whole Action Figures collection and some GI Joe's
spralled out on the floor...and GWB (in his Texas bunny pajamas)
playing war games like an 8-Year Old...????

Comedy Central Networks or Late Nite should get a set
of these dolls (along with a Saddam Hussen and Bin Laden figure)
and do a comedy bit/sketch along these lines.....a real laugh-so-hard-
you'll-pee-in-yer-pants fer sure!

: language what would you call that?
:

I would call that a usual day for Twisty, sounds like you got him pegged.

: > But there is really no concrete proof of this either. If one
: > wished to be anonymous, it's not too hard to take advantage of anonymous
: > remailers or other tricks.

: Agreed, when using anonomous remailers. But do a Dejanews
: search on "Snapperhead" in Rec.Radio.Cb only and see what
: you come up with.

So what does the use of the word Snapperhead in this NG mean? What does it have to do with what Dave is saying. What is he to come up with if he does a search ? Ill give a little help

What is a snapperhead?

Contrary to popular belief, a snapperhead is not a person who wears a fish in their hair. It's a term I first heard while living on the East Coast. It's normally bestowed upon a person who has earned the disdain of the bestower. While not particularly cruel or vulgar, I certainly would not let someone call my little brother a snapperhead.

Compare it to calling someone "stupid", "dork", "moron", or "weisel".

Freedom of speech, of the press, of association, of assembly and petition -
this set of guarantees, protected by the First Amendment, comprises what we
refer to as freedom of expression. The Supreme Court has written that this
freedom is "the matrix, the indispensable condition of nearly every
other form of freedom." Without it, other fundamental rights,
like the right to vote, would wither and die

I would like to replace the 2SB754 (Q51) with
the 2SB688 for better modulation.

What are the pros and cons to making this
radio modification ? Would it be harmful
to use a power mike once done ?

Anything else needed to be done once this
transistor is replaced ?

Any other diodes or resistors needed to be addressed ?

"You always manage a way to work your leaglities into the subject.
Please
allow me to displace your bullshit.
Being a ham doesn't offer any of the above with the exception to more
spectrum. One can operate all the modes one wishes on 11, they work just
as well on 11 as they do 10. Some run as much power as they wish."

Bingo..there it is......entirely indicative and being compared
to.....tadaaaaaa: 10 meter.
No one else seems to have the problem with it that you are
experiencing.

>Its clear that you do in fact get more as a >Ham. Yeti did not confine
his comments to >strictly 10m , or any other band. He was >speaking
about Ham Radio in general.

But I was very clear about what I spoke of

>Now you opened your mouth and clearly said >"One can operate all the
modes one wishes >on 11,".

Once again, snipping a part of a post in the manner in which you have
done changes the scope of the context. If I would have said only the
part which you cut, snipped and reposted, you would have a point, but I
was very clear about what I said. Your comprehension problem is
manifesting.

>So I picked some. Its not my fault that your >ignorant about all of the
modes that are in use

Gee, Mr. college grad, that would be "you're".
Here we are almost 4 years later and you still give me all these
opportunities to educate and enlighten you. Please continue to make us
howl with "your" ignorance.

>on the Ham Bands, then erroneously >assuming that they work on 10m,
thus they >should work on 11m as well. Nope.

Oh? What mode works on 10 that couldn't be accomplished on 11?

>--

Thank you, JJ. I can't speak for anyone but myself on this issue, but you are 100% correct in your observations.
It's not like all I do is DX and freeband on the cb. Sometimes I freeband *after* doing the local thing..or dxing on 38 low.
Today I did the barefoot Galaxy thing from 8 miles out...it worked fine and got me everyone I needed it to. When there is no dx, I do the local thing on the reg 40. I love local banter as much as the next guy and when the dx goes away, that's where you will find me, but while it's here, I enjoy it and make the best out of it and I don't run gobs of power either.

Gap has been around for awhile, and the antennas do pretty well. I have a friend using the "Titan" and it performs well, although they are a "compromise" antenna. Isotron is even more of a compromise, but they do excellent, despite their appearance. See http://www.rayfield.net/isotron/

Set the wattage to whatever the LEGAL limit is for your country and all
should work OK.... :-)

Source record: 145291

The insults are all return. I have never done a single thing to anyone in here, the wellknown cowards of yourself and Hall and Doc and Lelnad included. I say again, if you can't take it, don't dish it out. You sound like a woman with your whining
****
>Twisty you are the one doing the whining >talking about others who you say insult you,

Actually, that isn't what is taking place at all.....you are crying about what I say in my posts, calling me a hypocrite..I merely pointed out that what you complain about would never even be if the person they were directed to did not choose to become personal or insultive themself. It's a simple matter of treating people the way you would want to treated yourself. Any spin you attempt is bullshit and immediately recognized as such and thrown out the window.

>and yet you then say how wrong they are for >doing it, all in the mean time you return Fire as >you say and do the same thing, and yet cry >about them doing it, can't you see that your a >hypocrite? 2 wrongs don't make you right >either. They do it so you do it sounds like your >a 10 year old.

Oh well. I fight back...always have..use this analogy.......assaulting someone, or any form of violence is wrong and there are laws in place against such behavior. If someone assaults me or commits or attempts to commit an act of aggression against me or my family, I will retaliate with any means I deem necessary to stop the violator. Laws aren't any good when no one is around to enforce them, but you of all people know this best. It's why you run around holding your breath taking hissy fits about cbers. You feel it gives your empty life meaning.

>should you be taken with any credibility if this >is what you resort to

Hhahaha..what I "resort" to is whupping your azzes with your own game.

>So you say

So do the ISP's.
You guys had no clue the rock you were overturning..like usenet..you can't take it back (roaring with laughter)!

>Youare correct on that I knew you crawled >from under a rock.

Not exactly...I was born in the desert, raised in a lion's den.
Return fire and it is burning you fast. You are very quick to attempt to perpetuate against another :what you cry is unfairly,

>Return fire, nah just hypocritical fire, you cry >that those hurl insults then you turn around >and do it then get your panties in a bunch

It's your panties in a wad Georgey girl...you're the *only* one screaming.

> when I remind you the jackass you are >making yourself out to be.

DOH.....you sure told me...(snicker)

Hypocrite and Liar
are a few names that come to mind when I think of you, Lelnad and Hall and Doc.

>Hmm those were the exact words I used to >describe you a few posts back, I see they >made there way back to me so I guess this is >return fire to, well he called me it so Ill call him >that typical of you twisty.

Sure....another picture-perfect illustration of you sissies not able to take your own medicine..they WERE your words,,I just returned them and lookie how you took issue with them.once agian,,,treat those as you would prefer e treated yourself, ya' hypocritical, communication-challenged parasite!

>here is a hankie for you, go wash off.<

Your originality appears limited only to what I have said in the past to you.
I don't turn anyone in who doesn't harass me. AS sharkie noted, if your losers would obey the rules of their ISP, whatever I complain about is irrrelevant..hahhahahhaha! Poor Boy George.
"Hypocrite" is applied...such as been done with several "hammies' lately..Dave Hall lied about everything and still is..... here is a criminal telling another they are breaking the law.
He may "have" been a criminal in the past,

>does that mean he still is?

Sure he is..a liar too.

>Perhaps he has seen the light maybe you
>should too.

Then he wouldn't be defending amps he claimed were illegal only 2 weeks ago, but, alas, he did, so your attempt at lawyering for him is null. How much credibility do you actually think that carries?

>What all your Lies? and hypocritical >statements.

Hall's self-contradictions. The contingency has noted he talks out both sides of his azz/mouth without any assistance from me or you. Paul Lalli lied and said his server was down when it was proved otherwise.

>who is Paul lalli? and how was it proved just >because you say it >doesn't make it so.

Paul is Doc.......you are correct....it doesn't matter what I say,,

>Yes I know I am correct it doesn't matter what >you say.

Again, I agree with you Geo.. the proof is in the post from Doc's
neighbor that his server works jes' fine. No one's opinion means
anything when presented with hardcopy solid proof.
you See,,I have hammie friends all around...it's exactly how Lelnad
was caught trying to pathetically be heard on the freeband jamming me..

>Oh so your saying a Ham heard him on the >freeband?

Something like that..............

>and he was saying he was twistedhed?<

No...he was ghost-talking and then resorted to deadkeying rapidly after
he realized he didn't have the azz he thought he did to get out and walk
on me.

>I don't know why he would want to be you of >all people.

Ya' know....me and Dick asked him the same thing when he forged
me....why don't you ask him..maybe he'll answer you...he LIKES you.

>I think that Is a boldface lie. Where is your >facts or proof ? Earlier
in this post you did say >you only post facts.

Correct.

>Well prove it otherwise what you say doesn't >matter and is to be taken
along with the rest of >your words an outright lie.

I really don't give a damn how you take it.
The sun will still rise and set on my house long after you are gone.
Making you selfish bastages realize how insignificant you actually are
has been an added pleasure and bonus I didn't count on.

how else do you think we know he has his call on his plate?

>because he said it was.<

He did? When? Where?
Hammies hammies everywhere and nuthin' you can do about it!!
Hahahahahahhah!

>No there is nothing you can do about it.<

Why would I want to do anything about it? The crusade is yours...I like
things the way they are just fine...hahhaahahha!

It was very easy to show he is a lying sob just like you

>really well post some of my lies then, <

Already have. You misattribute more than anyone here, well, at least as
much as the half-a-hammie Lelnad that no one wants or claims and the

hypocrite Hall.

>you have given these guys all that attention<

They ask for it....so do you. See, what takes place on usenet, is when you drect a post to or about someone, you can expect a reply. Simple. Too simple, as a matter of FACT, for some of you. Hall is feeling so alienated and defeated that he had to claim he was killfiling me just because he couldn't muster the self-control needed not to respond, as each time he did, he allowed for more crow.
Funny thing..killfile someone,,,,and spend your wind and time talking about them....mmmmmph...ahahahahhahahah!!

>pos<

Doh.........

>some of the things you say I am lieing about, >you do posts facts right? So lets have my lies >with something to back up that they are >indeed lies. Other than your opinion. OK I am >all ears and would love for you to bring my lies >out in the open. Father twisty. No rush, and no >opinions just facts .. Ill be waiting.

Fine.
Pertinent fact number one: You are recognized, now that "arron" was hung out to dry, as the biggest troll in this forum. Asking someone to prove that YOU don't lie, well, once again, the comedic irony is lost on you, but that's ok, cause some of the best laughs have come from you phreaks not even being aware of what time it is.

Lost ISP;s..fact. Doc lied. Fact. Hall lied. Fact. Lelnad forged and lied. Fact. It isn;t what I say, Boy Georgey, their own posts haunt them..yet you fewls continue to try and attack the messenger for pointing out your self-contradictory posts..and lies.

>well search the archives and point out my lies >with FACTS not opinions can you do that.

I already have. I have asked of you several times to show your basis for your false allegations and misattributions......you ignore all requests...the opinion is all yours.
It's all y'all can do, cause you GOT nuthin' else.
You and the nad man and Hall are bonafide liars and parasites to hammie radio. All facts.

>All Facts?? LOL If they are facts it should be >easy to prove I havent lost any isp mail >servers or whatever so go ahead and prove a >few things.

Please show where anyone said you lost anything, boy Georgey. <g>

and comment and flame me all you want........

>Here is a hankie again twisty your crying >again, and yet continue the hypocritical >approach, hurl insults etc and think that it is >ok.

See analogy above.

>Listen to twisty croon as he hurls insults at >those he claims do it .

Claim? No my son,,,it is no claim..it is a plain simple facts backed by y'alls posts....it's why I love usenet..you girls can't take it back.

>And neither can you you have insulted all >those you accuse

Now you're paying attention. All those I have "accused" have posted defamatory, derogative, personal, atttacks and/or insults.

>and the excuse it is return fire is so lame not >one of your keyclown heathen will back you on >it.

That's because everyone can see for themselves and is quite aware I need nothing from anyone concerning my lapdogs. I am quite the independent trainer. Truth needs no "backing".

>Facts are true statements backed by proof.
>Start putting facts forth concerning me >otherwise it is lip service and whining.

So? Throw it out the window if it doesn't apply.
Whining and crying and sniveling like a school marm deos nothing to facilitate your expressed opinions.
Everyone knows you are washed up and
tired...hell, most don't even read your posts,

>Oh I see they keep you busy my impotent one >from florida
>That word is your favorite when your getting >spanked you throw it >around like the boy who cried wolf.

Gee, Boy George, ...you appear angry.

>No more than you dementedhed

Doh....ya' know..the more I think about it, the more it appears you did lose an ISP......everyone knows you had two services anyway,,,,,,,,,,if I'm wrong..no harm donw..but as you are beginning to cry as much as Hall, and I know he;'s a guilty SOB....sniveling about something "it may not really be spam that people are reporting"..hahhaha..he should walk around with a sign on the front of him that says, "I'm guilty" and one on his azz that says "kick me hard".

Don't worry,

>Me worry? Nah your worthless.

we won't

>who is we?

Dunno. You hacked whatever it was.
go back and take a gander.
Laughing at your impotency does not constitute a fetish...as another matter of fact, there would be nothing to laugh about if you girls had a clue or were effective in any of your endeavors, but seeing how y'all are magnificent failures at hammies and human beings,,,,,,,it makes it all worth while to watch you dogs squirm on the floor.

>Are you on meds for it?

You claimed "consequences" for us......failing to produce as usual,

>Yes. if you break the law and are caught there >are consequences, I am not the FCC I do not >hand out the penalty for operating illegally that >is up to them so yes your illegal operating >does have consequences.

Since when?
Everyone knows by now that you are impotent Georgey,so please try to refrain from exhibiting this in the future ad keep your personal life seperate from what goes on in this NG. I have maintained that those with the greatest deficit in communcation (such as the posse you belong to with Lelnnad KC8LDO and N8WWM and N3CVJ, all named by "arron" voobner) always get personal.

>Our choice to let the illegals know they are >breaking laws.

Has nothing to do with obeying rules or else connections to this group wouldn't be lost at such a comical rate by those who have cast such huge stones.
Hhahaha..read it again, Boy Georgey.

"The issues got blown out when certain individuals came into this group, started spouting the "Rules
& Regulations",

"Yes the dreaded rules and regulations post they knew when they did that it was now going to be nothing more than them to troll the group, as they are still doing to this very day."

>They may have did it to educate, you and your >band of loonies jumped all over Mark fuller >and anyone who dares >speak out against >illegal radio.

I wasn't here when this other loser you speak of was your God, but I still am enamored over being elected to take his place by you and Lelnad and Hall and, gosh, now Doc.

>More insults and lies... hypocrite<

Dohh.............(yuk yuk yuk)

No really,,,,,everyone knows how ya' losers gravitated toward me..I certainly didn't go looking for you girls.....y'all came to me.....as always..I just sit back and relax and y'all do it to yourselves oh so much better than anyone else ever could :)

>I wonder why Landwhale<

There you go again.....insults for no reason other than you don't like
what he says.
Juvenile comes to mind.

>Yes, I was thinking that as well,<

So what are you saying? It's the Tourettes, again?

>perhaps why I called you Jr, you simply >havent grown up or perhaps
>you did and you are retarted,

Oooo, dat hoit, Boyy Georgey wa3moj.
Check your spell check, Boy wonder.

>you claim others insult people then you do

Return fire. Can't take the heat get out of the kitchen, boy Georgey
wa3moj.

>the whole post makes you wonder what is in >the water down there.

Making you wonder is no feat.

>is so concerned about foul language and such >in this NG he had one of
the foulest mouths in >the NG, wanna see some examples Mark?

Oh, so N3CVJ can claim he has "learned" since his days of posting his
criminal endeavors for all to see, but it isn't ok for sharkie to clean
up his language?
Well according to you what Dave Hall did
before should be held agaisnt him now,

> I said nothing of the sort. <

Sure you did. You said he learned from his behavior..I showed he did not
and is still operating illegally, but has a hard time admitting it. He
has this false image of himself that only he envisions....it's part of
what makes Dave an entertainable and sometimes likeable guy.
Am I incorrect? Do you still hold it against him?

That is 5 false attributions you attempted but failed with in this
thread, but poor boy Goigey couldn't produce anything but
words........nothing..nada..not one iota of anything that can back any
of your lies.
hahahahhhaaha!.

>which set of rules is it this time .... Jesus >friggin Christ
>Twisty YOU ARE A
>HYPOCRITE!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
>!!!!!!!!!!

Then show something of substance instead of crying crocodile tears to
usand howling ike a school marm.
Thing is, N3CVJ DIDN'T learn,

>just because you say it doesnt make it so<

Sure it does...especially when Dave Hall said it himself.He claimed he learned since those days but self-contradicts his own posts from two weeks ago..complete and polar opposite of what he posted a mere two weeks ago,,this makes him a liar, con man, lawbreaker, and of cource, your fave....a hypocrite.
..
>And I beleive he has as much as landwhale

As much WHAT?
Since I have been around, sharkie has done nothing to anyof you but return the bulshit from whence it came. He is to be commended for not laying down and taking your bullshit and stuffing it right back down your sorry throats.

>has so which set of rules is it I will ask again.

Ask what?

>the Hypocrite from Florida rules?

Oh, there is no hypocrisy. I make no bones about dxing and freebanding boy Georgey. Unlike you girls, I have no reason to hide my actions or words.

"Freedom of speech and the ability to express a dissenting opinion, really bothers you doesn't it?"

>Yes it does<

Then you should get the hell out and leave the country for those of us who cherish it and would die for your right to say it.

>Wasn't talking about me snapperhead <

Sure it was...YOU said it.

>butyou knew that it is just another feeble >attempt by you to snip my >post and try and change the meaning.

Look at the posts again, boy Georgey..you are the guilty "snipper" head, not I...ahahahahaha!.

>If you post the rest that you cut you will see I >am not talking about >me, you know that, it is just another twisty >trick went bad

Read it again...you said it, I just pointed it out..unlike you, I need not make up anything..merely use y'alls own posts to consistently and constantly remind newbies that the members of AArons pets are not to be trusted. Y'all made your own bed and now you are forced (as in have no choice) to lay in it and stink.

You and the nad man and Hall are bonafide liars and parasites to hammie radio. All facts.
You can sit here and fill the group with your hate that consumes all 3 of you and comment and flame me all you want........it changes nothing concerning your own actions.

>Heh Heh Heh... Sure looks like Twisty's >heading for a nervous breakdown.

That's why I keep you around, Hall,,,your intuitive and dead-on uncanny observational skills.....hahhahahhahahaahaha!.

>All he can say now is, Liar! Liar! Liar! (Your >pants are on fire!).

Well, Idon't hae to say it to make it true...you took care of that all by lonesome.

>There are doctors who can ease your pain. A
>little valium, or maybe a little Prozac, can work >wonders for you.

You sound like you talk from personal experience. As many times as you losers can't comprehend what is being said....I don't use drugs....I don't smoke.....I don't drink,,,and I don't take over the counter meds either. I find it's better to live a somewhat healthy lifestyle and not get sick.

>And maybe you'll see reality in a much clearer >light......
>Dave
>"Sandbagger"

Well, now that we see you feel that narcotics are necessary to improve comprehension, maybe you can take one or two of them drugs you speak of and elaborate on two points that have you embarrassed, eating crow, and hopping like mad to retrieve the credibilty that you lost weeks ago.

1) You claimed you only "borrowed" (whatever that term means in the world of computers) an email addy from villanova only once, years ago. Some of your headers still show the same...so, in this instant.."Liar liar pants are on fire" ..ahahahahahahahahhahahahahahhahahahaah!

2) When you say you are going to ignore and killfile
someone.....do it, elst your lies are becoming as commonplace as
your posts..

Sure, Lelnad. I'll invoke the good spirit of Dick

>He would turn over in his grave if he know you >were trying to use him
to further your >misguided agenda. You are one sick puppy.

You're the dog kennel lead dog, Lelnad, not I. I did nothing but repost
his post where he popped your azz.

>He in fact figured out the post(s) you like to >drag out are in fact
forgies.

But...as usual,,,,you don't have THOSE posts..or wait..let me
guess....he emailed YOU! (SCREAM HAHHAHHAHAHHAHHAHHAHAH!)

>I was not the only one on the group who saw >through the crap and
mentioned it to him.

You're right...Dogie NWWM was there in full force with you, as usual.

>Of course this still does nothing to further your >agenda.

It was your agenda....always was.

> You still can't prove who is on the sending >end of any posted
messages, even this one.

>So I'll make this easy.

You gonna watch Mr. Rogers?

>Just prove THIS MESSAGE was posted by >me .

LOL! You're really pathetic. No one cares about your identity games.
Dick's word will always be taken over yours,,,,,long after he's been
gone.
All you do is solidify what I have maintained about you concerning your
obsession with identites. Get over it.

CB radio is not regulated by the states but by the federal government.
Unfortunately, Florida is still part of the United States, so SSB is
just as legal in Florida as any other state. For future reference,
here is the FCC's page about CB radio:

http://wireless.fcc.gov/prs/citzn.html

>Any advice on a good rig thats AM/SSB? Thank you.

Anything that works. You should probably avoid older 23 channel radios
because most SSB talk is on channels 35 to 40. I would suggest
starting with a cheap radio. Use your money for a good antenna & coax.
An external speaker is also a good idea cause the built-in speakers
usually suck. Next on the list should be a good mic. If you get a
power mic try to avoid the urge to crank it up -- turn it up just far
enough to send out a nice clean signal. And then, after you get your
station running nice and smooth, you might consider getting a better
radio.

Very helpful, Lelnad. This guys doesn't know cable from coax
characteristics

>And maybe he does to some degree so >congratulations for just insulting
the guy.

Well, if he did to the degree you ASSumed, he wouldn't have needed to
ask.

>Or is it that you now claim to have the psychic >ability to read minds
too, something you >learned from hanging with the "saucer men"?

Acyually, I learned it from you a few threads ago attempting to do it
for Mopar.
Problem taking it back, NAd?

or else he wouldn't have asked and you give him a song and dance.

>I charge for concert performances.<

Oh yea? In addition to your $126,570 per year salary you claimed? Why do
you live in subsidized housing if you make that kinda money? Ah Never
mind.....

> And I wouldn't give you a back stage pass no >matter how much you
begged me for one. 8-))

I don't listen to Disco and I don't own a cat. I keep telling you, not
everyone is like you.
Then to top it off, you suggest he build impedance transformers.

>They do work.

Your assumption that he understands how to build one after the single
question he posted......doesn't.

Let me guess,

>That's all you ever do twisted<

Quite accurately, it would appear. I have the whole lot of you crying
today..you and Hall and Boy Georgey.....

you desperately hoped he would inquire as to how one is constructed and
you would be more than happy to oblige......

>He could always use Goolge and look it up on >the Internet for himself. Of course you wouldn't >think of doing that because its beyond your >metal capacity.

Metal? Nah...I'm too old for that....last good metal band to come down the pike was Deep Purple...besides,,,,make up your mind with your self-contradictory self...(haha)...i some of your posts you accused me of crusing through google...now you claim I can't...oh NAd..not looking good for you old chap, not looking good at 'ta'll.

why not just tell him the bottom line..... cable coax sucks for all practical cb purposes.

>Wow!! You just did. So what's he suppose to >use 450 ohm ladder line now?

Go to rat shack and buy some rg 8 or 58, it's cheap enough.

>You do know that RG-8 and RG-58 are "cable >coax". So why are you now all of a sudden >telling him to use cable that "sucks for all >practical cb purposes"?

Because the TV cable coax characteristics, as you have noted, are undesireable as they are in their present state.
Whatever you do, do not listen to Lelnad and company. They have been known to intentionally give advice that will fry cb radios. We validate them when we're bored for entertainment purposes only.

>When you lose your temper you can't think >straight can you Twirted?

That only works on you, Nad, not I.

>Besides why pay attention to you? You don't >know anything about electronics, and that's by >your own admission too.

That was correct back then. I have learned all kinds of wonderful things from my newfround webbie cbhammie friends.

>Then Prozac summed things up rather nicely.

And you see where he is today.

>

Me too. I'd love to give it a full test.

First off, just because something is patented doesn't mean it works. You
don't have to show a fully-functioning unit to get it patented. In the
1800's, they used to patent perpetual motion machines, yet nobody has ever
produced a working model.

From the website:

IT MAY BE SMALL, BUT IT IS LOUD

"Loudness" has never been a unit of antenna performance.

Exceptional Efficiency = Efficiency approaches 100%

I highly doubt this. An HF antenna only 3 feet tall with nearly 100%
efficiency?

Outstanding immunity = Virtually undisturbed by nearby metal

This I also find suspicious. All antenna's transmitting & receiving
patterns are affected by nearby metal objects. They don't say what method
they used to arrive at this conclusion.

TVI - EMI low = Not prone to coupling on wires

I find this hard to believe also. TVI can be caused by poor shielding
inside the TV itself. The website seems to imply that the antenna doesn't
receive EMI. Electromagnetic interference is made up of radio signals just
like the wanted signal.

I didn't see a price anywhere on the website, but am curious as to what they
want for that antenna.

Tom

> leland name me one mode of operation hat works on ten meter but not
11?

OK Ham satellite communications. Specifically:

RS-12
Uplink 21.210 to 21.250 MHz CW/USB
Downlink 29.410 to 29.450 MHz CW/USB
Beacon 29.408 MHz
Robot 29.454 MHz

RS-15
Uplink 145.858 to 145.898 MHz CW/USB
Downlink 29.354 to 29.394 MHz CW/USB
Beacon 29.352 MHz (intermittent)
SSB meeting frequency 29.380 MHz (unofficial)

AMSAT OSCAR 7 AO-7
Uplink: 145.850 to 145.950 MHz CW/USB
432.125 to 432.175 MHz CW/LSB
Downlink: 29.400 to 29.500 MHz CW/USB
145.975 to 145.925 MHz CW/USB
Beacon: 29.502 MHz, 145.972 MHz, 435.1 MHz, 2304.1 MHz

Since there are NO operational transponder links anywhere on 11m so
its impossible to conduct communications through those birds on that
band. The only access is on the legal Ham bands.

There has been discussions about including HF capabilities on the
International Space Station some time in the future. If and when that
occurs it will be just one more mode of communications that CBers
won't have access to use without a Ham ticket.

Twirted got sloppy when he wrote the comment about "One can operate
all the modes one wishes on 11,". Its just not true.

If you want to act as his "apologist" you're going to get a good work
out on this group.

Twist, I'm a bit skeptical too. I read an IEEE article on exceedingly small antennas. They are theoretically possible. Of course, time travel also appears theoretically possible - as long as nothing is changed to affect the future. Problem is, how do you avoid changing the future? Sure, you can't kill your parents before you were born - but you might step on an ant, or set a virus free before that virus existed. So .... possible in theory, but is it truly possible? I sure don't know. One thing is sure, no vertical quarter wave (or shortened vertical) is going to perform like a yagi, but it would be nice to have a small antenna hidden in an attic that would work as well (say within a dB) as a full size vertical mounted outside.

Yes, and I believe they are capacitive loaded antennas. Many have used them and although not claimed to be equal to a full size antenna, they do fairly well. I've seen articles by folks who raised them to the same height as full size antennas and they do quite well indeed. Loops also can do quite well so long as they don't get too small (at which point radiation resistance gets small enough that the IR losses start mounting in proportion to the radiation resistance. Often they may only be around 50% as efficient as the full size antenna (less at lower frequencies). The tunable loops that cover 10 MHz to 30 MHz do quite well on the higher frequencies, but start dropping off below 21 MHz.

The insults are all return. I have never done a single thing to anyone
in here, the wellknown cowards of yourself and Hall and Doc and Lelnad
included. I say again, if you can't take it, don't dish it out. You
sound like a woman with your whining
****
>Twisty you are the one doing the whining >talking about others who you
say insult you,

:Actually, that isn't what is taking place at all.....

Oh it sure is you just don't want to admit it or are to niave to see it.

: you are crying about what I say in my posts,

LOL not at all I am not crying about what you say, I am poiting out how you
are a hypocrite for crying that others do it then you do the same it is very
easy to understand why are you having trouble understanding your double
standard.

: calling me a hypocrite..

and you are

: I merely pointed out that what you complain about would never even be if
the person they
: were directed to did not choose to become personal or insultive themself.

Ah another twisty excuse/lie, I see others validate you they make you act
like they do interesting, but lame.

: It's a simple matter of treating people the way you would want to treated
yourself.

Ok, I got it the your an asshole I am an asshole, the problem is you don't
think your an asshole, for doing the same thing.

:Any spin you attempt is

What going to be called a lie?

:Oh well. I fight back...

This means your not a hypocrite? this means you are right?

: ..use this analogy.......

Sorry changing the topic at hand is what your noted for I will snip it right here and not comment it has nothing to do with what we speak of another impotent misdirection ended.

(offtopic drivel snipped)

>So you say

: So do the ISP's.

Sorry my isp says nothing.

:Not exactly...I was born in the desert

Understandable being left out in the sun to long has fried your brain.

:It's your panties in a wad Georgey girl...you're the *only* one screaming.

Screaming, No I am just pointing out how much of a hypocrite you are, all done from a whipsper.

> when I remind you the jackass you are >making yourself out to be.

DOH.................you sure told me...(snicker)

Yes I did as usual now go wash off again.

:Sure....another picture-perfect illustration of you sissies not able to
:take your own medicine..they WERE your words

Can't think for yourself I see

: I just returned them and lookie how you took issue with them.

I didn't take issue with them, I told you those were the words I used to describe you, no issues just fact.And of course they are oh so fitting. Failing to see you are trolling and a hypocrite is your biggest snafu.

Let me ask you this if a troll makes a post what is the correct thing to do?

a) ignore it
b) reply with vengenace
c) come up with your own troll back

If you do reply to the troll with your own troll what does that make you a Troll.

: once agian,,, treat those as you would prefer be treated yourself,ya' hypocritical,communicationchallenged parasite!

Thats why you are being treated the way you are

>here is a hankie for you, go wash off.<

:Your originality appears limited only to what I have said in the past to you.

Just like your use of my words a few sentences earlier, yet it bothers you LOL again a hypocrite LOL

Ya' know....me and Dick asked him the same thing when he forged me....why don't you ask him..maybe he'll answer you...he LIKES you.

>I think that Is a boldface lie. Where is your >facts or proof ? Earlier in this post you did say >you only post facts.

Correct.

That is a lie, you havent posted them

: I really don't give a damn how you take it.

You sure do otherwise you wouldn't chase me around at every post. yet you claimed to have facts about me lieing. Did you catch me doing something I denied

: The sun will still rise and set on my house long after you are gone.

likewise

: Pertinent fact number one: You are recognized, now that "arron" was
: hung out to dry, as the biggest troll in this forum.

Another opinion twist where are the facts, You and Moped are 2 of the bigger trolls.

: Asking someone to prove that YOU don't lie,

Should be easy to post some of my lies simple even for you assclown

:I already have.

what posted opinions not based on fact yes you sure have done that

the opinion is all yours.
It's all y'all can do, cause you GOT nuthin' else.
You and the nad man and Hall are bonafide liars and parasites to hammie radio. All facts.

What you say means nothing you are impotent and irrelevant in the grand scheme of things. Your a punch clown we take out and play with.

:Please show where anyone said you lost anything, boy Georgey. <g>

See that is one of your biggest problems you can't comprehend what is said so you spin it to what evr you wish it to mean. I said I haven't lost any email etc etc so

:and comment and flame me all you want........

We will your a punch clown

:Now you're paying attention. All those I have "accused" have posted
:defamatory, derogative, personal, atttacks and/or insults.

Including yourself.

:Doh....ya' know..the more I think about it, the more it appears you did lose an ISP......

I didn't lose shit slapnuts you and your bunch are impotent. Still have comcast and had @ home

:everyone knows you had two services anyway,,,,,,,,,

LOL, yes they all know, lOL thats funny everytime you or Landshark or some other jabronie posts that I had 2 services I piss myself with laughter, knowing that you guys actualy beleive the stuff you say somehow in an effort to make it true. say it a few more times i need a good laugh.

:if I'm wrong..no harm donw..

Oh you are wrong, and no harm at all just a another misattribution by you

:but as you are beginning to cry as much as Hall, and I know he;'s a guilty SOB

No Twisty it is not crying, it is pointing out your hypocrisy that is all there is to it you can take it for all it is worth if this was a fly fishing NG i would do the same thing.

Dunno. You hacked whatever it was. go back and take a gander.

No you said "we" nothing else to look at who is "we"

>Are you on meds for it?

Since when?
Everyone knows by now that you are impotent Georgey,so please try to refrain from exhibiting this in the future ad keep your personal life seperate from what goes on in this NG. I have maintained that those with the greatest deficit in communcation (such as the posse you belong to with Lelnnad KC8LDO and N8WWM and N3CVJ, all named by "arron" voobner) always get personal.

>Our choice to let the illegals know they are >breaking laws.

Has nothing to do with obeying rules or else connections to this group wouldn't be lost at such a comical rate by those who have cast such huge stones.
Hhahaha..read it again, Boy Georgey.

No really,,,,,everyone knows how ya' losers gravitated toward me..

: I certainly didn't go looking for you girls.....

I am sure you don't look for girls , but I do see the girls you hang with , Landwhale comes to mind.

So what are you saying? It's the Tourettes, again?

I am not sure but you have all the classic signs, but I will let you know after speaking with your doctor, he say it probably is , you have been takin your meds right?

: Oooo, dat hoit, Boyy Georgey wa3moj.

Is this supposed to impress me, my name is not george so you are rendered impotent.

Return fire. Can't take the heat get out of the kitchen, boy Georgeywa3moj.

No I can't take the hypocrisy the heat I can take and give out in big doses as well.

: Sure you did.

Liar

: You said he learned from his behavior..

Never said anything of the sort, another misattribution by you. This is what I said, I never said he learned fronm his behaviour poor comprehension on your part doesn't constitute a lie on my part nice Try, Liar.

"Oh, so N3CVJ can claim he has "learned" since his days of posting his criminal endeavors for all to see, but it isn't ok for sharkie to clean up his language? "

: I showed he did not and is still operating illegally, but has a hard time admitting it.

You have a hard time admitting that you are trolling this NG amongst others, your excuse is well they are doing it, well perhaps they are that still makes you guilty no matter how you try to spin it

:That is 5 false attributions you attempted but failed with in this
:thread, but poor boy Goigey couldn't produce anything but
: words........

Funny I just showed your comprehension skills suck, as I said don't blame your misunderstanding on me. If you can't keep up i suggest you don't play the game.

:Sure it does...especially when Dave Hall said it himself.He claimed he
:learned since those days

I thought you said I said that, which is it me or him. Time for your medicine

: but self-contradicts his own posts from two weeks ago..

Sounds like you.

>And I beleive he has as much as landwhale

:As much WHAT?]

What were we speaking about, that he said he learned from previous mistakes, damn you sure have a hard time understanding things, no wonder you alwsys think I am lieing, are you actually able to read this stuff?

: Since I have been around, sharkie has done nothing to anyof you

who cares how long you been around, since I have been around dave Hall has done nothing to anyone he returned what was sent to him.

: but return the bulshit from whence it came. He is to be commended for not
: laying down and taking your bullshit and stuffing it right back down
:your sorry throats.

I hear he is good at stuffing things from males down his throat thank you for confirming this, all though it has been before

:Oh, there is no hypocrisy. I make no bones about dxing and freebanding
:boy Georgey. Unlike you girls, I have no reason to hide my actions or
:words.

Oh there sure is twisthed, ok what is your name? the hypocrisy of you comes when you call others liar, trolls, dogs, whatever you like no matter if it is return fire or not you are still a hypocrite and a troll. If you would admit to that we can end this discussion and move on yet your refusal to amit that yes perhaps you are doing a little trolling in return etc. How much gumption do you have?

>Wasn't talking about me snapperhead <

: Sure it was...YOU said it.

No assmunch this is what i said you snipped it off to change what I said, the Dave i think made the fredom of speech comment, it was about landshark not me, you better stick to the topic. How could I be talking about me I don't use the queer sig files. this is what i said you have a sever comprehension problem.

"Yes it does he uses these queers sig files yet never lives up to them."

>butyou knew that it is just another feeble >attempt by you to snip my >post and try and change the meaning.

: Read it again...you said it, I just pointed it out..unlike you, I need not make up anything..

No assmunch you read it again in fact here is what i said. "Yes it does he uses these queers sig files yet never lives up to them." How can I be talking about myself fishlips? You have lied about not making things up you are phuqqed up

You make shit up you snip posts and take the words out of context, you are twistedhed that is yor only salvation to try and confuse and obfusacte things.

: merely use y'alls own posts to

Take things out of context, to snipp sentences so as not to revel the full meaning you have been played out twist your jig is up you are old news at an old game.

: that the members of AArons pets

Still dreaming of aaron he hasn't posted in what a few weeks but you need to show him his worth to you do validate him nicely.

: not to be trusted.

Correct you are not to be trusted.

No such luck. Knowing Aaron, the Feds have finally gotten tired enough
of his snitch act to charge him with interfering in a communications
investigation... & the G-men wouldn't buy his "but I'm on your side"
stuff.
At least, it sure sounds like something he'd do.

"Twistedhed" <twistedhed@webtv.net> wrote in message
news:13399-3DE53041-103@storefull-2312.public.lawson.webtv.net...
The insults are all return. I have never done a single thing to anyone
in here, the wellknown cowards of yourself and Hall and Doc and Lelnad
included. I say again, if you can't take it, don't dish it out. You
sound like a woman with your whining
****
>Twisty you are the one doing the whining >talking about others who you
say insult you,

Actually, that isn't what is taking place at all.....you are crying
about what I say in my posts, calling me a hypocrite..I merely pointed
out that what you complain about would never even be if the person they
were directed to did not choose to become personal or insultive
themself. It's a simple matter of treating people the way you would want
to treated yourself. Any spin you attempt is bullshit and immediately
recognized as such and thrown out the window.

>and yet you then say how wrong they are for >doing it, all in the mean
time you return Fire as >you say and do the same thing, and yet cry
>about them doing it, can't you see that your a >hypocrite? 2 wrongs
don't make you right >either. They do it so you do it sounds like your
>a 10 year old.

Oh well. I fight back...always have..use this analogy.......assaulting
someone, or any form of violence is wrong and there are laws in place
against such behavior. If someone assaults me or commits or attempts to
commit an act of aggression against me or my family, I will retaliate
with any means I deem necessary to stop the violator. Laws aren't any
good when no one is around to enforce them, but you of all people know
this best. It's why you run around holding your breath taking hissy fits
about cbers. You feel it gives your empty life meaning.

>should you be taken with any credibility if this >is what you resort to

Hhahaha..what I "resort" to is whupping your azzes with your own game.

>So you say

So do the ISP's.
You guys had no clue the rock you were overturning..like usenet..you
can't take it back (roaring with laughter)!

>Youare correct on that I knew you crawled >from under a rock.

Not exactly...I was born in the desert, raised in a lion's den.
Return fire and it is burning you fast. You are very quick to attempt to

perpetuate against another :what you cry is unfairly,

>Return fire, nah just hypocritical fire, you cry >that those hurl insults then you turn around >and do it then get your panties in a bunch

It's your panties in a wad Georgey girl...you're the *only* one screaming.

> when I remind you the jackass you are >making yourself out to be.

DOH.....you sure told me...(snicker)

Hypocrite and Liar
are a few names that come to mind when I think of you, Lelnad and Hall and Doc.

>Hmm those were the exact words I used to >describe you a few posts back, I see they >made there way back to me so I guess this is >return fire to, well he called me it so Ill call him >that typical of you twisty.

Sure....another picture-perfect illustration of you sissies not able to take your own medicine..they WERE your words,,I just returned them and lookie how you took issue with them.once agian,,,treat those as you would prefer e treated yourself, ya' hypocritical, communication-challenged parasite!

>here is a hankie for you, go wash off.<

Your originality appears limited only to what I have said in the past to you.
I don't turn anyone in who doesn't harass me. AS sharkie noted, if your losers would obey the rules of their ISP, whatever I complain about is irrrelevant..hahhahahhaha! Poor Boy George.
"Hypocrite" is applied...such as been done with several "hammies' lately..Dave Hall lied about everything and still is..... here is a criminal telling another they are breaking the law.
He may "have" been a criminal in the past,

>does that mean he still is?

Sure he is..a liar too.

>Perhaps he has seen the light maybe you
>should too.

Then he wouldn't be defending amps he claimed were illegal only 2 weeks ago, but, alas, he did, so your attempt at lawyering for him is null. How much credibility do you actually think that carries?

>What all your Lies? and hypocritical >statements.

Hall's self-contradictions. The contingency has noted he talks out both sides of his azz/mouth without any assistance from me or you. Paul Lalli lied and said his server was down when it was proved otherwise.

>who is Paul lalli? and how was it proved just >because you say it
>doesn't make it so.

Paul is Doc.......you are correct....it doesn't matter what I say,,

>Yes I know I am correct it doesn't matter what >you say.

Again, I agree with you Geo.. the proof is in the post from Doc's
neighbor that his server works jes' fine. No one's opinion means
anything when presented with hardcopy solid proof.
you See,,I have hammie friends all around...it's exactly how Lelnad
was caught trying to pathetically be heard on the freeband jamming me..

>Oh so your saying a Ham heard him on the >freeband?

Something like that..............

>and he was saying he was twistedhed?<

No...he was ghost-talking and then resorted to deadkeying rapidly after
he realized he didn't have the azz he thought he did to get out and walk
on me.

>I don't know why he would want to be you of >all people.

Ya' know....me and Dick asked him the same thing when he forged
me....why don't you ask him..maybe he'll answer you...he LIKES you.

>I think that Is a boldface lie. Where is your >facts or proof ? Earlier
in this post you did say >you only post facts.

Correct.

>Well prove it otherwise what you say doesn't >matter and is to be taken
along with the rest of >your words an outright lie.

I really don't give a damn how you take it.
The sun will still rise and set on my house long after you are gone.
Making you selfish bastages realize how insignificant you actually are
has been an added pleasure and bonus I didn't count on.

how else do you think we know he has his call on his plate?

>because he said it was.<

He did? When? Where?
Hammies hammies everywhere and nuthin' you can do about it!!
Hahahahahahhah!

>No there is nothing you can do about it.<

Why would I want to do anything about it? The crusade is yours...I like
things the way they are just fine...hahhaahahha!

It was very easy to show he is a lying sob just like you

>really well post some of my lies then, <

Already have. You misattribute more than anyone here, well, at least as much as the half-a-hammie Lelnad that no one wants or claims and the hypocrite Hall.

>you have given these guys all that attention<

They ask for it....so do you. See, what takes place on usenet, is when you drect a post to or about someone, you can expect a reply. Simple. Too simple, as a matter of FACT, for some of you. Hall is feeling so alienated and defeated that he had to claim he was killfiling me just because he couldn't muster the self-control needed not to respond, as each time he did, he allowed for more crow.
Funny thing..killfile someone,,,,and spend your wind and time talking about them....mmmmmph...ahahahahhahahah!!

>pos<

Doh.........

>some of the things you say I am lieing about, >you do posts facts right? So lets have my lies >with something to back up that they are >indeed lies. Other than your opinion. OK I am >all ears and would love for you to bring my lies >out in the open. Father twisty. No rush, and no >opinions just facts .. Ill be waiting.

Fine.
Pertinent fact number one: You are recognized, now that "arron" was hung out to dry, as the biggest troll in this forum. Asking someone to prove that YOU don't lie, well, once again, the comedic irony is lost on you, but that's ok, cause some of the best laughs have come from you phreaks not even being aware of what time it is.

Lost ISP;s..fact. Doc lied. Fact. Hall lied. Fact. Lelnad forged and lied. Fact. It isn;t what I say, Boy Georgey, their own posts haunt them..yet you fewls continue to try and attack the messenger for pointing out your self-contradictory posts..and lies.

>well search the archives and point out my lies >with FACTS not opinions can you do that.

I already have. I have asked of you several times to show your basis for your false allegations and misattributions......you ignore all requests...the opinion is all yours.
It's all y'all can do, cause you GOT nuthin' else.
You and the nad man and Hall are bonafide liars and parasites to hammie radio. All facts.

>All Facts?? LOL If they are facts it should be >easy to prove I havent lost any isp mail >servers or whatever so go ahead and prove a >few things.

Please show where anyone said you lost anything, boy Georgey. <g>

and comment and flame me all you want........

>Here is a hankie again twisty your crying >again, and yet continue the hypocritical >approach, hurl insults etc and think that it is >ok.

See analogy above.

>Listen to twisty croon as he hurls insults at >those he claims do it .

Claim? No my son,,,it is no claim..it is a plain simple facts backed by y'alls posts....it's why I love usenet..you girls can't take it back.

>And neither can you you have insulted all >those you accuse

Now you're paying attention. All those I have "accused" have posted defamatory, derogative, personal, atttacks and/or insults.

>and the excuse it is return fire is so lame not >one of your keyclown heathen will back you on >it.

That's because everyone can see for themselves and is quite aware I need nothing from anyone concerning my lapdogs. I am quite the independent trainer. Truth needs no "backing".

>Facts are true statements backed by proof.
>Start putting facts forth concerning me >otherwise it is lip service and whining.

So? Throw it out the window if it doesn't apply.
Whining and crying and sniveling like a school marm deos nothing to facilitate your expressed opinions.
Everyone knows you are washed up and
tired...hell, most don't even read your posts,

>Oh I see they keep you busy my impotent one >from florida
>That word is your favorite when your getting >spanked you throw it >around like the boy who cried wolf.

Gee, Boy George, ...you appear angry.

>No more than you dementedhed

Doh....ya' know..the more I think about it, the more it appears you did lose an ISP......everyone knows you had two services anyway,,,,,,,,,,if I'm wrong..no harm donw..but as you are beginning to cry as much as Hall, and I know he;'s a guilty SOB....sniveling about something "it may not really be spam that people are reporting"..hahhaha..he should walk around with a sign on the front of him that says, "I'm guilty" and one on his azz that says "kick me hard".

Don't worry,

>Me worry? Nah your worthless.

we won't

>who is we?

Dunno. You hacked whatever it was.
go back and take a gander.
Laughing at your impotency does not constitute a fetish...as another matter of fact, there would be nothing to laugh about if you girls had a clue or were effective in any of your endeavors, but seeing how y'all are magnificent failures at hammies and human beings,,,,,,,it makes it all worth while to watch you dogs squirm on the floor.

>Are you on meds for it?

You claimed "consequences" for us......failing to produce as usual,

>Yes. if you break the law and are caught there >are consequences, I am not the FCC I do not >hand out the penalty for operating illegally that >is up to them so yes your illegal operating >does have consequences.

Since when?
Everyone knows by now that you are impotent Georgey,so please try to refrain from exhibiting this in the future ad keep your personal life seperate from what goes on in this NG. I have maintained that those with the greatest deficit in communcation (such as the posse you belong to with Lelnnad KC8LDO and N8WWM and N3CVJ, all named by "arron" voobner) always get personal.

>Our choice to let the illegals know they are >breaking laws.

Has nothing to do with obeying rules or else connections to this group wouldn't be lost at such a comical rate by those who have cast such huge stones.
Hhahaha..read it again, Boy Georgey.

"The issues got blown out when certain individuals came into this group, started spouting the "Rules
& Regulations",

"Yes the dreaded rules and regulations post they knew when they did that it was now going to be nothing more than them to troll the group, as they are still doing to this very day."

>They may have did it to educate, you and your >band of loonies jumped all over Mark fuller >and anyone who dares >speak out against >illegal radio.

I wasn't here when this other loser you speak of was your God, but I still am enamored over being elected to take his place by you and Lelnad and Hall and, gosh, now Doc.

>More insults and lies... hypocrite<

Dohh.............(yuk yuk yuk)

No really,,,,,everyone knows how ya' losers gravitated toward me..I certainly didn't go looking for you girls.....y'all came to me.....as always..I just sit back and relax and y'all do it to yourselves oh so much better than anyone else ever could :)

>I wonder why Landwhale<

There you go again.....insults for no reason other than you don't like
what he says.
Juvenile comes to mind.

>Yes, I was thinking that as well,<

So what are you saying? It's the Tourettes, again?

>perhaps why I called you Jr, you simply >havent grown up or perhaps
>you did and you are retarted,

Oooo, dat hoit, Boyy Georgey wa3moj.
Check your spell check, Boy wonder.

>you claim others insult people then you do

Return fire. Can't take the heat get out of the kitchen, boy Georgey
wa3moj.

>the whole post makes you wonder what is in >the water down there.

Making you wonder is no feat.

>is so concerned about foul language and such >in this NG he had one of
the foulest mouths in >the NG, wanna see some examples Mark?

Oh, so N3CVJ can claim he has "learned" since his days of posting his
criminal endeavors for all to see, but it isn't ok for sharkie to clean
up his language?
Well according to you what Dave Hall did
before should be held agaisnt him now,

> I said nothing of the sort. <

Sure you did. You said he learned from his behavior..I showed he did not
and is still operating illegally, but has a hard time admitting it. He
has this false image of himself that only he envisions....it's part of
what makes Dave an entertainable and sometimes likeable guy.
Am I incorrect? Do you still hold it against him?

That is 5 false attributions you attempted but failed with in this
thread, but poor boy Goigey couldn't produce anything but
words........nothing..nada..not one iota of anything that can back any
of your lies.
hahahahhhaaha!.

>which set of rules is it this time ..... Jesus >friggin Christ
>Twisty YOU ARE A
>HYPOCRITE!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
>!!!!!!!!!!

Then show something of substance instead of crying crocodile tears to
usand howling ike a school marm.
Thing is, N3CVJ DIDN'T learn,

>just because you say it doesnt make it so<

Sure it does...especially when Dave Hall said it himself.He claimed he learned since those days but self-contradicts his own posts from two weeks ago..complete and polar opposite of what he posted a mere two weeks ago,,this makes him a liar, con man, lawbreaker, and of cource, your fave....a hypocrite.
..
>And I beleive he has as much as landwhale

As much WHAT?
Since I have been around, sharkie has done nothing to anyof you but return the bulshit from whence it came. He is to be commended for not laying down and taking your bullshit and stuffing it right back down your sorry throats.

>has so which set of rules is it I will ask again.

Ask what?

>the Hypocrite from Florida rules?

Oh, there is no hypocrisy. I make no bones about dxing and freebanding boy Georgey. Unlike you girls, I have no reason to hide my actions or words.

"Freedom of speech and the ability to express a dissenting opinion, really bothers you doesn't it?"

>Yes it does<

Then you should get the hell out and leave the country for those of us who cherish it and would die for your right to say it.

>Wasn't talking about me snapperhead <

Sure it was...YOU said it.

>butyou knew that it is just another feeble >attempt by you to snip my >post and try and change the meaning.

Look at the posts again, boy Georgey..you are the guilty "snipper" head, not I...ahahahahaha!.

>If you post the rest that you cut you will see I >am not talking about >me, you know that, it is just another twisty >trick went bad

Read it again...you said it, I just pointed it out..unlike you, I need not make up anything..merely use y'alls own posts to consistently and constantly remind newbies that the members of AArons pets are not to be trusted. Y'all made your own bed and now you are forced (as in have no choice) to lay in it and stink.

I'm sure that 100% of the power into it gets turned into something else.
Normally though, I like the Radiation/Heat ratio to be a bit higher.

Interesting, thanks. For clarification, it should be stated that the figures represent U.S. licenses, not world-wide. I wonder what those numbers look like.

2751. basic question about CB radio

Newsgroup: rec.radio.cb
Date: 2002-11-28 03:51:13 UTC
From: Kris <krisclark349@hotmail.com>
Message-ID: <qg4buuosv9v9iubjqc6o6pkdnrhpnas45d@4ax.com>
Source record: 145236

hi!

I have always been facinated and have enjoyed cb radio as a hobby before. This time, I would like to invest a bit more money on a cb radio set up for my vehicle. I would like to get a radio that doesnt require a massive antenna for my truck, a radio capable of send/receive signal at around 200k radius. I travel such distances on a daily basis, and thought this would be a great cheap way to stay contact with the family at home. Do you guys recommend anything out there that will fit this little job? Please note, I would like to use the smallest antenna possible (if its possible)

TIA!

2752. Re: Just what ARE the correct ham radio licensee stats?

CB radio uses frequencies that don't carry very well over land, and
the service is only intended for a range of 1 to 5 miles. Even with an
amp so big that it cuts your gas mileage in half AND an antenna that
knocks out street lights, you won't get your desired 200 Km range
(unless you are talking skip, but 200 Km is too short for skip). Spend
your money on a ham license, then run 2-meters through the many
repeaters located all around the country. Or get a cell phone.

Kris, I'm not sure what country you may be in, however 200 Km would be around 125 miles - and that is a real stretch. A **big** stretch. 30 or 40 miles with the proverbial 'foot warmer' would likely be doable, 70 is really starting to stretch. I doubt 125 is going to be possible on any regular basis. Any received signal at that distance (you're depending upon scatter for propagation) will be easily knocked out by a skip station or even a low power station if the low power station is within 10 miles or so of either the base or mobile. However, let's wait and see what some of the more knowledgeable folks have to say about this ...

I tell ya what guys, I will check the literature that comes with the
radio and see if I can find a date for you. When I bought the radio,
the guy I bought it from said he thought it was from 1973, but he
could have been wrong. I'll let ya know in a few days.

In the mean time, check out the auction! Only $51 as of this posting!
It's a steal for a cool radio!

Hi!

Ok, well lets say 40km away from home, is that possible? I thought it
woull dbe nowdays since cheap two way radios are available that will
easily go 3 kms radios.

thanks for the responses

That could be one way to get back at Spammers... put their e-mail addresses
in newsgroups so that they get Spammed.

Just one thing... make sure you get their **REAL** address. Spammers
use false addresses in their headers. If possible, find addresses that
they
do not usually expect to get noticed by other Spammers.
Oh, and do not pretend to be them... they may get your Internet access
pulled. Maybe put them in your sig file.

There are some great Spam filters available FREE, such as
"SMB and "MailWasher"... but be careful of using any "bounce"
feature... it could get bounced to an innocent person, who's
addy has been faked by a Spammer.

Regards,

Peter.

Hi Kris

What you are looking for is not really doable on CB. Once skip roles in
you can't talk 3 km with a base, a 50 foot high antenna and 100 watts. I
talk world wide with a handheld and a rubber duck antenna on 2 meters with
the help of a repeter. That may be the way to go for you as that ham
licenses are easy to get now.

Thanks for all the help, What do you guys think of a President Washington home base radio? I am thinking of getting one of these, its 40channels am,usb,lsb isnt it? Any advice?

Also I am in a area that's got a home owners association and I don't think they would allow an Anton 99 up, does anyone have any good home base antennas they can recommend? It can go outdoors but up a tree or something, something that's not to obvious that we would get a complaint about. Thanks.

Kind Regards

Stuart

Kris.......what you are proposing isn't really possible on 27 Mhz. Your stipulation on having a very small antenna complicates things. The guys are right on their suggestion on the Amateur licsense. If you like the enjoyment of DX, 6 meters can be used without too large of an antenna on mobile. 2, 220, 440 are also fitting for what you are looking for, and with the higher the frequency, the smaller the antenna. Another option is something like Nextel http://www.nextel.com/ that offers the cell phone AND 2/way system, that amazes me. Their network is impressive....but that isn't the old enjoyment and "flavor" of true radio fun! Good luck, and Happy Thanksgiving.

It would be tough to find a CB setup that would allow you to reach 200 kilometers. Most CB's will cover about a 15k radius, if you're lucky. It sounds like you would need something like ham radio, but you have to pass a test to be able to do that. Ham radio would allow you to use repeaters to talk to your family over that distance, but they would also have to be licensed and there would have to be a good repeater or a repeater network that could cover that distance.

The short answer is that a CB will not fit the bill for what you want it to do.

We haven't exchanged any emails, we can say what needs to be said
here. I don't see a lot of things their way, (Mopar and I do agree
on quality equipment - Collins), and they don't see a lot of
things my way, some of the things you are accusing are just not
true. If you think Twistie, Landshark, or Mopar have condemned
others for operating legally, please post the proof.

Beware of modified radios. I'm not preaching legality, but the
majority of modifications are done by monkeys with chain-saws and
arc-welders. Plus, most of the mods on the Washingtons (including the
TRC-490's) have been done improperly to begin with. If there are extra
holes and/or switches in the base plate, it has probably been modified
at one time or another.

>Also I am in a area that's got a home owners association and I don't think

>something that's not to obvious that we would get a complaint about.

That's bogus. If it were me I would challenge the rules. Regardless,
you could get yourself a tuner for about $20 or so, and then you can
use just about anything for an antenna, even a rain gutter or a flag
pole.

So whats the deal with the new FCC ruling on the type accepted radios.
Is there a grandfather clause built in or is my 2950 illegal to posess now?
What are they saying..we cant own or buy or import or operate or what?
I use mine strictly for 11meter because of it's superb audio characteristics
and dont have any plans to remove it but i would like to know what the
guidelines entail..TIA

Do what the state's wants you to do and hire an attorney, and just maybe
you'll get the baby. But don't hold your breath to long.
A baby to the state is a gold mine. Put it in a foster home for 5 years and
they make tons of money doing it.
What you need to do is sue the agency for rights to your child.
That's the only way any court is gonna take notice.

and
: talks pretty regularly. i also know of a 3cx3000 base station too. these
guys
: see some big numbers, believe it.

Tim, I don't doubt guy uses those tubes as well as the 4cx 10,000 but to say 100,000+ watts, that is a bit of a stretch from 2 -10,000 watt tubes in a mobile configuration. Any idea of just the input power, needed to run an amp that big, and they would need about 10-15 kw of drive power, and another 1 to 1.5 kw to drive that amp. Add up all the input power to run these amps. You are looking at 250,000 watts of input power. Rather Ripley's Beleive it or not material.

HTML is considered to be a binary. and is not ascii format.
Since html is also a coding language, that requires translation, which
should not take place in text only newsgroups.

> doesn't seem to sit well. ;-)

Personally, I would like to think that a fee meant something for your
money... but unfortunately it doesn't always.
If you run a business the way the Government work... taking money for
a service and spending it on something else, while refusing to provide
a service, you would be in trouble.

Also, there's no guarantee that users would buy a licence... the figure
over here was estimated at 2/3 of users being unlicensed... it is probably
even less than that now. Many of those who did get a licence, soon
felt that their money was wasted, as the "idiots" were not being
controlled, so they stopped buying it.

Regards,

Peter.

They will be on different bands.
Also, some services get the distance by using "repeaters". You only need enough power to get to the nearest one, which then sends your signal out further... NOT available on CB in most countries.

CB uses HF... 27MHz. At this frequency, antennas are big.
The antenna size can be reduced by using loading coils, but you will not get the same efficiency and distance.
The smaller the antenna, the less distance you will get from it. Don't be fooled by some antenna manufacturers claims to "10dB gain" from their 12 Inch mag mounts... they are probably comparing it to the signal with no antenna connected.

You either want distance, with a fair sized, efficient antenna... or a compact antenna, with shorter range.
In any case, as already mentioned, you cannot expect too much from the CB service... just short range.

As someone else said, if you want to get distance reliably... you need to use a mobile 'phone or get a Ham licence.

Regards,

Peter.

It may well have done that... for the few minutes that it lasted. Can you
say, "Scrap"?

I have also seen radios go into self oscillation, with feedback from a high
SWR or excessive gain.
As you say, this will cause inteference... the output will be all across the
band.

> Yes, but non-approved ones are on the shelf, and aftermarket mods, and

full
> stop, but that hasn't prevented them from being available.

You will not stop them. They made the single band "Amateur" radios, such as
Lincolns, illegal over here. They still came in, but without the Goverment
getting any VAT on the sale, or tax on the profit.
So, they lifted the ban... they are now legal to buy, sell, own and, if you
have the Ham licence, transmit on. Same with amps, they can legally be used
for Amateur radio... although we all know who really buys the cheap rubbish
available from so many CB shops.

The American AM and SSB CBs are 100% illegal. The laws were hard to
enforce, as they were had to prove:
1 Importing. They had to be caught bringing it in
to the UK.
2. Connecting. They had to be caught in the act of
fitting it, otherwise there was no proof of who
did it.
3. Using. Also not too easy, as a "recording" may be
someone with a similar voice, and is not proof that
the conversation took place over an illegal CB.

So, they made owning them illegal... but they are still common over here.

> Without knowing exactly what sort of interference is happening, it's hard
> to be specific on cleanup steps. I don't know that front end overloading
> is the problem in this case.

It would be nice to see a reply from "Walter" about the radio and other
equipment that he is using.
I too would like to know if the radio is new, second hand, got at, modified,
legal, etc.
Also, if he is using an "Amp" or what power the radio is putting out.

> > As the person has said that space and location of antenna are a
problem...

> > system, I would not suspect a "dirty" signal... unless your FCC allows
> > the sale of "dirty" CBs.
>
> It's not legal, but they are sold,

But surely not the "approved" sets.
We could discuss this forever, but we need to know what he is using... is it
an "approved" set, made to the accepted standard... and has he any Amp or
mods?

As I said in another post, he should make sure that he is using legal
equipment first... then, if the problem is still there, look at the other
things mentioned. We will have to wait and see if he replies with further
info or results of efforts.

> and of course after-sale mods are common.

They are also common here... some legal, some illegal... some for sets that
will never be legal.
Another common problem is the "Screwdriver Experts" who do not know what
they are doing when the "tweek" the radio.

Regards,

Peter.

Ohhhh!
Yes, the famous 2950...
It's supposed to be a ham rig (28-29.7 MHz) and not an "export" 11metres rig.
In fact there's nothing new: you can possess a non modified rig according to the FCC, but you cannot possess a modified (26-32 or 24-30 MHz) one.
To use it or modify it, well, in theory (according to the FCC) you have to be a legitimate ham radio operator... In theory...
The only thing for freebanders is not to be caught!
But with all the spurious coming out of this shitty rig when used out of the ham band... Sure you'd have problems one day or another.

Bye!

Hi!
Just take a non modified FCC approved rig, good quality non exotic coax cable and a well tuned (not indoor)antenna placed at some distance from TV, sat or FM-BC antennas. You could add an HF filter on the 110V edge of the power supply and some ferrite cores or EM clips on the DC cable.
If it doesn't cure add a good quality (Kenwood LF30A or Ham 150) Low-Pass Filter.
After trying this, if the problem is still there, it's not your fault and your neighbor's using an indoor wide-band amplified recieving antenna... and he will have to cope with or invest for better receiving conds and ferrite cores or clips!
Bye.

What I love most about it is that they continue to be clueless.
They lost the people by being far left,
lacking basic moral character traits- even convincing themselves
such traits are unimportant- and telling lies about darn near
everything in sight. And now that their behavior has cost them,
they insist they need to act this way even more.
Their choice of House minority leader is an excellent example
of their self-destructive madness.
You can always count on a Democrat to let his emotions
override what very little common sense he has.
Let them continue to whine and self-destruct.
It's the best thing to happen to this country since Reagan.

Twistie gets fired upon and returns the fire and vice versa. That is
life in newsgroups on the Internet, learn to deal with it.

>Right on,JJ.<
--

>I am dealing with it I am pointing out the >hypocrisy and it is fine
with me

Apparently all isn't fine....you are posturing something terrible.

>but he is crying how dave and lee, aaron etc >are these bad people,
trolls, who call him
>names etc yet
>when he does the same thing it is just return >fire.

No, Georgey boy, that isn't what is taking place at all. You are indeed
confused, fouled, and indeed crying about it,,,focusing on all I say to
your fouled little clique,...you continue to accuse me of hypocrisy so I
continue to reply to your accusations and point out how it is not
hypocritical of anyone to stand up for what is right, regardless of who
is on the opposing end. You inquire and accuse me, I reply (that is how
usenet works, Georgey boy) with words *you* used, and you cry
"hypocrisy'...you are angry with yourself.
  You are unwilling to see the forest through the trees. If you
would respond in a non-inflammatory manner and manage to treat those as
you wish to be treated, there would be absolutely nothing for you to
point at.
It's such a simple concept yet you fail to grasp it as you were
obviously were never taught it, same as Lelnad and Davey-boy Hall.

>JJ, in your next email to twisty I think you >should be telling him to
learn to deal with it. he >is the one accusing others of lieing and
>doing dasterdly deeds all the while doing it >himself. Are twist and
you
>buddies now JJ? Must have been one >powerful email.

Ahhahahhahhaaahahahhah!
This is the second time you have cried aloud concerning an email
exchange inquiry that didn't concern you. JJ tells me it's ok to email
him and you act as if he just stabbed you in the back.
You continue to selectively ignore and clip a very important detail,
George. As was correctly noted, I have no desire to flame or argue with
anyone,,nor will I passively lay down or take your bullshit. I just do

not enjoy casting pearls before swine. You angry few who always initiate attacks with flames and off-topic comments are not interested in truth. You want a target, demonstrated by Lelnad and Dave Hall's pastcomments of how they find pleasure or entertainment when another finds lament, even if they must be the cause of such.
Why you act this way is simple..it is nothing more than an ego challenge.

If you can manage to appear cute to each other while collectively attacking another, your goal is accomplished and beaten ego temporarily elevated. Nothing like a bit of posturing to make up for the low self-esteem you already suffer..the bond that ties you with Lelnad, Dogie and Hall...the sheople...the followers.....and it makes them mad as hell to be reminded what they are. They know it. You know it. Everyone knows it. Their whole lives and they are still unable to figure out what they are or how to effectively communicate. There is not a backbone among you. You want nothing less than blood but were rendered incapable and shown to be incompetent.

  Yet, as you plainly see, I hold the leashes of the sheople. I didn't ask for this and I really wish it were another way. I do not like to see people so emotionally involved and charged that all someone has to do is to refuse to give in and then they go wild. I have never, and never will give in and let you, KC8LDO, N3CVJ, N8WWM, or anyone else feel that all they need do to run one off when an opinion they don't like is expressed, is to begin hurling insults and making so much bullshit off-topic noise that it frightens others from expressing their point of views and opinions. You have met the enemy, and indeed been rendered impotent.

We haven't exchanged any emails, we can say what needs to be said here. I don't see a lot of things their way, (Mopar and I do agree on quality equipment - Collins), and they don't see a lot of things my way, some of the things you are accusing are just not true. If you think Twistie, Landshark, or Mopar have condemned others for operating legally, please post the proof.

>I have never said they did condem anyone for >operating illegally JJ, where did you arrive at >that conclusion?

You have indeed lied with the false accusation that several you speak of try to censor legal cb advocation. It was a lie and you were caught and called on it. The number of times you prefer to lie desn't matter, George...it still maketh you a liar.

>They say others call them names etc yet they >do the same thing, twisty lies like a rug yet he >calls everyone else a liar.

Not true at all. I have never posted an untruth.....it is why I have you on a string and you are have been unable to post anything of substance..not a single post or claim, just "Twisty this, twisty that"..ahhahahahh! Pooor poor boy Georgey.....it appears you are heading for a nervous breakdown.

> I guess you don't read what is said.<

You are the one that misses post. THAT has been shown countless times. Has DAvey Boy Hall ever mentioned to you WHY he lied concerning his villanova account? Never mind,,once a liar......

> They were looking for your call sign <

There ya' go again, Busch-boy. I never looked for JJ's call, as I had questions if he was even a hammie...whether he is or isn't makes no dfference to me at all. Looking at his recent posts, I tend to lean toward the "yes he is a hammie" and has done some homework and is seeing the bullshit you sling and the accusations you hurl for what they are...lies..

>for what
>non are Hams,

You failed miserably at all your identity inquiries.....so you know nothing other than what I allow you. It is part of what keeps you

struggling.

>they want to dig up some dirt on you. In fact it >wasn't real hard to find if they wanted it.

Yea? Dig some up on me. Permission granted.....fewl! Hahahhahahahah!

>Mopar calls me a troll, yet do you see the >posts he makes, he says I am the biggest Troll >in the NG, who cares if I am the biggest or >smallest

Not many...that's why you are in most kilfiles. Most don't have the time r patience to deal with your bullshit. Fortunately, there exist some that have the time and resources to nullify your bullshit you post.

>the point remain he is a troll as well, <

That's not the pint at all, Boy-Georget..hehhe....wishing hard enough won't make it so.

>he trolls posts with the intent to solicit a off >topic off the wall reply That is a troll.

Only to you, boy Georgey....more return. See, you are receiving back all you dish out and dude, you whine more than any child or woman that doesnt get their way..a solid indication you are unable to handle what you spew........haahhahahha!

>I am glad you and a he agree on Collins. So >JJ, what are the things you say I am accusing >them off that isn't true.

Ahhaahhaahhhah! Poor boy Georgey!

Superb analogy. I can fly to LA or SFX from here at 9:00 AM, and arrive in time for 9:00 AM Pacific Time....<g>. You are right....time travel is possible..to what extent remains to be explored.

>Problem is, how do you avoid changing the >future? Sure, you can't kill
your parents before >you were born - but you might
>step on an ant, or set a virus free before that >virus existed.

I can definitely dig it. One widely accepted theory by scientists and devotees of weather study is that a hurricane can, has, and does, begin with the flutter of a wing of a butterfly in Africa or something similar in nature. I watched an entire documentary that followed the process from start to finish and it was nothing less than spectacular.

>So .... possible in theory, but is it truly >possible? I sure don't
>know. One thing is sure, no vertical quarter >wave (or shortened
vertical) is going to >perform like a yagi, but it would be nice to

within a dB) as a full >size vertical mounted outside.
>73 from Rochester, NY
>Jim
>ps - I didn't see any price listed on that site >either!

I don't know if he is still around, but Great Pumpkin has some experience with alternate type cb antennas and gave one a thorough workout and detailed review..the final result: Pretty darn good. It might be found in google, not sure. 9db from a small attic antenna will make someone a millionaire. Maybe Jay will figure something out. I love messing with antennas and I'm not adverse to hooking up old, semi-worthless radios as guinea pigs. WHY radiation patterns do what they do in certain situations but not in others is fun to explore. The guy around here that has this "richochet skip dish" as he calls it, proved SOMETHING is going on with his set-up with friendly aranged mini-wannabe keydowns. The future of antennas...hmmmm! You heard of the folks messing around with water-filled antennas yet?

majority of modifications are >done by monkeys with chain-saws and
>arc-welders. Plus, most of the mods on the >Washingtons (including the
TRC-490's) have >been done improperly to begin with.

Maybe you would be so kind as to post your version of what is a proper
modification to the Washington and those in the know can make up their
own mind, not what you tell them to believe.

>If there are extra holes and/or switches in the >base plate, it has
probably been modified at >one time or another.

"Also I am in a area that's got a home owners association and I don't
think they would allow an Anton 99 up, does anyone have any good home
base antennas they can recommend?"

Stick it inside a tall flag pole.

"It can go outdoors but up a tree or something,

You can always use camoflauge hunting tape around it before you put it
in the tree. Bungee cord works great in a tree.

something that's not to obvious that we would get a complaint about."

>That's bogus. If it were me I would challenge >the rules.

He'll probably lose unless he is a hammie.

>Regardless, you could get yourself a tuner for >about $20 or so, and
then you can use just >about anything for an antenna, even a rain
>gutter or a flag pole.

Regardless, all mods do not require an accute education in electronics
and some are quite simple.....the Cherokee and knock-off Tomahawk come
to mind immediately..change a jumper and "ta-daa"..instant 400 plus
freqs.....the Tomahawk has FM whereas the Cherokee has 10 weather
bands.. simple mods aren't real poular with some "techs" because they
aren't needed until a repair is necessary.

news:8811-3DE771B2-275@storefull-:
:
:
: You have indeed lied with the false accusation that several you speak of
: try to censor legal cb advocation.

Oh it is a lie? Bullshit, you, landwhale, moped and the other crybabys have tried to silence aaron, myself, frank, doug and who ever made the most noise about operating Legaly. you refusal to accept that fact shows your true pedigree a born liar.

: It was a lie

oh you admit to lieing, thats a change.

:The number of times you prefer to lie desn't matter,

I only return things to their rightful owner

:
: >They say others call them names etc yet they >do the same thing, twisty
: lies like a rug yet he >calls everyone else a liar.

: Not true at all. I have never posted an untruth.....

LOL now that is the biggest lie you have posted to date.

: on a string and you are have been unable to post anything of
: substance..not a single post or claim

No claims lump head just the truth you are a confirmed liar, bellevue want you in by 8:00 tonite.

.....it appears you are

pointing out your lies, yes correct

: a nervous breakdown.

then you need to calm yourself.

: You are the one that misses post.

I do, am I supposed to read every post?

: Has DAvey Boy Hall ever mentioned to you WHY he lied concerning his
: villanova account? Never mind,,once a liar......

Why would he tell me anything, I am not personal friends with Dave, although I do like how he has you on a leash.

: There ya' go again, Busch-boy. I never looked for JJ's call, as I had
: questions if he was even a hammie...

Twist did I say you personally looked for JJ call sign? but as noted you question him being a ham or not so a callsign would have either been proof to you or not.

:whether he is or isn't makes no dfference to me at all.

Oh it sure does otherwise you wouldn't have questioned if he was a ham or not. another lie by you.

:Looking at his recent posts,

He doesn't know who helps him

:I tend to lean toward

What you lean to is of no consequence

the "yes he is a hammie" and has done some homework and is seeing
: the bullshit you sling and the accusations you hurl for what they
: are...lies..

Oh and that pleasures you...

: You failed miserably at all your identity inquiries.....

I failed at what? i don't care who you are twisty, and never asked you or anyone else, to me your some whacko who lives in the pile, it is you that has that affliciton of identity.

: Yea? Dig some up on me. Permission granted.....fewl! Hahahhahahahah!

My anonymous acolyte, why do I care who you are it is proven you are a schemp who wants to know everyone elses name yet hides behind the twistedhed moniker.hahahahahaha

: Not many...that's why you are in most kilfiles.

Whay am I not in your's you follow me around like a lost puppydog

:Most don't have the time or patience to deal with your bullshit.

Most don't ? I can name 2 or 3 that respond to my every post like clockwork. want the names? nah you know who they are, your one of em.

: Fortunately, there exist some that have the time and resources to nullify

Yes, it is called self discipline, you have the choice too, but you chose not to

: That's not the pint at all,

what you say is of no importance

:wishing hard enough won't make it so.

and saying it over and over won't either. try another tactic

: Only to you, boy Georgey....more return.

more hypocrisy, and affection

: See, you are receiving back all you dish out and dude, you whine more
than any child or woman
: that doesnt get their way..a solid indication you are unable to handle
: what you spew.....haahhahahha!

I can handle it twsity thats where your mistaken, It is you guys crys about
things that go on in this NG then say aaron did this george did that you
then you turn around and do the same thing back to those you claim are doing
you wrong. That is a hypocrite. I dont care what you or JJ or any of you
think flame me all you want, troll me all you want but to claim that your
allowed to do it because it is return fire? LOL That's the biggest joke of
all, well next to you.

So whats the deal with the new FCC ruling on the type accepted radios.
Is there a grandfather clause built in or is my 2950 illegal to posess
now? What are they saying..we cant own or buy or import or operate or
what? I use mine strictly for 11meter because of it's superb audio
characteristics and dont have any plans to remove it but i would like to
know what the guidelines entail..TIA
--
Mad Dog

--

If you're an authorized hammie, you can legally use it on 10 meter.

Warning: It is illegal to purchase and use [tranmsit with], ham radio
equipment without a proper FCC issued license.
Modifying the radio for use on 11 meters is also illegal.
Transmitting voice on code only frequencies is also illegal, which you will
be doing on the modified radio on the frequencies outside of 11 meters.

Penalty for being caught is a $10,000 fine and confiscation of equipment.

>I am dealing with it I am pointing out the >hypocrisy and it is fine
with me

:Apparently all isn't fine....you are posturing something terrible.

It sure is fine twisty, pointing out your hypocrisy is a fun.

>but he is crying how dave and lee, aaron etc >are these bad people,
trolls, who call him
>names etc yet
>when he does the same thing it is just return >fire.

:No, Georgey boy, that isn't what is taking place at all.

It sure is twisthed, you claim these guys get personal yet you do the same
phuqqing thing, your lame retun fire excuse is just that Lame. It gives you
no extra rights to do anything It just makes you look like a hypocrite.

:You are indeed

whipping your ass that your reduced to 'LOL "return fire"

:confused, fouled, and indeed crying about it

yes it seems you are confused and can't understand you saying one thing then
doing it back is a HYPOCRITE>

: you continue to accuse me of hypocrisy

Deservedly so, I can see you getting pulled over for speeding. "well officer
everyone else was doing it , why can't I? I am just trying to speed because
others are.

: so I continue to

Lie, and make false claims.. duly noted.

:reply to your accusations and point out how it is not hypocritical of
anyone to stand up for what is right,

Thats the point you pschotic head is missing. your not standing up for what
is right, someone cals you a asshole and the right thing to do is call them
one back? then tell them they are a asshole for calling you the asshole.
That is what you are doing. Instead of you being a "adult" about it you
revert to childish banter, well he did it so I am gonna do it to
nannanananaaa. Do you have kids twisty? do you smoke cigs. Tell your
children to not smoke then light up a cigarette, hypocrite

: regardless of who is on the opposing end.

You will lie

: and accuse me,

deservedly so

: I reply with words *you* used, and you cry "hypocrisy'...

Yet when I say those words I am wrong when you do it is ok? That is how a hypocrite works, and you got that down pat.Twistednuts, if you replied in kind to me with what I say to you that is ok I can take it I have broad shoulders, but not your crying about it and how wrong we are when you do the same thing. I don't know why you have a hard time understanding your hypocrisy.

If I call you an asshole, and you want to call me one that is fine, knock your dick in the dirt doing it, but Don't tell me I am an asshole for calling you one, and then you turn around and call me one and say it is just you returning fire.

:If you would respond in a non-inflammatory manner and manage to treat those as
: you wish to be treated, there would be absolutely nothing for you to point at.

Oh so what that means is then you wouldn't be a hypocrite?

: It's such a simple concept

yes it is you condem those for the same thing you do then use an excuse for your behaviour

: yet you fail to grasp

I fail to grasp your non comprehension of it yes.

: same as Lelnad and Davey-boy Hall.

Ah your love for them is never ending, is that return fire or just you being a dickhead?

: JJ tells me it's ok to email him

Not in his post yesterday.

: and you act as if he just stabbed you in the back.

well if he sleeps with you then yes he has. I have backed JJ when possible.

: As was correctly noted, I have no desire to flame or argue with anyone,,

Thats your biggest lie yet, you have no self disipline then> no one is making you do anything. You chose to argue and you enjoy it hence the reply to this post.

: nor will I passively lay down or take your bullshit.

You sticking your nose in where it doesnt belong doesn't constiute anyones bullshit except your own.

: I just do not enjoy casting pearls before swine.

Then why are you doing it Lack of self control?

: You want a target, demonstrated by Lelnad and Dave Hall's pastcomments

ahhh there goes those 2 names again can you say infatuation, you really need to see a doctor about it.

: the bond that ties you with Lelnad, Dogie and Hall...

Can't make a post without bringing up these guys name can you say Lunatic?

rest of useless twisty ranting snipped for bullshit and hypocrisy reasons.

I'm sure it is, but it looks to me like somebody's idea of a joke or a hoax.
If I had developed an antenna that could do what they claim theirs can do,
I'd start selling them right away.

Or maybe they don't want anyone to buy them and find out that it doesn't
work as advertised?

> licenses are easy to get now.

Yeah, the best solution for two-way radio to communicate around 150 miles or so is to get a ham license and operate on 80 meters. The 80 meter band has a lot of groundwave propagation that will allow short-distance (for HF) communications. At my location in SE Kansas, I can communicate with stations in Wichita, around 150 miles away.

However, an 80 meter mobile installation is going to require a decent antenna with a big coil on it.

Probably. I never trust gain figures in antenna advertisements. Gain is subjective, and you can make up whatever number you want as long as you never say what you are comparing the antenna to. Usually, the term "gain" refers to comparing an antenna to a dipole in free space, but it's never guaranteed that's what the advertisements are really saying.

randy theres at least one guy here in LM who has a 4cx5,000 in his ride and talks pretty regularly. i also know of a 3cx3000 base station too. these guys
see some big numbers, believe it.

Ok, but that's still much less than 100,000. Sure, you can do 20K in a mobile, been done lots of times. But, you ain't gonna do 100k in a mobile. Well, I guess you could with a generator in the back of a dump truck, but not in a normal mobile, even with a gen set in the back of Suburban. You are talking 3 phase, with lots of KVA to spare.

> >Just one thing... make sure you get their **REAL** address.
>
> Now tell me, please, HOW do you find their 'real' address?

Before I started using "SMB" to filter out the crap, I did
exactly that to some of them.

They gave a Web url, so by checking out their site, I found
e-mail addresses for them. If they really want sales... they
MUST make contack possible.
Once I found some of their addresses, such as "sales@"
and "support@" their domain, I spammed them back.
More recently, I got one of their web sites shut down
for Spamming.

Quite simple, really.

> You CAN'T,

You mean, "YOU can't"... so don't bother. Block them
and ignore threads about them.
That should be easy enough.

> and they don't KEEP addresses long enough for your technique to work.

Those who really want sales, must keep an address long
enough to get replies, and so sales.

The better way, is just to get a good filter (such as SMB)
and block spam. I use it to delete all unexpected mail, while
still on the server. Spam does not even get downloaded,
and the addy in the header is just used for spam.

> All you're doing is wasting your time, and OUR space.

Your space... huh. Got yer name on it?
Do you control who can reply to what message?

Hey, are you not "wasting time and space" by replying to me?
So much anger... you must try to control it.

Regards,

Peter.

i agree 100k is stretching it but nothings impossible. dont forget 55 in fla with the 350 in the back of the van just to spin the alternators. these guys are running race car motors with nitrous and beefed up crank shafts to get the power there getting. none of them can hold the power for long but they can make it for short amounts of time and thats a fact.

>Ok, but that's still much less than 100,000. Sure, you can do 20K in a
>mobile, been done lots of times. But, you ain't gonna do 100k in a mobile.
>Well, I guess you could with a generator in the back of a dump truck, but

Kris,

As far as amateur radio, you can switch repeaters as you pass out of distance from one and come into range on the other. Of course, the base would have to be able to communicate directly to any repeater you used. Generally, from a mobile running 50 watts or so you should have a few good repeaters that will allow you to communicate through them out to perhaps 50 miles or so (depending upon terrain). A good base should reach out even farther since the antenna will be higher than a mobile antenna, so it will really depend upon what is available in your area. Another possibility is to check out what repeaters along your route may be connected to the internet. If there are a couple, you would only have to punch in the desired node id from home or from the mobile. This will, if there are repeaters connected, allow unlimited communications - even from a handheld. I just had a nice chat with a guy in British Columbia, Canada, from here. BTW, you could simply use a computer for the base station - no radio needed - as long as everyone has their license. If the repeaters are available with internet linking, you may get out of this for around $150.00 US or less. Some more food for thought.

Water filled antennas? No, but if some had some corn squeezins' in 'em, I might be interested ;-) Yeah, 9 dB gain, but I think many folks would be happy with an antenna with a 0 dBd (equal to a dipole) in a compact antenna that could be hidden. If anyone comes up with it, I'd tend not to bet against Jay myself.

"Twistedhed" <twistedhed@webtv.net> wrote in message news:8811-3DE77440-281@storefull-2314.public.lawson.webtv.net...
I don't know if he is still around, but Great Pumpkin has some experience with alternate type cb antennas and gave one a thorough workout and detailed review..the final result: Pretty darn good. It might be found in google, not sure. 9db from a small attic antenna will make someone a millionaire. Maybe Jay will figure something out. I love messing with antennas and I'm not adverse to hooking up old, semi-worthless radios as guinea pigs. WHY radiation patterns do what they do in certain situations but not in others is fun to explore. The guy around here that has this "richochet skip dish" as he calls it, proved SOMETHING is going on with his set-up with friendly aranged mini-wannabe keydowns. The future of antennas...hmmmm! You heard of the folks messing around with water-filled antennas yet?

try to censor legal cb advocation.

>Oh it is a lie? Bullshit, you, landwhale, moped >and the other crybabys
have tried to silence >aaron, myself, frank, doug and who ever made >the
most noise about operating Legaly.

Lies. All lies. Show something other than your word.

>you refusal to accept that fact <

You are not a fact...and your word never has been.

>shows your true pedigree <

All my hounds have papers...yours andNAds and Halls just happen to be
spread on the dirt floor.

The number of times you prefer to lie desn't matter,
I only return things to their rightful owner

>They say others call them names etc yet they >do the same thing, twisty

Treat others as you wish to be treated.
If you come off as being Hall's favorite subjective term..a
"dick"...expect to be treted as such in return from that person. When
you treat someone like a dick and they treat you back as a dick, it is
not being a hypocrite, Boy Georgey. You appear to be the only one that
crying aloud because of your lack of comprehension skills. Even your two
butties of Lelnad and Hall aren't lending you support on this issue as
they usually try.

>>lies like a rug yet he calls everyone else a >liar.

Not true at all. I have never posted an untruth.....

>LOL now that is the biggest lie you have >posted to date.

You have been unable to post anything of substance..not a single post

>No claims lump head just the truth you are a >confirmed liar, bellevue
want you in by 8:00 >tonite.

Your off-topic and rambling again, Boy George.

>.........it appears you are
>pointing out your lies, yes correct
>a nervous breakdown.
>then you need to calm yourself.

Talking to yourselves has always been enlightening and indicative of what ails you gals.
Has DAvey Boy Hall ever mentioned to you WHY he lied concerning his villanova account? Never mind,,once a liar......

>Why would he tell me anything, I am not >personal friends with Dave, although I do like >how he has you on a leash.

You are welcome. My words are effective, but coming from you merely reflect your originality.

"There ya' go again, Busch-boy. I never looked for JJ's call, as I had questions if he was even a hammie... "

Wow...really snipping now...harrrrharrrr!

>Twist did I say you personally looked for JJ >call sign?

I didn't say you said *personally*. Pay attention.

>but as noted you question him being a ham

No, I didn't question it.

>or not so a callsign would have either been >proof to you or not.

Attempting to qualify for another can be traced to the dog pound, exclusively you and Nad and Hall.

whether he is or isn't makes no dfference to me at all.

>Oh it sure does otherwise you wouldn't have >questioned if he was a ham or not. another lie >by you.

Check it out. I didn't question it. I told you to pay attention, now you have raw egg dripping down your snout.

Looking at his recent posts,
He doesn't know who helps him
I tend to lean toward

>What you lean to is of no consequence<

Of course it isn't. Never claimed otherwise. It's you arrogant children that come unglued when told your points are useless. This is usenet, my pet, when reading advice on usenet, consider what you paid for that advice.

"the "yes he is a hammie" and has done some homework and is seeing the bullshit you sling and the accusations you hurl for what they are...lies.."

>Oh and that pleasures you...<

Not at all. It simply troubles you that your troll brigade were never able to gain control of what they thought they could.

You failed miserably at all your identity inquiries.....

>I failed at what? i don't care who you are >twisty, and never asked you or anyone else,

Puh-lease! You have asked many, MaNy, MANY their call signs, real names, etc. etc.
Myself, Mopar,Sharkie, just to name a few.

>to me your some whacko who lives in the >pile,

And you would be correct.

> it is you that has that affliciton of identity.<

Nah. You and Frank posted satellite pics of my 'hood. Lelnad probably finally got popped by the postal inspector for sending who knows what to some poor sap through the mail that he thought was my address.....gee...and to think I never asked anyone if they were a hammie, where they lived, or their personal name. Yea, the "affliction" is mine (chuckle)!

Yea? Dig some up on me. Permission granted.....fewl! Hahahhahahahah!

>My anonymous acolyte, why do I care who >you are it is proven you are a schemp who >wants to know everyone elses name yet hides >behind the twistedhed moniker.hahahahahaha

See above.

Not many...that's why you are in most kilfiles.

>Whay am I not in your's you follow me around >like a lost puppydog

I have the self-control. I need no killfile.
Reply to me, I will respond.
Stop replying to me if you wish for me to "killfile" you.
Again..simple..treat those as if you would want to be treated. For some reason, you snipped that part out of all your posts and in every single one of my reposts and quotes. Boy-Georgey has a problem with the golden rule. Perhaps you ought take a gander at your moralistic fiber.

Most don't have the time or patience to deal with your bullshit.

>Most don't ? I can name 2 or 3 that respond to >my every post like clockwork. want the >names? nah you know who they are, your one >of em.

Nothing new. You have always erroneously referred to one, two, or three, as the "majority" or "most".

Fortunately, there exist some that have the time and resources to nullify

>Yes, it is called self discipline, you have the >choice too, but you chose not to

Of course I choose not to, and that's what has you girls crying like school marms. No Boy Georgey, I will not go away or ignore your lies and bullshit that you and Lelnad and Hall and anyone else chooses to ply here. I will continue to point such things out. Nothing more, nothing less. You can continue to carry on and flame and make it personal, as you and Hall and Nad have perfected it to an art. It won't change a thing.

That's not the point at all,

>what you say is of no importance<

Of course it isn't...but I'm not the one having a hard time accepting this concept...it's you, and Nadboy KC8LDO and Daveyboy Hall N3CVJ that think your opinions matter when they are useless, worthless, and impotent..

Wishing hard enough won't make it so, nor will
saying it over.You have exhausted all your tactics.

Only to you, boy Georgey....more return.
See, you are receiving back all you dish out and dude, you whine more than any child or woman
that doesnt get their way..a solid indication you are unable to handle what you spew.....haahhahahha!

>I can handle it twsity thats where your >mistaken,

I'm not mistaken boy-Georgey. You sorry pups have illustrated it time and time again.

>It is you guys crys about things that go on in >this NG then say aaron did this george did that >you then you turn around and do the same

Not true, boy Georgey. Just like you were called on your lies about us attempting to silence legal advocation....just oral defacation from you, nothing more.

>thing back to those you claim are doing you >wrong.

I dont claim anyone does me wrong, Boy-georgey, until they start complaining about me treating them the way they treated me......it is a circular argument, started, perpetuated, and continually escalated by yourselves.

>I dont care what you or JJ or any of you think >flame me all you want, troll me all you want >but to claim that your allowed

Only you used the word "allowed", boy-Georgey.

>to do it because it is return fire? LOL That's >the biggest joke of all, well next to you.

I am glad I can be of some assistance to bring a bit of joy and laughter
to your sorrowful pit of stank.

WA3MOJ wrote:
>Lie, and make false claims.. duly noted.<

Your mantra.

reply to your accusations and point out how it is not hypocritical of anyone to stand up for what is right,

>Thats the point you pschotic head is missing.<

No, it's not,,,it's the point your lack of intellect is not comprehending.

> your not standing up for what is right,<

That will be the day when you can dictate to another what he feels is right. I have a feeling this is one of your serious problems...you have a differing view of what is "right". You feel that one should turn the other cheek and run when confronted. The impotence is totally authentic with you...you are unable to make another conform to your view of wht is "right" and you just can't handle it...heheheheh!

>someone cals you a asshole and the right >thing to do is call them one back?

No. It began with me pointing out inaccuracies, lies, then your wad of sticky pups decided to take it to another level and get personal. There are hundreds of posts of you losers getting personal and calling names and becoming off-topic insultive for no other reason than someone posts something you disagree with.....t-o-u-g-h! Get over yourself, boy george.

>with.lthen tell them they are a asshole for >calling you the asshole. That is what you are >doing. Instead of you being a "adult" about it >you revert to childish banter, well he did it so I >am gonna do it to nannanananaaa.

Again, that is not what happened. The archives are there for all to peruse of my entrance into this group.

>Do you have kids twisty? do you smoke cigs. >Tell your children to not smoke then light up a >cigarette, hypocrite

Children are to do what they are told, not what adults do. Smoking is legal for adults, boy-georgey. It is perfectly acceptable for an adult to smoke and tell a child not to. That is the way it has been done forever. YOU, as usual, are in the norm, and no, I don't smoke,,you're missing posts again.

I reply with words *you* used, and you cry "hypocrisy'...

>Yet when I say those words I am wrong<

Yes, you're wrong. Again, I am sitting here with a perpetual grin on my face because you can't understand why people treat you like shit when you treat them the same way.

> when you do it is ok? That is how a hypocrite >works,

No, boy-Georgey...it is the golden rule coming home to roost and you have a problem with it.

> and you got that down pat.Twistednuts, <

Yes I do, boy Georgey. I have always given folks the benefit of the doubt. I assumed you were an idiot and I was correct..you attacked without provocation. I assumed Lelnad was an azzhole and I was correct..he attacked because I made a monkey out of him..actually, I just shared the info..... . I ASSumed Hall was a lying troll, and his past posts confirmed as much. You all attack me on a perosnal level because of my cb views and you think I should....ignore your lies? Go away? Hahahhh! Grow up, Georgey.

>if you replied in kind to me with what I say to >you that is ok I can take it I have broad >shoulders, but not your crying about it and >how wrong we are when you do the same

YOU began the crying, boy Georgey.
You are the hypocrite..you and Nad and Hall.
I don't know why you have a hard time understanding your hypocrisy.

>If I call you an asshole, and you want to call >me one that is fine, knock your dick in the dirt

Hahhaha...you dont get to dictate what is fine..and it's YOUR d*** in the dirt.

>doing it, but Don't tell me I am an asshole for >calling you one, and then you turn around and >call me one and say it is just you returning fire.

That's exactly what it is...even your subconscious knows this..read what you wrote again.......then realize it.

If you would respond in a non-inflammatory manner and manage to treat those as
you wish to be treated, there would be absolutely nothing for you to point at.

>Oh so what that means is then you wouldn't >be a hypocrite?

It's such a simple concept

>yes it is you condem those for the same thing >you do then use an excuse for your behaviour

>yet you fail to grasp

I fail to grasp your non comprehension of it yes.....same as Lelnad and Davey-boy Hall.

>Ah your love for them is never ending, is that >return fire or just you being a dickhead?

Well, Hall boy said I was killfiled and talked about me in a post to another to the tune of 400 words. I'd say it's return fire.

JJ tells me it's ok to email him
and you act as if he just stabbed you in the back.

>well if he sleeps with you then yes he has. <

There ya' go with the homosexual remarks. I think you're little clique is all queer......Lelnad has made sexual remarks, you...etc.

>I have backed JJ when possible.<

Ummm.....so?

As was correctly noted, I have no desire to flame or argue with anyone,,

>Thats your biggest lie yet, you have no self >disipline then no one is making you do >anything.

That's right..it's all me..totally in control. Wake up, biy-Georgey.

>You chose to argue and you enjoy it hence the >reply to this post.

Listen carefully,,and I know it pains you...but,,,you know only what I allow you to know concerning me.

nor will I passively lay down or take your bullshit.

>You sticking your nose in where it doesnt >belong doesn't constiute anyones bullshit >except your own.

It's usenet..public...everyone's nose belongs. You're just sorry 'casue I won't allow you to claim it for your own little private domain to spread bullshit and lies.
Very simple again, so simple it lost on you...if you can't stand the heat,,get out of the kitchen...comments such as "sticking your nose where it doesn't belong" concerning posts on usenet highlights your intellect, and you're too ignorant to know any better to be embarrassed by it.
Again, don't wantI just do not enjoy casting pearls before swine.

>Then why are you doing it Lack of self control?
Pay attention. I will not lay down or back away or ignore those who feel they can attack and intimidate those whose opinions they don't agree with. Get over yourself.
You want a target, demonstrated by Lelnad and Dave Hall's pastcomments

>ahhh there goes those 2 names again can you >say infatuation, you really need to see a >doctor about it.

They are "arron's" named names of the posse of trolls in recradio.cb..and yes, you were on it as well.

>the bond that ties you with Lelnad, Dogie and >Hall...

Most men do have bonds with their dogs.

>Can't make a post without bringing up these >guys name can you say Lunatic?

If it bothers you, exercise some self-control....(ROAR)HAHAHAHHAHHAHAHAHAHAHAHAH!

>rest of useless twisty ranting snipped for >bullshit and hypocrisy reasons.

That's all you had to in the first p[lace..get out of the kitchen wehn it gets too hot..hahahahha!

2889. Replacement Mic Q

Newsgroup: rec.radio.cb
Date: 2002-11-29 21:06:07 UTC
From: "SplashPattern.Com - Dave" <dave@splashpattern.anti_spam.com>
Message-ID: <uuflmot325pecc@corp.supernews.com>
Source record: 145423

Greetings and salutations.

First, let me appologize in advance for my general lack of all things RF. If it sounds like I don't know what I'm talking about, it's probably because I don't! That said....

I recently installed my old CB radio (Midland model 77-099) in my new truck. Unfortunately, sometime in the five or so years the radio has been in storage the little lug on the back of the mic that allows you to hang it on the....uh....whatever they call the thing the mic hangs from...has broken.

I had an old Radio Shack mic lying around from Glub-only-knows when. They connectors were similar so I thought I'd just swap mics and be done with it. Nope. The RS mic doesn't work (for starters, the radio indicates 'transmit' full-time!).

And so I've entered the market for a new mic. Unfortunately, nothing I've seen after a brief web search is obviously suitable. That is to say that nothing has said, "works on a Midland," or words to that effect.

I presume that the Midland mics are compatable with some other brand's, but after seeing the results of using the RS mic I am leary of ordering anything without a bit more info.

Sooo..... Can anybody point me in the right direction?

Arguments concerning one party vs. another in a radio room can be construed as.....ah, never mind....here's some truth.....the demos lost everything because of no worthy candidates. The republicans have already way overshot their mandate....way faster than even the demos thought would happen. Check last weeks state-by-state financial report and forecast. Some were even in here crowing about the GNP growing and claiming things were actually looking better financially.

Cough, cough, BULLSHIT!!!!!!!!!!!!!!!

You will not ever see a mobile do 100k. And when I say "do", I mean for more
than 1 second, and self contained. I really don't know where you guys get
off thinking you can rewrite physics.

Tim, if can't do it continuous, you ain't doing it. For an analogy, sure air conditioners pull 150 amps momentarily on startup, but they don't do it in operation. It's the same principle.

I love that (p)icture(.) (I)t(')s so true, but there is one problem I
noticed. Most
CBplussers use a (s)oldering (t)orch instead of (s)oldering (g)un, but only
when
working on (p)rinted (c)ircuit Boards.

While looking at these posts, it's always easy to spot Babbling Brucey's
improper use of upper case and no apostrophe's, not to mention wrong usage.
("your' vs. "you're", "there" vs. "their" vs. "they're", "to" vs. "too")
...and yes, I've cross-posted this to rec.radio.cb so that they, too, can
see what an idiot you are.
Like I said before - if you write one full line of text that has no errors
in it, I promise I'll stop.

Currently selling at $51! It's a steal!

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=1501&item=1941085308&rd=1

This auction is for a truely unique radio from the 1970's! It is a Robyn DG-1300 40 channel AM CB with a Robyn SX-7 base module. This allows the CB to be used as a base radio simply by sliding it into the "docking station" and plugging in the speaker and power plugs in the back and attaching an antenna! The power supply and speaker are in the base module!

This radio is COLLECTORS QUALITY! It is PRISTINE. I would give it a 9.9 on a scale of 1-10 only because it isn't brand new in the box.

I got this CB not too long ago with the intention of using it at home, but I never did. It's been kept in the original box. Included is the microphone and some of the original literature that came with the radio.

This radio works 100% and I received great audio reports when tested. It does the full 4 watts legal limit as indicated by the internal power meter and 2 different external power meters.

It would be interesting if Babbling Brucey had to write up the paperwork on this supposed bust. I'm sure the FCC officials would've been shaking their heads in disbelief at how someone who passed the Extra test could be so functionally illiterate.

Ok, and I stand by that statement, one says Legal the other Illegaly, never the less they cry to peoples ISP's JJ, cry and whine saying we shouldn't be posting FCC rules we know what they are, oh he called me a name, mainly because they don't agree with what aaron,myself, frank etc or anyone who are against Illegal Cb operations. So they want to silence the critics. I expalined enough. It will be fun to watch them hang you out to dry to JJ,when given the opporunity. Grab him up fellas he is ripe.

Not necessarily. Many rules of English grammar are flexible. Example:

"Like father, Like son."
"Like sands through the hourglass, so are the days of our lives."

Even split infinitives have become acceptable. Example:

"To boldly go where no one has gone before" <- (politically correct version)

It seems to be "verb stingy" like some of Leonardo's stuff.

> "Like sands through the hourglass, so are the days of our lives."

How about, "Like, Daddy--you got the chord changes but you need to work
on the lyrics."?

> Even split infinitives have become acceptable. Example:
>
> "To boldly go where no one has gone before" <- (politically correct version)

That one is just a clause which has been lifted from a sentence. Not
only that, it came from the land of television where "Winton tastes good
like a cigarette should" was deemed to be correct use of English.

CBers use 40 Channels AM and SSB and sometimes FM
CBers sneak out of band to get away from the "wigger-fied" airwaves.
(crossfire gets his feelin's hurt when he sees the "N"-word being used!)

Hell, I love to sneak outside the 40 channels above or below to get away
from the "wiglets" that dominate and they gets so excited that they "cum" in
their pants when their favorite "toy-wiggers" are on the channel.

Every damn mornin' I hears their loud mouth bleedin over the channels!!

They be talkins to somebody called "black man" in the bayou , when theys
only talkins to themselves!!!
These DXer wannabes pretend to talk DX - the person answerin' is really
livin' in the next town!!
That's whys theys so clear!
It's Sad!! It's Sad!!

I key up and make all kinds of sounds to get them goin'.
They come back and tell me to shut up, call me a "mud-duck" (I keyed up all
over them and the only word they use is "mud-duck"?) WIGGER, Please!!

I sometimes sit in a undisclosed location and key up and say some off the
wall shit!

I used to work for Gundlach Heating / ac in Richmond, VA until I got A REAL
job.
I remember someone called my work and threatened to take me to court for
verbal abuse on the CB!!
WIGGER, Please!!

They used to fuck wit me on Channel 16 - they called it the family channel
or some shit!
more like the faggot channel!
they used to mess with ol 513 and threatened him!
Some fag callin hisself "Step or stelth Rider" --- what the hell kinda name
is that on a cb radio?
he must not have no woman as sorry as he was!!
workin as a rentacop at car lot in 1994
Dumb ass -- he and someother stupid persons were trackin my radio down!!
Well they found an empty van is all they found!!
If they'ed look alittle more they might have seen me in the back! with my
GLOCK!
If that faggot stumprider's out there his momma is a buttfuckin whore!! and
his daddy ain't nuthin but a nigger lover!!
dats how stumprider has his mental problems all the damn time!
tryin to make people like him jes becoz he cry alot!!!

His real name is -- well he ain'ts got no real name worth havin'!
he goes around poppin off about he gonna kick ass or some shit!!
If I sees that faggot I ma gonna shoot him and his famly.
I knows the others who tracked me down that night!
I really dont gives a damn 'bout 9/11 -- Ima gonna take that fagot out!!
any fool try to stop me will get a good ass beatin'!
I likes that extreme shit!
its a way of life ands if yous can't take it -thens I shows you how to take
it!!

Sure(,) Brian(.) (You) (C)an(')t pass the Extra(,) so now you think they
should make it 1 License.
(T)hat way(,) you can pretend to be a real Ham(.)

Sorry, Brucey, but an amateur radio license, as issued by the FCC, is all
one needs to be a "real ham." Some of the so-called "CB-plussers" I've met
are more of a ham than you'll ever be.

GOOD(!) (M)aybe one of these days you can get a (r)eal ham (l)icense(.)

But...but... I thought that the real ham licenses were all gone! I thought it was all a "dumbed down" license! After 4/15/2000, everyone that acquired an amateur radio license was nothing but a "CB-plusser." You said so yourself.

It means every time you double the distance from the antenna, the
power level drops by a factor of four.

I have heard the power output diminishes at the "square of the distance".
What does this mean. If I have a CB that puts out 4 watts what would be the
power one, two, four feet away from the antenna?

If a four watt measurement is referenced at one foot then.......

A two foot measurement would equate to One watt.

.A four foot measurement would equate to a Quarter watt.

: WA3MOJ wrote:
: >Lie, and make false claims.. duly noted.<
:
: Your mantra.
:
: reply to your accusations and point out how it is not hypocritical of
: anyone to stand up for what is right,

Twisty, you can stand up for what ever you think is right, it is how you go about doing it. You calling others all the names you call them then turn around and say they are vermin etc for using the same words you used is hypocritical. You can stand up for what is right, and not call people names like they do. if you do that then you can say we are assholes and call names etc. But you do the same thing so you are no better than those you claim are foul mouths, and trolls. I just don't understand why you don't get this. I can dish it out and take it but don/t call us liar's and name callers when you yourself have been proven to lie repeatedly. Call people names repeatedly. I don't care what your justification is. it is like saying well since he killed someone in my famiy you are allowed to and face no punishment. Oh he raped my wife, that means I can go rape his, and not be expected to be called a rapist.

: No, it's not,,,it's the point your lack of intellect is not
: comprehending.

Sorry twisted nuts, you lack of comprehension is your greatest skill, you either don't understand or your just plain thick headed.

: That will be the day when you can dictate to another what he feels is
right.

No one is dictating to you what you feel is right. STOP< and listen. How can you for one minute think you are justified in your comments, to those you claim are doing the same that you are doing to them. Your telling your kids not to smoke and you have a cigarette in your mouth I don't know how much simplier to make it. if you feel people are calling you names etc unfairly you have the right to call them the same back. but don't tell me how wrong they are when you are doing the exact same thing in return.

:I have a feeling

could be diarehha

:this is one of your serious problems...

you are correct talking to you is a serious problem

: you have a differing view of what is "right".

Not at all, my name is not twistedhed.

: You feel that one should turn the other cheek and run when confronted.

See your comprehension skill are severly lacking. READ what the FUCK I HAVE BEEN SAYING>

I have never ever said You can't stick up for yourself, that is your poor comprehension skills that are lacking you should be expected to stand up for yourself. It is your accusing others of name calling and then doing the same thing to them and saying how bad they are and your a saint. You are doing the same thing you are accusing them of doing, the name calling, the crying to Isp's. It is all hypocritical. You blame others for the same friggin thing you do you are no better than they are . Who cares who cast the first stone. If your as big a man as you say you are you would'nt "return fire" like you do you are acting the same as those you talk about that is the whole story. get it thru your thick friggin head. Stop putting words in my mouth You are the master of twisting posts.

:The impotence is totally authentic with you...

more sexual innuendos as expected.

: you are unable to make another conform

you cannot speak for me you have a hard time speaking for yourself. What you say is of no consequences.

: to your view of wht is "right" and you just can't handle it...hehehehehh!

What do you call someone who tells another to not do something yet does it themself?

: >someone cals you a asshole and the right >thing to do is call them one
: back?

: No. It began with me pointing out inaccuracies, lies,

Just because you cannot comprehend what another person means does not make them a liar. To you that is all you have your claim is everyone who disagrees with you is a lair. look at your posts how is it everyone lies and you catch them amazing.

: then your wad

More sexual innuendos

: of sticky pups decided to take it to another level and get personal.

That's great then defend yourself.

: There are hundreds of posts of you losers getting personal and calling names

here you go crying, the same song getting personal, is it ok for you to get personal? there are hundreds of you getting personal as well, if you are so better than those who chose to get personal with you why stoop to thier level? because you are at thier level you are no better than those you critisize.

: and becoming off-topic insultive for no other reason than someone posts
: something you disagree with.....t-o-u-g-h!

You do the same thing I say the same thing to you toguh your crys to ISP's and to the NG is tough, don't like being called names Tough, don't like what someone says tough it works both ways not just your way.

: Again, that is not what happened. The archives are there for all to
: peruse of my entrance into this group.

: >Do you have kids twisty? do you smoke cigs. >Tell your children to not
: smoke then light up a >cigarette, hypocrite

: It is perfectly acceptable for an adult to smoke and tell a child not to.

It is? You tell a chld no smoking is bad for you then light up to me that is a hypocrite. Flat out plain and simple, well then I see why you don't think your a hypocrite. you believe in the say one thing do another syndrome.

:That is the way it has been done forever.

yes with backwards ass thinking people like yourself.

: YOU, as usual, are in the norm,

You damn straight I am in the norm, it is you who is in left field.

: I don't smoke,,you're missing posts again.

For some reason you think I read your every post, nah your just not that important.

: Yes, you're wrong. Again, I am sitting here with a perpetual grin on my
: face because you can't understand why people treat you like shit when
: you treat them the same way.

Twsity, i don't care if you treat me like shit, I expect you to, but don't call me anything your not prepared to call yourself. You are singing the same tune as I am, name calling etc. you are no different no matter your reason for doing so.

: > when you do it is ok? That is how a hypocrite >works,

: No, boy-Georgey...it is the golden rule coming home to roost and you have
a problem with it.

Ass clown my problem is with you calling others names and then feel you are somehow justified in doing so, all the while saying how bad that person is for doing so. Thats my problem , your comprehension skills are also a problem, your thick headed ness is a problem need I go on?

: Yes I do, boy Georgey. I have always given folks the benefit of the
: doubt. I assumed you were an idiot and I was correct..

I didn;'t assume you were an asshole you confirmed all by yourself by your posts

: you attacked without provocation.

I did? prove it

I assumed Lelnad was an azzhole and I was correct..he attacked because I made a monkey out of him..actually, I : just shared the info..... . I ASSumed Hall was a lying troll, and his
: past posts confirmed as much. You all attack me on a perosnal level
: because of my cb views and you think I should....ignore your lies? Go
: away? Hahahhh! Grow up, Georgey.

Seeing your Jockstrap post I can only assume what he thought of you.

: YOU began the crying, boy Georgey.

I did ? wh o began the letters to Isp's etc? you asshole you and your impotoent bunch when you saw your words couldn't contain aaron. you began the crying when Aaron arrived on the scene, want to see the posts?

: You are the hypocrite..you and Nad and Hall.

yes we all are and your not? Twisty your a legend in you own mind. Ass Clown were are not the ones accusing you of calling us names, and hurting our feelings, then in turn turn around and call you names.

: Hahhaha...you dont get to dictate what is fine..and it's YOUR d*** in
: the dirt.

why does it taste funny? hows my dictate?

: It's such a simple concept

yes it is, call us names and what ever you wish but don't cry how were are the ones doing the name calling you are doing it as well hypocrite.

: JJ tells me it's ok to email him and you act as if he just stabbed you in the back.

No i told him to be careful, your comprehension skills are severly lacking hence you calling people a liar as usual. You took it as that. i will determine what the meaning of my words are not you.

: >well if he sleeps with you then yes he has. <

: There ya' go with the homosexual remarks.

there were no sexual connection whatsoever but your seedy mind sure hoped so. guess your used to it huh

: I think you're little clique is all queer.....

What you think is of no consequence, and has been ruled such. Besidies, I think your click is queer too in fact i know at least one is,LOL but hey thats fine you can drop all the sexual innuendos you want, If leland or someone else does it it is just return fire. Stay on topic no one mention anything about queers except you.

: Lelnad has made sexual remarks, you...etc.

And so have you so lets add you to the list too. btw, you sure have leland of the brain.
Seek Help, I havent seen him post in how many days are you trolling in hopes of getting a remark from him?

: Listen carefully,,and I know it pains you...but,,,you know only what I
: allow you to know concerning me.

Remember that when you say things about me it works both ways slapnutz.

: nor will I passively lay down or take your bullshit.

Stand up lay down you will still wind up on the short end of the stick if you confront me. Take that to the bank.

: They are "arron's" named names of the posse of trolls in
: recradio.cb..and yes, you were on it as well.

Who cares who named them you cannot stop saying thier names, you are trolling in hopes of a reply by them. Leland Aaron, Dave hall not a single posts goes by with out you mentioning thier name in one way or another.

: >Can't make a post without bringing up these >guys name can you say
: Lunatic?

: If it bothers you, exercise some self-control...

How can i you mentioned them in a post directed towards me when they are not even part of the topic . ou need to excersize the self control stay on topic they are not part of this convesation except when you show your allegiance to Lee and Dave.

It means that if you want to double your range you need to quadruple
your power. And that's only theoretical: i.e, no other losses or
interactions from the ground, buildings, trees, etc.

> If I have a CB that puts out 4 watts what would be the
>power one, two, four feet away from the antenna?

Because your radio doesn't operate in a theoretical world, and your
antenna isn't going to be ideal either, you can't really translate it
into watts without measuring it directly with a field strength meter
that can read uV/m.

>ask.

That's better than deliberately insulating the guy like you did.

>Acyually, I learned it from you a few threads ago

You really want to admit that you actually learned something from one
of my posts?

>I charge for concert performances.<

>Oh yea? In addition to your $126,570 per year salary you claimed?

I just may make more next year too. 8-))

>I don't listen to Disco and I don't own a cat.

You don't own a computer and use a real ISP either and it shows.

>I keep telling you, not everyone is like you.

Yeah, well it gives people a lofty goal to aim for.

>Your assumption that he understands how to build one after the single
>question he posted......doesn't.

There you go again Twirted, insulting him again by assuming he can't
look it up in an ARRL publication or on the net someplace.

>Quite accurately, it would appear. I have the whole lot of you crying

The only one "crying" Twirted is you. You need a diaper change.

>Metal? Nah...I'm too old for that....last good metal band to come
down
>the pike was Deep Purple...

I rather like Pink-Floyd myself.

>besides,,,,make up your mind with your
>self-contradictory self...(haha)...i some of your posts you accused
me
>of crusing through google...

It still doesn't imply you know how to use it. Even a blind squirrel
finds a nut now and again.

why not just tell him the bottom line..... cable coax sucks
for all practical cb purposes.

>Wow!! You just did. So what's he suppose to >use 450 ohm ladder line
now?

>Because the TV cable coax characteristics, as you have noted, are
>undesireable as they are in their present state.

And this is coming from somebody who can't tell the difference between
a Pot you tweak and the kind you park your arse on. Twirted go to the
corner and play with your squirt flower quietly by yourself.

I believe that myth is mixing two different items.
But what the expression means is this;
If you have a radio which is capable of transmitting 20 miles with 4 watts,
then theoretically, that same radio should be heard at 400 miles and have
two watts of output.
Seems a little ridicolous when applied to radios doesn't it?
In reality, any antenna will have something in the way of power gain.
There is a formula to determine what the power gain is for your antenna.
As it is quite complex, you ain't gonna get a description here.
But let's say you have a radio that puts out 4 watts.
your antenna has a power gain factor of 3.
Your effective radiated power (ERP) is now 12 watts.
You've heard commercial broadcast stations state what their ERP is and
wondered what they meant? Now you know.
It's not the same as their transmitting output power.
As required by FCC rules, those stations must make annual measurements at
given distances from the antenna.
Equipment will record what the signal strength at that location is.
As you know, the farther away you get from the source, the weaker the signal
gets.
That is primarily due to the nature of the signal itself. What frequency is
used and so on.

What you want to know about actually has to do with audible power.
If you stand 10 feet away from a speaker, then move to 100 feet, you will
hear half as much as you did at 10 feet.
Using a decibel meter should quickly prove that theory.

Not brilliant, just the truth. Reception of a radio signal only
requires the induction of a few microvolts, and yes eventually
you will have nothing left to overcome the naturally occurring
noise.

snip

If a 4 watt radio is referenced at a specific signal at 20 miles then
at 400 miles the same signal would be 1/400th of the original.
1/400th of 4 watts is only 10 milliwatts.

Square the product of 400/20, or the reduction is 20 x 20 = 400

There is truth in this. You couldn't measure a few feet away since you will be in the near field of the antenna and magnetic and electric field ratios will change as you move away from the antenna. Once you are farther away, if you double your distance, the electric field will drop in half and you would have to quadruple your transmitted power to bring the field back up to where it was. This only applies to line-of-sight transmissions. Once you get into skip, all bets are off as skip conditions will likely affect the received signal more than transmitter power. You might talk from Pennsylvania to England, yet not be heard in New York at all. Also, you'll find that the more you need a state or country, the weaker the signals are going to be (Murphy's law) ;-)

IceCold, if he doesnt have 250kw of input power then he won't have the 100k
output. Simple concept but I didnt think a keyclown like you would have a
hard time understanding.

I believe the PC board is good and working. You will just have to rewire it and put it in a good case. Someone put phone wire on it. I needed the PTT bar from it. The rest is parts. Let me know. It will work without the PTT bar, you just need little fingers.

This has been my own personal rig for about 3 years. Just got a 1000D so no longer need it. It has the AM/FM board and has been modified for 11 meters. This is a loud AM talker and swings to 125 watts from a 25 watt deadkey. SSB operation is smooth and sweet sounding. Receive is very sensitive. Pics available on request. This radio is in excellent condition physically and electronically. Includes owners manual and original hand mic with up/down controls. Put a D-104 on this radio and you have a screamer. Asking $490 + shipping.

You don't understand radio wave theory at all. Your theory above
is so far off it is ridiculous. The signals that hit your antenna
are in the microvolt/microwatt range, even from that big powerful
50 kw AM station you listen to on AM radio. For every doubling of
the distance from the antenna, the power drops by a factor of
four. It is the laws of physics.

> Seems a little ridicolous when applied to radios doesn't it?
> In reality, any antenna will have something in the way of power gain.
> There is a formula to determine what the power gain is for your antenna.

The same rules applies, an antenna with gain just means that it is
concentrating power more in one direction than other directions,
but still the power drops off by a factor of four for every
doubling of the distance from the antenna.

> As it is quite complex, you ain't gonna get a description here.
> But let's say you have a radio that puts out 4 watts.
> your antenna has a power gain factor of 3.
> Your effective radiated power (ERP) is now 12 watts.
> You've heard commercial broadcast stations state what their ERP is and
> wondered what they meant? Now you know.

And still the amount of power you receive from that commercial
broadcast station is in the microwatts.

> It's not the same as their transmitting output power.
> As required by FCC rules, those stations must make annual measurements at
> given distances from the antenna.
> Equipment will record what the signal strength at that location is.

Suggest you get some good books on radio theory and do a bit of
reading before you make more foolish statements.

> I believe that myth is mixing two different items.

It's called the inverse square law, and applies to all electromagnetic radiation, including light.

> But what the expression means is this;
> If you have a radio which is capable of transmitting 20 miles with 4 watts,
> then theoretically, that same radio should be heard at 400 miles and have
> two watts of output.

Try it this way: If you're S9 into someone's receiver at 10 miles, then at 20 miles (twice the distance) you'll need four times the power to achieve the same S9.
This is because no matter what sort of antenna you use, the signal illuminating any patch of space spreads spherically with distance, and the area of a sphere is proportional to the square of the radius.

This is a free-space thing, and does not take into account terrain, or ionospheric propagation.

> What you want to know about actually has to do with audible power.
> If you stand 10 feet away from a speaker, then move to 100 feet, you will
> hear half as much as you did at 10 feet.
> Using a decibel meter should quickly prove that theory.

You won't get more than 1% the amplitude at 10 x the distance.
It's the inverse square LAW, not the inverse square suggestion.

>>Just prove THIS MESSAGE was posted by >me .

>LOL! You're really pathetic. No one cares about your identity games.

You do. You like to dredge up old posts and claim that you were forged
by somebody else. Of course you never could figure out who it was, and
still can't. You like to point to message headers and clim they came
from so-and-so, but you really can't prove it can you when pressed on
the subject.

So I'll state my challenge once again Twirted:

Just prove THIS MESSAGE was posted by me.

Good luck. Of course anything you come up with has to be independently
verifiable by other interested parties.

You can also quit the silly games with the extra white space in your
posts etc. Everybody knows you do that, and others things, in a vain
attempt to stop people from copying your posting style. Its really
stupid on your part. If nobody else knows what you do "special" then
nobody can tell if its really you, so you're screwed. Of course if
somebody can hack your style once they can do it again. Then again
maybe it was just you crying for attention.

Hello and Help.
I have a cobra 25 nw st and would like to change the instant channel 9 selector switch to a different channel or even a upper or lower of a different channel.
Does any one know how to do this or a link to a site to help me do this, I do know wiring and some circutry so this shouldn't be too hard for me to handle unlike my spelling.
Thanks
K

jimbo......i don't think filling it with corn squeezins would be a
good idea......the last think i need is for my antenna to hick up
while under full load.....

WAAAA!

Then sell the 122 and buy a radio with an 858 or an 8719.

An antenna filled with corn squeezins, that would make it a loaded
antenna, but would that make your audio sound mushy?

Naw, I don't need a halo. Just from a bit of background with those 40 KW output HF transmitters .... Heck, speaking of Kodak, they're shutting down my plant! Everything going to China. I feel sorry for the guys with a lot of years (two of 'em with over 30 years) who aren't 55 yet. They will get no life insurance, no health insurance, and if they tap their pension, even taking a lifetime annuity, IRS wants to penalize them 10% (plus tax that!)! Some folks get the gold mine; others get the shaft.

73 from Rochester, NY
Jim
ps -expect to find another opening within the company. Thank God I'm getting near the end of my career - I honestly don't know what the kids are going to do. No stability, no benefits .... managers now are making the equivalent of what I did in 1978 as a master mechanic. Sheesh.

Thats a Mocat. The one I am after is a 40 ch AM/SSB mobile that is smaller in size and in a black and grey case I believe the actual model is 550 or 555 (one is a base and the other is a mobile).

I had one and I foolishly sold it a while back. I want another one to replace it as it was one of the best talking stock rigs I have ever owned.

Thanks.

3011. CB Repair & Mod. Books 40% Off

Newsgroup: rec.radio.cb
Date: 2002-12-01 01:15:08 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <lpoiuu09cqaivi2lg26h8fokutddr1qmeo@4ax.com>
Source record: 145496
Cross-posted to: rec.radio.cb,rec.radio.swap

To learn the technical TRUTH about CB Radio without all the hype from people who are just plain ignorant, check out the following books from CBC International. They're selling right now at a big discounts on our EBAY & AMAZON stores too.

Check it out! Go to this link:

http://cgi6.ebay.com/aw-cgi/eBayISAPI.dll?ViewSellersOtherItems&userid=lou@cbcintl.com&completed=0&sort=3&since=-1&include=0&page=1&rows=25

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out & Repairing CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB repairs & modifications. Covers peaking of receivers, transmitters, modulation, mike problems, antenna & SWR problems, detailed frequency modifications for both crystal & PLL radios. Loaded with charts, illustrations, and specific instructions for most brands including the new export models. This latest edition also covers slider and broadbanding tricks, FM conversions, and much more!

BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms. How they work, and how to modify them for many more channels. Includes specific PLL block mixing diagrams, truth charts, & IC pin function diagrams for nearly every PLL chip ever used. Covers all the most popular U.S. & export chassis, with specific listings of all models using the chip.

BOOK #3: UNDERSTANDING & REPAIRING CB RADIOS. List $42. Giant 370-page technical book for the professional repairman. Picks up where the "SCREWDRIVER EXPERT'S" GUIDE leaves off. Includes circuit descriptions & troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. Covers test equipment (& where to find it), transistor basics, synthesizers, receivers, transmitters, power supplies, T/R switching, antennas, interference, parts & accessory sources. Over 350 illustrations including schematics, charts, and photos. Huge subject index also lets you look up repairs by symptoms. This is "must" reading for any serious CB technician!

For details on our Galaxy-Ranger Service Manual (2nd Ed.) go to:

www.cbcintl.com/galaxy.htm

Nighthawk,

Your link wrapped around. When you click on the link you posted it shows all auctions for a "Nighthawk" on ebay. If you cut and paste the missing part of the link you will see what "Nighthawk111" has for auction. I found it odd you had nothing for auction when I clicked on your link so I double checked and realized it had wrapped and only part of it was active. Any way you can fix the link up? Would clear up the confusion next time you want to advertise your auctions.

Dave

Wow my adjustment worked wonders, not it link wrapped to. As I just noticed.
as Dave said just copy the part of the link that is not underlined and paste
it in addy bar to the link that is alrady there.

Well, I am sorry cheese I wouldn't know what he has, I just figured all keydowners, know these type of things. It is nt real hard to figure out you have a so called 100 kw amp isn't 100 % efficient, you will need a exciter to drive the the thing, to get that type of output you are going to need a certain amount of watts i say at least 10- 20 kw to get that type output. I have a hammie friend who works at an Am radio station/ tv station, 50 kw transmitter 100% duty cycle. i don't doubt these fellas have 50 kw mobiles

perhaps a tad bit more, anything over that is subject to a bullshit fudge factor, how are they measuring the power at deadkey or under modulation.

John, It depends on several factors transmitting antenna height, recieving antenna height, antenna gain, power used, coaxial losses as well as frequency. but to give you a half vast answer between 60 and 100 microvolts for a 4 watt transmitter at 3 miles.

Matt, I lost the earlier part of the thread. The point I would make is that the handheld, used as a handheld with a whip, won't have any reasonable range. It will be much more subject to intermod distortion as opposed to a bigger radio (whether base or mobile). Yes, they can work, but if he is interested in mods, I can't come up with any reason for a handheld. Again, poor intermod (especially noticeable with an external antenna - and with the whip, any handheld at 27 MHz is almost a joke. No reasonable antenna and virtually no ground). Pray tell, what advantage does a handheld have over any reasonable 27 MHz CB? MURS will offer a much more efficient antenna as well as ground and will be capable of much further range. A 27 MHz handheld will be lucky to compete with FRS ... If folks offer advice against the 27 MHz handheld, there just might be a reason.

73 from Rochester, NY
Jim

From: yeti@REMOVEcet.com
Message-ID: <3de998d6.18895298@news.cet.com>
Source record: 145569

After a couple years of active participation, it's clear that this forum is nothing more than a medium for the promotion of illegal operation and the proliferation of technical voodoo. There is almost no discussion of the intended and practical uses of CB radio, the fundamental purpose of which is easy-to-use, low-power, license-free radio communication. Instead, discussions are about using the band for RF drag racing, and by wannabe-hams that are too lazy to get their license. From participating in this newsgroup, it seems that CB radio has attracted its recent popularity from this new 'gimme' generation ("I want mine, I want it now, and I don't want to pay for it!"), of which I am not a member. If that's what CB radio has become then I'll leave you all to roll happily in your squalor, and instead of trying to use facts and reason in my efforts I'll be using DF equipment from now on.

Toodles.

You are not helping by repeatedly cross posting your
ham radio crap to rec.radio.cb And you don't need to
ask anyone anything, just quit your dam cross posting to
rec.radio.cb

JoeBobHawksley proves a very good point. The roving hordes of savage
CBers really aren't interested in taking over the ham bands via a
no-code licensing scheme.

A man walks into a rather upscale bar/restaurant and asks the homosexual bartender if they serve black folks there. The queer bartender replies I will ask the Jewish waiter who replies "well yes sir of course we do", then he goes and asks the illegal alien Mexican cook in the kitchen if they have any. Yes sir the Mexican said, but if we didn't I would send the Puerto Rican dish washer who lives with his family of 7 in 1 room out into the back alley with his knife and drag a 40 oz. drinking pimp with a big pink hat and a feather in it from his 1982 Caddy. The relieved patron says "well I am glad to hear you do. I will have the fish as I don't eat red meat but my dog is not fussy so he will have one medium rare". !
A TOTALLY TASTELESS JOKE MEANT TO OFFEND EVERYONE INCLUDING YOU . SORRY IF I MISSED

I'm not sure why you think that super-swing has the abity to over-drive anything. The signal on super-swing is nothing more than a reduction of carrier during "no modulation" conditions. It doesn't have the ability to acheive more power output than without it... Actually, it almost guarantees that any linear amp will not be operated in the non-linear "compression" area. Operating in that area produces tremendous harmonics and interference to other bands such as TV...

As for complexity... there is very little.

The only real problem that it has with most amps is that the low carrier will not key the amp properly. This makes the amp relay chatter. Very annoying. My amp has provisions to be able to accept a multiplexed keying signal, that can easily be added to the set to eliminate this problem entirely.

If you trim rec.radio.cb from your reply on a complaint about cross posting, you'll increase the odds you'll see less of the thread.

It's also a good idea to check the date of a message before replying to a thread. If it's been inactive for a few days, replying may get it going again.

Regards,

Mark

I sure do. Why wouldn't I nothing said in there should make me feel any differently, I searched dwights name and last it came back was dec of 2001, as I stated in the post it may depend on which exact email addres he used, and as i also said it was a brief quick search and thats the info I found out. BTW, what does this have to do with CB? Shouldn't you be worried about your SWR, or coax connectors instead of wondering when the last time someone posted.

Super Mod kit is just a resistor in most cases, they epoxy 5 wires into a blob and only 2 of the wires are connected. They then tell you too hook this wire to mic this one to 12 volts and these 2 here. All aimed at the knowledgable CBer.

You personify the very attitude that permeates cb that Frank is
talking about. If that is a bit over your head, it means you are
the very type he is referring to.

Assuming the final stage is operated in class C using high level
(plate/collector) modulation. In this configuration it take a
certain amount of audio power to achieve 100% modulation, in the
case of 5 watts RF it takes 2.5 watts of audio. If you reduce the
carrier, then you are attempting to modulate less than 5 watts RF
with 2.5 watts of audio, this is OK on positive modulation, but
you will drive the final into cutoff on the negative side which
causes distortion. Swing mods do nothing to improve the signal,
all it does is make output meters and s-meters swing which makes
some people think they are getting a 'big signal'.

3067. Radios for trade

Hello All
I have a FT 920 with AM filter and MD 100 mike with the MFJ Versa Tuner V that I will Trade for a Yaesu FT 990. I also have the technical supplment for the FT 920. Anyone interested I am in the Atlanta area. I will meet with in a 70 mile radius of Athens GA. My email is oris@dirtball.com. I am in the Atlanta area. I will meet with in a 70 mile radius of Athens GA.
I Also Have a FT 1000MP that needs work. The frequency display blinks. I was told that there is a problem in the Phase Lock Loop curcuit. Milton Lord at http://www.n4da.com I will trade for a FT 990 Or simlar HF rig. I also have a working Icom AT 500 antenna tuner that I will trade for a Kenwood TS 50 or any small 100 watt continuos coverage HF rig. I need a moble rig. I also Have a Henry radio 2KD-5 Amplifier (pair of Emac 3-500, New Power supply Capacitors, 100 in gets you 1250 out) that I will trade for a FT 990 or FT 1000.
I also Have a Pentium III 500 Mhz computer 40 X cd rom Turtle beach CD burner 128 K of ram sound card Network card 1 gig hard drive keyboard and mouse that I will trade for a HF rig.
Anyone intereAnyone interested I am in the Atlanta area. I will meet with in a 70 mile radius of Athens GA. My email is oris@dirtball.com. I am in the Atlanta area. I will meet with in a 70 mile radius of Athens GA.
Thanks for Reading and Happy Holidays

From: tim960@aol.com
Message-ID: <20021201151750.25113.00007946@mb-mp.aol.com>
Source record: 145603

Dave,
You can rewire the mic you have, order a power mic (or a stock mic) and have it wired for your radio, search eBay for an old one, or try to find one that will fit some of the older Cobra radios with the grey talk button. Search the web for "mic wireing" or try this. Pins on the connector are numbered, the wires are color coded and each has a function, note what color wire does what and to which pin it is hooked to, change the wires to match the functions of the pins from the old Radio Shack radio to your radio.

Realistic 5 wire mic

Braid = Common/Ground
White = Mic or Audio
Red = Transmit
Black = Receive
Blue = Audio Switch

Mic plug numbers (looking into the end of the plug that goes into the radio)

2
5 4
3 1

77-099 mic

1 = Audio
2 = Transmit
3 = No connection
4 = Ground / common
5 = Receive

>I recently installed my old CB radio (Midland model 77-099) in my new truck. Unfortunately, sometime in the five or so years the radio has been in storage the little lug on the back of the mic that allows you to hang it on the....uh....whatever they call the thing the mic hangs from...has broken.
>
>I had an old Radio Shack mic lying around from Glub-only-knows when. They connectors were similar so I thought I'd just swap mics and be done with it.
>Nope. The RS mic doesn't work (for starters, the radio indicates 'transmit' full-time!).
>
>And so I've entered the market for a new mic. Unfortunately, nothing I've seen after a brief web search is obviously suitable. That is to say that nothing has said, "works on a Midland," or words to that effect.
>
>I presume that the Midland mics are compatable with some other brand's, but

>after seeing the results of using the RS mic I am leary of ordering anything
>without a bit more info.
>
>Sooo..... Can anybody point me in the right direction?

3079. Re: basic question about CB radio

Newsgroup: rec.radio.cb
Date: 2002-12-01 23:58:45 UTC
From: Mad Dog <lgsast@strato.net>
Message-ID: <ase7h6$q46i7$1@ID-71746.news.dfncis.de>
Source record: 145616

Hey Kris, that kind of range can be realized using 11meter but requires
ideal atmospheric conditions and some expensive equipment.
Sideband has 4 times the range of AM and may satisfy your needs for
reliable medium range communications.
My first love is CB and i use 2meter when parked to talk with the local hams
that may be using a particular repeater.
FM has great range but is limited to line of sight,if you cant see him you
cant
talk to him..this is why we use repeaters on FM to relay the signal and
increase range.
AM or SSB is not limited to line of sight but is affected by atmospheric
conditions that make it difficult to be heard at long distances using ground
wave propagation.
Sky wave propagation has incredible range but limits your closest contact
point to 900 miles (approx.)
You got a lot to learn and it will require your full attention if this is
something you want to explore.
Go to the library and get some books on amateur radio and obtain your
No-code technician class license..then you can reap the benefits of HF
communication.
I would invest in a superb sideband rig for the car and house and see where
it takes you.

And what if, just maybe, he wanted to talk to someone else who had a handheld, such as in a buisness? I don't think he would need a masive whip.

Matt, I am **not** trying to be argumentative. I have a friend with a construction business that tried just that - using hand held 27 MHz radios. A couple of jokers always would try and run him off. Those wakies we no good for any usable distance (500 feet?). I am simply trying to point out facts. For business use, UHF would probably be the best bet - one has access to repeaters, and even without repeaters, one could expect 5 miles or so between handhelds (farther to a base; how much would depend upon antenna height and local terrain). MURS, while probably running about the same power (2 watts for MURS), offers much more efficient antennas and I would suspect 5 miles between handhelds could be expected; considerably more to a base. As to the 27 MHz handhelds, any reasonable whip will offer such low efficiency that I would suspect the range would be comparable to FRS - assuming no skip, no others using the channel, no strong stations using an adjacent channel. As I mentioned, a very close friend of mine tried using 27 MHz handhelds. I suspect anyone buying them would be very disappointed. Yes, one can connect them to a fixed external antenna - then their signal would be similar to a stock base unit, but I believe they would be more subject to front end overload in the presence of strong signals - and, of course, they are no longer portable.

73 from Rochester, NY

3097. Check Your Radio for this common Problem

Newsgroup: rec.radio.cb
Date: 2002-12-02 07:58:14 UTC
From: Stutterin' Bob <tenfour@goodbuddy.com>
Message-ID: <3DEB1296.4CAC1189@goodbuddy.com>
Source record: 145633

Check this out- You'll get out better.

Many radios take a real beating while being shipped from the maker to the retail outlets. Inside your radio, there are several screws holding things securely to the circuit board. Look for these screws inside little square metal cans. These get loose and make the cans noisy. To really get out, tighten those screws back down.

3098. Re: Type Acceptance..

Newsgroup: rec.radio.cb

Message-ID: <3DEB2A07.1070601@yahoo.com>
Source record: 145634

I wonder what the 'big deal' is about type acceptance
all of a sudden? It's been around since shortly after
'CB' was created (what, 50 years +/-?).
Type acceptance basically says that unless a radio
transmitter meets certain requirements, it can't be used
for a particular service, each service has different
requirements. It doesn't say anything about 'owning' a
non-type accepted radio, just about using one. It's fairly
common that the FCC considers 'owning' a radio the same as
'using' a radio, so you might think about that, but don't
confuse it with type acceptance.
'Doc

Another point of clarification. I never "killfile" anyone. I read any post that I have an interest in. I AM ignoring twisty's little non-sensical responses, as they contain nothing of substance, and arguing with an idiot is counterproductive. I have enough self control and willpower to not respond to some schoolboy, calling me juvenile names. There's no point in it.

I could go on and try to explain some of the finer points of network routing (As much as I know about it, which isn't everything, as it's not my bread and butter), and how messages "hop" between nodes (You know, those computers that make up the internet), and how since my ISP is relatively close to Villanova University, that traffic could conceievably pass though there on its way to wherever it is finally headed. It doesn't mean that I "posted" from there. The only address that's meaningful in the header is the originating address. The rest are just part of the routing chain, something that's done automatically. But he'd only argue it further, even though he understands little of the finer points of TCP/IP. He just scans headers and looks for "something", he doesn't know what exactly it is, but it has to mean something.....

Some people wouldn't know a clue if it were pasted on the end of a baseball bat, and slammed into their heads.....

I too, find your change in attitude somewhat surprising. A few short
weeks ago, you had nothing nice to say about CB, the operators, or
anyone who would thumb their nose at FCC regulations. Now, it seems you
are coming just short of defending these scofflaws.

I am curious as to what "enlightened" you?

AM or FM does not determine whether a signal is line-of-sight.
This is determined by the frequency of the RF.

AM on 2 meters would still be line-of-sight.

Nicolas,

Just understanding bits and pieces. Yes you can put an EC2018 on your president Taylor. I am guessing the wiring diagram, (because I am unfamiliar with the radio) is common to cobra/uniden/ most president radio's. 4 or 5 pin.

Just make sure that you adjust your modulation with the mic gain on the radio as opposed to the volume on the mic.

Good luck. That's what I think you are asking.

Deb

>

If someone wanted to use handheld 2-way radios for business use, or personal use, such as keeping track of the kids at the mall, 27 Mhz CB handhelds would not be the ideal solution. Here's my reasons why:

First off, CB handhelds use AM, which is highly subject to atmospheric and man-made noise. Using them inside around flourecent lights, computers, or other electrical equipment will definitely reduce receiver performance.

Secondly, short, "rubber duck" style antennas are very inefficient at 27 Mhz, resulting in reduced operating range. Where a 5 watt walkie-talkie with a 5 foot center loaded antenna, can get up to about a 5 to 6 mile range in the right conditions, the same radio with a "rubber duck" will be lucky to get 1 mile.

27 Mhz CB handhelds have to also contend with varying conditions and interference from both local and skip operators. Your handheld to handheld range will not be very good if the skip is bringing in DX stations at an equivilent signal level to a local less than a mile away, right over top of your other unit.

If you truly want to use portable radios for keeping in touch, you would be better off with either MURS or FRS/GMRS radios. These offer FM, for reduced noise degradation, and higher frequencies for less atmospheric and man made noise interference. They can also use rubber duck antennas with less reduction in performance due to their operating length being closer to a quarterwave at UHF frequencies. Range on a typical FRS radio is 1/2 to 1 mile inside buildings, with 2 miles being typical for outdoors. Skip interference is virtually non-existant, and with CTCSS tones, you can set your radios up to only hear who you want to hear.

Of course if you WANT to be on the 27 Mhz band for your own reasons, then, a handheld CB might be ok. The best performance addition you can make, is to replace the rubber duck with a loaded quarterwave telescopic antenna.

They're cheap and easy to do (Just so you don't fall for the truckstop CB shop line of "Extensive modification = $$$$").

What they essentially do is lower your dead key power, without lowering your full peak modulation power. This allows a higher percentage of modulation percentage compared to the now lower carrier, which is percieved by the receiving end as being louder. The other plus is that the lower dead key allows you to drive an amplifier withour driving it into compression.

The downsides:
In order to see the maximum swing effect, it requires that the modulation limiter be disabled (aka clipped). removing the mod limiter introduces splatter into the picture, as the negative peak of the modulation tries to mimic the positive peak, but gets severely clipped as it hits the zero power point. This causes the signal to emit harmonics of the various audio frequencies that can be up to 100 Khz or so wide.

Also, someone who is running a widely "swinging" signal is harder to copy in the distance as their signal jumps from in the noise to out of the noise, and plays hell with the AGC in the reciever. Also, some swing mods have been known to adversely affect certain noise blanker circuits in the received radio. With the noise blanker on, the "swinger" sounds severely scratchy and distorted. Turning off the blanker clears up the problem. This is likely related to the splatter componenets which are being interpreted as noise pulses in the blanker's detector.

IMHO a "swing kit", is nothing more than a novelty mode. It really does little to enhance your range, and is fraught with problems. Many people like to see the meter swing when they talk, and a small amount of forward swing, if done properly, is good. But like many good audio and RF techniques, when it hits the CB band, they get taken to extreme, and most of the benefits are negated by the side effects.

Easy, look at the negative modulation trough. While the positive peak can be allowed to rise until there is no more audio power, the negative trough cannot go below the zero power cutoff. Unless you have the ability to offset the center of the modulation, so that the negative trough does not exceed zero (Which cannot be achieved using simple CB "Swing" mods), you will cause splatter and distortion.

It is the holiday season, that makes me do crazy things. All I was
defending is the fact that charlie the tuna accused them of
condemning those who operate legally, but that is not true. If so
please prove me wrong. I still don't have any good things to say
about illegal operation, others don't see it that way, nothing I
can do about that, but doesn't keep me from saying what I think.
What I said above is true, the group is a virtual butt kicking
contest, either deal with it or move on.

Go back to the books, AM or SSB at VHF/UHF is line of site. It
isn't the mode that determines line of site, it is the frequency.
Hams use FM on 10 meters and make contacts via skip just like they
do on SSB.

And what is the purpose? Just so you can have bragging rights that
you produced a stronger signal than some other clown for a few
seconds? I can certainly think of better uses for several thousand
dollars.

3130. Regency BTH-201 VHF FM Transceiver

Hello,

I just picked this old transceiver up and was wondering if any of you could give me some info on this item. i.e. frequency coverage. I do not see an tuner to tune the radio to various frq's.

Any other info is greatly appreciated!

Thanks,

Cowboy67

> stronger than locals?

That depends on what your definition of "local" is, and the equipment they are running. If the "local" is someone running a 5 watt HT with a rubber duck antenna, a mile away, then yes, a skip station can cover him up. If the "Local" is someone running a 4 watt base station, 15 miles away, then he too, will be covered up by skip, if the "skip" is made up of mostly people running excessive power (We don't know any of them do we?). BUT, if the local is a 4 watt base station, a half mile away, he's not going to get covered up by a skip station also running 4 watts due to the increased path loss that a skip signal will incur over that of a direct line of sight local.

You are correct John Perry that is not true that is not at all what I said.
You are now suffering from the Twistedhed syndrome.

Perhaps you can't read either. My accusation is they call myself, leland etc
liars, and say we are name callers, insult hurlers, when they in turn do the
exact same thing they turn around and call us the same names and hurl
insults. It has nothing to do with them accusing anyone of operating
legally. Again, that is not what I said.

: If so please prove me wrong.

I just did and have all along said the exact same thing.

: What I said above is true,

Perhaps in your mind, you think it is I never accused them of condeming
those who operate illegally, that was your call.

: the group is a virtual butt kicking contest, either deal with it or move
on.

I suggest mr Perry you do the same thing.

Everyone here, including myself, is getting off of the point. He asked for a CB that is easy to modify. We don't know what he is going to use it for, but the best that can be done is we just answer his question and not go off track. To answer the question, I have a maxon handheld that was pretty inexpensive, and it sucks. I would go with cobra.

Well, I don't have to say it to make it true...you took care of that all
by lonesome.

2) When you say you are going to ignore and killfile
someone.....do
it, elst your lies are becoming as commonplace as your posts..

>he had you killfiled he replied via my post just >like Landshark and
the rest of the ipmotent >crew says when everyone is supposed to be
>killed.
--
>Another point of clarification. I never "killfile" >anyone.

You're nitpicking. Whatever.
Ignore, killfile,,,the implication is the same,,you claimed you were
ignoring me but wrote an essay stemming from your personal problems.

>I read any post that I have an interest in.

But as usual, that isn't what you claimed.
Only you can have an interest in my posts while simultaneously ignoring
me.

>I AM ignoring twisty's little non-sensical >responses, as they contain
nothing of >substance, and arguing with an idiot is >counterproductive.

Ohh..I see,,,you're not ignoring me at all, just being selective in
which of my posts you reply to. Cool. But it is quite different than
ignoring, despite your attempt to merge and fudge what you said.
You go on selectively replying to me (after all, that is what
participation requires in a ng..glad you figured it out) and I'll
continue to repost your own posts that are self-contradicting without
making a comment..that way, you will have nothing personal to cry about
and can distant yourself from anymore lies.

>I have enough self control and willpower to not >respond to some
schoolboy, calling me >juvenile names. There's no point in it.

You drew first blood with the name calling..I merely returned it to you,
Davey boy. It's not my fault you lie,,I didn't invent the term
"liar"....just used it when it applied.,,this in turn caused you to go
spastic withoff-topic insults and comments of a personal nature. If you
have a problem with truth maybe you should change your hypocritical ways

and comments.

>I could go on and try to explain some of the >finer points of network routing (As much as I >know about it, which isn't everything, as it's not >my bread and butter), and how messages >"hop" between nodes (You know, those >computers that make up the internet), and >how since my ISP is relatively close to >Villanova University, that traffic could >conceievably pass though there on its way to >wherever it is finally headed.

Umm..Dave..can you name a single person you think believes this shit? Your arrogance is just one reason you are viewed as such a stain to hammie radio.....your refusal/inability to recognize such is but one in a long line of other reasons.

>It doesn't mean that I "posted" from there.

Nope, it sure doesn't...but it damn sho' means you are a liar...and have certified as much.

>Some people wouldn't know a clue if it were >pasted on the end of a baseball bat, and >slammed into their heads.....
>Dave
>"Sandbagger"

Such violent thoughts. Coming from a lying psycho like you, I would expect nothing less.
Now manage some gumption and quit breaking your self-imposed shun .
Your assumption that one needs your respect or accolades is par for your arrogance, expected of your ignorance. I am totally content illuminating you cock-a-roaches when I turn on the bright light and watching you scatter and run to hide and filter.

You and George cry crocodile tears about getting back what you dish out. For instance, I understand perfectly well that many of my posts to you and Georgey-boy come off as egotistical. I am also aware that boasting about how I force you to claim you ignore me and then show otherwise is an extreme irritant to you.
If truth were of consequence with you, Dave, and anyone paid any real attention to you besides myself and my prized litter, they would see repeated insults peppered throughout your posting history for no reason other than you disagreeing with another.
While you indeed have every right to portray yourself as whatever the hell you wish, flame actions such as yours often cause much angst, so much in fact, that newbies may not want to attempt a post for fear of retaliation in the form shown and perfected by you.
Does any of this make any sense to you, Davey-boy?

There is indeed a method to my madness and it has been expressed it several times. The fact yourself, Frank, KC8LDO, N8WWM, and WA3MOJ have the inability to comprehend or see it, is not my fault. It doesn't get any simpler...treat those as you wish to be treated. Now, run and practice some of that gumption...

From: yeti@REMOVEcet.com (Frank Gilliland)
>After a couple years of active participation, it's >clear that this
>forum is nothing more than a medium for the >promotion of illegal
operation and the >proliferation of technical voodoo.

You always use that word when you lose a debate concerning electronic
applications as applies to radio.

>There is almost no discussion of the intended >and practical uses of CB
>radio, the fundamental purpose of which is >easy-to-use, low-power,
license-free radio >communication.

Exactly. This is because cb radio is no longer used as its original
intention. The group has kept up with the evolution of cb. It has
evolved rather nicely. The good stuff is just out of your
reach.....invitation only.

>Instead, discussions are about using the band >for RF drag racing,

>It happens, Frank. You were warned denial >and attempted self-imposed
censorship would >fail.

>and by wannabe-hams that are too lazy to get >their license.

Licensing has nothing to do with cb and not one of the regs here
expressed a desire concerning obtaining their license who did not do
it...except you...but you always had a license.......never did come to
figure out why you were so full of piss and malice and lies, but then
again, it never mattered much.

>From participating in this newsgroup, it seems >that CB radio has
>attracted its recent popularity from this new >'gimme' generation

Kind of like when you began acting out in here with the "gimme my own
forum" and "gimme Twists addy" and "gimme people to follow me to my new
moderated (read: censored) forum I wanna start." You've been crazy ever
since.

>("I want mine, I want it now, and I don't want to >pay for it!"),

That wouldn't surprise anyone, Frank, it holds quite well with your
reign of terror when things are not going your way.

>If that's what CB radio has become then I'll >leave you all to roll
>happily in your squalor,

Got news for ya' frank mah boy...as soon as you are gone, the window is
getting opened and the place will air out just fine......the squalor you

speak of moves when you do. Sort of like the cloud of stank that follows pigpen.

>and instead of trying to use facts and reason >in my efforts I'll be >using DF equipment from now on.

Your efforts have never consisted of facts and reason. Your tool of choice isn't of much consequence.

>Toodles.<

Losing ISPS as much as you do can get costly. Can't say I blame you, but no one believes you are going anywhere, Frank. You're probably about to unleash an entire campaign or harassment blitz on all that you can't comprehend or that of which makes you crazy.....don't let the door hit ya' where the good Lord split ya'....you know where to find me....talking over Lelnad's paltry deadkeying attempts.

<Moparholic@hotmailnospam.com> wrote in message news:20021202163311.260
Notice how he warned you about us CBer's...then broadcasted your
personal name to the group?
Who should you be concerned with? hmmm..

>He should be concerned with those he phuqqs >with,
--

What are you insinuating?

"George doesn't care what the topic is..he'll do his best to start an
argument about whatever.."

>Yeah your a real saint, asshole.

"Guess he told you,Mr Perry."

>he is good in the book look him up he lives in >Texas, John A Perry.

That identity thing is a serious obsession with you clowns.....not very
effective anymore when you turn around and accuse the obsession of
belonging to another, regardless how many times you attempt to repeat
it.

There are a few sheople in this newsgroup who have decided to take it
upon themselves to be the self-professed leaders of what is "right".
They become unglued when an idea is passionately expressed and not of
their liking or way of thinking. Such talk is intolerable to these few
communicative-challenged souls.
They wish one would conform to their way of thinking, and if not, they
want for them
go away. By refusing to do so, my methods of training have been
obviously successful.

They learned they can not get away with such juvenile behavior. I choose
to attempt to discuss issues. They go off-topic and become insultive.
When it is returned, I am accused by a hypocrite of being a hypocrite.
As Georgie and Lelnad and Davey-boy Hall continue with off topic
insultive posts, I will focus on their behavior from their own posts,
not unfounded accusations and namecalling.
To me, this is the way it has always been, from the bully in the school
yard to the these lowlives among us..... not allowing theses thugs to
shout or intimidate one down is the best defense one can employ.
Sometimes the best defense is a little offense. Yea, it can muddy the
water on occasion, but perhaps if enough takes place, others will see
not all are willing to run and hide and will begin to express opinions

freely without fear of retaliation employed by each and everyone of you that "aaron" named. I will not stand idly by while this type behavior is employed. Deal with it.

You really need to get straight who you are talking to, just
because I have the initials JJ does not necessarily mean my name
is John, there are a lot of other names that start with J. Just
for the record, my first, middle, nor last name start with J, JJ
is a nick name given by an uncle when I was a youngster. By the
way, your sentence should be "John if "I" wanted". Note the
capital I. I guess you think so little of yourself though that the
lower case i fits. You and cheesecutter live in the same trailer
park?

3176. Oldie newbie need mobile CB recommendations

Newsgroup: rec.radio.cb
Date: 2002-12-03 01:08:20 UTC
From: "Vinnie S." <enzo@reemoovthis.monmouth.com>
Message-ID: <gb0ouuk6l5vr1nhcj3q6br5ucj56423tri@4ax.com>
Source record: 145703

Here is my story. I have recently taken a position that has me driving thru east PA and NJ most of the time. I am not a trucker. I drive a minivan.

Anyway, I reached into my attic and pulled out my 20 year old realistic CB. About 10 years ago, I purchase a K40 antenna and a D104 hand mike, and never used them.

Anyway, I connected them this weekend, and seem to get pretty good range. My SWR was 1.3:1 on channel 1 and near perfect on channel 40.

I was impressed by this 20 year old Radio Shack radio with hardly any features. It still was kicking.

Now, since my knowledge is very limited ot at least 20 years old, my questions are:

1. This K40 antenna. Is it any good? Seems that Wilson is a hot brand. Is there a major difference?

2. The D104 still is one of the best. Anything I should now about this?

3. The Realistic is only pushing about 3 watts. I had it peaked many years ago. Is this common? (or should I settle for #4.)

4. And most important. I am looking to upgrade to a more modern unit. Seem the big 3 brands are Cobra, Galaxy, Texas Ranger. Some others like Uniden and Midland are available. I am looking to possibly get SSB.

Can anyone tell my what they me what they recommend or what to avoid. I am very unfamiliar with Texas Ranger and Galaxy.

Thanks

Vinnie S.

Tell you what NoBalls, just to prove how far off base you really
are, if you're smart enough to do it, figure out the ISP I am
posting from, then go to their web site and see if they have
access in Dickinson, Tx, where ever that is.

...what's really pathetic is that the kind of people who think such behavior is on a par with murder. Unfortunately they also think Stalinism is great & that they're living in the Spanish Inquisition, where accusation equals proof. Just ask the antikeyclowns---on-air monkeyshines give them angina attacks.

You always use that word when you lose a debate concerning electronic
applications as applies to radio.

>There is almost no discussion of the intended >and practical uses of CB
>radio, the fundamental purpose of which is >easy-to-use, low-power,
license-free radio >communication.

Exactly. This is because cb radio is no longer used as its original
intention.

Says who? You? Just because you say it doesn't make it so.

>The group has kept up with the evolution of cb.

Shame the FCC doesn't see it that way, perhaps a rule change or 2 may help
your misguided statement, but nothing has evolved on CB turn it on
Neanderthals on every channel.

: It has evolved rather nicely.

Nah your still dragging your knuckles

Reminds me of a guy who went by snoopy dog, who used to talk here in East Texas. He would get drunk, and talk on the radio. There was a guy who went by Catfish, who worked on radios. He would tell ol' snoopy to take the cover off his radio and then he would tell him what to turn. Snoopy would turn and say "hows that?" Fish would say "yea snoopy, that's good you're getting REAL LOUD!!!" He would tune 'ol snoopy right off the AIR!!!!!!!!!!
HEHEHEHEHEHE

3192. Decriminalizing on-air obscenities: pro & con

Newsgroup: rec.radio.cb
Date: 2002-12-03 02:47:13 UTC
From: witchdoc@attbi.com
Message-ID: <3aed93cc.0212021847.468b5d17@posting.google.com>
Source record: 145724
Cross-posted to: rec.radio.amateur.misc,rec.radio.cb

A blasphemous thought occurred to me a couple days ago: what if the FCC announced "from now on, we will no longer pursue any complaints of obscenities transmitted or broadcast over the airwaves... this includes all words which refer to sexual or excretory activities or organs, as well as to nudity and insulting gestures transmitted via image communications. Nor will we pursue complaints involving excess transmitting power. We will only pursue cases involving threats of bodily harm or property damage, or of jamming interfering with life-or-death emergencies".

Pro: by making nude pics/middle fingers/mooning legal on ATV, making linears legal on CB, and making cussing legal on CB & ham, there wouldn't be any challenge to it anymore from the outlaw's point of view. No adrenaline rush = no incentive.

Con: too many hams & CBers think such things should be as illegal as 1st-degree murder **NO MATTER WHAT** the law says--- after they cried their eyes out at being so cruelly betrayed by their beloved bureaucrats, they'd be outside the FCC's HQ picketing the place the very next morning, ready to wash scabs' mouths out with soap.

That's pretty much it, Bill. My meter's buld is very dim. I was wonder if I could modify a super bright LED to fit behind the meter. I don't know if the bulb is in the meter itself, though.

I had gone with my wife that day to see her doctor. As we passed
DFW airport where there are always a number of plans landing and
taking off, there seemed to be an unusual number of plains lined
up on approach for landing. While we were in the doctor's office
it was announced that all airspace over the U.S. had been closed
and all planes ordered to land at the nearest available airport.
When we left the doctor's office I told my wife to look up in the
sky over the airport. She said, "What, I don't see anything." I
said, "exactly, there are no planes in the sky." It was really
spooky.

Here you go. By the way, although annoying what the person may be
doing
it is not against Comcast's AUP. Just ignore the person! I swear
there
should be an international law that requires people to take a test
before getting internet access!!

First Question:

If someone is avoiding your killfile you should
A. Stalk them
B. Cry to their provider
C. Ignore them
D. Call the police

And the correct answer is "C".

True JJ, but that is how some competitions get started.
Take Drag racing, started out in the streets, Off roading
(Rock crawling) started out in Fed & State forest where
it was illegal in parts, Soap Box Derby started out in the streets too so
some competitions do start that way.
Now as for the cost, well the same could be said for street racers, some
of those guys have tens of thousand into their
rigs.

I pulled my 2950 out of the closet for Thanksgiving. Talked to 23/001 Nigel in Montego Bay, Jamaica on Thursday and again on Saturday. I dropped my 2950 off to the doc for a complete alignment. It's never been done in the 7 years I've had it. The xmit and USB receive was a bit off. Almost stock. I've had to replace the bulbs once. I'll use it again on Christmas Day and probably New Year's Day. Listen for me.

I also keyed up my PC122 tonight and used my Texas Star 250 on SSB. It's also stock with a stock mike.

25 years in radio and I'm still not a ham.

Click. Click.

That same arguement has been used by pro-drug people for years. They claim, with the same logic that you have, that the main reason people use drugs, is because of the "rush" of doing something illegally. Make it legal, and that "rush" goes away. At least that's what they would have you believe. I believe that the issue is much more dynamic than that, and throwing in the towel and giving into social deviancy is not the answer.

The much broader question would be why people feel the need to be able to swear, and bring to light, actions that are best left behind closed doors. This need for exhibitionism, and the juvenile need to say things like "F*ck" over the air, is a litmus test as to how our values have slipped, and where we, as a society, have failed as parents, in teaching those values.

The issue shouldn't be whether or not such activities should be legal, but rather why something like that would appeal to you in the first place.

Then they should be in reasonable shape. Some components will age and
fail. But if the radio works, great!

>
> Anyway, I connected them this weekend, and seem to get pretty good range. My SWR
> was 1.3:1 on channel 1 and near perfect on channel 40.

If you raise the tuning whip a tad, it will balance out a little better.
But it's probably not worth the throuble, as you have a good match
already.

>
> I was impressed by this 20 year old Radio Shack radio with hardly any features.

I have a tiny one Rat Shack radio, with no meter, and about the size of
two cigarette packs. I use it im my camper and it's always worked great.

>
> Now, since my knowledge is very limited ot at least 20 years old, my questions
> are:
>
> 1. This K40 antenna. Is it any good? Seems that Wilson is a hot brand. Is there
> a major difference?

No. Unless you're planning on running a ton of power, there is really no
performance advantage to the Wilson.

> 2. The D104 still is one of the best. Anything I should now about this?

Make sure the battery is fresh. The mike is a good one. Don't change a
thing.

> 3. The Realistic is only pushing about 3 watts. I had it peaked many years ago.
> Is this common? (or should I settle for #4.)

Check to make sure your power connection is a solid one, with full power
available. A low volatge condition could cause the lower power and your
dim bulb. Peaking a radio is a waste of time (and money). The most you
will get is a couple more watts, which will not be noticable on the
other end.

> 4. And most important. I am looking to upgrade to a more modern unit. Seem the
> big 3 brands are Cobra, Galaxy, Texas Ranger. Some others like Uniden and
> Midland are available. I am looking to possibly get SSB.

I would suggest keeping what you have, until you decide whether or not
you want to get serious about CB as a hobby. If all you want to do is
pass time while on the road, you already have all that you need. SSB is
a great way to expand your range, but it's not very popular in all
areas, and SSBers tend to be in close knit bunches. It's less noisy and
more civil, but usually you won't find many travelers (except for
commuters) on SSB. Most "on the road" people, stick to channel 19 AM or
jump around as they see fit.

>
> Can anyone tell my what they me what they recommend or what to avoid. I am very
> unfamiliar with Texas Ranger and Galaxy.

This subject is going to bring on many opinions from people who have had
experience with these brands. Some people are easily impressed, others
have specific needs that are met by one radio over another.
As someone with some experience in the repair business, I have a
somewhat negative opinion of galaxy radios. To be fair, the galaxies
that I've worked on, were mostly 5 to 10 year old vintage radios, they
may have improved their designs since then. They were generally poor
quality, with all sorts of strange design problems, which were
exacerbated when the radio was modified by a "clip and peak" tech.

Cobra, used to be the king of the band. Back then, they were made by
Uniden. Lately, though, they're being made in China, Malasia, etc. They
use poorer quality parts than their Uniden made counterparts, and have
had some quality issues.

My recommendation for a good AM/SSB radio, is the Uniden Grant. You
really can't say anything bad about this radio. It has a great noise
blanker, an excellent receiver, and sounds very nice on SSB. They also
have a good track record. I've only had to repair one over the years,
and that was for a blown final, at the hands of someone who was
attempting to peak his own radio (the hard way), so I can't fault Uniden
for that.

You might want to have the memory battery replaced as well. Mine just
quit after about 7 years.

I've already done that. Unsoldered the old battery, put two wires in
it's place, and attached a battery holder to the ends of the wires.
Taped up battery and holder and stuffed it in the harness.

It will be a quick replacement when necessary.

Vinnie S. wrote:
"Here is my story. I have recently taken a position that has me driving thru east PA and NJ most of the time. I am not a trucker. I drive a minivan.
Anyway, I reached into my attic and pulled out my 20 year old realistic CB. About 10 years ago, I purchase a K40 antenna and a D104 hand mike, and never used them. Anyway, I connected them this weekend, and seem to get pretty good range. My SWR was 1.3:1 on channel 1 and near perfect on channel 40.
I was impressed by this 20 year old Radio Shack radio with hardly any features. It still was kicking. Now, since my knowledge is very limited ot at least 20 years old, my questions are:
1. This K40 antenna. Is it any good? Seems that Wilson is a hot brand. Is there a major difference?"

The Wilson has reportedly and consistently outperformed the K-40 in all independent test results and the masses sentiments echo the same thing. I have never heard the opposite claimed.

"2. The D104 still is one of the best. Anything I should now about this?"

It's a great mic.

"3. The Realistic is only pushing about 3 watts. I had it peaked many years ago. Is this common? (or should I settle for #4.)"

If you had it peaked and it's working fine..leave it alone.

" 4. And most important. I am looking to upgrade to a more modern unit. Seem the big 3 brands are Cobra, Galaxy, Texas Ranger. Some others like Uniden and Midland are available. I am looking to possibly get SSB. Can anyone tell my what they me what they recommend or what to avoid. I am very unfamiliar with Texas Ranger and Galaxy."

For road bounce and AM talk, a Galaxy will serve you perfectly. They can be loud as all get out and take extreme temps pretty well. If its possible, make certain you get one that has the board from Malaysia. Never had a Texas Ranger, but never had a problem with my Galaxy from day one..it's quite old and has been through the ringer. Put a D-104 handheld on it and you can sound like the voice of God in Cecil B's "Ten commandments."

That Guy Again wrote:
A blasphemous thought occurred to me a couple days ago: what if the FCC announced "from now on, we will no longer pursue any complaints of obscenities transmitted or broadcast over the airwaves... this includes all words which refer to sexual or excretory activities or organs, as well as to nudity and insulting gestures transmitted via image communications. Nor will we pursue complaints involving excess transmitting power. We will only pursue cases involving threats of bodily harm or property damage, or of jamming interfering with life-or-death emergencies".
Pro: by making nude pics/middle fingers/mooning legal on ATV, making linears legal on CB, and making cussing legal on CB & ham, there wouldn't be any challenge to it anymore from the outlaw's point of view. No adrenaline rush = no incentive.
--
>That same arguement has been used by >pro-drug people for years.

Quite effectively and quite true. One needs look no further than the Netherlands for an example
of police being freed up and appropriated to more important tasks.

>They claim, with the same logic that you have, >that the main reason people use drugs, is >because of the "rush" of doing something >illegally. Make it legal, and that "rush" goes >away. At least that's what they would have you >believe. I believe that the issue is much more >dynamic than that, and throwing in the towel >and giving into social deviancy is not the >answer.

Humans, since the beginning of time have seeked to alter their consiousness in one way or another, whether through drugs, plants, chemicals, religion, meditation, whatever.

>The much broader question would be why >people feel the need to be able to swear, and >bring to light, actions that are best left behind >closed doors.

And would go hand in hand with your nose problem of asking WHY someone would choose to exercise their freedoms or rights.
Your obsession and much misalligned self-professed knowledge of social study has proved to be quite marred.

>This need for exhibitionism, and the juvenile >need to say things like "F*ck" over the air, is a >litmus test as to how our values have slipped,

Your values are illustrated by the volumes of posts where you call people names and insult them merely for holding a vew that you disagree with.

>and where we, as a society,

You have shown you are indeed a minority when it comes to society and have no peers among us.

>have failed as parents,

Speak for yourself. Some of us had our children fulltime in nuclear families. We aren't all estranged from our spouses, Hall.

>in teaching those values.

Again, concentrate on your own. Yours is young enough to teach different values since you apparently don't like what you see in her current developing values.

>The issue shouldn't be whether or not such >activities should be legal, but rather why >something like that would appeal to you in the >first place.

HAhahah....no Dave,,only to those like you who can't get a grip on why people don't see things your way only. Again, the evolution of humans have proved that cultures have systematically engaged in intoxicating behavior. Here you come along with some petty arrogance and feel you have a right to question those that live their life in a manner that affects you in no way, yet you still manage to find problems with...it's your nose.

I've had both good and bad results working from a Cigarette plug. In one
vehicle I could satisfactorly power a 100 watt HF ham rig, while in
another, the ignition noise, and voltage drop caused me to lose more
than a few watts, and trashed the receive with noise.

The fact that you mentioned both a dim light and lower power, made me
suspect that you might be fighting a low voltage situation. The best way
to power any 2-way radio is to run leads directly to the battery. That
might not be appealing to you, if you want to keep things on a strictly
temporary basis, but you could still get away with it by using an
in-line quick disconnect plug.

SSB is an acquired taste. Many people love it, many others hate it. The
fact that you have to tune in stations to understand them properly, as
well as how a badly tuned or improperly setup radio can really trash
audio fidelity, is a major turn off to some people. I've always enjoyed
the mode, but throughout most of my CB days, the majority of the locals
prefered AM, so that's where I usually ended up, with brief forays to
SSB for some long distance contacts with mobiles on the fringe, or to
get away from noise and interference.

Source record: 145762

Today after listening to truck drivers up and down the 10 meter band, I tuned down on the infamous 27.555. Now, I am not here to argue legalities, just to ask a question. There was a guy saying over and over, "Canadian Superpower", a couple of guys insulting each other and using ob-scenities, and someone playing rap racket. What's the attraction to that? What is the thing that makes grown men want to act in such an infantile way? Why would supposedly grown people act as if they have never left 3rd grade? Yes, it happens on the ham bands, too, and I wonder the same thing. I am not trolling, I truly wonder about the sanity and the lives of people whose whole world revolves around trying to jam, interfere with, and insult others.

Jerry

Definition as applied in your
example: "Predisposition"
The fact or condition of being predisposed.
2) To render subject susceptible or liable.
"Their biases toward illegal cb predisposes them to lie against those
who would discuss operations deemed illegal."

Primarily they happen to be losers who don't have much else productive to do. Thats why they have to act like jerks. I suspect if the welfare checks were cut off this nonsense would cease. I wonder if their mothers know they act in this way. Its pretty immature anyway.

Same thing here, much easier
that way to change the battery.

> Merry Christmas & Happy New Year to All

It might seem that *I* am trolling with this question, but when I hear
anyone acting this way, I am just lost! I've heard 8 year old hams that
operated more maturely than this! I know that when I
go to a frequency I plan to use, and it is busy, I will just move on to

another one. One thing that
seems to go on on the ham bands is that guys seem to pee on a certain
hydrant (frequency), and
if someone else happens to beat them to it, they'll piss and moan and
QRM--even getting into trouble with Mr. H---all over a stupid frequency they
think they own. If FCC declares a certain
frequency to be an emergency operations frequency, they'll QRM , whine,
bitch and moan as if
their claws were stuck in the carpet. Interestingly enough, several
frequencies around 27.555
seemed to be quite civil--illegal as heck, but civil. Heehe!

Hi Jerry.

I wonder the same thing... and it is not just limited to radio use.

Look at all the new computer viruses created every day... over 100 every
week. Do they not have anything better to do with their time?

Then, there's the newsgroup Trolls. Like those who post false messages or
something else to wind people up, usually crossposting to unrelated groups,
and use the header to send replies to another newsgroup.
Recently there was one appeared in a few groups. Someone claiming to have
another Internet user stalking her, sending nude pictures of himself to her
and her 12 year old daughter. Although she acted innocent and clueless about
how to stop this, her name changed in each group, as did her e-m addy (which
had a spamblock added)... and the header had been set to send the replies to
another group.
Of course, it had to be a fake story, but the mention of a 12 year old girl
being at risk would have fired up some replies.

What about the people who do mindless damage to property, they gain nothing
from it. I remember, one morning, finding scratch marks all the way up the
car, from front to back and several of them. Other people had their
antennas snapped off.
This is nothing new, my first employer had it happen once... one night,
someone went up his street damaging every car. Another time, someone made
use of his letterbox... as a urinal.

Then you get all these terrorist groups... spending their lives trying to
stop others from living theirs.

Surely, their time would be better spent improving their own lives, rather than trying to make everyone else as miserable as them.

Regards,

Peter.

Just depends on what you want to do with your radio. You can get a lot of good skip with the export if your running the right Frq's. I have a friend that has some and he loves it!

Illegal or not they are fun.

That would be Montgomery Hospital. Actually, I'm closer to Macungie now,
as I've moved to Douglassville.
How's the medical repair business? I had a chance to branch into that
several years ago, but never felt comfortable with the idea of working
on "blood and guts" machines. I hear it pays well, especially for
independant contractors.

Usually they are, but they are not always a truly "direct" run, as they
route the wires through the fuse box, and in the wire bundles, where
they can pick up noises, and may not always have the least resistance.

> >get away from noise and interference.
>
> How much more distance can you get in SSB?

That's a hard question to quantify. Range numbers for any mode or setup have too many variables to make an accurate prediction. But generally speaking, you can expect to get about 50-100% farther with local contacts over those using AM. From my own personal experience, the furthest that I've talked on AM without anything fancy on either end, was about 40 miles, with almost zero noise, from a base station with a directional antenna. With that same setup, on SSB, I was able to hit stations at the Jersey shore, from the Norristown area, which is better than 100 miles. These guys weren't moving the needle, but I could hear them, and they could hear me. Again, this was in the dead of night. During the day, I'd be lucky to do half that distance on either mode. Mobile range, of course, will be less, unless you're at the top of a nice sized hill.

An "export" radio is, what you would probably assume, a radio made for use in other countries, where the rules and frequencies are different than in the U.S.
These radios cover way more channels (Some have over 200), have additional modes (Like FM and CW), and some have higher power (up to 100 watts).
Many of these radios find their way into the U.S. and are popular with "High perfomance" CBers, those who look for more out of their hobby than what the FCC rules allow.

As you might have guessed, these radios are illegal to operate on 11 meter CB in the U.S.. This doesn't seem to bother some people though.

> Same thing here, much easier
> that way to change the battery.

Just be careful though. I've had people do that exact "mod", and had the
battery break loose, from mobile use, and short to some component
inside. If the + lead of the battery comes into contact with +12V, you
can say goodbye to your microprocessor. I'd be leary of just using
electrical tape and "stuffing" it in the wire bundle. A more secure
fastening method would be desirable, especially if you use the rig in

the mobile.

When I replaced mine, I used a flat battery socket, so that I can replace a dead battery by just sliding it out of the socket and popping in a new one. It just fits in the space.

>saying over and over, "Canadian >Superpower", a couple of guys
insulting each >other and using ob-
>scenities, and someone playing rap racket.

Ok...folow along now. I can't help you with the Candian station 'cause
they usually get buried unless they are a big strapper down
here...BUT....

>What's the attraction to that?

Same attraction to 2 meter? 75? (need I go on?)

> What is the thing that
>makes grown men want to act in such an >infantile way? Why would
supposedly grown >people
>act as if they have never left 3rd grade?

Well, you know how it is with us "wannabe hammies" and all...we imitate
what we hear on the hammie bands since we're all too stupid to plunk
down our money, social security number and private address to be handed
to attain even a nocode licenseso that some of these same hammies use
that information for nefarious purposes....you have been witness to it
yourself.

>Yes, it happens on the ham bands, too, and I >wonder the
>same thing.

I don't wonder about that at all..I think you're overcomplicating
it...those you speak of on the hammie bands with that attitude have
expressed their shortcomings and problems right here...many were and
still are cbers and refuse to let go of their lowlife ways...it follows
them to hammie radio. I never cease to be amused by those who feel that
the ticket somehow elevates them above other humans that have other
interests in communications and electronics besides hammie radio.

>I am not trolling, I truly wonder about the >sanity and the lives of
people whose whole
>world revolves around trying to jam, interfere >with, and insult
others.
>Jerry
>---

Once again, as has been demonstrated by Arrons little hate posse, the ticket does nothing virtuous for these type..the way they act here is totally indicative of how they act on the air. Good points, Jerry.

I don' tthtink you're trolling, Jerry. You made an observation and pointed it out.....nothing wrong with that.
Those who would call you a troll for stating what you merely observed or for what you are appointing out may have to re-examine their position.
There are those who would prefer such things not be illustrated unless it is conducive to a certain agenda they hold..
to do so invites off-topic flames and personal insults.

>I've heard 8 year old hams that operated more >maturely than this!

I've known 8 year old kids that don't lie like some of these "virtuous" hammies.

>I know that when I go to a frequency I plan to >use, and it is busy, I will just move on to >another one.

Exactly. Or wait your turn.

With all due respect, he does report violations. I have a feeling some hammies are really upset because their playground is under scrutiny while ours goes unmolested and remains a free-for-all. They just can't do what they want to do on their frequencies and they resent us being able to, so instead of following procedure to change things, they take it upon themselves to harass us....always attacking the symptom or messenger. It would take too much intellect and effort to make any real changes..I mean, let's get serious a moment and take a look at who we are talking about here...the hammies that pitch pissy moaning fits here about cbers are the same ones that decent hammies distant themselves from.

>Nah, They openly admit the Law breaking >ways.

So do the very few hypocritical hammies in here that bitch the most about illegal cb. Hammie Dave Hall N3CVJ has been shown a hypocrite concerning his amp statements..calling those who use them a federal criminal (stemming from sheer ignorance) while owning and using a Davemade on illegal frequencies. Lelnad KC8LDO has also called people federal criminals for not obeying laws..going as far as saying those who violate them instead of conforming to them are psychopaths.....then we have his post seeking a way around the rules to construct an antenna where one was prohibited, not to mention his recent foray into the freeband for attempted but failed harassment. We also have Frank who has acted the same way who has also had many hands in the same type behavior he hypocritcally condemns.
So yes, these internet thugs and boils to hammie radio are indeed self-professed law breakers.

Curiosity. All I did was ask a simple question as to why allegedly grown
people would act
like infantile idiots, not just on a radio, but elsewhere as well. If the
lack of understanding of
such behavior is "trolling" then so be it. One thing for sure: I will never
stoop to such stupid
behavior. What a waste of space and breath.

SO true! BTW, who is "Canadian Superpower" anyhoo? And your observations
are correct:
Most hams don't associate with those miscreants that cause so much trouble
on our bands, either. It's just that I'll never understand why a hobby is
something to get bent over. There's too
much to do, too much to occupy one for all that.

Exactly. Egging cars and "rolling" yards (over here, that's filling the
trees and everything that doesn't
move with yards and yards of toilet paper) has never appealed to me. I have
been guilty of my share of pranks, tho. Like the time a friend and I jacked
up a guy's Volkswagen and placed it on a
block just enough that the rear wheel was barely off the ground. He started
up and, of course, the
car wouldn't move. He declared, "Darn! I knew I should've replaced that
clutch". He got out of
the car and left it running and in gear because he thought the tranny was
out. You should've seen his shocked expression when he spied the wheel
turning idly round and round! That was many,
many years ago when I was in high school. I once won a rubber snake at the
county fair at some
shooting booth--hardly a notable prize. I stuck it in my pocket and forgot
about it. One Saturday
morning, I drifted over to a little hole-in-wall gas station to hang out.
Several of us were sitting on
a long bench in front of the store. There was a older man that reminded me
of the TV actor Broderick Crawford sitting on the bench. After quite some
time, I noticed that Mr Early would
cross his legs, lean to the right and prop his hand on the edge of the bench
while yakking about some long ago event. After awhile, he would sit up
straight and fold his arms across his chest. The
process was repeated several times until I remembered the rubber snake I had

in my pocket. Bet-
ting that Early would prop his hand on the edge of the bench again, I fished out the snake and laid it
on the edge. Sure enough, Mr. Early crossed his legs, leaned over, and propped his hand on the edge of the bench. He was in the middle of a long story (he'd had a bit to drink as well), his double
chin flopping, and when he felt "something" on the bench, he didn't stop talking; he rolled the snake
off the bench into his hand and, still talking, brought it around in front so he could see what it was.
"And there I was in the middle of a whole bunch of sailors------SHI*!" He slung the snake out past
the gas pumps!!! And, of course, the rest of us had a huge laugh at his expense.

Today, I wouldn't do that to someone because, while it might be funny to scare a person, you never
know if you might cause someone to have a heart attack. I might scare my cat, but not a person.

Jerry

Hi all

Can someone please tell me a site online where I can buy

Antron 99
18ft coax and plugs
10amp PSU

I have tried Bills2Way but he won't accept my CC, any other sites please? I don't care about shipping costs as I know the ariel will cost a bit to ship. Please help.

Kind Regards

Stuart

I have an over 25 year old 7' UHF Parabolic TV antenna. I have taken it down (was outside at least that long) and will re-assemble it. I have a brand new exact same piece that is the "collector" of the reflected signal. Brand new from the antenna terminals to where it connects on the dish. No new dish parts. THE questions are:

(a) Should I use the old collector piece, and sell the NOS one on E bay? Will the old one work better than the new one? I've heard about aluminum antennas needing to "wear in" and get older before they work better. IS this nonsence?

(b) Should I put the new one on the old dish, and sand the internal aluminum that will touch the new piece? Will it work better or just the same? Should I sand the GOLD anodizing off the new piece?

Antenna Geeks, start thinking!
Dave!

The term is SOCIOPATH, not psychopath. A psychopath and a sociopath share many common maladies, but the key difference is that a psychopath is prone to violence, while a sociopath prefers passive agressive tactics, and "mind games".

And BTW, those who do thumb their noses at the established rules of society, no matter what you may think of them, are considered sociopaths, so Leland was right about that.......

Radios that do not meet specific FCC requirements for proper use in the USA.
Such as 10 meter units displaying channel indicators, having "roger beep"
installed, greater than 4 watts internal output.
A simple modification makes these radios capable of transmitting on 11
meters.
Plus not being type accepted for the above reasons.

Not to mention the fact that within the USA, to purchase one, you MUST hold
a ham radio operators license.

Oh, but there's more to it than that. Those unlicensed operators have NO
business being there,
and, while I don't spend ALL my time listening to it, if I DO hear those
intruders and IF I can
catch one, I will turn him in a skinny minute. No worry, no hassle to me.
He is not allowed to
be there, he is breaking the law, and he is taking something that belongs to
me; he is NOT welcome
to transmit there. Of course, *you* wouldn't understand the principle of
what's right or wrong since
"them thar fellers ain't a-hurtin' nothin' nohow", or "they's got a rah't to
operate a reddio, too jist la'k
y'all do", and "Ah cain't see why them fellers gits to operate up'air on
them frequencies an' I has to
have a lah'cense, too".

It happens to be that I support fully the sensible, sane use of radio
whether it be on CB or any radio
service, and the operation of same in a legal manner. I fully support CB
radio, but I have no tolerance for the theft of frequencies for use by
bandits and rogues, or illegal interference. What the
folks do on the regular 40 doesn't really bother me. Come up on my turf,
and I won't even talk to
the offending station, but I will be on the phone to RH before you can say
scat. I've done it before

and I'll do it again.

There is no paranoia involved. I just don't see how grown(?) men get such
joy out of banal,
low-life, stupid, infantile activities. What is alarming is, there seems to
be so many men that
NEVER outgrow childish behavior. It's a wonder women have anything to do
with them: then
again, DO they? Or are they losers to a man? I merely asked a question as
to how these trash
get joy from constant filthy language, insulting one another, repeating a
dumb phrase over and over
and over and over, playing music, and throwing dead keys--not just as a
single, passing prank--but
day in and day out, over and over. It just beats me.

My ham ticket is only one of a long string of activities that I enjoy. I
also have a shop crammed full
of tools. I spend time doing things ranging from metal working to wood
projects. I framed up my
basement and paneled it with REAL shiplap 3/4" oak boards. I built a
furnace room and a pantry.
I flew airplanes until it became so expensive I let my medical drop; nothing
prettier than flying into
a beautiful sunset returning from a day at the beach. Yes, there is more to
life than radio.

federal criminals for not obeying laws..going as far as saying those who violate them instead of conforming to them are psychopaths..

>The term is SOCIOPATH, not psychopath.

No...Lelnad used the term "psychopath" not sociopath. Pay attention and stop being so particular about what days you choose to possess gumption.

>A psychopath and a sociopath share many >common maladies, but the key difference is >that a psychopath is prone to violence, while a >sociopath

Wold "sociopathic liar" fall under that umbrella?

>And BTW, those who do thumb their noses at >the established rules of society, no matter >what you may think of them, are considered >sociopaths, so Leland was right about that.....

So Davey boy, how long have you considered yourself a psychopath?
Of course the licensed hammie N3CVJ who claims with his license comes a responsibility to operate within his own acceptable stated perimeters and what he deems "responsible", only here he is blatantly bragging about the illegal behavior he claims makes the rest of us "federal criminals".

From your own lips Davey-boy:
>Who needs "Melrose Place" when you have a >scanner? My neighborhood phone traffic was >no less juicy at times. Teenaged girls talking >about their first time with sex, wife talking to >newly found lover while hubby watched >Monday Night Football in the next room, guys >making drug buys, and even caught one >neighbor bitching about ME and all my "radio >stuff" to another.
>It's fun to try to figure out who all those voices >belong to. Sometimes more entertaining than >TV, becasue it's REAL..... Dave
>"Sandbagger"

MORE..from N3CVJ's own hypcritical own words:
>I will say that there are SOME hams that may >feel a bit cheated, since they feel obligated to >follow the rules, and it bothers them to see >Cbers doing all that they do, totally illegally, >and seemingly without the least bit of remorse. >Dave
>"Sandbagger"

Well, we know that's YOUR problem, Dave. What other hammies are you purporting to speak for in the above?
And we certainly can't ignore:
>I currently own 2 Dave made amps. Both of >them "sound" ok. But they are also not >something that I would run inside my house. I >have them because I horse traded other radio >gear. I'd trade them for a Texas Star DX-500 >or 600 if I had the opportunity.
>Dave
>"Sandbagger"

Let's see what you said again:
>And BTW, those who do thumb their noses at >the established rules of society, no matter >what you may think of them, are considered >sociopaths,

And so again the question is posed to you...how long have you been a hypocritical federal lawbreaker?
N3CVJ claimed he was a federal law breaker many years ago when he was younger until he saw the light and mended his ways......balderdash. The post is less than 3 years old. The fact that someone his age lies as much as he does is troubling enough. The real question would be WHY he is compelled to commit such behavior and engage in such magnificent lies.

>More links on the subject of sociopathic >disorders. Do these sound like anyone we >know?
>http://home.datawest.net/esn-recovery/artcls/s>ocio.htm
>http://www.ulm.edu/~palmer/AntisocialandHistrionicPersonalityDisorders.htm
>http://faculty.ncwc.edu/toconnor/401/401lect16>.htm
>Dave
>"Sandbagger"

It might. The fact that you consider yourself "knowing" an internet stranger based on what they allow you goes hand in hand with the arrogance and ignorance emanating from your lying pie hole. The sites concerning habitual and sociopathic liars are more accurate in this application. One must look no further than your posts to see your contradictions and psychopathic tendencies. The fact that you fancy yourself more knowledgeable than the next guy concerning mental health merely adds to the entertainment of your claims. You have only accusatory claims and your personal off-topic self-inflated opinions,,,the rest of us have your posts. Now how about exercising some of that gumption that seems to elude you.....

I remember some hammies telling me that if one reports the frequency
along with the time and operator's call sign with a recording, they will
receive a letter from the FCC, specifically Hollingsworth. Is this true?
Say someone had a a few pics and a recording of one who attempts
harassment on a regular basis, like a hammie transmitting on a frequency
where they shouldn't be.....is there a physical address to send a
cassette tape to? Hypothetically speaking, of course.

>No worry, no hassle to me. He is not allowed >to
>be there, he is breaking the law, and he is >taking something that

on them frequencies an' I >has to
>have a lah'cense, too".

Which has been a valid point lost on many hammie rogue wannabe cb
enforcers....the pirates have a right to be there as much as you have a
right to enforce them (NOT talking about your hammie bands).

> It happens to be that I support fully the >sensible, sane use of radio

Many of us, hammies included, have no tolerance for self-appointed radio
cops and no problem with legal operation.. As a matter of fact, if we
are talking illegalities, I know I operate legal way more than I operate
illegally, as mucho contacts of mine are local and to other anglers.

Sorry John, your wrong. You are not required to have
a ham license to purchase any ham equipment in the USA.
It might be policy of some stores, but it is not a "MUST"
to have a ticket to get ham equipment.

3345. WANTED: Raytheon / Apelco / Webster

Newsgroup: rec.radio.cb
Date: 2002-12-04 22:04:09 UTC
From: k5dh@raytheon.com
Message-ID: <tZuH9.123$Z74.849@dfw-service2.ext.raytheon.com>
Source record: 145881
Cross-posted to: rec.radio.swap,rec.radio.cb,rec.radio.amateur.boatanchors,rec.radio.amateur.equipment

As always, I am looking for 1960s and early 1970s
CB radio equipment from Raytheon, Apelco, and
Webster to fill holes in my museum collection.
Here is a list of specific models that I need to
complete the collection:

RAYTHEON:
Tube-type: Raycom
Solid-state: Raycom III, Raycom IV (AM/SSB),
Ray-Tel TWR-11, Ray-Tel TWR-11T
Handheld: Regal Ray-Ette, Super Ray-Ette, MW-2

APELCO:
Solid-state: AR-15, AR-16, 565

WEBSTER:
Solid-state: Bandspanner 550

ALLSTATE (sold by Sears):
Tube-type: 832.62270

AIRLINE (sold by Montgomery Ward)
Tube-type: GAS-587

I would be interested in hearing about any Raytheon,
Apelco, or Webster CB gear that you might have, even
if it's a duplicate (I'm always looking to upgrade
models that I already have). I'm interested in any
"parts rigs" that might be collecting dust also.

In addition to the radios themselves, I am seeking
any kind of related printed matter, including dealer
sales literature, owner's manuals, service manuals,
magazine ads, magazine articles, and so forth.

If you are a vintage CB collector and have any models
in your collection that I need a photo of, I'd like
to work with you on that.

If you ever had any involvement with CB gear from my
target brands, whether it was sales, service, worked
for that branch of the company, or whatever, I'd love
to hear from you as well.

If you have any interest in vintage CB, please visit
the Raytheon/Apelco/Webster CB Radio On-Line Museum:

http://www.qsl.net/k5dh/raytheon.html

DISCLAIMER:
For those hams who are offended that I placed an ad for CB equipment on ham radio newsgroups, I need to point out that the overwhelming majority of radios, printed matter, and historical information that I've collected so far has come from hams, not from CBers! Perhaps that's because so many of today's hams were CBers "back then".

Thanks and 73,
Dean K5DH

jerry for all intents and purposes you are preaching to the choir
here...hell most of the people you hear doing that sort of stuff don't
even know how to get on a computer much less be human.....now
some of us like to freeband.....and some of us like to use illegal
amps, but i can say that probably most of the people who hang out on
here are cb nutts....and radio nutts and all that good
stuff.....so your habit of contantly bringing this stuff up is
of no concern to most on this newsgroup.....sooooooooo jerry please
stick a sock in it....because you are breakin my heart pal.....

Don't understand this statement at all twist. Why would we want
the ham bands to be a free-for-all? I can do anything I want to on
the ham bands, Ham radio offers enough variety and freedom that I
don't have to do anything illegal.

That's pretty much it. Just look at those types on the ham bands,
most have never married, because no woman would have them, or if
they were married the wife walked out years ago. I know of more
than one ham who was so eat up with ham radio they ignored family
and everything else to pursue their hobby to the point he wife and
kids finally had all they could take of being ignored and left.

Thanks for the links, I have just shot a email off to Alf Enterprises, next question is does anyone know of a good site to buy PSU's? I need a 5 to 7 amp but find the prices on alfs a little expensive for them.

Anyone know ?

Thanks

Stuart

Of course there is. Even better, just email rholling@fcc.gov and I'm sure
he'll give it to you.

Or go to arrl.org and click on special interest topics, then enforcement,
then pick a random
enforcement letter. His address should be on any letter he has written.

Its ok all, I just ordered with Copper, the first time I went on there site
I couldnt get the menu's to load, all seems fine now and they have
everything I want and have just placed an order.

Thank you for all your help

No to all? I figured that I should not sand the Gold; but the OLD aluminum that will touch the new--I figured that I should at least sand that so the new Gold anodized pieces that touch the old will make a good connection? ! Dave!

There AIN'T NO "Evolution" in Human behavior--just a "Changing of Religions" going on in this country/ or worldwide from the Christian way of living, to the Humanist one, which is debatched ! The religion of a country determines it's laws! IF only the commy FCC would of done their jobs to BUST the commies in the 50's that took over the TV, there wouldn't be the trash on it today, as well as the so called "shock jocks" on AM/FM radio like antiChrist Howard the Coward Stern! (as well as the dirty mouth imitaters that watched or listened to this trash over the years), and now talk it themselves on the CB or ham bands!
The Bible says that THE WRATH of God will surely hit them, and that's WHY it comes!
Dave!!!!!!!!!!!!!!!!!!!

"Twistedhed" <twistedhed@webtv.net> wrote in message news:13399-3DECB6B4-969@storefull-2312.public.lawson.webtv.net...

HAhahah....no Dave,,only to those like you who can't get a grip on why people don't see things your way only. Again, the evolution of humans have proved that cultures have systematically engaged in intoxicating behavior. Here you come along with some petty arrogance and feel you have a right to question those that live their life in a manner that affects you in no way, yet you still manage to find problems with...it's your nose.

I don't have a NEW whole antenna--just the collector of the dish, and
the old dish parts. So I have 1 new collector, and one as old as the dish.

Scrap the old one and put up the new one.

You mean the collector, right?

> 'Doc
>
> PS - Dishes don't wear out, you know. The 'LNA' yes,

My guess would be that his radio will be within 18ft of the antenna. But a GOOD place such as yourself would know that.
Besides, the customer is always right. But a GOOD place such as yourself already knows that !! (abuse of exclamation points added intentionally)

If you listen to "Canadian SuperPower" for a while, you'll discover
two things: First, he doesn't sound like a Canadian and Second, he
never seems to really talk to anyone; he just repeats the same crap
over and over and over and over an

He's not there to be a CBer or even to communicate. He's there to
cause as much havoc as he can because he's a Loser First Class and he
doesn't have a life off the radio. He (and everybody else) would be
much better off if he'd go outside for a while and get some fresh air,
but he's obviously house-bound. It's my guess that "Sheriff Bob" is
also house-bound, since he's on the radio all day long; I've heard him
as early as 6 a.m. (Phoenix time) and he's usually in as long as the
skip runs. Fortunately, sometimes the skip runs to Europe and Africa
and I don't have to listen to either of them.

You are correct to wonder about the sanity of those people, Jerry, I
wonder too; but some people's only happiness comes from messing with
others. Seems to be a lot of those kind around, too.

Urmmmm, I disagree. The frequency may be allocated to the Amateur
Radio Service, but it does not BELONG to you or anyone else any more
than the commercial broadcasting frequencies BELONG to the AM, FM, or
TV broadcasters. You have been granted THE PRIVILEDGE to use those
frequencies and, for the most part, it's a secondary priviledge to
some other allocation(s).

I have to wonder where you got this strange idea that those
frequencies BELONG to you?

http://wireless.fcc.gov/services/amateur/

Operation of an amateur station requires an amateur operator license grant from the FCC. Before receiving a license grant, you must pass an examination administered by a team of volunteer examiners (VEs) to determine your operator class.

You can not operate on any amateur radio frequency within the USA without a license.

Whether or not a business does not check you for a proper license, then they could be held liable for any violations.
Of course, you can always find a business that does not check as their interest is in your money becoming theirs.
I do not yet have the link to the specific law which states this, but I am researching it.
The key is, if you are caught transmitting on said frequencies, without a license, you will be fined and your equipment will probably be confiscated.
Even more so if you are transmitting on said frequencies improperly.
Such as voice on code only frequencies, as in the 10 meter band just above the CB band.
But you go ahead. Play the game and laugh at the rules.

It is a euphemism. I don't need you to tell me ANYTHING about the
privileges I hold; I know
exactly what I can do and what I cannot. And Ten meters is allocated
internationally to Amateur
Radio. They come closer to being "mine" and every other ham's than they do
to an unlicensed rogue
that just starts beeping and squeaking where he pleases. There's nothing to
wonder, bud.

J

Outgoing mail is certified Virus Free.
Checked by AVG anti-virus system (http://www.grisoft.com).

I think that is just a figure of speech that Jerry uses.
It's more along the lines of he's earned the right to use it by studying and
passing said exam to get the right to use those Freqs.

Landshark

PS, hope you're staying warm Jerry, it looks as though your
getting quite a cold spell.

correct, without the proper classifaction for that frequency too

> Whether or not a business does not check you for a proper license, then
they
> could be held liable for any violations.

Nope, it is the responsibility of the operator to know where
he or she can operate their equipment, not the manufacturer
or the retailer.

> Of course, you can always find a business that does not check as their
> interest is in your money becoming theirs.

True, but it just depends on whether or not the retailer
cares about the hobby he is representing.

> I do not yet have the link to the specific law which states this, but I am
> researching it.

Please post it, I and I'm sure others would love to see it.

> The key is, if you are caught transmitting on said frequencies, without a

confiscated.

Correct

> Even more so if you are transmitting on said frequencies improperly.
> Such as voice on code only frequencies, as in the 10 meter band just above

> the CB band.

Just above the cb frequencies? Those are not the ten meter band. If you are talking about 28.000 and above yes, but below that is not ten meters.

> But you go ahead. Play the game and laugh at the rules.
>

Hey I can laugh, because I very rarely talk on the
radio anymore, let alone with an amp or on the off freqs.
I had my ticket many many years ago and you know, it
was probably people like you that turned me off about ham radio. Just your statement above says that while you know
some about ham radio, obviously not enough.

Uh, you think so Matt? It's more along the lines that
have been brought up here again & again. They buy all
the "export radio's" with roger beeps, echo and such
and then go up to these nice clean freqs. Man, they are
now in heaven, no local to hassle them and get semi
clean communications. So some know it's illegal and
others just didn't know about that radio that's not
supposed to go that high in the freqs.

Ok mister expert. Try this on for size.
Many moons ago before 40 channels, some radios, such as johnson messenger,
had a channel called 23A.
Which is now channel 24.
It was not an RC freq. either. It was voice.
Was it legal for a cb'er to talk on it?
You tell me.

Good radio

> had a channel called 23A.

Yes

> Which is now channel 24.

Huuummm, I thought it was actually channel 25, don't
remember the exact freq #.

> It was not an RC freq. either. It was voice.

OK

> Was it legal for a cb'er to talk on it?
> You tell me.

Not unless you were licensed for that freq. A cb License
would not allow you to talk there, so if you meant under
that term, no you couldn't.

You know John, I don't have anything against you, but
when you make statements that it is illegal to buy a ham
radio, when it isn't, I'm sorry you're wrong. Then start
posting something to the effect that if the store sells it
to you and your not licensed they will be liable,again
sorry you're wrong.
I'm not trying to argue with you here, I just pointed out
that it wasn't against any law for retailers to sell ham equipment
to non hams, I suppose that trailing comment was a little
harsh, so I will sorry if I offended you with that comment.

3412. FCC Annoucement Regarding " freeband " operations

Newsgroup: rec.radio.cb
Date: 2002-12-05 08:07:47 UTC
From: General Johnson Jameson <null@null.com>
Message-ID: <1HEH9.144$AS6.32056435@news.inreach.com>
Source record: 145998

It was recently announced from the FCC that because they cannot effectively enforce illegal transmissions due to the fact most of the offenders are mobile
they are SUSPENDING enforcement. of all frequencies in the 11 and 10 meter bands.
Instead they will be concentrating on the importers of equipment that can be easily modified.

Looks like the Funny Candy Company has tossed in the towel gentlemen.

Yee-haw!!!!!

Hello Dave or Debby:

How did you make out on your other antenna install project???

I have replied below:

Dave or Debby wrote:
>
> I have an over 25 year old 7' UHF Parabolic TV antenna. I have taken it
> down (was outside at least that long) and will re-assemble it. I have a
> brand new exact same piece that is the "collector" of the reflected signal.
> Brand new from the antenna terminals to where it connects on the dish. No
> new dish parts. THE questions are:
>
> (a) Should I use the old collector piece, and sell the NOS one on E bay?
> Will the old one work better than the new one? I've heard about aluminum
> antennas needing to "wear in" and get older before they work better. IS
> this nonsence?

I would use what ever collector assembly gives a better picture. I would
think that the new and old collector will probably work the same, and
you won't get enough money on E-Bay, so I suggest you keep it as a
spare. I base this on what you said as the antenna being a UHF TV
Antenna, and not a Satellite Dish Antenna.

I have also heard about Aluminum Antennas getting older and working
better or even worse. One of the locals here in the deep high desert has
a S-1 Signal, from a 40 mile away station. He uses a old Penetrator 5/8
Wavelength Antenna, and he cleaned it for the very same reason, and has
never seen any increase or decrease in his signal in 7 years. I have not
ever measured a Aluminum "wear in" factor.

> (b) Should I put the new one on the old dish, and sand the internal aluminum
> that will touch the new piece? Will it work better or just the same?
> Should I sand the GOLD anodizing off the new piece?
>
> Antenna Geeks, start thinking!
> Dave!

Which ever "one" works better.

No do not sand off the gold anodizing off, the manufacture had it put on
for a reason. The Gold Anodizing will not change the reflection
coefficient (ability to reflect signals).

Good luck there.

Jay in the Mojave

Could anyone direct me to a site where I could buy a decent indoor antenna.
My landlord won't let me mount my antron or groundplane on the roof or peak.
Any help would be appreciated.

Brian

Hello Dave:

If your talking abut the Hy-Gain Penetrator 500, Hy-Gain still sells all the plastic parts to that antenna!!! The Bottom, Top, Insulator, and Tuning Wire support pieces.

The parts are used on other antennas, but the part numbers are still good at Hy-Gain. Let me know I have the part numbers in my files from modifying the CLR-II, and Penetrator 500 Antennas with a new low loss Impedance Matching Hardware.

There are special apatment type indoor antenna available. It's a radial type,
but the main radial is about 5 feet. It is called the IBA-5

It would be nice to quote the source of the information. Three times I have been apologized to by friends for inadvertently infecting my computer. They mention the file to delete. Of course, my A-V is always up to date, so I check and sure enough, they fell victim to a hoax and deleted a necessary file! Since I've received accidental hoaxes, please quote your source.

We've now added all our crystal charts for free download/printing (PDF) on our site. These 32 charts cover about 95% of all American mobile & base CB models, and show exactly which crystal(s) affects which mode or channel. Very useful for troubleshooting "dead channels" symptom, or for modification to 10M or other freqs.

Check 'em out at: www.cbcintl.com/xtals/xtals.htm

We specialize in CB books, plans, kits, and high-performance CB accessories. Please visit our Web site to see all those "goodies" you just can't find anywhere else!

www.cbcintl.com

You can also download our complete CB catalog, or just the Order Form from the home page. We've also got a new Email Order Form (for VISA/MC) if you're in a hurry.

Jerry while you are here could you please explain to Twisty how those
export radios arent legal to use. without type certification.
He already knows that. No need to.
J

>Sir, I am sorry to say he doesn't he asked me >to have you clarify. He
seems to think a ham >can use whatever he wants. I know you tried >to
educate him before.

I never claimed what you attribute me. What I claimed was a Galaxy is
perfectly legal for an authorized hammie to use on ten meter. Nothing
was ever said about "Whatever he wants"...more attempted distortion from
you is all that is. You disagreed and were incorrect in doing so.

Dave or Debby,
Of course your dish has an LNA, all of them do. It's the 'sticky outy' thing in front of the dish. It's also what amplifies the signal so your satelite receiver has something to 'listen' to. The feed line to the dish connects to the LNA. The LNA is the only 'part' of a satelite dish set up that will wear out or break. The actual dish part just keeps going unless it gets bent out of shape or falls apart. Unless you are changing to a larger diameter dish, it won't do any good. Swapping the LNA can do some good, though... Does that make any sense to you?
'Doc

3460. CB Repair & Mod. Books 40% Off

Newsgroup: rec.radio.cb
Date: 2002-12-05 22:32:37 UTC
From: Lou Franklin <lou@cbcintl.com>
Message-ID: <v3lvuu4e944vfajf2227d1dbbom0glp9ua@4ax.com>

To learn the technical TRUTH about CB Radio without all the hype from people who are just plain ignorant, check out the following books from CBC International. They're selling right now at a big discounts on our EBAY & AMAZON stores too.

Check it out! Go to this link:

http://cgi6.ebay.com/aw-cgi/eBayISAPI.dll?ViewSellersOtherItems&userid=lou@cbcintl.com&completed=0&sort=3&since=-1&include=0&page=1&rows=25

To see exactly what these books look like, plus all the specific, chapter-by-chapter details, see our Web at:

www.cbcintl.com

Some of the books included are:

BOOK #1: THE "SCREWDRIVER EXPERT'S" GUIDE To Peaking Out & Repairing CB Radios. List $25. The most popular "big dummy's" guide ever published on do-it-yourself CB repairs & modifications. Covers peaking of receivers, transmitters, modulation, mike problems, antenna & SWR problems, detailed frequency modifications for both crystal & PLL radios. Loaded with charts, illustrations, and specific instructions for most brands including the new export models. This latest edition also covers slider and broadbanding tricks, FM conversions, and much more!

BOOK #2: THE CB PLL DATA BOOK. List $20. The only complete reference source on CB PLL synthesizer circuits ever published! Detailed PLL theory explained in layman's terms. How they work, and how to modify them for many more channels. Includes specific PLL block mixing diagrams, truth charts, & IC pin function diagrams for nearly every PLL chip ever used. Covers all the most popular U.S. & export chassis, with specific listings of all models using the chip.

BOOK #3: UNDERSTANDING & REPAIRING CB RADIOS. List $42. Giant 370-page technical book for the professional repairman. Picks up where the "SCREWDRIVER EXPERT'S" GUIDE leaves off. Includes circuit descriptions & troubleshooting guide for 23- & 40-Ch., crystal & PLL, solid-state & tube, AM, FM, SSB, CW, American & export models. Covers test equipment (& where to find it), transistor basics, synthesizers, receivers, transmitters, power supplies, T/R switching, antennas, interference, parts & accessory sources. Over 350 illustrations including schematics, charts, and photos. Huge subject index also lets you look up repairs by symptoms. This is "must" reading for any serious CB technician!

For details on our Galaxy-Ranger Service Manual (2nd Ed.) go to:

www.cbcintl.com/galaxy.htm

I've got a couple small boxes around 100 or so watts
you are welcome to have one if you want, no charge.

Well crainumlesss, I figured some moron would say something like
that. Reread my post. I said I can do anything I, notice I said I,
not we, them, they, or others. I said *I* can do anything *I* want
to on the ham bands. Now where did I say that *I* want to
broadcast or play music? Did I state that anywhere in my post? Do
I need to type real slow so you can keep up? I also stated that
ham radio offers enough variety and freedom that *I* don't have to
do anything illegal, such as broadcasting, playing music, running
power over the limit, jamming, using frequencies I am not licensed
to, ect., ect., ect., to enjoy ham radio.
By the way, as usual YOU are wrong coax breath, broadcasting on
the ham bands is allowed as long as it is bulletins or information
related to ham radio (ever heard the ARRL bulletins BROADCAST on a
regular basis?) or for instruction in Morse code. I used to
BROADCAST code practice tapes on 10 meters for local would-be hams
that wanted to learn code, and code at different speeds for those
wishing to increase their speed to upgrade. All that is required
is that you id properly. So you are not as quite as smart as you
think, assuming you do think which is really stretching it.

Wrong again, as usual. I began correcting Aanal Aaron H. Voobner less
than one year ago. Guess I'll hang around to further correct
Georgie-girl Busch and you, the two biggest TROLLs in the newsgroup.

It's too bad you don't stick to protecting what you consider yours
(hint: the ham bands) instead of infesting a CB newsgroup with your
tripe.

And you lost then, too. Amateurs are NOT constrained by "type
acceptance". They can use anything they want to use on the ham bands.
That should not be mis-interpreted to mean that hams can use anything
they want on CB, of course. Them's two different animals, so to speak.

3469. FS: 2 HANDHELD CB'S (COBRA & REALISTIC)

Newsgroup: rec.radio.cb
Date: 2002-12-05 23:55:52 UTC
From: MDB61487@aol.com
Message-ID: <b2ccb3e.0212051555.44dc6b4d@posting.google.com>
Source record: 146054

The first one is a Cobra 38WXST handheld CB. I only used it once, its in excellent condition. It comes with all the original literature and has new AA batteries in it, ready to go. Covers all 40 CB channels and has weather service frequencies as well. 1/4 watt output selectable, has scan and SoundTracker technology. Asking $190 for this one.

The other one is a Realistic TRC-217 Handheld CB, it was given to me by a friend who no longer needed it. In good working condition, 1/4 watt selectable, covers all 40 CB channels. This is a bit older, probably from the early 90's. Asking $50 for this one.

Also have two 12VDC Plug in power supplies for the CB's. These are the wall adapter things that let you run the CB's using your regular wall outlet. Both in good working condition. Asking $15 for each. These can also be used to run stereos, portable TV's, and VCR battery packs.

I've heard the same stuff you're talking about, as well as similar noise on the ham bands. It is strange, and I think a psychologist would have a field day trying to figure these people out.

My only guess is that it is a way to blow off steam, or perhaps for someone hiding behind the anonymity of their microphone to harass others when they know they wouldn't do the same thing to someone else in person.

I see a similar pattern between the radio operators you describe and internet trolls. The behavior is the same, it's just the medium that's different. Perhaps the idiots on the radio feel powerless in their own lives and are unable to communicate like a normal person so must resort to music playing, noisemaking, or other attention-getting antics.

I've never understood it myself and could be off base in my hypothesis, but I'm sure the anonymity is the catalyst that allows these people's "dark side" to come out.

Tom

All the time...although it looked to me like that sleet/freezing rain
may be headed down as far as you...shux, we had 40's the other night and
they are calling for it again tonight in some areas. Went out this
morning and the temp was nice, then the fog came in REAL thick, then the
temp dropped, then it reained like hell. DX conditions smoked, though..I
done talked to half the country today and them boys in Texas talked to
the other half.

We here in central NC took it in the teeth. I am on generator right now,
and there are 245,000
without power just in my county alone---that's about every single resident.
But I have generator
(that's how I'm online now), and my woodstove, and I cooked a big pot of
beans and weenies with
cheese on that stove. My, my, was that ever good. It's supposed to freeze
again tonight, so those
that have to go to work will slip and slide and dodge downed lines.

Jerry

You won't FIND a rule that states that one must have a license to purchase
or possess. It is still
a free country (more or less), it is ONLY illegal to transmit without a
license for the service for which the equipment is intended. Some Amateur
outlets *MAY* ask for a license, and I support
that; it is, after all, their right to do business as they see fit. But
there is no law that requires them to
ask for a ham license to sell such equipment.

Hmmmmmmmmmmmmmmmmm! (striking the pitch!) Oh the weather outside is
fright---COUGH!
?COUGH! Well, so much for the singing. but you get the idea. About an
inch of ice last night that
took down limbs, power lines and whole trees. 1.2 million without power.
Temps in the 20s--not
exactly the sunny south people envision. But I am fine. Ole wood stove
crackling and hissing. Generator making that unmistakable Briggs & Stratton
sound. We are well prepared. Thanks for
asking.

He's talking about a UHF TV dish, not a DBS dish.
It's a skeleton dish design, with an active element (dipole) at the focus.
Some have LNA's, some don't.
If it has an LNA, it would take power up the coax.

The DBS dishes don't have LNAs, they have LNBs. (Low Noise Block Converter)

I used to install MATV systems. :)

Higher is better.
Are there any stations on the same channel, in that direction or nearly so,
that are closer to you than the one you want?
If so, you're basically hosed.

Broadband antennas also pick up broadband interference (pagers, other junk)
They do make single channel yagis that are narrowband by design, and will do
a bit better job.
Most of our MATV stuff was done with single channel antennas.
Have a look in a Jerrold catalog.

That being said, the RS VHF antennas are pretty good.
Their UHF antennas are rather less impressive than a coathanger for some
reason.

I am looking for an 8 foot top loaded antenna,
About 14 years ago I could buy a firestick & another brand, but I can no longer find anyone that sells them.
Anyone have any ideas.
I need it for my mobile.
I have a van & have a 5 footer top loaded vulcan, but it is pointless.
Also tried a top of the line mag. mount. talk about sucky....
I hate mag. mounts.
Anyway years ago the 8' whip on the back of my van made an awsome moble station, so I want to copy what worked for me. & yes it was directional, big time. But I like it that way...

Any help would be mucho apreacato...

That's best.

> Or the rat shack set-up..?

You might get away with it.

I used to get SanFransisco stations from Dutch Flat, which is a pretty long haul, with a modest antenna, but 3000' elevation does nice things for RF.

3487. Re: Indoor Base Antenna

I don't think rental properties are going to be affected by FCC rules in any way. If you rent, you can't fasten anything to the house without permission (and then it becomes part of the house and owned by the landlord!). The rules apply to a privately owned home (not rental property).

Dave,
Basically the same advice. The 'dish' doesn't wear out,
and unless the 'new' dish is larger than the 'old' dish,
there isn't likely to be any improvement. Why bother?

Even finding a regular stainless steel whip is hard to do these days.
it's a matter of what the stores want to carry and what the customers are
really buying.
a truckstop may sell a few basic choices because they know truckers will buy
that type.
they're not gonna buy stuff that's gonna sit for ten years.

What you're hearing is a low S/N ratio. When the carrier drops... the background channel noise stays the same. What you have is a poor signal/noise ratio at that time. As more audio is applied, the carrier increases and the signal to noise ratio improves drastically. You're certainly right that it has a distinct sound to it. What you're hearing is what you would experience if you were able to talk to someone on the "fringe"(at great range) area. Unfortunately, with all the noise on the CB today... this is something that most modern CBers have never experienced.

Exactly!... that's essentially what my super swing is... minus the major bad point of SSB. I'm speaking of the "critical frequency tracking" that is such a pain in the a@#. On DSB with a supressed carrier, I sacrafice some power that I'd get from SSB... which is easy made up by external means... and I get away from having to tune everyone every five seconds because of radios drifting at different rates.

Actually, a purely "Export" type CB is illegal to sell to ANYONE within
the U.S. The fact that it happens too regularly anyway, does not change
this.

A "10 Meter" rig (Which is usually a thinly veiled disguise of an
export), can only be used legally on 10 meters, but you don't need a
license to purchase one. Recently the FCC tightened up its specs, with
regard to what they consider "contraband" radios, and many of the
so-called "10 meter" radios have now made the FCC's "illegal" list, in
that they can no longer legally be sold in the U.S. If you have one, and
are licensed to use it on 10 meters, you can continue to do so legally.

It's a can of worms for sure.

Dave

Hello Dave:

Here are the Plastic (made from black ABS Plastic) Insulators for the
Hy-Gain Penetrator 500 5/8 Wavelength Ground Plane Antenna. Had to do
some digging.

Tell the nice lady at Hy-Gain, that these are still current parts used
on other Hy-Gain Antennas, but you need then for the Penetrator 500,
model number is "Order No. 500" Hy-Gain will also sell you the assembly
instructions, for 5 dollars.

Hy-Gain is at: http://www.hy-gain.com/hy-gain/contact.php

Penetrator 500 Insulator Part Numbers:
Base or lower Insulator 877961
Upper Insulator 463056
Tuning Wire Supports 463642

Tell em Jay sent ya's

Jay in the Great Mojave Desert, ... just down the road ah ways from the
fillin station.

You were doing so well until that last statement. Most of the "dark side" you speak of comes from a few that post their call. As of late, yes, a few of these hammies have ceased posting with their call and attempted anonymity..the first sign that others have seen them for what they are and the self-realization they are detriments to the hobby. CB is anonymous and always has been.....this is a cb room.....cbers have no interest to imitate something they have no interest in. So let's shed some truth on the matter....these few malcontent hammies are imitating CB with their failed attempts at being anonymous. Ha!

From: aa2qa@frontiernet.net (Jim Hampton)
I don't think rental properties are going to be affected by FCC rules in any way. If you rent, you can't fasten anything to the house without permission (and then it becomes part of the house and owned by the landlord!). The rules apply to a privately owned home (not rental property).
73 from Rochester, NY
Jim
--

He didn't clarify if he was in a house or apartment.....you're right...I assumed an apartment or deed resricted area. If he is in an apartment, doesn't the landlord have to allow a "reasonable" antenna (once he is licensed) ? Many hammies have even joined emergency repeater clubs as an added piece of armor to fight back against the no-antenna rules. A rental house? I'd throw up a flagpole and use it to house an antenna...just make sure you raise the flag each morning and take it down each night.

I suppose that pranks are OK between friends who know the score, but you do
have to know where to stop.
The damage that so many are casing is no prank, you certainly have to draw
the line when damage or danger are involved.

Hi.

Also, reducing the antenna bandwidth will allow the rx front end to put all
it's effort into the wanted signal.

A few years back (quite a few), while I was training and lived in a small
split level flat, most television transmitters in the UK still switched off
at night... usually about 12:30am.
Once the local transmitters switched off, my rx gain picked up and I could
receive stations 100s of miles away... on an indoor (set top, broadband)
antenna. Once the local transmitters came back on, the signal would be
lost... although nothing local used the same channels.

Peter.

Hi Stuart.

As you seem to be in the UK, try Knights CB...
http://www.users.zetnet.co.uk/knightscb/
I have dealt with them (via the shop)... never had a problem yet.

There is also Truck Kings (now in Letchworth, Herts - was once Watford)...
http://www.truck-king.co.uk/home.htm
They never had much on their site so, unless it has changed, you cannot
purchase on-line... although they do work mainly by mail order.
If you go on the group "rec.radio.cb", you will find someone called
"Rocket", who has some kind of association with them (not sure what).
Also, Doug Knights (Knights CB) makes the occasional post on the group to
let us know when their latest newsletter is available (free on-line).

Just one more I can think of right now...
http://www.cb-shack.com/index.html
CB Shack. Not sure what you can do on-line, not visited the site for a
while.

If you say so.

> Pay attention and
> stop being so particular about what days you choose to possess gumption.

The key is that *I* chose which posts I want to respond to, and ignore
those that I don't. Every so often I'll respond just to bitch slap you
back to reality.

>
> >A psychopath and a sociopath share many common maladies, but the key
> difference is that a psychopath is prone to violence, while a
> >sociopath
>
> Wold "sociopathic liar" fall under that umbrella?

Compulsive and habitual lying is a trait of sociopathic mental illness,
as well as Narcissistic Personality Disorder. Your almost continual
lying and misrepresenting what other people say are one of your key
symptoms. Along with an indifference to the laws of our society and the
general disregard for the rights of other people. You do possess the
lions share of the symptoms.

>From one of the links below:

Antisocial Personality Disorder (APD) is practically synonymous with
criminal behavior. It's so synonymous, in fact, that practically all
convicted criminals (65-75%) have it, with criminologists often
referring to it as a "wastebasket" category. Psychologists consider it
an adult
version of juvenile conduct disorder. The main characteristic of it is a
complete and utter disregard for the rights of others and the rules of
society.
They seldom show anxiety and don't feel guilt. There's really no

effective treatment for them other than locking them up in a secure facility with
such rigid rules that they cannot talk their way out.

Sociopathy is chiefly characterized by something wrong with the person's conscience. They either don't have one, it's full of holes like Swiss cheese, or they are somehow able to completely neutralize or negate any sense of conscience or future time perspective. Sociopaths only care about fulfilling their own needs and desires - selfishness and egocentricity to the extreme. Everything and everybody else is mentally twisted
around in their minds as objects to be used in fulfilling their own needs and desires.

Sound familiar?

>
> >And BTW, those who do thumb their noses at the established rules of

> stuff" to another.
> It's fun to try to figure out who all those voices belong to.
> Sometimes more entertaining than TV, because it's REAL.

What does this prove? It's not illegal to monitor cordless phones, only cellular ones. Cell phones are the only ones protected by the ECPA. Otherwise the cordless phone freqs would be blocked out as well. Now if I were to DEVULGE the specific content of those conversations or record them, I would be in violation of the state's wiretap law.

Strike one, try again....

>
> MORE..from N3CVJ's own hypcritical own words:
> I will say that there are SOME hams that may feel a bit cheated, since
> they feel obligated to follow the rules, and it bothers them to see
> Cbers doing all that they do, totally illegally, and seemingly without
> the least bit of remorse.

And what is the significance of this? It's true that some hams do feel cheated, when they are bound by the rules, that they feel an obligation to obey, while freebanders operate outside the law, seemingly with immunity, and certainly with no remorse. What's hypocritical about that? Are you challenging this statement? On what grounds? Are you saying that there are no hams who feel this way? Oh, I forgot, you speak for the "majority". Another trait of sociopathic disorder, an over inflated self worth.

Strike two, you're on a roll.....

> And we certainly can't ignore:
> I currently own 2 Dave made amps. Both of them "sound" ok. But they
> are also not something that I would run inside my house. I have them
> because I horse traded other radio gear. I'd trade them for a Texas
> Star DX-500 or 600 if I had the opportunity.

What does THIS prove. So what, I have 2 Dave Made amps. Unlike you, I can use them LEGALLY (With some extensive modification to add bias, and to add a lowpass filter). I currently have a Texas Star DX 600 in my truck. It works just fine on 10 meters. I get about 750 watts peak out of it on SSB. I enjoy projects, and making the Dave Made's spectrally compliant, was a bit of work, but I enjoy this type of project. Besides, I'll probably horse trade them for some more gear in the future. I've spent very little pocket cash for most of my equipment. I've horse traded for most of it. Many people pay me for radio work, in equipment rather than cash.

Strike 3, you're outta here!

> Let's see what you said again:
> And BTW, those who do thumb their noses at the established rules of
> society, no matter what you may think of them, are considered
> sociopaths,
>
> And so again the question is posed to you...how long have you been a
> hypocritical federal lawbreaker?

As long as you've been lying about it.

> N3CVJ claimed he was a federal law breaker many years ago when he was
> younger until he saw the light and mended his ways......balderdash. The
> post is less than 3 years old. The fact that someone his age lies as
> much as he does is troubling enough. The real question would be WHY he
> is compelled to commit such behavior and engage in such magnificent
> lies.

And two wrongs don't make a right. The fact that I operated a CB outside of FCC rules in the past, in no way absolves you from doing it now, and believing that you're justified in doing so. THAT is what makes you a sociopath. The fact that you've almost continually attempted to deflect the topic away from your lawlessness, to my alleged "lying" is a clear case of deflection, which is another classic symptom of a sociopathic disorder.

>
> >More links on the subject of sociopathic disorders. Do these sound

>
> It might. The fact that you consider yourself "knowing" an internet
> stranger based on what they allow you goes hand in hand with the
> arrogance and ignorance emanating from your lying pie hole.

OH!!! So now you coyly imply that you might be just acting like a sociopath, but are not one in real life. Ok, I can accept that. Hell, That would mean that you and I are very much alike then, and we should sit down and have a few beers and chuckle at all the turmoil that you've created on this newsgroup. When do you want to do it?

That get out of jail free card isn't going to wash. You've got way too much archived history for that.

> The sites
> concerning habitual and sociopathic liars are more accurate in this
> application. One must look no further than your posts to see your
> contradictions and psychopathic tendencies.

One of the other common traits of sociopathic disorders is deflection. The blaming of others for your own failings and character flaws.

Oh and by the way, a psychopath usually resorts to physical violence. Since we have no way of determining whether or not physical abuse and violence are a part of this picture, it would be irresponsible to assign this designation, without further proof.

If you want to play in this sandbox, you'd better brush up on the terminology.

> The fact that you fancy
> yourself more knowledgeable than the next guy concerning mental health
> merely adds to the entertainment of your claims.

What's really entertaining is that these symptoms fit you to a "T". I suspect that this is the main reason why you have concentrated your vitriolic campaign to malign me to such a degree. The fact that I've got your number, bothers you to no end. The old "truth hurts", as it were....

> You have only accusatory claims and your personal off-topic self-inflated
> opinions,,

Which are supported by credible mental health professionals.

> the rest of us have your posts.

As do we have yours. You're a case study of sociopathic disorders, with
every word you post.......

Boat anchor.

You'd get more features, in a smaller and more attactive case, with most modern general coverage ham rigs.

Of course, this radio is military spec, which means it'll likely survive a bomb blast, but that's normally not something I'm overly concerned with......

to AM cb radios with any type of noise blanker ie the 148's and grants your super swing sounds raspy and muffled while running the noise blanker. the erattic peaks are filtered out by the noise blanker the best it can. theres a huge difference in the way you hear a super swinging station with noise blanker on and noise blanker off. also what i said about making it hard for an amp is the fact that average power rises with modulation and some words go higher than other words leading to certain words or syllable being louder and over driving the amp into compression while others dont. if you created some type of alc maybe that wouldnt happen but as of now its still a shitty way of doing AM

>Exactly!... that's essentially what my super swing is... minus the
>major bad point of SSB. I'm speaking of the "critical frequency
>tracking" that is such a pain in the a@#. On DSB with a supressed
>carrier, I sacrafice some power that I'd get from SSB... which is easy
>made up by external means... and I get away from having to tune
>everyone every five seconds because of radios drifting at different
>rates.

All the antenna in the world won't do you any good if you don't have a line of sight shot to the distant TV station. There is a rather large book, that shows the coverage area of the major TV stations. I'll try to dig it up if you give me the station's call sign.

If you have fairly flat ground, with no hills in the way, you have a chance. I'd go with the biggest deep fringe antenna, that you can buy. Like CB and ham radio, the more elements, the more gain.

As for pre-amps, I'd stay away from Radio Shack. Their amps have been known to self oscillate and transmit spur at all sorts of frequencies (I once had one on the input of my 220 repeater). Blonder Tongue makes some good products, as does California Amplifier, although they may be mostly SAT TV.

And like radio, height is might. The higher you go, the better your chances of grabbing useable signals.

"Sandbagger"

3517. The real deal on K8CPA, BKA "Chukkee Sukkee"

Newsgroup: rec.radio.cb
Date: 2002-12-06 15:28:55 UTC
From: chukkeedacriminal@yahoo.com
Message-ID: <7684f123.0212060728.e50be19@posting.google.com>
Source record: 145950
Cross-posted to: rec.radio.cb,rec.radio.amateur.swap,rec.radio.amateur.misc,rec.radio.amateur.equipment

First things first...
Happy Holidays to Keyclowns and Anti-Keyclowns alike.

There was a hamfest in the Detroit area which a few of us
Anti-Keyclowns attended last Sunday. Who did we see, with about a 3
day beard, homeless shelter type clothes and a glazed expression on
his goofy face????? None other than Chukkee Sukkee herself!

Chukkee was so goofed up in the head he didn't even recognize us
Anti-Boys, although he had met one of us under very bad <for him>
circumstances in September. He called one of us "Mike", a name which
none of us carry, and mumbled incoherently at our table of antique
radios, variacs, antennas, modern transceivers, etc...and departed the
scene hastily.

Chukkee Sukkee can say things like "puff a root, dickhead", etc. , but
has absolutely no power or credibility. This lying toad of a human
being has said the following things on the NG's, all proven false:

1. He works for Jeff Roush racing
2. He has a concealed weapon permit<he ADMITTED THIS WAS A LIE IN
SEPTEMBER>
3. He is affiliated with a gang called the Latin Counts
4. He is affilaited with a bike gang called the Iron Coffins
5. He owns a .45 caliber pistol
6. He owns a 9 MM pistol
7. He has faced down police officers over his pistol. <he calls police
officers "pigs" in his posts>
8. When accused of selling illegal radio equipment Chukkee Sukkee
vehemently denied doing so. That is, until an enterprising amateur
looked up his advertising for sale of illegal amplifiers on
various
amateur radio and CB forums. This documentation drove him back
into the woodwork a while.

Chukkee Sukkee says these things to make himself appear to be some
sort of a formidable human being. When confronted in person he wilts
like a dandelion hit with weed killer. For example, Chukkee Sukkee
threatened in rec.radio.cb to shoot people with a 9mm pistol at the
Findlay, Ohio hamfest in September, 2002. The persons he threatened
walked up to his table and asked him if he wanted "to settle the hash
now", and he could not have been faster to stretch out a hand to shake
if he had a spring loaded elbow.

In late 1999, he lost an ISP because he threatened another amateur with raping his wife and daughter, killing his dog, and doing a drive by shooting on his home. The local police and the Toledo office of the FBI became interested in Chukkee Sukkee recently because of his long record of violent threats to people in newsgroups. The Lincoln Park, MI Police dept. paid Chukkee Sukkee a visit in September, 2002 because of these threats. After the cops were done with him, Chukkee Sukkee whined like the cowardly person he is, and posted to rec.radio.cb a long and lying denial of making any violent threats, and specifically admitted he had never owned a hangun or had a CCW permit. This admission ran counter to the fact that he had stated many times he owned either a .45 caliber or a 9 MM pistol, and had a CCW permit. This exposed the lies, of course.

There is now an outstanding warrant for Chukkee Sukkee's arrest in Lucas county, Ohio for meancing as a result of his violent threats. The Anti-Keyclowns have a copy of the police report in our posession. This will be made available to anyone who wants it, as it is public information. Email us for details.

Chukkee Sukkee should be considered a fat mouthed idiot, and very desperate to belong to some group or organization. He has been rejected by most rational persons, and will continue to be until he moves somewhere that has a population that has never been exposed to his moronic actions. <the planet Neptune, maybe?>

In summary, we have among us a lying idiot who has obvious psychological issues. He is prone to violent threats against people, even women, children and pets. When confronted, though, he shows a spineless, yellow, cowardly nature.

If Chukkee Sukkee is smart he will stay in Michigan. If he gets confronted by any LEO in Ohio he may be on a road he does not wish to travel. Chukkee Sukkee makes a big blatting issue of the fact that he was at the Toledo hamfest last year and that his truck and his carcass emerged unscathed. Fact is, no one threatened either. It is Chukkee Sukkes's mentality, however, that most intriguingly emerged in the dust up over this situation last March... Why would anyone be concerned about their auto being damaged unless: A> They are in the habit of damaging autos and have that mid set, or B> They are guilty of doing something bad and expect retribution?

Laugh if you will folks, but Chukkee Sukkee is a sick puppy.

Mr. 66:
Call me after the 14th when I get up there, or e mail me direct. Basically I need to know what town they are in, and then I can tell you if it will be worth it to do any of what they are talking about. The problem is that IF they are not on the SE side of town or further out, it will probably be a big waste of $$$ for them. The ILLEGAL (HI N8) TV skip from Pittsburg RARELY ever comes in to where they are probably @. Maybe the best bet is to see if a Youngstown UHF station will have it (depending on network carrying it) and maybe that will work, depending if there are stations on that channel in Canada, which when the ILLEGAL DREADED TROP SKIP comes it, will wipe away any chance of seeing channels 33, 27 or 21 from Youngstown. I did TV DX for years, back when N8 couldn't even spell RADIO ! And I'm familiar with the area as to what comes in on a regular basis. So I have to have more info before I can say get it or not!
Dave!!!!!!!!!!!!!

Dude,

go out and read the specs... it is computer based. it has a custom
CMOS processor as the core. thats why you can reprogram it to use
almost any frequency.

I agree, to an extent. Legalize freebanding, and there'd be no more
thrill of lawfucking to attract the freebanders. "It's legal, so---?"
would be the response. It would take all the fun out of it for the
outlaws.

10 meter intrusions, however, are another ballgame, best dealt with
through DFing and resultant beatings. Hey, it works for us 6m hams...
though I do think a tire iron is a bit excessive.

i always thought you were pretty cool until now but if you believe this bullshit your dumber than i can imagine. do you really think we outband for the thrill of just doing something illegal? since theres about zero chance of getting caught i'd say that isnt much thrill at all. people escape the 40 channels and go above and below to find clear spots to talk amung each other. during the day times of the solar highs 1-40 are crammed full of users all around the world. simply too many people there, the only way to escape it is go a few kc's above or below the normal 40. if you legalize it you'll only have 120 channels that will be just like the regular 40 we have now.

>I agree, to an extent. Legalize freebanding, and there'd be no more

Twistedhed wrote:
Lelnad KC8LDO has also called people
federal criminals for not obeying laws..going as far as saying those who
violate them instead of conforming to them are psychopaths..

>The term is SOCIOPATH, not psychopath.

No...Lelnad used the term "psychopath" not sociopath.

>If you say so.

No, LELNAD says so.
Pay attention and
stop being so particular about what days you choose to possess gumption.

>The key is that *I* chose which posts I want to >respond to, and ignore
those that I don't.

.as goes usenet...congratulations for finally figuring out proper
useage.
It's also too bad the idea of extending the same concept you employ to
others is lost on you. As you choose to respond to only what *you*
choose, you know only what I select, allow and put forth to you. PT
Barnum claimed one of you are born every minute. To set forth the idea
that you somehow are qualified to intimately identify textbook cases
based on what a stranger tells you (on the internet, no less) speaks
much more of your mental health than anyones.....please continue.

>Every so often I'll respond just to bitch slap >you back to reality.
.
What is more important is your predisposition to violence over mere
words someone may post..to allow yourself to become huffed enough to
allude to violence....my, my.

>A psychopath and a sociopath share many >common maladies, but the key
>difference is that a psychopath is prone to >violence,

Hence your "bitchslap" reference..very well illustrated.

>while a
>sociopath

Wold "sociopathic liar" fall under that umbrella?

>Compulsive and habitual lying is a trait of >sociopathic mental
illness, as well as >Narcissistic Personality Disorder.

Your continual lying and misrepresenting what others say fits the mold,
Davey-boy. Several examples of your hypocrisy and lies......

>"There REALLY isn't a problem, It's just that >there are a FEW hams
that got fed up with >CB, upgraded to ham, and now either >continually
trash the CB band, or refuse to >admit that they were once a part of it.
>Dave
>"Sandbagger"

Here again you give a self-description.
Below you give advice showing your indifference to society's rules.

>"Peaking a radio is NOT recommended. It's >more trouble than it's
worth. Go with the small >2 pill amp, and let IT do the work.
>Dave
>"Sandbagger"

Then we have the more recent:

>That's an export radio, so he's already a >criminal. So go ahead and
modify the clarifier!
>Dave
>"sandbagger"

Then we have below you admitting to yet a THIRD amplifier:

>I'll stick with my TS amp. It seems to continue >to run with the best
of them....
>Dave
>"Sandbagger"
>N3CVJ

Then we have your lie about the "bust" that you were nable then, and now
to substantiate to anyone in anyway whatsoever...no records of this,
nothing. Like a sealed public record...snicker!

>I know a local CBer that was taken to court >over his CB interference,
and was found guilty >of "disturbing the peace" and had to pay a fine
>of $300. The neighbor had tape recordings of >the interference, and it
didn't help that the >CBer was heard swearing on the tape.

Once again, Hall, you lie like hell.
Then, you offer up the gem below:

>To your original point, it is much safer for a >CBer to run power from
the mobile. That way >you never interfere with the same people for >very
long.
Dave
"Sandbagger"

In other words, it's ok to interfere with people when you're running
your illegal amps from your mobile, 'cause they will never find out who

you are. Brilliant, criminal, sociopathic logic, Hall.

Here we have his Mott-the-Hoople impression:

>Why should you fear this? Only people that >have something to hide need to fear this loss >of anonimity. Besides, what ham would care? >Hams frequently give out their phone numbers >or addresses on the air. Unlike CB, there >aren't a bunch of mentally challenged people >waiting to cause trouble with this information.
> Dave
>"Sandbagger"
--
(snicker)
But alas, it wasn't cbers posting personal information on folks,,it's people like boy-Georgey, and Lelnad and Frank and yourself.. Cb has always been anonymous with handles....you have had a hard-on over this for years.

Here is another of your gems..........a prediction where just the opposite happened:

>The government can't stop illegal drugs, so if >the CB market is big enough to justify the risk, >people will still sell illegal radios, but they will >become more scarce, and more expensive as >a result.
>Dave
> "Sandbagger"

Shows how clueless you were and still are.
Radios are cheaper and easier to get than ever b4. If nothing it at least illustrates your astute
prowess.

This is a good one...crying about getting others to do it your way....

>Elmering. What a nice concept. Unfortunately, >sometimes when you "lead", you have to tug a >little bit to pull the "elmeree" in the right >direction. Hams, are not going to encourage >lawless operation. The first step in the >"elmering" process, is to show the person, the >error of their ways and to steer them down an >equally fufilling (but legal) path.

Now, mind you, this post was made at the same time as your illegal activities..superbly reflecting the accurate description of troublemaker and hypocrite.

> activiteSome of the 2950's problems, I have >managed to correct, which make the radio >decent enough that I've used it mobile now for >close to 7 years. Dave
>"Sandbagger"

Still have that as well?
And being busted out for crossposting to rec.radio.cb and generally being a pest and troll.....

>Dave Hall wrote:
>Dave
>"Sandbagger"
>Dave, the CB crossposting showed up on your >reply. 73, Brian

And below we have you hyping cb voodooodooo:

>Only when there are standing waves does the >length of the coax matter.
>Dave
>"Sandbagger"

More of that sparkling hypocrisy:

>As far as price, unless you catch a closeout >sale, RS has no price
advantage. I would >recommend finding a mail-order stre that >carried a
Uniden Grant XL. This radio can still >be modified via the PLL for
out-of-band >operation, and they're usually available in the >$129
range. Dave
>"Sandbagger"

> Along with an indifference to the laws of our >society

You repeating yourself with nothing more than lies is what tarnished
your hammie sig, Dave. Why do you act like this? the only laws I have
ever claimed breaking are the DX and freeband...your communication
skills must really be f*cked for you to intepret those selectively
ignored rules as the laws of society. "Society" doesn't even know the
difference between hammie and cb, let alone distinguishing rules.

>and the general disregard for the rights of >other people.

If you feel your rights are violated by speaking my piece, perhaps you
should seek counseling.

>You do possess the lions share of the >symptoms.

And you are qualified to diagnose a stranger on the internet by what
they force feed you just how?
Never mind,,the fact that you believe it is rich enough to go around for
all our enjoyment.

>From one of the links below:
>Antisocial Personality Disorder (APD) is >practically synonymous with
criminal behavior.

Not surprising.
Based on your comments alluding to violence, it is easy to see you are
the same old Dave Hall N3CVJ that breaks laws and is a hypocrite.

>It's so synonymous, in fact, that practically all >convicted criminals
(65-75%) have it, with >criminologists often referring to it as a
>"wastebasket" category. Psychologists >consider it an adult
>version of juvenile conduct disorder.

But you healed yourself, right Davey-boy? Now you must heal the rest of
the freebanders and cb lowlives who piss in your light.

>The main characteristic of it is a complete and >utter disregard for the rights of others and the >rules of society.

Again, your communication deficit is blinding you. 2 selectively disregarded rules is not "utter disregard" for anything.

>They seldom show anxiety and don't feel guilt.

Guilty.

>There's really no effective treatment for them >other than locking them up in a secure facility >with
>such rigid rules that they cannot talk their way >out.

(giggle) Based on what someone you have never met says, you want to lock them up. Pretty much sounds like the efforts at having someone silenced, eh Davey-boy?
Ahahhaah!

>Sociopathy is chiefly characterized by >something wrong with the person's >conscience. They either don't have one, it's full >of holes like Swiss cheese, or they are >somehow able to completely neutralize or >negate any sense of conscience or future time >perspective. Sociopaths only care about >fulfilling their own needs and desires - >selfishness and egocentricity to the extreme. >Everything and everybody else is mentally >twisted
>around in their minds as objects to be used in >fulfilling their own needs and desires.
>Sound familiar?

Yes, it does....yourself, N8, Lelnad, And Frank. But that's not news..and you lowlife few certainly aren't "everybody".

>And BTW, those who do thumb their noses at >the established rules of >society, no matter what you may think of them, >are considered >sociopaths, so Leland was right about that.......
So Davey boy, how long have you considered yourself a psychopath?

>Try to tell a nut, he's nuts.........

Let's rephrase it since you can't comprehend the communication being extolled.....how long has it been since you ceased being a lawbreaking psychopath?

Of course the licensed hammie N3CVJ who claims with his license comes a responsibility to operate within his own acceptable stated perimeters and what he deems "responsible", only here he is blatantly bragging about the illegal behavior he claims makes the rest of us "federal criminals".

>Really? Where was I "bragging" about >anything?

The same place I showed utter disregard for society.

From your own lips Davey-boy:

>Who needs "Melrose Place" when you have a >scanner? My neighborhood phone traffic was >no less juicy at times. Teenaged girls talking >about their first time with sex, wife talking to >newly found lover while hubby watched >Monday Night Football in the next room, guys >making drug buys, and even caught one >neighbor bitching about ME and all my "radio >stuff" to another.
>It's fun to try to figure out who all those voices >belong to.
Sometimes more entertaining than >TV, because it's REAL.

-
>What does this prove?

It shows how easy it is to entertain someone with an attention span and intellect such as yours.

>It's not illegal to monitor cordless phones, only >cellular ones. Cell phones are the only ones >protected by the ECPA. Otherwise the >cordless phone freqs would be blocked out as >well. Now if I were to DEVULGE the specific >content of those conversations or record them,

You just did. The law doesn't say anywhere about divulging "specifics". But, your sicko pleasure at listening to TEENAGE girls talk about their first time with sex? Couple this with the fact that you allowed one of your partners were in business with owning a cb hack shop was a sex fiend and a very disturbing picture of you is unfolding. Any grown man that would take delight and refer to teenage girls as "juicy", no matter what they said, is truly f*ucked. No wonder you are somewhat familiar with psyche treatment. You're a sex whacko..a genuine perv!
No wonder you're in here,,, many hammies are aware of your sickness and have abandoned you......sicko!

>Strike one, try again....

Dude, you've done cashed all your chips. Freak.
MORE..from N3CVJ's own hypcritical own words:

> I will say that there are SOME hams that may >feel a bit cheated, since they feel obligated to >follow the rules, and it bothers them to see >Cbers doing all that they do, totally illegally, >and seemingly without the least bit of remorse. >And what is the significance of this? It's true >that some hams do feel cheated, when they >are bound by the rules, that they feel an >obligation to obey, while freebanders operate >outside the law, seemingly with immunity, and >certainly with no remorse.

>What's hypocritical about that? Are you >challenging this statement? On what grounds? >Are you saying that there are no hams who >feel this way? Oh, I forgot, you speak for the >"majority".

Which hammies were YOU purporting to speak for?
I am much closer in touch with the views of the majority of cbers than you. You were proven this several times prior when only yourself, Lelnad, N8, and Frank were shown to refer to dxers as federal criminals. No one else does this,,this means you are a minority..and myself, who

doesn't consider such self-rightous and asinine banter worthy of the source, am in what is referred to as the "majority" in this instant.

> Another trait of sociopathic disorder, an over >inflated self worth.

It just appears that way to you 'cause you have no self-worth 'cause of the battering your ego has taken..

>What does THIS prove. So what, I have 2 >Dave Made amps. Unlike you, I can use them >LEGALLY (With some extensive modification >o add bias, and to add a lowpass filter). I >currently have a Texas Star DX 600 in my >truck. It works just fine on 10 meters. I get >about 750 watts peak out of it on SSB. I enjoy >projects, and making the Dave Made's >spectrally compliant,

Really? then you wouldn't have a problem telling the group exactly what you did and how you did it.....you know,,so we can all benefit from the spectral purity bullshit you're attempting.

>was a bit of work,

Don't say it, sow it.

>but I enjoy this type of project. Besides, I'll >probably horse trade them for some more >gear in the future. I've spent very little pocket >cash for most of my equipment.

Yea,,,,,,many cbers can do what you do at a fraction of your cost. AS amatter of fact, it's exactly what sent Lelnad running for the hills concerning my article in Sporadic Waves.. lost his mind over that comment.

Let's see what you said again:

>And BTW, those who do thumb their noses at >the established rules of society, no matter >what you may think of them, are considered >sociopaths,

And so again the question is posed to you...how long have you been a hypocritical federal lawbreaker?

>As long as you've been lying about it.

Ahh, but it was shown it was you lying about freebanding and using amps on 11 meter Davey-boy. Now you claim you operate withon the confines of the law. Again, I ask you, how long has it been since you gave up being a federal lawbreaker?
You already were shown you were a liar for that...need some more?

N3CVJ claimed he was a federal law breaker many years ago when he was younger until he saw the light and mended his ways......balderdash. The post is less than 3 years old. The fact that someone his age lies as much as he does is troubling enough. The real question would be WHY he is compelled to commit such behavior and engage in such magnificent lies.

>And two wrongs don't make a right.

Who said it did?
This was illustrated to show how you lie,,anything else you find in it
is cause of your communication deficit.

>The fact that I operated a CB outside of FCC >rules in the past, in no
way absolves you from >doing it now,

No one said I am absolved. That was YOUR word, as they all are YOUR
words. The fact that YOU did it but had your fill of it, and now if
anyone else does it is grounds for you to harass and call names, is
bullshit, Dave. YOU can't justify your behavior, no matter how much you
point to another's behavior.

>and believing that you're justified in doing so.

More of your communication deficit.

>THAT is what makes you a sociopath.

I may be crazy, but unlike you, a habitualand compulsive liar I am not.

>The fact that you've almost continually >attempted to deflect the topic
away from your >lawlessness, to my alleged "lying" is a clear >case of
deflection,

My lawlessness is none of your business and was only a topic until your
lying began.

>which is another classic symptom of a >sociopathic disorder.
>More links on the subject of sociopathic >disorders. Do these sound
like anyone we >know?
>http://home.datawest.net/esn-recovery/artcls/s>ocio.htm
>http://www.ulm.edu/~palmer/AntisocialandHist>rionicPersonalityDisorders.htm
>http://faculty.ncwc.edu/toconnor/401/401lect16>.htm

It might. The fact that you consider yourself "knowing" an internet
stranger based on what they allow you goes hand in hand with the
arrogance and ignorance emanating from your lying pie hole.

>OH!!! So now you coyly imply that you might >be just acting like a
sociopath, but are not one >in real life. Ok, I can accept that.

Which would be ok if you weren't suffering from such communication
deficits.

>Hell, That would mean that you and I are very >much alike then,

You and I are nothing alike.
I was brought up a man's word is his honor, a handshake is a contract.
When a man loses his word and integrity, he is useless.

>and we should sit down and have a few beers >and chuckle at all the
turmoil that you've >created on this newsgroup.

It's return fire and not considered turmoil by anyothers besides yourself and the other 2 or 3 stool-drinkers.
I don't drink. And even when I did, I was very particluar who I drank with. You wouldn't have made the cut.

>When do you want to do it?

If you are that hell-bent on eyeballing me, the invitation was aleady extended to you once. Whenever you grow up and manage the airfare, I'll be around and I'm extremely easy to find.

>That get out of jail free card isn't going to >wash. You've got way too much archived >history for that.

And my history shows I do not lie and do not start trouble with anyone......a stark contrast to yours.
The sites
concerning habitual and sociopathic liars are more accurate in this application. One must look no further than your posts to see your contradictions and psychopathic tendencies.

>One of the other common traits of sociopathic >disorders is deflection.

Is that like personal attacks when yuor lies are pointed out?

>The blaming of others for your own failings >and character flaws.

Couldn't have said it better. YOU SOMEHOW hae managed to balme me for your "turmoil" among other shortcomings you share.

>Oh and by the way, a psychopath usually >resorts to physical violence.

Which is why you mentioned it a few times already. Of course,,t all begins to make sense, now.

>Since we have no way of determining whether >or not physical abuse and violence are a part >of this picture, it would be irresponsible to >assign this designation, without further proof.

Not really. Allow me to explain..we have several innuendos and references by you concerning acts of violence..none by myself.
Self-explanatory.
BUT YOU HAVE NO proof of anything and it hasn't stopped you from being irresponsible and assigning designations b4, why stop now?
:)

>If you want to play in this sandbox, you'd >better brush up on the terminology.

I don't play in childrens sandboxes and I dont find teenage girls talk of sex "juicy" like you do.
The fact that you fancy
yourself more knowledgeable than the next guy concerning mental health merely adds to the entertainment of your claims.

>What's really entertaining is that these >symptoms fit you to a "T". I suspect that this is >the main reason why you have concentrated >your vitriolic campaign to malign me to such a >degree.

Poinin out your lies is not maligning. You attacking me with no provocation and offtopic insultive remarks was the first "maligning" of any, if it was done at all.

>The fact that I've got your number,

Post it. Say it, don't spray it. the drool from your snout is embarrassing.

>bothers you to no end. The old "truth hurts",

Apparrently, as it has the ability to make yu lie and go wild.

..
You have only accusatory claims and your personal off-topic self-inflated opinions,,

>Which are supported by credible mental health >professionals.

From a carefully and scripted dialog provided by the "patient"? (chuckle) No wonder this is so much fun.

the rest of us have your posts.

>As do we have yours. You're a case study of >sociopathic disorders, with every word you >post.......
>Dave
>"Sandbagger"

Better crazy than a liar.

getting a governmental ham license is tatamount to agreeing that you
will play the game according to the government's rules and basically
you sign away your fifth ammendment rights .....you know,.........kind
of like signing a income tax form isn't it????

Radio is a microcosm of society.

If everyone is allowed to do what they feel like, then the finite spectrum
will be rendered completely useless.

3545. OT:funny!

A not necessarily well-prepared student sat in his
life science classroom, staring at a question on the final exam
paper.
The question directed: "Give four advantages of breast milk."

What to write? He sighed, and began to scribble
whatever came into his head, hoping for the best:

1. No need to boil.
2. Never goes sour.
3. Available whenever necessary.

So far so good - maybe. But the exam demanded a
fourth answer. Again, what to write? Once more, he sighed. He
frowned.
He scowled, then sighed again.
Suddenly, he brightened. He grabbed his pen, and
triumphantly, he scribbled his definitive answer:

4. Available in attractive containers of varying
sizes.

He received an A.

3546. OT: ROFLMAO!

Need a laugh? This ought to do it. It gets funnier, the further you read. This
is an article submitted to a 1999 Louisville Sentinel contest to find out who
had the wildest Christmas dinner. This won first prize.

Christmas with Louise

As a joke, my brother used to hang a pair of panty hose over his fireplace
before Christmas. He said all he wanted was for Santa to fill them. What they
say about Santa checking the list twice must be true because every Christmas
morning, although Jay's kids' stockings were overflowed, his poor pantyhose hung
sadly empty.

One year I decided to make his dream come true. I put on sunglasses and went in
search of an inflatable love doll. They don't sell those things at Wal-Mart. I
had to go to an adult bookstore downtown. If you've never been in an X-rated
store, don't go. You'll only confuse yourself.

I was there an hour saying things like, "What does this do?" "You're kidding
me!" "Who would buy that?" Finally, I made it to the inflatable doll section. I
wanted to buy a standard, uncomplicated doll that could also substitute as a
passenger in my truck so I could use the car pool lane during rush hour. Finding
what I wanted was difficult.

Love dolls come in many different models. The top of the line, according to the
side of the box, could do things I'd only seen in a book on animal husbandry. I
settled for "Lovable Louise." She was at the bottom of the price scale.

To call Louise a "doll" took a huge leap of imagination. On Christmas Eve, with
the help of an old bicycle pump, Louise came to life. My sister-in-law

was in on
the plan and let me in during the wee morning hours, long after Santa had come
and gone, I filled the dangling pantyhose with Louise's pliant legs and bottom.
I also ate some cookies and drank what remained of a glass of milk on a nearby
tray. I went home, and giggled for a couple of hours.

The next morning my brother called to say that Santa had been to his house and
left a present that had made him VERY happy but had left the dog confused. She
would bark, start to walk away, then come back and bark some more. We all agreed
that Louise should remain in her panty hose so the rest of the family could
admire her when they came over for the traditional Christmas dinner.

My grandmother noticed Louise the moment she walked in the door. "What the hell
is that?" she asked. My brother quickly explained, "It's a doll." "Who would
play with something like that?" Granny snapped. I had several candidates in
mind, but kept my mouth shut. "Where are her clothes?" Granny continued. "Boy,
that turkey sure smells nice, Gran," Jay said, trying to steer her into the
dining room. But Granny was relentless. "Why doesn't she have any teeth?" Again,
I could have answered, but why would I? It was Christmas and no one wanted to
ride in the back of the ambulance saying, "Hang on Granny Hang on!"

My grandfather, a delightful old man with poor eyesight, sidled up to me and
said, " Hey, who's the naked gal by the fireplace?" I told him she was Jay's
friend. A few minutes later I noticed Grandpa by the mantel, talking to Louise.
Not just talking, but actually flirting. It was then that we realized this might
be Grandpa's last Christmas at home.

The dinner went well. We made the usual small talk about who had died, who was
dying, and who should be killed, when suddenly Louise made a noise that sounded
a lot like my father in the bathroom in the morning. Then she lurched from the

panty hose, flew around the room twice, and fell in a heap in front of the sofa.
The cat screamed. I passed cranberry sauce through my nose, and Grandpa ran
across the room, fell to his knees, and began administering mouth to mouth
resuscitation. My brother fell back over his chair and wet his pants and Granny
threw down her napkin, stomped out of the room, and sat in the car. It was
indeed a Christmas to
treasure and remember.

Later in my brother's garage, we conducted a thorough examination to decide the
cause of Louise's collapse. We discovered that Louise had suffered from a hot
ember to the back of her right thigh. Fortunately, thanks to a wonder drug
called duct tape, we restored her to perfect health. Louise went on to star in
several bachelor party movies. I think Grandpa still calls her whenever he can
get out of the house.

On 6 Dec 2002 07:28:55 -0800, chukkeedacriminal@yahoo.com (The truth
about ChukkeeSukkee) was blabbling:

...First things first...
...Happy Holidays to Keyclowns and Anti-Keyclowns alike.
...
...
...There was a hamfest in the Detroit area which a few of us
...Anti-Keyclowns attended last Sunday. Who did we see, with about a 3
...day beard, homeless shelter type clothes and a glazed expression on
...his goofy face????? None other than Chukkee Sukkee herself!
...
...Chukkee was so goofed up in the head he didn't even recognize us
...Anti-Boys, although he had met one of us under very bad <for him>
...circumstances in September. He called one of us "Mike", a name
which
...none of us carry, and mumbled incoherently at our table of antique
...radios, variacs, antennas, modern transceivers, etc...and departed
the
...scene hastily.
...
...Chukkee Sukkee can say things like "puff a root, dickhead", etc. ,
but
...has absolutely no power or credibility. This lying toad of a human
...being has said the following things on the NG's, all proven false:
...
...1. He works for Jeff Roush racing
...2. He has a concealed weapon permit<he ADMITTED THIS WAS A LIE IN
...SEPTEMBER>
...3. He is affiliated with a gang called the Latin Counts
...4. He is affilaited with a bike gang called the Iron Coffins
...5. He owns a .45 caliber pistol

...6. He owns a 9 MM pistol
...7. He has faced down police officers over his pistol. <he calls
police
... officers "pigs" in his posts>
...8. When accused of selling illegal radio equipment Chukkee Sukkee
... vehemently denied doing so. That is, until an enterprising
amateur
... looked up his advertising for sale of illegal amplifiers on
...various
... amateur radio and CB forums. This documentation drove him back
... into the woodwork a while.
...
...Chukkee Sukkee says these things to make himself appear to be some
...sort of a formidable human being. When confronted in person he
wilts
...like a dandelion hit with weed killer. For example, Chukkee Sukkee
...threatened in rec.radio.cb to shoot people with a 9mm pistol at the
...Findlay, Ohio hamfest in September, 2002. The persons he threatened
...walked up to his table and asked him if he wanted "to settle the
hash
...now", and he could not have been faster to stretch out a hand to
shake
...if he had a spring loaded elbow.
...
...In late 1999, he lost an ISP because he threatened another amateur
...with raping his wife and daughter, killing his dog, and doing a
drive
...by shooting on his home. The local police and the Toledo office of
the
...FBI became interested in Chukkee Sukkee recently because of his
long
...record of violent threats to people in newsgroups. The Lincoln
Park,
...MI Police dept. paid Chukkee Sukkee a visit in September, 2002
because
...of these threats. After the cops were done with him, Chukkee Sukkee
...whined like the cowardly person he is, and posted to rec.radio.cb a
...long and lying denial of making any violent threats, and
specifically
...admitted he had never owned a hangun or had a CCW permit. This
...admission ran counter to the fact that he had stated many times he
...owned either a .45 caliber or a 9 MM pistol, and had a CCW permit.
...This exposed the lies, of course.
...
...There is now an outstanding warrant for Chukkee Sukkee's arrest in
...Lucas county, Ohio for meancing as a result of his violent threats.
...The Anti-Keyclowns have a copy of the police report in our
posession.
...This will be made available to anyone who wants it, as it is public
...information. Email us for details.

...
...Chukkee Sukkee should be considered a fat mouthed idiot, and very
...desperate to belong to some group or organization. He has been
...rejected by most rational persons, and will continue to be until he
...moves somewhere that has a population that has never been exposed
to
...his moronic actions. <the planet Neptune, maybe?>
...
...In summary, we have among us a lying idiot who has obvious
...psychological issues. He is prone to violent threats against
people,
...even women, children and pets. When confronted, though, he shows a
...spineless, yellow, cowardly nature.
...
...If Chukkee Sukkee is smart he will stay in Michigan. If he gets
...confronted by any LEO in Ohio he may be on a road he does not wish
to
...travel. Chukkee Sukkee makes a big blatting issue of the fact that
he
...was at the Toledo hamfest last year and that his truck and his
carcass
...emerged unscathed. Fact is, no one threatened either. It is Chukkee
...Sukkes's mentality, however, that most intriguingly emerged in the
...dust up over this situation last March... Why would anyone be
...concerned about their auto being damaged unless: A> They are in the
...habit of damaging autos and have that mid set, or B> They are
guilty
...of doing something bad and expect retribution?
...
...Laugh if you will folks, but Chukkee Sukkee is a sick puppy.

My supplier has recently received a ship cargo box full of
import CB transceivers, amplifiers, dvd's and vcrs. The radios
were originally intended for another port but ended up in
Los Angeles and we now have them available for distribution.

We want to sell everything by the pallet load only and are willing
to offer huge discounts. Expect to pay around $5000 per pallet lot.
Each pallet contains as many as 250 boxes or more.

Serious inquires only to foowangchu@yahoo.com

Thank you

What you'll get are $2 radios that run on sun power.
I doubt seriously that the shipping line would have made that huge of a
mistake.
Sounds to me like a nice little scam certian LEA would like to know about.

Rich said:

Last week, I received several e-mails and telephone calls from a CBer
who was constructing a 3cx15,000A7 AB2 g-g amp. using a 3kV anode
supply.
He was having problems getting it to work properly, and he had some
questions, which I answered. In a few days, he got it to work. My
impression was that he was interested in the science behind getting it
to amplify linearly. Hopefully, he will someday get a license.

Reminds me of a fella I met in the Motor City a couple of years ago:

http://www.bigradios.com/shadow/longv.htm

"Bluegill" from Chicago had a pair of 4CX20K's in the mobile.

CB'er or no CB'er it takes balls as well as brains to fire those up from
a 14v rail even with eight 350A Electrodyne alternators and stock in
Peter Dahl Inc.

My ham exam tutor and mentor G3AGP did not teach me that one in 76.

Don't understand that logic either. I don't have any desires to do
all those illegal things. I knew the rules when I got my license
and agreed to abide by them and I do. If I thought I could not
abide by the rules I wouldn't have gotten a license. So why should
it piss me off? I know if I break the rules I could get caught,
and could pay a price, it is called accountability and being
responsible for your actions, something that alludes a lot of
people today.

The point is that niether a ham or CBer may legally go out of his assigned
range of frequencies, play music, use foul langauge, run 20,000 watts etc,
etc. But of the 2 the ham is far more likely to get caught if he breaks the
rules, and that is what will piss off some hams even if they have no disire
to break the rules themselves.
I'll bet no ham admits to this being true, but if it's not true then I'd ask
Mr. Ham "what's the attraction to rec.radio.cb?"

Likely a perfect hit on the problem. It also may be a large reason a lot of CBers have no desire to be licensed (despite what many claim).

So you say the FCC can't catch you if you're mobile? That's what
the unlicensed fellow in Dallas a few years thought who was using
a 2 meter transceiver. He was having a lot of fun jamming some
repeaters driving around the freeway system saying how the FCC
couldn't find him. He changed his mind when the red flashing
lights appeared in his rear view mirror and a U.S Marshal and an
FCC agent pulled him over.

May be dumb and uncool... too dumb in fact to know what the inside of a jail cell looks like. Go figger. Sometimes a dummy, but never a jailbird.

> do you really think we outband for the
> thrill of just doing something illegal?

Why not? It's the only reason *I* used to do all kinds of illegal crap, until my arthritis kicked in. I've gone "grey" in more ways than one (*sigh*).

> if you legalize it you'll only have
> 120 channels that will be just like the regular 40 we have now.

Not necessarily. Get yourself an ICOM-706 and mod it... you'll have hundreds of freqs instead of channels. You won't even need a slider, either.

But I'm SURE that you will re-surface with a brand-new username and ISP addy in the future so you can still have your fun on 'ol rec.radio.cb. You see...it's in your blood, and you can't quite give up this NG. If I exposed you as being n7vcf.... well I'm sorry. NOT! Alright....you're NOT n7vcf. But all a guy has to do is go to www.qrz.com and type in your call, and maybe your're STILL not n7vcf. I just find it ironic that once you got your tech license, you are suddenly BETTER than the rest of us. Did that 50 question test go to your head? Do you find it easy to recite your retoric from books such as Part 97, or the antenna builders bible? Or perhaps your swollen ego has been canvassing www.fcc.org or www.arrl.net either way, we don't really care. So do us ALL a favor Frank... Shut the FUCK up. And leave your elementary stuff on the playground. 'Nuff said.

You know nothing of the import/export business sir. We are a legitimate
company with worldwide shipping expertise that just happens to have a
a cargo box that is full of incredible buys that you won't find anywhere
else. Right now we have over a dozen cargo ships circling the
globe, transporting tons of merchandise to ports of call in every country
in the world that is currently participating in free trade. I am thinking
right
now that maybe I should just re-route my merchandise somewhere else
where those who know a good deal can produce the finances needed
to conduct business with me.

You sir are obviously a hourly wage employee barely making ends meet who
can at best only dream of living a life filled with the latest in electronic
toys and such.
Your kind annoys me and makes conducting business with those who can
appreciate fine quality goods difficult. Go away sandflea.

Hey dweebo, Chukkee Sukkee is not being made a punk by N8WWM, he IS a punk from the jump. That boy is waaaaay too much of a pussy to do anything to N8 or any of the anti's.

Chukkee Sukkee is obviously infected with some sort of virus that causes him to blame one person for all his ills and afflictions. The problem is that his ills and afflictions are indeed caused by one person...himself. He is just too stupid to see it.

Hardee harr harr harr...life is good when you aint an alumni of the detroit school for hopeless fatass gayboy chumps.

Here is Chukee Sukkee's biography below...call this a Christmas present to you keyclowns...

MY BIO!!!!!
K8CPA
Okay, this is the place where I tell you how I came to know how fucked up I am.... and all the personal information about me. I will try and answer all the questions:

Date of Birth: June 28, 1972 <in the fall of 71 my daddy fucked a pig, ya see>

Place of Birth: Detroit, Michigan <in an alley behind the unit block of Waterman Avenue>

Religious Information: Well, first off, I am NOT heterosexual! I am a faggot! I accepted penises as my personal Lord in 1980. I was all of 10 Years old, I knew exactly what I was doing, I knew that if I didn't get cock in my mouth, I would not See the Lord in the rapture of it's jizz pulsing. I have been butt pumped nightly for 12 Years. Although, I was "Backslidden" for about 6 of those years, while screwing female barnyard animals. I am now back serving my Lord penis. I would like to Thank the Rev. Jack Hizhogoff of Detroit Gayboy Outreach (Web at: http://www.dgo.fag) for standing in the gap and slapping his manly dick up my fat faggot ass, and for a playroom where people like me, who were burned by chickenhawks with syphylitic dicks and fellow fags in general, could come and give their hearts back to the Lord penis. My only regret is that Rev Hizhogoff had to start pushing his manly dick in my fat faggot ass to the point where I could not bear to bend over anymore, and I returned to my favorite pastime, cocksucking in the men's room of the Detroit bus station.

"Burned" by the syphylitic cocks in my mouth and asshole?: Yep, Sure was.... I was... like I said before, I was sucking when I was 10, (around 1980), I was originally sucking just anyone, especially born again Christians and other mentally fucked up Baptist types like me. I loved those guys when they'd tell me to tongue their assholes. Condoms were a BIG no-no.... and I believed it!

Speed ahead 4 years. in 1984, The Baptist Church I went to had a bit of a controversy, The Pastor had resigned because he was caught bobbing on my young fat faggot pee pee, and things there were in a state of chaos, and my mom did not want to suffer having to put up with my faggot punk boy ass at home. She enrolled me into the Detroit Institute for Hopless Gayboy Fatass Chumps. I started attending and believe me, going to a Full-TILT anal only gayboy school. after attending one with a stated preference for teaching Hopless Gayboy Fatass Chumps to mainly suck dick, was a MAJOR SHOCK to my system! But one thing kept me from leaving the place, was the fact that these people seemed to really love the Lord Penis. and there was this one guy, named Robert Snyder, Who played the drums, like John Bonham, (from Led Zeppelin) and we got along great.... (Not to mention he would let me drink his jizz on the sly. That was HOT! least *I* thought so! Hey! I was 14 years old, and my hormones were at full TILT! So SUE ME!) (By the way, Snyder is now married to MoparHolic and living in Ohio. I'm very happy for him.
Anyhow... After being there for about a year. I started being interested in playing drums for them, as I was a drummer, from a young age... and I wanted to use my talent for the Lord Penis. Well, I eventually got the nerve to ask if I could play for them, and they said sure, as long as I would give em all head before each show! AWESOME!!!... My first time playing for Detroit Institute for Hopeless Gayboy Fatass Chumps was a nightmare! I was scared, I totally forgot how to play because I was violently burbing up the sprem I had sucked down before the show.! I was THAT scared! Anyhow... speed ahead to age 19... I was changing as a person, things were changing at Detroit Institute for Hopeless Gayboy Fatass Chumps, as well. and a bit of a disagreement rose up between me and Snyder. I wanted to suck their cocks the night before the show instead of immediately prior to it. They said they needed the rush in order to play better, and I was asked to step down from the music ministry. Needless to say I was crushed. and very upset at Snyder In fact. I didn't think I'd ever be able to forgive him for that... Anyhow... I entered into what I called "My Dark Years" from age 19-26... Drugs, Drinking, eating 7 meals a day of Burger king, Dominos Pizza and Taco Bell in order to make myself an even bigger Hopeless Gayboy Fatass Chump.... and when I found out that Snyder had turned heterosexual, I really went off the deep end... until...

MY MOMENT OF CLARITY

Well, when I was around 26, I was totally burned out on the Dominos Pizza... I was just sick and tired of being sick and tired... I needed cocks rammed up my Hopeless Gayboy Fatass Chump poop

chute and I needed it BADLY!!! the people I was upset at were gone from Detroit Institute for Hopeless Gayboy Fatass Chumps. I was not getting any older... and I was ready to stop running from the Lord penis. But I had issues to resolve in my life... How could just Go back to the fags that had only "screwed" me and wouldnt let me suck cocks in the first place? I still felt like I'd been wronged! But I had the Clarity moment of a lifetime... This thought crossed my mind...

"I was a FAGASS PUNKBOY MOTHERFUCKER BEFORE I came to the Detroit Institute for Hopeless Gayboy Fatass Chumps

Why am I allowing something that happened 7 years ago, keep me from serving my God, the Penis?????????

My Return to total Fagassedness!

Well, I was 26 years old... I was wanting to come back full time to Lord Penis. But I wasn't going back to Detroit Institute for Hopeless Gayboy Fatass Chumps (at least not at that time!!!) I had heard about a church called DGW (short for Detroit Gayboy Outreach) and I'd heard in the past that it was a nice place... So..... I wanted to be where the Holy Spirit of the Lord Penis was... and there I was... I came to the church on Ann Arbor Trail... my first experience there was a interesting one, I came in the parking lot... puffing on a 7 year old kid's cock, (in my years of being Backslidden, I picked up a nasty 2 child a day, sucking habit...) I finished my child, and went in, and right away I heard SCREAMING in my ear... "what are you doing here???" "these are the people that Screwed you, but would not let you suck dicks!" act..... and when the song service started, the Holy Spirit of Lord Penis fell, and I became very uncomfortable, to the point when I had to leave! and I did!, I remember a usher, running after me and saying where are you going??? I remember looking back at him and saying... "I can't handle this SHIT I got to get out of here!" and I left.... Well, that week... I sort of prepared myself for service to mens dicks next week, I took my Book, Gay Sex For Dummies to work. (I worked midnights as a Security Guard, so I could walk around the ghetto apartment complex I patrolled and peek in windows at sleeping little boys. and I had lots of time to masturbate...) My mother realized I was fantasizing about kids nuts....
I found myself reading the Word, and Praying for a big hairy chested man to suck off.. by Sunday, I knew I was ready to come back... Went back that Sunday.... they had a Illustrated Sermon on fellatio with pictures from several fag magazines, it was great, and needless to say, my Hard cock, Melted in the presence of the Lord Penis. and I knew that I wanted to come home.

I thank the Lord Penis for his Love, That takes us whacked out people as we are, and makes us his Servants....

Where am I now... : Currently Attending Adult classes at The Detroit Institute for Hopeless Gayboy Fatass Chumps.

HAM RADIO?!?!?!?!?!?!?I BETRAY IT AND WORSHIP ILLIGAL FAGGOT KEYCLOWNS BECAUSE THEY LIKE SUCKING COCK AS MUCH AS I DO!!!!

I was, I guess you could say, Born into the CB FAGGOT Hobby... My Father, was a Dyed in the wool CB FAG... I even had a stint in the CB radio hobby as well... Anyhow, one year (I think I was around 8 Years old...) my parents and I went to have sex with my Grandfather's Sister and her German Shepherd, in Conway, Ark, which is the world capital of CB FAGGOTS. To say the least, was totally impressed with the FAGGOT CB Hobby, because it satisfied my craving to run my faggot mouth constantly AND to suck cocks!!!. and for years I did nothing about it, just sucking dicks constantly and that linear tuning on those tube type ILLEGAL FAGGOT KEYCLOWN amplifiers was just too hard to learn. Speed Ahead to age 14, a friend of mine, Joseph Hampton (Ham call sign N8ExtremeCockNosher-but ALSO a secret ILLEGAL FAGGOT KEYCLOWN) who lived across the street from me, and also was interested in getting his dick polished as well.. Well, we had some gay sex together... (you see this was when you had to be secretive about your gayness! I was KB8HHZ (hugely horny for zebra!) and Joe was KB8HGL (Hungry Gonad licker!)... I believe me and Joe were originally licensed in 1989....

On April of 2000. The FCC Restructured it's licenses... and I paid a renegade VE 50 bucks and Received my General Class Ticket... I often masturbate while thinking of linears for ILLEGAL FAGGOT KEYCLOWNS. And really think Riley is mean. Maybe if I sucked his dick he would not be after traitor scumbag shithunk fagboys like me.

My Call? Is a Vanity call that I paid for, it is my initials! Because as a Hopeless Gayboy Fatass Chump, I need something like that for my ego.

so there you go!

I hope this answers everything you wanted to know about me!

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100 watts HF + 6 Meters. It has a Auto tunner and the MC 100 Desk Mic. I also Have the 3 KW Roller Inductor Antenna Tuner. They are in good shape I will trade both for a FT 990 or a FT 1000.. I have been using the FT 920 as a backup rig.
If you have a FT 1000D I will add a Henry Radio 2KD-5 Amplifier to the deal. 100 watts in gets you about 1000 watts out. It has new caps and a pair of Emac 3-500. It is wired for Single Phase 240. The same voltage that runs your dryer and electric range. I am will to travel 100 miles from Athens GA. Drop me a email so we can work out the deal.
oris@dirtball.com
Happy Holidays

3594. Penetartor 500 repair info:

Newsgroup: rec.radio.cb
Date: 2002-12-07 15:33:26 UTC
From: Jay in the Mojave <jay123a@qnet.com>
Message-ID: <3DF214C6.35DA535E@qnet.com>
Source record: 146130

Hello All:

I posted this information on another thread, and got a few e-mails requesting this info be put out on separate thread for all to see. I have also included some repair information to fix you Hy-Gain Penetrator 500, should you have some tubing bent or broke.

Hope this helps those who need the help here. With time the old out of production Hy-Gain Penetrator 500 5/8 Wavelength Antennas are getting pretty rare, and repair info should be supplied to keep those great old antennas up and running, Ten-4!

So maybe I'll put some photos and info on the web site for all to see, let me know if your all interested? I have sent out some replacement parts, and misc. stuff, like tubing, Top Hat Wires and Insulators for guys to fix their Penetrator 500, but I don't stock this stuff, I just have a few pieces left over from modifying the Penetrator 500, with the low loss Impedance Matching Hardware that will also go on the web site.

Jay in the Mojave

Hello Dave:

Here are the Plastic (made from black ABS Plastic) Insulators for the Hy-Gain Penetrator 500 5/8 Wavelength Ground Plane Antenna. Had to do some digging.

Tell the nice lady at Hy-Gain, that these are still current parts used on other Hy-Gain Antennas, but you need then for the Penetrator 500, model number is "Order No. 500" Hy-Gain will also sell you the assembly instructions, for 5 dollars.

Hy-Gain is at: http://www.hy-gain.com/hy-gain/contact.php

Penetrator 500 Insulator Part Numbers:
Base or lower Insulator 877961
Upper Insulator 463056
Tuning Wire Supports 463642

Penetrator 500 Tubing Repair:
Hy-Gain uses a manufacturing technique that reduces the Outside Diameter of the Aluminum Tubing, called reduced swaging. This is done at the Hy-Gain Plant, in a special machine that uses a Hydraulic Press and Die type Tooling, that forces the tubing into the swag reduction tooling, reducing the end of the Aluminum Tubings OD and ID

OD = Outside Diameter
ID= Inside Diameter

This allows for a smaller diameter tubing to be used, making the antenna lighter and more resilient. It also allows the antenna manufacture to NOT have to deal with tubing wall thickness tolerances.

The Penetrator 500 uses 3 different tubing pieces that are reduced swaged. And they are:
1- 1 1/8" OD (.058" wall thickness) reduced to accept 7/8" OD Tubing, instead of 1" OD tubing.

2- 7/8" OD (.058" wall thickness) reduced to accept 5/8" OD Tubing, Instead of 3/4" OD Tubing

3- 5/8" OD (.058" wall thickness) reduced to accept 7/16 OD Tubing, instead of 1/2" OD tubing.

The swaged reduced ends, are not magic, they can be replaced without any harm to the antennas performance or tuning.

The reduced swag end, can be cut off with a tubing cutter or hack saw. Then cut down the remaining end length wise, for about a 1 1/2 inches, this cut slot will allow a hose clap to hold in a new piece of tubing.

As an example, the ground plane radials use the following reduced swaging scheme:

24" long, 7/8" OD reduced to accept 5/8" OD tubing
36" long, 5/8" OD reduced to accept 7/16 OD tubing
50" long, 7/16" OD no reduced swag.

In most cases the 5/8" OD Tubing needs to be replaced. But not everyone had a swag reducing tool in the garage or living room, (I sure don't)

The reduced swag end can be cut off with tubing cutters or a hack saw, and slot cut, length wise for a 1 1/2". Then new 1/2" OD Tubing can be installed into the 5/8" OD tubing, and a hose clamp installed to hold the new piece of 1/2" OD tubing.

As with the 1 1/8" OD and 7/8" OD reduced swag tubing, again the reduced swag can be cut off, and again a length wise end cut 1 1/2 inch long cut needs to be done. Then a 5 to 6 inch length of 1" OD tubing can be installed into the
1 1/8" tubing, and 3/4" OD for the 7/8" OD tubing, allowing the next tubing pieces to be installed.

Aluminum Tubing, 6061 T-6 or 6063 T-8, with a wall thickness of .058" should be available from local metal supply houses. You will need to call around and find it. Texas Towers sells Aluminum Tubing in 6 foot length, that is UPS shippable.

Texas Towers Aluminum Tubing is at:
http://www.texastowers.com/aluminum.htm

Please let me know if need any help, or suggestions on a repair article for the web site. I will throw in photos and diagrams to make it easier to understand.

Thanks for the e-mail

Jay in the Great Mojave Desert, ... just down the road ah ways from the fillin station.

well they usually start out on the rev at about 11 volts and go to about 22 volts or so.....and those electrodynes do take a bite when they start feeding. they are used on locomotives in their stock condition....and they are not cheap.....that is why it is a good idea to use 1/2 amp transformers instead of the 1 amp .....and you can step start the power supply....that way it won't be so bad on your engine.....in a few seconds you will be able to key what you have and save your crankshaft at the same time....just a thought.....and you are right.....it is crazy.....for a car.....this amount of watts can only be achieved for a few seconds at a time.....but on a base station.....with three phase power.....hmmmm....

Nobody's whining Chuck, only you. You post this dribble
to the effect that Doug was harassing you, when in fact you
made it up. You are creating situations that don't exist so you
can have some sort of reason to cry to the newsgroup.

Now that I reread your posting here....you're basically accusing me,
of posting all that stuff, myself!?!??!?!!?!?!?

That's the STUPID, Ignorant thing I've EVER heard you fucking say....

check the damn IP address.... his posting came from 206.149.128.28 and
mine is 68.42.181.26, ever look at that? and no, I do not have a
telephone modem, hell, I cut my telephone line off, when I got the
cable modem...

Yes, doug does exist. I thought me and the "anti-keyclowns" had called
a truce. what sparked this latest attack, is beyond me, I somehow
doubt doug was the poster, but some of his suck buddies from Ohio, who
were with him, like the guy with the beard, who was sitting next to
Doug on the left or the dude on right... I think they're just doing it
for grins....and, I'm cool with that....I just wish they'd keep my
friends and family out of it... the accusation that I threatened
someone's family... is mearly, that. I saw the postings and yes, they
came from AT&T worldnet...but not from me! Ever heard of Modem pools
and static IP addresses?

anyhow....this is my LAST posting reguarding this subject... better to
let sleeping Dogs snore...

Don't think so....

I've been operating mobile with illegal power for over 25 years,
even annouced my position once and waited for 3 days for FCC
agents to come and get me while I camped along the Sacramento
river. They never showed up and the official FCC listening station
was less then 50 miles away.

Source record: 146154

Bert,
I would still call the test inconclusive. From the 'raw' data given, the amount of reduction in gain gets smaller as the radiation angle gets smaller until there is a -1db gain difference at zero degrees. The effectiveness of the GPK is reduced as you approach zero degrees. It's too bad the author didn't continue with it the negative angles of radiation, which would have told how affective the GPK would be for reducing RFI at near distances.
Antenna modeling programs are based on several different versions of 'NEC'. Depending on which version was used for the comparison, some do not have much accuracy for non-perfect ground conditions. That means they work fine for 'free-space' antennas but not so fine for 'real' ground conditions.
Regardless, there is not an abrupt 'cut off' of signal at near fields of the antenna. The signal doesn't just stop at the edge of the graph's lines, it has a gradual reduction to a zero level. The second line in from the outer ring of the graph is the 'half-power', or -3db ring, where the signal strength is half the full power value. The program used to generate the graph does not produce a radiation pattern in a 'standard' format. Without an explanation of the program's parameters, the graphs produced can be interpreted in any way you wish. The results can be misleading. I do agree, and other modeling programs do show that there is a change in the 'near field' radiation patterns, but they don't support the conclusion.
What all that means is that if you think the price of the GPK is worth a 1db reduction in strength at the base of the antenna, go for it. I'm not so sure that 1db justifies the price.

That is too bad. But practically none are illegal
operators. They are broadcast engineers and electrical engineers.
The above statement can't be translated as some of the best
RF minds in the world are illegal CB operators.

Consider a fiberglass whip with a tennis ball on the tip and
a fiberglass whip with a tennis ball at the bottom:

Which one is going to cause the least stress on the mount at
traffic speed?
Which one is going to bend and sway the least at traffic
speed?

I think that is why a top loaded whip is not on the top of
the list despite being more efficient. My opinion is why
bother with a loaded antenna if you're gonna buy an 8'
loaded antenna. May as well just get the ole 9' SS whip and
be done with it. If one foot makes a difference then let
that sucker smack the parking garage all the way.

W7DVJ,
Nope, not an urban legend this time. It did happen but
not as described. They caught the fool with a friend parked
in fron of his house (I think). The friend was a ham also.
Both voluntarily gave up their licenses to avoid prosecution.
I don't have the reference, but check on the ARRL home page,
they had it listed at one time.

Ground plane radials effectiveness changes with height of antenna above
ground as well.

Hi,
If you have an access to your attic, then hang a dipole antenna
there.
These are only two pieces of an ordinary wire, 103 inches each.
It costs less than a bottle of beer and works better, than any
factory
product.
Best regards to all,
Chris
Poland

I worked at a 100kw FM station back in the 60s. The amp was located at
the base of the tower and just connected with 4-0 copper. Don't forget
your grounding electrode, which I never saw but was told was 100' legs of
4-0 copper radiating from the tower in an 8-pointed star, and the ends
connected together in a loop, everything buried 10' deep. I doubt there
was an earthworm within a quarter mile of the tower.

Well mr. made up ham call, it isn't an urban legend, see Doc's
post. The federal marshall involved was a ham and belonged to the
local ham club. Whenever the local FCC boys needed to bust
someone, he is who thay called.

What antenna? How about a 6 inch diamator solid steel rod?

Next to my house we put up a rohn 25 tower at 110 feet.
For grounding, we just used one shorth length of arc welding cable.
30 minutes after I came off the tower, it got zapped.
the cable was split in two so we knew it worked.

From: "Vinnie S." <enzo@reemoovthis.monmouth.com>
Message-ID: <7ff5vusgtfu47d1ihjr77971gnnq5h2nj0@4ax.com>
Source record: 146188

I have one in my attic. It's old, about 20-25 years old, but fully protected from the elements. My father wouldn't allow me to put it on the roof, so I settled for the attic. Did pretty well, too. Are these still any good? Or have antennas progressed much better?

Vinnie S.

That and the Astroplane are probably the best vertical polarized antennas
ever designed.

Very low angle of radiation = bad ass signal!

It's funny you mention that. When I was on the air 20 years ago, the Big Stick was the hot antenna. Who made that and do they still make that? I remember people telling me never to get that antenna, and to get the big stick.

How does the starduster compare to the Antron-99?

Vinnie S.

Amateur Radio Newsline™ Report 1321 – December 6, 2002

Amateur Radio Newsline report number 1321 with a release date of Friday, December 6, 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T. North Korea takes its only ham off the air and the first digital voice Q-S-O across the Atlantic. These stories are first on Amateur Radio Newsline report number 1321 coming your way right now.

(Billboard Cart Here)

**

INTERNATIONAL – N. KOREA: LAST HAM FORCED OFF THE AIR

The Peoples Republic of Korea appears to no longer want Amateur Radio operating from its soil. It made its intention clear when it asked its only ham ito pack his gear and send it out of the country. Jeramy Boot, G4NJH, in Nottingham England has the details:

--
Ed, P5/4L4FN, the only radio amateur operating legally from North Korea, has had to close down. On the evening of the 22nd of November, Ed was called into a meeting with the North Korean Radio Regulation Board. Without any explanation he was politely asked to stop all transmissions and to pack up all his radio equipment.

Ed spent the following day dissembling his antennas and packing boxes. That afternoon government officials sealed all the boxes and Ed has been told to take everything out of the country when he leaves North Korea for a two-week holiday on the 10th of December.

Jeramy Boot, G4NJH
--

With Ed now off the air, ham radio is gone from North Korea and nobody expects it to be resumed anytime in the near future. It also puts North Korea back near the top of D-X'ings most wanted list.
More on this story is at www.amsatnet.com/p5.html. (RSGB)

**

EMERGING TECHNOLOGY: DIGITAL HAM AUDIO SPANS THE ATLANTIC

Two ham radio communications pioneers have achieved a major breakthrough. The first two-way digital voice transmission across the Atlantic via Amateur Radio. Norm Seeley, KI7UP tells us who did it and how it was accomplished.

--
Doug Smith, KF6DX, and Didier Chulot, F5MJN, have successfully transmitted and received HF digital speech signals between Sevierville, Tennessee and Paris, France. It happened on Friday, November 22 nd.

The first historic contact took place on 21.218 MHz in the 15 meter band. Chulot spoke with Smith for several minutes using a high-frequency digital link within a 3-kHz bandwidth. Signal strengths were S-5 to S-7 and readability was solid in both directions.

The feat was accomplished using Ten-Tec transceivers and digital audio systems from Thales Communications.

--
DEMO AUDIO HERE
--

The Q-S-O demonstrated the advantages of digital audio for two way radio. This includes noise-free, FM-like reception and the potential for simultaneous voice and data exchange.

With an eye toward the digital future of Amateur Radio, I'm Norm Seeley, KI7UP.
--

The Ten-Tec/Thales system used in this experiment is based on a new international broadcasting standard for digital radio adopted last year by the International Telecommunications Union. The FCC has approved a similar standard for broadcasting in the United States. An Amateur Radio version is expected to appear on the market sometime in 2003. (KF6DX, Ten-Tec)

**

EMERGING TECHNOLOGY: PPW PROPOSES ELECTRONIC INFRASTRUCTURE TO WARN PUBLIC OF DANGER

A group of U.S. communications security experts has recommended that Americans be alerted to impending danger over their wireless devices. Amateur Radio Newsline's Fred Vobbe, W-8-H-D-U, takes a look at this new concept in emergency notification:

--
The Partnership for Public Warning says that a national wireless system could send alerts to citizens via their pagers, mobile phones or computer screens.

The Partnership for Public Warning is a newly formed thirty-member advisory body that includes representatives of government agencies, relief agencies and even a ham radio operator. And on Monday, November 25th it released a report that says conventional media broadcasts may spread alerts too slowly in instances of pending natural disaster or terrorist threat.

P-P-W says that the newly formed Department for Homeland Security should take responsibility for leading development of a national all-hazard public warning architecture. This, in partnership with other federal agencies, state and local governments, industry, universities and other stakeholders. The technology itself would be produced by private industry with the alert system

operated by governments and selected other organizations following a strict set of alert protocols.

P-P-W says that improved warning systems and procedures will reduce losses from natural and man-made disasters, and will speed recovery. Most important is that it will save lives.

For the Amateur Radio Newsline, I'm Fred Vobbe, W8HDU

--

President Bush cited quick responses to attacks as a priority of the new Department of Homeland Security which will consolidate parts of 22 departments to better prevent attacks in the wake of the September 11, 2001 terrorist attacks in which some 3,000 people died.

information about the Partnership For Public Warning is on the web at http://www.partnershipforpublicwarning.org/ppw (Published reports)

(5 sec pause here)

**

HAM RADIO GROWTH: GOOD NUMBERS TO US

The folks on that "other band" might call this “almost good numbers.” This with word that the number of radio amateurs licensed by the Federal Communications Commission is at a five-year high. But there are some caveats. Bill Pasternak, WA6ITF, has more:

--
According to the CQ Magazine website, FCC numbersshow a total United States ham population of 684,498 as of October 31st. And breakdowns provided by Joe Speroni, A-H-Zero-A, say that the primary growth has come among Amateur Extra Classand General Class licensees. Extra is now breaking the 100,000 point for the first time.

Technician Class figures have essentially held steady. Also we had 20,000 new hams entering the hobby in the year ending October 31st.

License renewal statistics were also encouraging with the renewal rate climbing from an abysmal 45% two years ago to a better, but still unacceptable, rate of 55% in the past year.

Better numbers, but not the best.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF, in Los Angeles.
--

More on licensing figures are on the web at www.speroni.com/fcc (CQ)

**

HAM RADIO IN THE PUBLIC EYE: THE ATLANTC MONTHLY

The November 26th edition of Atlantic Monthly Magazine On-Line has some good words about ham radio and its role in homeland security. In an article titled America's Secret Weapon in the War on Terror, one of the groups singled out for attention is the nations corps of Amateur Radio operators. Its described in the article as an ever-ready line of emergency communications.

The story goes on to say that America boasts 650,000 licensed ham-radio operators. It quotes he ARRL's Mary Hobart as saying that about 1,500 of them are fully certified in emergency communications and are prepared to rush to the scene of a forest fire, flood, or hurricane with a jump bag full of portable radio equipment. And says Hobart, That can be crucial.

Atlantic Monthly notes that when phone lines, radio towers, and even satellites go down, ham operators -- broadcasting each to each other , and operating on batteries or generator -- stay on the air. And says Atlantic Monthly, after the terrorist attacks of 911 when New York's cell phones turned into paperweights hundreds of hams, some from as far away as Texas and California, turned out to provide radio lifelines for emergency workers and relief agencies.

The article is must reading for everyone involved in Amateur Radio public relations. It can be found at the U-R-L listed in this weeks Amateur Radio Newsline print edition.

The complete article is at
http://www.theatlantic.com/politics/nj/rauch2002-11-26.htm (KS2G)

**

ENFORCEMENT: FCC INVESTIGATING INTERFERENCE TO EMERGENCY TRAFFIC IN LOS ANGELES

The FCC is looking into allegations that two Los angeles area hams interfered with a distress call on an area repeater. The FCC's Daryl Duckworth, NN0W explains:

--
"The Enforcement Bureau has opened a case involving allegations of deliberate interference to emergency communications on the N6SAP repeater in the Los Angeles area. Anton W. Johnson, N6OAY, and Ledge Musselman, KC6NCN, are being asked to explain the allegations of the operations on October 2.

Information is also being sought from the repeater licensee. Scott Press.

This mater is being taken very seriously by the Enforcement Bureau since emergency communications is one of the foundations of Amateur Radio."
--

The FCC claims that Johnson and Musselman interfered with attempts to relay emergency traffic on the 147.435 repeater at about 9:45 a.m. on October 2nd.

Press is being asked to explain what action he is taking in this matter. He is also been directed to summarize any conversations he may have had with the licensees against whom the allegations have been made. The FCC says that Press must also provide any written correspondence he may have sent to Johnson and Musselman. All three were given twenty days from he date of the FCC letters to respond.

**

ENFORCEMENT: THE STORY OF THE EX-AA8DP

A follow-up now to last weeks report of the capture of Steve Anderson, the ex AA8DP. Anderson was wanted in connrection with an alleged attack on a police officer. He was arrested in the hills of North Carolina following a manhunt that has lasted over a year. Amateur Radio Newsline's Henry Feinberg, K2SSQ, has the story of how Anderson was caught:

--

A tip to the Fox Television program "America's Most Wanted" and forwarded to federal investigators has led to the arrest of Kentucky fugitive Steve Anderson, the ex-AA8DP. Anderson, an alleged white supremacist who resigned his Amateur Radio license almost two years ago and then operated an unlicensed radio station from his home, had been at large since October 14th of 2001.

According to the Louisville Courier-Journal, Anderson was arrested in the mountains of southwestern North Carolina by the Bureau of Alcohol, Tobacco and Firearms and the North Carolina State Bureau of Investigation. The A-T-F's Don York told the newspaper that America's Most Wanted received a tip about Anderson's whereabouts after airing its second segment on him about a month ago. The tip was forwarded to the A-T-F, which worked the case with North Carolina authorities.

Anderson is accused of shooting an automatic weapon at Deputy Scott Elder. This, after Elder had pulled Anderson's truck over north of Middlesboro Kentucky for a traffic violation. Elder was unharmed after Anderson allegedly opened fire, but his police cruiser was struck about two dozen times. Police said Anderson then drove into the mountains, and a search of his property turned up explosives and guns.

Anderson had attracted attention of authorities several years ago by playing host to a small Ku Klux Klan rally during which a cross was burned. He also allegedly operated a shortwave radio station out of his home, where his commentary against minorities, immigrants and the government drew the attention of the Federal Communications Commission. The Anti-Defamation League complained to the FCC about Anderson's broadcasts which were taking place in the Amateur bands. Rather than explain his actions, Anderson sent in his AA8DP license for cancellation. It was accompanied by a rather convoluted message that said he did not recognize the licensing authority of the FCC which he called an agent of a foreign power.

Anderson continued to broadcast but bowing to extensive pressure from the nations ham radio community, he took the transmissions out of the Amateur

service bands. They stopped after he disappeared following the alleged attack on Officer Elder.

For the Amateur Radio Newsline, In Henry Feinberg, K2SSQ.
--

As previously reported, the ex-AA8DP had been a member of the Kentucky State Militia until April 2001. That group dismissed Anderson because he refused to shut down his unlicensed radio operation. (ARNewsline(tm) from published reports)

**

THE INTERNET VS. HAM RADIO: HOTMAIL AND JUNO BLOCK ARRL E-MAIL FORWARDING

If you get your e-mail using the American Radio Relay League's @arrl.net vanity address, and use Juno or Hotmail as your account you know that you were cut off for a few days. It wasn't the ARRL's doing. Blame it on the twi internet service providers.

According to an ARRL bulletin the two companies notified the League on November 25th that they had stopped accepting e-mail messages forwarded to users of their services from the arrl.net e-mail server. According to representatives of the two companies, this was part of heir solution to the Internet-wide problem of spam.

The ARRL, through the vendor for the arrl.net server began working with both companies to resolve this matter. The ARRL and Hotmail reached a accord the fllowing day and service was restored. Juno was back late on Monday December 2nd. During the peak of the service outage, forwarded e-mail to nearly 6,000 ARRL members was curtailed. (ARRL)

**

RADIO LAW: NEW CODES DEVELOPED TO HELP STUDY RADIO RELATED HIGHWAY ACCIDENTS

State highway departments will soon get help tracking how many traffic accidents are caused by drivers chatting on their handheld cell phones or C-B sets, using their pagers or checking their personal digital assistants. In January, every state will receive a booklet of revised codes that describes causes of vehicle crashes, including distractions from electronic communication devices. The codes were developed by traffic safety and crash data experts, including the Governors Highway Safety Association and the Federal Highway Administration.

A spokesperson for the Governors Highway Safety Association, says that the updated crash codes will allow the organization to develop data that demonstrates whether electronic distractions in cars are a serious safety problem. A March report by the National Conference of State Legislatures suggests device-related distractions killed an estimated 600 to 1,000 motorists in 2001 and could kill 2,000 a year by 2004. (Published news reports)

**

RADIO EDUCATION: HAM RADIO COURSE OFFERED AT PENN STATE

Amateur Radio is a part of the training being offered this fall to freshmen at the Pennsylvania State University. According to Brad Parola, KB3HQE, Vice President of the Penn State Amateur Radio Club, part of the course during the first half of the Fall semester included exposure to Amateur Radio. Students were shown how to tune radios like the Ten Tec Pegasus, shown how to receive PSK 31 signals, and were given a tour of the world famous Rock Springs Antenna Test Range run by Dr. Jim Breakall WA3FET. Early in October, those students who were interested were given the opportunity to take their Technician class tests. So far 15 students have passed an Amateur service exam. (KB3HQE)

**
RESCUE UPDATE: ZL1AMO CONDITION REPORTED UNCHANGED

We have an update in the medical condition of famed D-X'er Ron Wright , ZL1AMO. Jim Meachen, ZL2BHF, has the latest:

--
A bit of good news this week. Wrights daughter Terri says the family visited Ron in the hospital and he was sitting up in a lazy boy chair. This is the first time any of the family had seen seen him out of the bed since he was hospitalized. Terri Wring says that Ron is also trying to communicate with those around him and he looks a lot better than on previous visits.

As reported last week, Wright suffered collapsed lungs while visiting Fiji. He was air lifted by an emergency air ambulance to Auckland New Zealand where he was initially reported to be in critical condition and on life support.

The INDEXA – the International D-X Association -- has established a fund to assist Wright and his family with the cost of air evacuating him from Fiji to Auckland. Donations go to the ZL1AMO Air Ambulance Fund, in care of Bill Jennings, W4UNP, P. O. Box 607, Rock Hill, South Carolina, 29731. Sorry, but INDEXA says that contributions to this fund are not tax deductible.

From Auckland New Zealand – down under – I'm Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline
--

Updates on the fund and Wrights condition are being posted to the web at www.papays.com/opdx.html (ARNewsline(tm), INDEXA, AA7UC)

**

THE SCIENCE PAGE: WHALES YES – NAVY NO

A federal judge has tentatively blocked the Navy from deploying a new early warning system because it might harm whales. Amateur Radio Newsline's Brucce Tennant, K6PZW, has the rest of the story:

--
A Federal court has said no to a new high-frequency SONAR system designed to detect enemy submarines at long range because it could further endanger the worlds whale population. But in making his ruing, the judge also said the Navy may use the sonar during wartime and must be allowed to train with it beforehand.

In partially siding with environmentalists, the judge ordered both sides back to court to begin formulating a plan balancing environmental and military concerns. Environmental organizations say the Navy's powerful sonar system can strand, maim or kill marine mammals. The Navy disagreed.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.
--

A few days earlier, a different judge ordered the National Science Foundation to stop firing high-intensity sonic blasts into the Gulf of California because they harm whales. So far there has been no comment from either the Navy or the N-S-F. (Published reports)

**

HAM RADIO IN SPACE: UO-22 IS BACK WITH US – FOR NOW

G7UPN reports that U-O-SAT 22 is back on line and open for business. At least for the time being.

Chris tells the AMSAT News Service that new software has been loaded to try and keep the downlink operating most of the time. But says G7UPN, UO-22 is an older veteran satellite. This means it may give problems in the near future. More information is in cyberspace at www.amsat.org (ANS)

**

INTERNATIONAL – JAPAN: JA SAYS NO TO PLT

Japan has said no to the introduction of Power Line Transmissions or P-L-T in that nation. Following extensive trials, the Ministry of Public Management, Home Affairs, Posts and Telecommunications has decided not to permit their roll-out for fear of interference to other services.

The Japan Amateur Radio League had been actively working with the government, radio astronomers, broadcasters and others to assess the impact of P-L-T systems on the radio spectrum. The results of this P-L-T study in Japan is a real eye-opener. It showed conclusively that Power Line Transmission system emissions are harmful to High Frequency communications operating in the range 2 to 30 MHz. Because of this Japan's telecommunications regulators have refused all requests from P-L-T manufacturers to operate these systems. (JARL, Q-News)

**

INTERNATIONAL: GETTING ON THE AIR DOWN UNDER

Still in that region of the world, were you aware that New Zealand is one of very few countries in the world where licensed amateurs visiting from overseas can immediately operate?

Well it is and a visiting amateur can get off an airplane, walk into the terminal building and start operating on 144 MHz and above by simply signing his own call sign portable Zed-L. This, without the hassle of getting a license and without paying a licence fee.

For more information on operating in New Zealand as a tourist or visitor take your web browser over to www.nzart.org.nz (NZART)

**

ON THE AIR: COMMEMORATING DIANA

Back here in the U-S-A, the first successful moon bounce experiment was conducted by the Army Signal Corps on January 10th 1946. And to commemorate the event, the Ocean Monmouth Amateur Radio Club will operate from the historic Diana radio site on January 10th 2002. The Ocean Monmouth group plans to operate using Morse and SSB in the General and Novice Technician sub bands of the 80, 40, 20, 15, 10 meter bands. For more information on the Diana Project and for QSL info please visit the OMARC web site at www.qsl.net/n2mo (OMARC)

**

DX

In D-X, F6COW is reporteed tobe operating from the 9S1X club station in the Congo. He will reportedly be there until the 9th
of December. (GB2RS)

Also, F6BLQ will participate in the ARRL 10 Meter Contest on the 14th and 15th of December, also as 9S1X. His operation will be on SSB only. (GB2RS)

And ST1MN is a new ham in the Sudan. He will be active on all bands until the end of June 2003. Q-S-L as directed on the air. (GB2RS)

A lot higher in frequency, FT1ZK, is active on 6 meters every afternoon from Amsterdam Island. The operator is named Caroline and she has a beacon transmitter active on 50.086 MHz and running 24 hours a day. She will be on Amsterdam Island until January 16th. QSL via F5JCB. (VHF Reflector)

**

THAT FINAL ITEM: THE CANALS OF VENUS - DEBUNKED

And finally this week lets turn our eyes toward the planet Venus. Just our eyes. Not our telescopes. Because if we do use a telescope we might make the very same mistake made by a very famous astronomer regarding canals on that mist shrouded planet. Q-News Graham Kemp, VK4BB, takes us into the cosmos for this one:

--
Turn of the century astronomer Percival Lowell is well known for promoting the incorrect notion that water canals had been built on the surface of Mars. He

also drew a map of the "canals" on Venus; the only problem was that no one else could see anything resembling canals because Venus is always shrouded in clouds.

Turns out that Lowell had narrowed the aperture of his 24" telescope down to about 3" to attenuate the bright light from Venus. That little known fact - recently publicized - caught the attention of optical experts who realized that Lowell had unwittingly turned his telescope into a reverse ophthalmoscope, an instrument used to examine the interior of the eye. Instead of mapping the surface of Venus, Lowell was apparently mapping the shadows of blood vessels and other structures on his own retina!

Sky & Telescope magazine explains the situation in detail, presents Lowell's sketch of the Venusian "canals," and a photograph of retinal blood vessels. The two patterns are strikingly alike.

From Q-News Australia, I'm Graham Kemp, VK4BB, for the Amateur Radio Newsline.
--

You can see the pictures Graham reefers to in the online edition of Sky and Telescope magazine. Just take your web browser over to http//skyandtelescope.com/news/current/article_648_1.asp (Q-News)

Brian. Here is a link for a really good indoor antenna. You will never believe by looking at it that it works as good as it does. There is a local guy by me that has one. He is about 8-9 miles away, has it in his attic, and gives me an S-6 on my meter. http://www.rayfield.net/isotron/

If that link doesn't work for some reason, just do a search for Isotron antennas.

I have a Realistic 485 This is a great radio.
I have heard & seen one page on the net boosting of a modification that will add 400 channels to my radio.
It looks easy, but has anyone out there done this modification?
I could use some help.
There are no longer any companies that will work on cb radios in my neck of the woods, not even close.
I do not really want to ship the radio out, cuase you do not know if you will get it back.
Anyways, any help would be great...

You can modify other radios that have 485 for their model, just
not the RadioShack version.

A 1/4 wave Starduster has a higher angle of radiation than a 1/2 wave or 5/8
wave.

Hello everyone;

I am finally done listing all my tubes to sell on e-bay. There are a lot of them. If you are interested please visit my e-bay auctions. There is also low cost CBs, and Coax. Here is a short link to all the items I have for sale. Click on it and wait a few minutes, while it redirects you to the right URL.

You may have to cut and past the URL in the address box.

Source record: 146258

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100
watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic. I
also Have the 3 KW Roller Inductor Antenna Tuner. They are in good shape
I will trade both for a FT 990 or a FT 1000.. I have been using the FT 920 as a backup rig.
If you have a FT 1000D I will add a Henry Radio 2KD-5 Amplifier to
the deal. 100 watts in gets you about 1000 watts out. I will trade this 2KD 5 Henry amp for a FT 990 or a FT 1000. It has new caps
and a pair of Emac 3-500. It is wired for Single Phase 240. The same
voltage that runs your dryer and electric range.
I also have a Icom AT 500 auto tuner. This tuner will handle 500 watts. It works fine and I have no use for ICOM equipment. My station is all Yaesu at this time. I will trade this tuner for a Kenwood TS 50, or other small HF Gen. coverage rig, or a good Short wave receiver. I also have a Pentium III 500 Mhz computer for trade. It has 128Mb ram, CD burner 52X CD rom S3 Virge video card, 1Gb hard drive, 10/100 Mb network card, Motorola SM 56 modem, Yamaha sound card in a ATX tower. Of corse keyboard and mouse included. I will trade this computer for 350 bucs plus shiping or a good HF moblie rig.
I am will to travel 100 miles from Athens GA. Drop me a email so we can work out the deal.
oris@dirtball.com
Happy Holidays

Forget the IDIOTS that know nothing about this antenna, or issues like fiberglass vs. aluminum, and so on. The MAIN issue is the design of the antenna. It is a ground plane antenna, which makes it a lot better than any "big stick" design. Was yours made by AS, Finco, or made in Italy? The Italy ones were the most rugged.
Dave!

Buy an antenna with radials on it to begin with! There is no "cons" to
having ground plane radials. Cost is a problem, but the lawyers, judges,
and insurance industry, along with the DRUNKS & DRUGGIES that took away our
5/8 wave aluminum ground plane antennas, they ARAE still the bigger problem
than a few DB's ! What you're talking about is a Deut. 28 CB antenna !
Dave!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

This is correct. Although they are based on the same chassis, neither
the TRC-485 nor the HTX-10 can be modified for additional frequencies.
The other models based on RF Ltd.'s Magnum 257 can be modified quite
easily though. This was at Radio Shack's direct request for an
unmodifiable processor and primarily due to their prior unpleasant
experience with the FCC over their all too easily modifiable HTX-100,
circa 1991.

The antenna is a quarter wave Tony, you need to look at where it is fed. The length they give is from the top of antenna to bottom of ground radials, which are at angle to lower the feed point resistance. . A 1/4 wave dipole is 18' as well 9' on each leg. Btw, Antron 99 claims to have 9.9 dbi gain, you beleive that one to right?

I didn't see this posted origionally, but if he don't want us older techs or Bros working on dem CB's, then this IS true:

(a) Dey have a CHOP SHOP there. They are more interested in being theives than doing a good, rightous job for people and maintaining a good name! Dey don't want experienced CB techs--just cooks from da restaurant they can teach how to be THIEVES!

(b) Isn't it descrimination to just want a honkey to work for you fixing CB's? I bet you there ain't hardly a black guy in da land that works on them in a shop! But that AGE descrimination is what has got me baffled. What he's saying is that he don't want ANYONE fixing CB's that KNOWS anything, because dey worked on them in da 70's !!!!!!!!!!!!!!
Big Broham, go get dem!!!!!!!!!!!!!!!!!!
Dave!!

Stern is of the Rev. 2:9 & 3:9 people, and as such, is subject to all The Law of God that we all are. He is an Anti-Christ. Fuel for the crispy critter furnace if he don't repent.
Dave!

(as >well as the dirty mouth imitaters that watched >or listened to this trash over the years), and >now talk it themselves on the CB or ham >bands!

I concur. Whether it's Stern or Rush, that they have a following is amusing.

>The Bible says that THE WRATH of God will >surely hit them, and that's
>WHY it comes!
>Dave!!!!!!!!!!!!!!!!!!!

Stern is a jew and not worried about the wrath of God as we are.

um on ebay. What yo thin we are ? chumps

3716. Chukkee Sukkee: Ya better go call the Iron Coffins again! SISSY ASS!

Newsgroup: rec.radio.cb
Date: 2002-12-08 21:50:53 UTC
From: chukkeedacriminal@yahoo.com

First things first...
Happy Holidays to Keyclowns and Anti-Keyclowns alike.

There was a hamfest in the Detroit area which a few of us Anti-Keyclowns attended last Sunday. Who did we see, with about a 3 day beard, homeless shelter type clothes and a glazed expression on his goofy face????? None other than Chukkee Sukkee herself!

Chukkee was so goofed up in the head he didn't even recognize us Anti-Boys, although he had met one of us under very bad <for him> circumstances in September. He called one of us "Mike", a name which none of us carry, and mumbled incoherently at our table of antique radios, variacs, antennas, modern transceivers, etc...and departed the scene hastily.

Chukkee Sukkee can say things like "puff a root, dickhead", etc. , but has absolutely no power or credibility. This lying toad of a human being has said the following things on the NG's, all proven false:

1. He works for Jeff Roush racing
2. He has a concealed weapon permit<he ADMITTED THIS WAS A LIE IN SEPTEMBER>
3. He is affiliated with a gang called the Latin Counts
4. He is affilaited with a bike gang called the Iron Coffins
5. He owns a .45 caliber pistol
6. He owns a 9 MM pistol
7. He has faced down police officers over his pistol. <he calls police officers "pigs" in his posts>
8. When accused of selling illegal radio equipment Chukkee Sukkee vehemently denied doing so. That is, until an enterprising amateur looked up his advertising for sale of illegal amplifiers on various
amateur radio and CB forums. This documentation drove him back into the woodwork a while.

Chukkee Sukkee says these things to make himself appear to be some sort of a formidable human being. When confronted in person he wilts like a dandelion hit with weed killer. For example, Chukkee Sukkee threatened in rec.radio.cb to shoot people with a 9mm pistol at the Findlay, Ohio hamfest in September, 2002. The persons he threatened walked up to his table and asked him if he wanted "to settle the hash now", and he could not have been faster to stretch out a hand to shake if he had a spring loaded elbow.

In late 1999, he lost an ISP because he threatened another amateur with raping his wife and daughter, killing his dog, and doing a drive

by shooting on his home. The local police and the Toledo office of the FBI became interested in Chukkee Sukkee recently because of his long record of violent threats to people in newsgroups. The Lincoln Park, MI Police dept. paid Chukkee Sukkee a visit in September, 2002 because of these threats. After the cops were done with him, Chukkee Sukkee whined like the cowardly person he is, and posted to rec.radio.cb a long and lying denial of making any violent threats, and specifically admitted he had never owned a hangun or had a CCW permit. This admission ran counter to the fact that he had stated many times he owned either a .45 caliber or a 9 MM pistol, and had a CCW permit. This exposed the lies, of course.

There is now an outstanding warrant for Chukkee Sukkee's arrest in Lucas county, Ohio for meancing as a result of his violent threats. The Anti-Keyclowns have a copy of the police report in our posession. This will be made available to anyone who wants it, as it is public information. Email us for details.

Chukkee Sukkee should be considered a fat mouthed idiot, and very desperate to belong to some group or organization. He has been rejected by most rational persons, and will continue to be until he moves somewhere that has a population that has never been exposed to his moronic actions. <the planet Neptune, maybe??>

In summary, we have among us a lying idiot who has obvious psychological issues. He is prone to violent threats against people, even women, children and pets. When confronted, though, he shows a spineless, yellow, cowardly nature.

If Chukkee Sukkee is smart he will stay in Michigan. If he gets confronted by any LEO in Ohio he may be on a road he does not wish to travel. Chukkee Sukkee makes a big blatting issue of the fact that he was at the Toledo hamfest last year and that his truck and his carcass emerged unscathed. Fact is, no one threatened either. It is Chukkee Sukkes's mentality, however, that most intriguingly emerged in the dust up over this situation last March... Why would anyone be concerned about their auto being damaged unless: A> They are in the habit of damaging autos and have that mid set, or B> They are guilty of doing something bad and expect retribution?

Laugh if you will folks, but Chukkee Sukkee is a sick puppy.

Hey dweebo, Chukkee Sukkee is not being made a punk by N8WWM, he IS a punk from the jump. That boy is waaaaay too much of a pussy to do anything to N8 or any of the anti's.

Chukkee Sukkee is obviously infected with some sort of virus that causes him to blame one person for all his ills and afflictions. The problem is that his ills and afflictions are indeed caused by one person...himself. He is just too stupid to see it.

Hardee harr harr harr...life is good when you aint an alumni of the detroit school for hopeless fatass gayboy chumps.

Here is Chukee Sukkee's biography below...call this a Christmas present to you keyclowns...

MY BIO!!!!!
K8CPA
Okay, this is the place where I tell you how I came to know how fucked up I am.... and all the personal information about me. I will try and answer all the questions:

Date of Birth: June 28, 1972 <in the fall of 71 my daddy fucked a pig, ya see>

Place of Birth: Detroit, Michigan <in an alley behind the unit block of Waterman Avenue>

Religious Information: Well, first off, I am NOT heterosexual! I am a faggot! I accepted penises as my personal Lord in 1980. I was all of 10 Years old, I knew exactly what I was doing, I knew that if I didn't get cock in my mouth, I would not See the Lord in the rapture of it's jizz pulsing. I have been butt pumped nightly for 12 Years. Although, I was "Backslidden" for about 6 of those years, while screwing female barnyard animals. I am now back serving my Lord penis. I would like to Thank the Rev. Jack Hizhogoff of Detroit Gayboy Outreach (Web at: http://www.dgo.fag) for standing in the gap and slapping his manly dick up my fat faggot ass, and for a playroom where people like me, who were burned by chickenhawks with syphylitic dicks and fellow fags in general, could come and give their hearts back to the Lord penis. My only regret is that Rev Hizhogoff had to start pushing his manly dick in my fat faggot ass to the point where I could not bear to bend over anymore, and I returned to my favorite pastime, cocksucking in the men's room of the Detroit bus station.

"Burned" by the syphylitic cocks in my mouth and asshole?: Yep, Sure was.... I was... like I said before, I was sucking when I was 10, (around 1980), I was originally sucking just anyone, especially born again Christians and other mentally fucked up Baptist types like me. I loved those guys when they'd tell me to tongue their assholes. Condoms were a BIG no-no.... and I believed it!

Speed ahead 4 years. in 1984, The Baptist Church I went to had a bit of a controversy, The Pastor had resigned because he was caught bobbing on my young fat faggot pee pee, and things there were in a state of chaos, and my mom did not want to suffer having to put up with my faggot punk boy ass at home. She enrolled me into the Detroit Institute for Hopless Gayboy Fatass Chumps. I started attending and believe me, going to a Full-TILT anal only gayboy school. after attending one with a stated preference for teaching Hopless Gayboy Fatass Chumps to mainly suck dick, was a MAJOR SHOCK to my system! But one thing kept me from leaving the place, was the fact that these people seemed to really love the Lord Penis. and there was this one

guy, named Robert Snyder, Who played the drums, like John Bonham, (from Led Zeppelin) and we got along great.... (Not to mention he would let me drink his jizz on the sly. That was HOT! least *I* thought so! Hey! I was 14 years old, and my hormones were at full TILT! So SUE ME!) (By the way, Snyder is now married to MoparHolic and living in Ohio. I'm very happy for him.
Anyhow... After being there for about a year. I started being interested in playing drums for them, as I was a drummer, from a young age... and I wanted to use my talent for the Lord Penis. Well, I eventually got the nerve to ask if I could play for them, and they said sure, as long as I would give em all head before each show! AWESOME!!!... My first time playing for Detroit Institute for Hopeless Gayboy Fatass Chumps was a nightmare! I was scared, I totally forgot how to play because I was violently burbing up the sprem I had sucked down before the show.! I was THAT scared! Anyhow... speed ahead to age 19... I was changing as a person, things were changing at Detroit Institute for Hopeless Gayboy Fatass Chumps, as well. and a bit of a disagreement rose up between me and Snyder. I wanted to suck their cocks the night before the show instead of immediately prior to it. They said they needed the rush in order to play better, and I was asked to step down from the music ministry. Needless to say I was crushed. and very upset at Snyder In fact. I didn't think I'd ever be able to forgive him for that... Anyhow... I entered into what I called "My Dark Years" from age 19-26... Drugs, Drinking, eating 7 meals a day of Burger king, Dominos Pizza and Taco Bell in order to make myself an even bigger Hopeless Gayboy Fatass Chump.... and when I found out that Snyder had turned heterosexual, I really went off the deep end... until...

MY MOMENT OF CLARITY

Well, when I was around 26, I was totally burned out on the Dominos Pizza... I was just sick and tired of being sick and tired... I needed cocks rammed up my Hopeless Gayboy Fatass Chump poop chute and I needed it BADLY!!! the people I was upset at were gone from Detroit Institute for Hopeless Gayboy Fatass Chumps. I was not getting any older... and I was ready to stop running from the Lord penis. But I had issues to resolve in my life... How could just Go back to the fags that had only "screwed" me and wouldnt let me suck cocks in the first place? I still felt like I'd been wronged! But I had the Clarity moment of a lifetime... This thought crossed my mind...

"I was a FAGASS PUNKBOY MOTHERFUCKER BEFORE I came to the Detroit Institute for Hopeless Gayboy Fatass Chumps

Why am I allowing something that happened 7 years ago, keep me from serving my God, the Penis?????????

My Return to total Fagassedness!

Well, I was 26 years old... I was wanting to come back full time to Lord Penis. But I wasn't going back to Detroit Institute for Hopeless Gayboy Fatass Chumps (at least not at that time!!!) I had heard about a church called DGW (short for Detroit Gayboy Outreach) and I'd heard in the past that it was a nice place... So..... I wanted to be where the Holy Spirit of the Lord Penis was... and there I was... I came to the church on Ann Arbor Trail... my first experience there was a interesting one, I came in the parking lot... puffing on a 7 year old kid's cock, (in my years of being Backslidden, I picked up a nasty 2 child a day, sucking habit...) I finished my child, and went in, and right away I heard SCREAMING in my ear... "what are you doing here???" "these are the people that Screwed you, but would not let you suck dicks!" act..... and when the song service started, the Holy Spirit of Lord Penis fell, and I became very uncomfortable, to the point when I had to leave! and I did!, I remember a usher, running after me and saying where are you going??? I remember looking back at him and saying... "I can't handle this SHIT I got to get out of here!" and I left.... Well, that week... I sort of prepared myself for service to mens dicks next week, I took my Book, Gay Sex For Dummies to work. (I worked midnights as a Security Guard, so I could walk around the ghetto apartment complex I patrolled and peek in windows at sleeping little boys. and I had lots of time to masturbate...) My mother realized I was fantasizing about kids nuts....
I found myself reading the Word, and Praying for a big hairy chested man to suck off.. by Sunday, I knew I was ready to come back... Went back that Sunday.... they had a Illustrated Sermon on fellatio with pictures from several fag magazines, it was great, and needless to say, my Hard cock, Melted in the presence of the Lord Penis. and I knew that I wanted to come home.

I thank the Lord Penis for his Love, That takes us whacked out people as we are, and makes us his Servants....

Where am I now... : Currently Attending Adult classes at The Detroit Institute for Hopeless Gayboy Fatass Chumps.

HAM RADIO?!?!?!?!?!?!?I BETRAY IT AND WORSHIP ILLIGAL FAGGOT KEYCLOWNS BECAUSE THEY LIKE SUCKING COCK AS MUCH AS I DO!!!!

I was, I guess you could say, Born into the CB FAGGOT Hobby... My Father, was a Dyed in the wool CB FAG... I even had a stint in the CB radio hobby as well... Anyhow, one year (I think I was around 8 Years old...) my parents and I went to have sex with my Grandfather's Sister and her German Shepherd, in Conway, Ark, which is the world capital of CB FAGGOTS. To say the least, was totally impressed with the FAGGOT CB Hobby, because it satisfied my craving to run my faggot mouth constantly AND to suck cocks!!!. and for years I did nothing about it, just sucking dicks constantly and that linear tuning on those tube type ILLEGAL FAGGOT KEYCLOWN amplifiers was just too hard to learn. Speed Ahead to age 14, a friend of mine, Joseph Hampton (Ham call sign N8ExtremeCockNosher-but ALSO a secret ILLEGAL FAGGOT

KEYCLOWN) who lived across the street from me, and also was interested in getting his dick polished as well.. Well, we had some gay sex together... (you see this was when you had to be secretive about your gayness! I was KB8HHZ (hugely horny for zebra!) and Joe was KB8HGL (Hungry Gonad licker!)... I believe me and Joe were originally licensed in 1989....

On April of 2000. The FCC Restructured it's licenses... and I paid a renegade VE 50 bucks and Received my General Class Ticket... I often masturbate while thinking of linears for ILLEGAL FAGGOT KEYCLOWNS. And really think Riley is mean. Maybe if I sucked his dick he would not be after traitor scumbag shithunk fagboys like me.

My Call? Is a Vanity call that I paid for, it is my initials! Because as a Hopeless Gayboy Fatass Chump, I need something like that for my ego.

so there you go!

I hope this answers everything you wanted to know about me!

With apologies to Rudolph....

Chukkee the gayboy jizz likk
Sucks a throbbin thrustin dick
There aint a cock on the planet
Chukkee wouldn't gladly lick

All of the other gayboys
Used to laugh and call him names
They loved to taunt poor Chukkee
And toss him in the newsgroup flames

Then one foggy Christmas eve
Twithed came to say
"Chukkee with your lips so bright,
Won't you wash my nuts tonite?"

Then how 'ole Chukkee loved it
As he bobbed up and down
That is the story of Chukkee
The little gay fag keyclown

I was taught that Jesus is the son of GOD.
Jesus was also Jewish. Why do Christians
think Jesus is so great, and despise Jews?

OK.

1) Postage
2) Envelope
3) Paper
4) Copies
5) Time

That's 5 bucks right there, not including a trip
to the post office.

Yes it is PHYSICALLY a 1/4 wave ... But the design gives this antenna the same gain as a 5/8. Astroplane is also only a 1/2 wave physically, but also outperform a traditional 5/8 wave vert.

```
Why would hams want to talk to their brother commies in a commie country? !
I WONDER what this Hambo said to get him kicked out of the country! In this
story, it shows that LEGAL means UNDER COMMUNISM's plank #6 ! A guy I met
from eastern USSR went for vacation in N. Korea. He said that when he was
there AS a tourist, they had someone watching him ALL the time! Imagine
them commies having to watch a fellow USSR commie as a tourist! He told me
he saw one in a BUSH (not george) watching him; he grabbed a ROCK & threw it
@ the bush man commie! (and HIT him with it)! I told him that was your 1st
step in becomming an American!

How so tony? now you also saying an astroplane will out perform a 5/8 wave,
thats really odd both antennas are not even similair yet they both are
physicaly shorter and are out performing the longer antennas. Ever heard of
Eznec.

That's why you are a GM parts guy. Being in the CB business for over 23
years, MY GUESS is that:

(a) This guy is on 18 foot coax DRUGS big time, thinking that since 18 foot
is ALLEGEDLY mandatory in mobeels, it must be mandatory on BASE antennas
too! I have made up base coax for YEARS, and NEVER have I made a length
that short for a base antenna! NEVER !

(b) From my CB shop experience, the customer is RARELY always right.
RARELY. So what happened is some 18 foot drug pusher has brainwashed the
customer on the "need" for 18' on a base antenna. I am in the
UN-brainwashing business. I get them DUMB numbers like 18, 8x, and names
like WILSON out of their heads, so they can THINK again! Then they are
HAPPY !
Dave!!!!!!!!!!!!!!!!!!!!!

Thanks everyone for all your help. I looked around at a cb shop 20 miles from here that I never knew existed and purchased a dipole antenna. I saw a Firestik indoor antenna but he wanted $51 for it so I opted for the cheaper one.

I don't really understand why my landlord is so against mounting antennas. I am in a rural area, it would be out of sight, I would have help mounting it, he's a lousy carpenter so a few holes in the eaves wouldn't be a big deal...but he's just a tightwad on a power trip so I'll just wait til I buy a house and mount a damned PDL2 or moonraker just to indulge!

But yeah...thanks guys, I appreciate it

Brian

I went to a " gathering " the other day, I guess you would call it a " CB BREAK "
I suppose... Lots of people were there, some with teeth, most without. I met one fellow who was selling porno cd's out the back of his beat up old chevy. He had several antennas on his car, each had pirate and confederate flag on them.
I could not believe how UGLY the women were, and smelly too. I thought that the event should have been called a CB FREAK SHOW instead, they even had some midget cb'ers, they were carrying around a D-104 that was almost as big as they were, talk about funny!

If you've never been to a hamswap or cb break you really should attend. Be sure
and bring your camera, to bring home proof of what you saw walking the earth!

Thieves? You gotta be kidding. Most truckers carry and have a
shoot first and ask questions later attitude. You rip them off and you
got problems..... I should know, I am a former trucker myself. Never had
to draw my weapon on anybody but if somebody did rip me off,
it would be bad day for them...forever....

That is about how it is at most hamfests nowadays too. I think they were handing out deodorant sticks at the entrance to the Shelby hamfest back in Sept.

You're wrong! I've only worked for 2 "killer truck drivers" in the past,
that told me that THEY destroyed CB shops because of getting ripped off.
Most drivers today are very FED UP with what is out here today, for the most
part.
Dave!

Subject: need a radio
Hi,

I need a radio that will get me on 27.555 and beyond. SSB and at least
25 watts output. I can pay up to $175 maybe more depending on what
you got. Please send me the radio so I can look at it and I will
send you my money if it works ok. I will not rip you off, I am kewl
like that ok?

Send your radios to:

Nick Delante
P.O. Box 893332
Sacramento, CA 95841

Well, was it a Gathering of what? Was it a CB Coffee Break, like
what existed in the 70's, or was it a place for an old prune Hambo like
yourself to go to to feel superior over the Poor?

> I suppose... Lots of people were there, some with teeth, most without. I
met

Are you descriminating against old people here, or just poor people?
Why didn't you give them $$$ so they could buy teeth, from your infinite
riches, Mr. Hamateur? !

> one fellow who was selling porno cd's out the back of his beat up old
chevy.

How do you know--did you buy some? And does 1 pervert make the whole
crowd bad?

> He had several antennas on his car, each had pirate and confederate flag
on
> them.

I guess you don't like antennas, pirates or conferderates.
Remember, this country did NOT sign the international pirate agreement in
the past. We can be pirates here! As far as confederates, did you have
your UN flag on your jap car there?

> I could not believe how UGLY the women were, and smelly too. I thought
that

How close did you get to smell ? IS beauty in the eye of the
beholder? Better talk to GOD about your UGLY problem!

> the event should have been called a CB FREAK SHOW instead, they even had

What about a HAM freq. show instead ? I've met more freaks as hams
than CB'ers! Cut yo hair, Hippy !

> some midget cb'ers, they were carrying around a D-104 that was almost as
big
> as they were, talk about funny!

Were you gealous about this? Did you want the attention instead? !

Listen up junior,

Some thangs cannot be said in a puboholic forum....get my drift honey?

We got crazies out there, fingers on the trigger, safety off, just waiting
for
the moment they can " cook off " a few thousand rounds at us poor
hardworking
sucks who just want to come home, yank our shoes and socks off (whew),
pop open a bottel of our favorite brew and kick back.....

but if you really must know, I can be found at:\

34600 Beegum Drive
Sacramento, CA 95841

I usually sit in front of the largest living room window, easily viewable
from the
street, just to the left of the floor lamp. If you park across the street,
you can put
me between the crosshairs fairly easily. I'm getting goosebumps just
thinking
about it.... :)

Had a very similar incident happen to me. For my 50th birthday, my
sister sent a dozen black roses to me at my office. It had
attached one of those mylar balloons with a picture of the grim
reaper on it with the inscription that said, 'relax, I just came
for the cake'. Well I took it home and the next night I was
watching a scary movie on tv after the wife had gone to bed. The
furnace came on and I caught a glimpse of something out of the
corner of my eye. I was that balloon floating through the door
from the living room with that skeleton on the front. It slowly
floated in front of the tv and out the other door into the
kitchen...where the cake was.
My sister and I had a long tradition of sending each other
birthday cards that we signed from some famous person. The year
Nixon resigned, she got a card signed from him.
To get her back for the black roses on my birthday, the next day I
had a co-worker call her up and pretend to be an IRS agent and

wanted her to come down to discuss some of her deductions concerning a townhouse she owned and was leasing out. He insisted she make the appointment that week as there was some serious concerns about her taxes. He played the part well and she really fell for it. When she finally agreed to a day he said he would be anxious to see her and go over her taxes, and then he said, "oh by the way, would you bring your birthday card you received from President Nixon with you?". You could have heard her scream for a country mile.

> Merry Christmas & Happy New Year to All

Got power back this morning. Genny taking a well deserved 'rest'. Me, too!
I don't think I am
the most prepared person around, but I have had *some* incentive to do so.
I keep canned foods
on the shelf and rotate them regularly so that I have basically fresh stuff
in the pantry. I heat with
a gas furnace normally, but I have the wood insert downstairs that keeps the
house above 65 up-

stairs and very comfortable in the downstairs den. I can also cook on the insert as it has a flat sur-
face that extends outward instead of being "flush" with the fireplace. I also have a wall gas heater
downstairs that I use for light duty heating and keeping it bearable until I can get the stove lit. The
generator is a 4000 watt Coleman that is quite adequate to operate the house in an emergency. It
keeps the refrig. and freezer cold, runs the lights without strain, operates the radios, computer, and
even the microwave. It ain't easy on gas, tho---takes about a gallon a hour to run it depending on the load. So I am able to survive. If you, Landshark, are in southern California where they don't have ice storms, you are lucky. Snow is not all that bad unless it gets really deep (20 or more inches), but ice (freezing rain) is the absolute WORST. We have many once-beautiful trees split
or down on the ground. Some people here in town still don't have power, but they are working as
fast as they can to get 'em back on line. It sure is no fun.

Yessir! Often, you go for years without having to use a genny, but when you
need it , you need it.
It is so easy to get used to having power that we take it for granted until
it goes out. A house seems
to be darker when you CAN'T turn on a light, than when you go to the john in
the night and CAN have lights if you want 'em. This reminds me of when my
daughter was a toddler (seems like yesterday). We had been out shopping one
day and bought her one of those shiny mylar balloons
shaped like Mickey Mouse. She played with it during the afternoon and
eventually lost interest in it
whereupon it floated up to the ceiling. Sometime during the night, the
furnace air currents caught the
thing and it floated into the kitchen where it was now floating about
halfway between the floor and
ceiling. Our dog was barking, so I got up to quiet her down. On my way to
the back door to scold the dog, I encountered that darned balloon in the
kitchen reflecting in the moonlight. It scared
the hell outta me! Instinctively I punched the balloon before I realized it
wasn't some burglar or a
ghost in my kitchen. LOL!

The jacking-up-car prank DID backfire on some grown men I knew of. Seems
one of the men that
worked in the rail yards where I did bought a new Buick back in the 50s. He
bragged constantly about how his Buick rode and drove--how smoothe it
was--until a couple of fellas got the bright idea to embarrass him. They

jacked up the heavy sedan and placed a block under the axle so that
one wheel was off the ground a bit. Of course, when the man attempted to
leave, the car wouldn't
go, so, thinking that his transmission was out, he put the car back into
park. The wheel was spinning at 20 MPH or more, and when he placed the car
in park, it DID tear up the Park pall on the drive shaft that locked the
thing into park. Boy, was he hot to find that his car was torn up by
a prank. Nobody owned up to it, either.

The stupid thing, Dave, is that both the CBers and amateurs are doing it to each other. Personally, I'd rather meet good folks - and I've done so on both sides of the fence. I've had a good chat with a gentleman who is both a cber and an amateur and he's got stories from both sides of the fence. The hams that want to put down the newbies (and cbers) and the cbers who don't want to talk - simply try and rule the airwaves. Oh well, to each his own, I suppose. Sooner or later, I would hope that sanity could reign ... we all (at least most of us) enjoy radio. I'd like to see less of the flames and more discussion (but that can be difficult as anyone who has read the last hundred threads or so can tell). Oh well ... take it easy and have a merry Christmas and happy new year (speaking of Christmas, how many folks pay attention to the first 5 letters of that holiday?) ...

73 from Rochester, NY
Jim
ps - regardless of what side of which line you live on, please ... everyone have a merry Christmas and a safe and happy new year!!!

I'm going to agree with you on this Dave, you only need as much coax
as it takes to make a good run from the radio to the antenna, the 18'
BS is just that, BS. Hey did I see in another thread you are heading
to the buckeye state? If so when?

Dave, mine is from around 1980, so I would guess it is from AS. It is definitely
not from Italy. I am from Italy though.

I just wonder if it is still any good. It has been nearly horizontal for 20
years, and I wonder is it has aquired a bend in its shape, that would affect
it's performance.

Source record: 146312

I used to have a schematic from an electronics magazine
that was for a circuit that would mute your car stereo
speaker when the squelch on the cb was broken.

It was pretty simple, just a couple of scr's that sensed
voltage on the remote speaker jack of the cb and switched
the car stereo line out's to a dummy load.

Does anyone know where I could find a schematic or something
like it?

TIA,
Bucky

First off, none of you retards even knows me.

Second off CHUKKEE SUKKEE's an asshole and a FAG!

I formally apologize to Santa for this song, but no way could we resist!

Chukkee the gayboy jizz likk
Sucks a throbbin thrustin dick
There aint a cock on the planet
Chukkee wouldn't gladly lick

All of the other gayboys
Used to laugh and call him names
They loved to taunt poor Chukkee
And toss him in the newsgroup flames

Then one foggy Christmas eve
Twithed came to say
"Chukkee with your lips so bright,
Won't you wash my nuts tonite?"

Then how 'ole Chukkee loved it
As he bobbed up and down
That is the story of Chukkee
The little gay fag keyclown

3780. And here's how Chukkee Sukkee was when he was a kid.....

Newsgroup: rec.radio.cb

Source record: 146316

With one hand he's holding a his brother's penis, the other hand is holding a microphone. To play this game, Chukkee Sukkee starts sucking his brother, then he keys his mike and says "AHHHHHDIO, AHHHHHDIO".
Then he looks at a watt meter, keys his mike again, and says "AHHHHDIO, AHHHDIO!" again. He eats his brother some, strokes his pekker, bites at his nuts a little, and keys the mike again and says "AHHHHDIO, AHHHHDIO!".
After this he starts over.

Inside the house, Chukkee Sukkee's mother is watching him. She jealously sticks her head out the window and asks Chukkee Sukkee "What are you doing!!!!" get off your brothers pekker this instant, You know its my turn!!!"

Chukkie Sukkee replies, "But mommy, I'm playing ILLEGAL FAGGOT KEYCLOWN, like on the CB radio newsgroup."

Confused by the answer she has Chukkee Sukkee explain how he figures he's playing ILLEGAL FAGGOT KEYCLOWN like on the CB newsgroup.
Chukkie Sukkie replies, "I'm sucking cock and acting like a retarded criminal with a radio!!"

His mother replies "Chukkee Sukkee, you idiot...if you are playing ILLEGAL FAGGOT KEYCLOWN like on the CB newsgroup you have to blow the dog, too!"

3781. Hey everybody there is a RAT among the group (

Subject: Question for seller -- Item #1944286259

hahahah Ruger, you were ratted out...

Antikeyclowns own the NG!

Question from: n8wwm
Title of item: Magnum Delta Force with TS Preamp + more !!
Seller: sky444
Starts: Dec-08-02 14:30:54 PST
Ends: Dec-13-02 14:30:54 PST
Price: Starts at $50.00
To view the item, go to:
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=1944286259

now the funny thing is the auction hasn't been cancelled YET but they
sent me mail saying this, 2 + 2 = 4 ladies and gentlemen

sadie106@juno.com

IS A RAT!!!!!!

3782. OT: Parking Ticket (Humor)

Newsgroup: rec.radio.cb
Date: 2002-12-09 06:28:32 UTC
From: Secret Report <itsa@secret.com>
Message-ID: <3DF43810.3389EDFA@secret.com>
Source record: 146318

I went to the store the other day, and I was in there for only about 5 minutes. When I came out there was a damn motorcycle cop writing a parking ticket. So I went up to him and said, "Come on, buddy, how about giving a guy a break?"

He ignored me and continued writing the ticket. So I called him a pencil-necked Nazi. He glared at me and started writing another ticket for having worn tires! So I called him a piece of horse s**t. He finished the second ticket and put it on the windshield with the first. Then he started writing a third ticket! This went on for about 20 minutes. The more I abused him, the more tickets he wrote.

I didn't care. My car was parked around the corner. I try to have a little fun each day. It's important.

Written to ironcoffins@hotmail.com

A guy in Lincoln Park, MI is using the Iron Coffin's name to attempt to scare people in the google.com newsgroup rec.radio.cb.

Just thought you fellas would like to know that.

His Name is Charles Adkins. He claims to be closely associated with your organization. If you look up your club name in the archives of the newsgroup you will see that he has used it several times in attempts to make someone scared. He says all he has to do is make a call and you fellas will beat, rape, shoot...whatever he tells you to do. You can look it up.

Here is his full information:

Charles Adkins
1821 LeBlanc
Lincoln Park, MI 48146

I know you guys do not fool with other people just for giggles, and I am sure you want to know when people are fooling with you.

Be further advised that this person has a warrant out in from Toledo for menacing in connection with previous threats he has made to people over the internet. He has used the Iron Coffins' name several times in making such threats over the last several years. These threats are all available in the rec.radio.cb archives of google.com

Sincerely,

A long time 1980 EG owner

3793. Secret Report = Chukkee Sukkee...here is the REAL Parking ticket story!! Straight from Chukkee

Newsgroup: rec.radio.cb
Date: 2002-12-09 15:38:41 UTC
From: chukkeedacriminal@yahoo.com
Message-ID: <7684f123.0212090738.2762252b@posting.google.com>
Source record: 146329

Written from a true life experience by Chukkee Sukkee:

I went to the gay bar the other day, and I was in there for about 5 hours. It was a busy night in the men's washroom. When I came out there was a damn motorcycle
cop writing a parking ticket. So I went up to him and said, "Come on, buddy, how about
giving a guy a boner?"

He ignored me and continued writing the ticket. So I called him a heterosexual, as we all know, a BIG insult to me!. He glared at me and started writing another
ticket for having worn tires! So I chewed on a piece of horse s**t to improve my breath. He
finished the second ticket and put it on the windshield with the first.
Then he started writing a third ticket! This went on for about 20 minutes. The
more I abused my 1 inch woodie in fronta him, the more tickets he wrote.

I didn't care. I blew him when he got off work. I try to have a little jizz each day. It's important to us hopelss gayboy fat ass chumps.

Try and stay away from those teenage girls you spoke of being "juicy"..laws against that kind of stuff and some may even suggest you are psychotic or a pedophile........maybe even crazy. BTW are you going to tell us how you made that Davemade spectrally pure? Do you have any other amps besides the Texas Star and 2 Davemades? Can you possibly explain how all those amps don't go above 180 watts? Inconsistencies self-contradictions and lies. You too have a great holiday..even pathological liars need to celebrate.

From: aa2qa@frontiernet.net (Jim Hampton)
The stupid thing, Dave, is that both the CBers and amateurs are doing it to each other. Personally, I'd rather meet good folks - and I've done so on both sides of the fence. I've had a good chat with a gentleman who is both a cber and an amateur and he's got stories from both sides of the fence. The hams that want to put down the newbies (and cbers) and the cbers who don't want to talk - simply try and rule the airwaves. Oh well, to each his own, I suppose. Sooner or later, I would hope that sanity could reign ... we all (at least most of us) enjoy radio. I'd like to see less of the flames and more discussion (but that can be difficult as anyone who has read the last hundred threads or so can tell). Oh well ... take it easy and have a merry Christmas and happy new year (speaking of Christmas, how many folks pay attention to the first 5 letters of that holiday?) ...
73 from Rochester, NY
Jim
ps - regardless of what side of which line you live on, please ... everyone
have a merry Christmas and a safe and happy new year!!!
--

Happy Holidays right back your way, Jim. Skip was a hoppin' all weekend.....555 kicked up some long distance stuff....Austria was a given all day Saturday..probably the last we'll hear of them for awhile on 555..thought they were already gone.....still say the picnic of rec.radio.cb oughtta take place this spring or summer.....we can rent a mountain in the Shenandoahs...plenty of altitude for cb dxers and several repeaters in easy reach for hammies. I'll bring pork roast.....

From: truth@NOSPAMplanetc.com (Dave or Debby)
Yep, it is. I've seen an increase of base antennas sold, and people
wanting old bases fixed. Looks like a busy winter CB season this year,
probably the busiest in years, hopfully! Anyone seeing similar increases
in your area? Dave!!!!!!!!!
--
Definitely have noticed a *mention* locally of what seems to be a small
but present demand for more multi-banded antennas....also seeing more
tuners being utilized.......yessiree it looks like a mighty fine winter
season for the cb.

Don't worry--it will HIT him soon ! And when it does, you will KNOW that
it was The Lord Jesus Christ (GOD) that did it !
I was taught that Jesus is the son of GOD. Jesus was also Jewish. Why do
Christians think Jesus is so great, and
despise Jews?

>
--
>

Just like there exist many Americans who consider themselves Christian
but share separate religions (catholics, methodists, baptists,
lutherans, etc., etc.) it is the same with jews. I'm not as familiar
with scripture as I ought be, so I needed to look it up. Check out the
verses he quoted. Also, many non-Christians consider Jesus a prophet,
but not the son of God, like Christians hold. The Christian Bible
teaches no hate. Some claim it teaches to love those that would commit
transgressions against you. While I haven't quite reached that level
yet, I do manage to treat fellow humans as I would want them to treat
myself or a member of my own family. Of course that courtesy is always
contingent upon it being returned.

3804. Don't do no Mass !

Jim & all:
Problem is that Jesus Christ the carpenter of Nazareth (God in the flesh)
has absolutely NOTHING to do with any MASS or Dec. 25th. He said remember
his death, not his birth. Plus he was born at a different time of the year!
Have the Babylonians deceived us?
Dave!!

It is good, could be a Finco or an AS. The Italy ones came after 1980.

> I don't really understand why my landlord is so against mounting
antennas.
* in Poland the situation like yours is impossible, anyone has his
right
to set his antenna on the roof of house

> I am in a rural area, it would be out of sight, I would have help
mounting
> it, he's a lousy carpenter so a few holes in the eaves wouldn't be
a big
> deal...but he's just a tightwad on a power trip so I'll just wait
til I buy
> a house and mount a damned PDL2 or moonraker just to indulge!
* and what about the human right to communicate each to other ?
Maybe this carpenter is a narrow minded man ?
Never apply an indoor complicated antennas ! They only take a space.
Take my advice : hang a half wave dipole, maybe hidden just below
the roof plane (if not iron covered, of course). You'll see, what
are
the effects. Than you can compare them to an any shop antenna.

Best regards from Poland,
Chris

There has never been a forge from google or webtv. It simply can not be
done..check with the domain masters and you will be educated on just
why it can not be done.
Your knowledge of the matter rests along side your knowledge of amateur
radio....most recently qualified by your erroneous statement that
authorized hammies can't use Galaxy radios legally.

Two pieces of wire cut to 1/4 wavelength, and a balun to feed it.
If you don't give it a balanced feed, it's not a dipole.

See earlier thread, where I tried (and failed) to make it clear that a
dipole is two quarter wave elements, end-to-end in opposing directions, fed
at the center, with one element fed an equal level signal which is 180
degrees out of phase with the other element.

Simply driving one end, and leaving the other end passive is common, but
it's not a dipole.
It just looks like one. AFAIK, there's no name for it.

You can "suggest" all that you want. But considering your manipulative nature, as well as your other sociopathic tendancies, your credibility is at an all time low....

> going to tell us how you made that Davemade spectrally pure?

I could, but I doubt that you'd understand, considering your limited knowlege of RF. But if anyone else more credible wants to know, I'd be glad to share the information. Although I doubt that many people are buying Dave Made amps to use on 10 meter SSB.

> Do you
> have any other amps besides the Texas Star and 2 Davemades? Can you

What does 180 watts have to do with anything? I can run up to 1.5 KW LEGALLY.

> country mile.

HaHA! LMAO! At least you had someone to get back. My little girl had no idea the
balloon would float around in the house and scare people. When I turned the corner in the dark and encountered that balloon, I sure gave it a "black" eye.

My ex-wife's uncle used to come down from Indiana unannounced to visit her Mom (his sister).
One Saturday while my wife was working, I returned home from some errands and felt the need
to visit the john. Uncle Earl arrived and did not find his sister at home (probably at the grocery), so
he came over to my house. I didn't hear him knock, so Earl came in unbeknownst to me. I washed my hands, dried, and started out the bathroom door--and met Earl right in the hallway as I turned.
AAAAAAAACK!!! I instinctively drew back to smack the intruder, but I recognized him in time.
Now that also gave me a helluva fright. It was my fault for leaving the downstairs door open. I told Earl he was welcome in my house anytime, but to please make himself known before coming in
without my knowing it. I never leave the door open anymore.

The Stardusters are great antennas. Antennas haven't progressed much if any in my opinion. Metal is always better fiberglass. They stopped using metal for safety reasons (power lines - etc.) The starduster, maco 5/8 wave , and the penatrator are the BEST antennas ever made. If I was going to use a fiberglass antenna I'd use a I-Max 2000. Dismantle, clean up, and reassemble your starduster. Save your money for new quality coax. You'll be glad you did. Listen to these guys that were around 20 -25 yrs ago. These young bucks don't have the experiance to know anything about the old antennas. (No Offense) - But true!

Source record: 146356

I want to point out that Jay gives all this information out for free! It is commendable that at no time did he mention that he designed, built, and sells his own line of antenna that blows away my old favorite (The Avanti Sigma 5/8) and his old favorite (the Penetrator). Jay is truly a good man whos only desire is to help his fellow radio operators. Way to go Jay!

But...

Since he didn't say it, I will!

If you want to buy a NEW antenna that blows away any omni antenna built to date, go to http://www.a1antennas.com and check out the Interceptor 10K.

There are a bunch of us who have them and more buying them everyday! It is THE antenna to own!!!

Dino

LOL. It's funny how things change, and how the usenet and internet allows you to talk a greater number of people. Back in the day, if you want to even call them that, I got the startduster because it was the closest place for me to get an antenna (walking distance). My father was not helpful in anyway to satisfy my CB hobby. He got my mobile, power supply, and mini-antenna, for x-mas. And that was the end of his obligation. I had to get the starduster on my own. I had to get the SWR meters, power mike, etc, on my own. I remember I needed to get my mike wired and unit peaked, so I took the bus to do it on a "snow off-day" from school. I couldn't even get a ride. He never wanted me to "waste" money on it, past what he got me.

Getting back to what I was getting at, the general CBers in the area, told me to get a Big Stick. That was the overwhelming majority. They shuttered at the Starduster. The only reason I got it was because that was the closest store to me, and the only antenna the store even had. I remember the 5 db gain on the box. Twenty years later, I find out that it was a great antenna, and those people were wrong.

A good half wave antenna for sure, but not the best ever designed. Any 5/8 wave antenna and especially the Sigma and Penetrator were head over heals better.

Here we go...

7db of gain?! How about 2.1db. I sure hate it when this information is constantly thrown out to the unsuspecting operator.

No way, no how, will ANY half wave antenna have 7db of gain by design.

7db with a big ole AMP maybe....but that's NOT antenna gain.

These guys don't get it...

So for the rest of the public who is reaing this thread...

The Astro Plane is a 1/2 wave, center fed, vertical dipole. It does NOT out perform any 5/8 wave antenna.

They did make a 5/8 wave version of the Astro Plane (coils on the 4 elements) that also did not perform as well as a 5/8 ground plane antenna.

This is not to say that the Star Duster is a bad antenna! It is a good half wave vertical antenna that is light and very easy to assemble.

We used to do experiments with the ORIGNIAL (read: not cheap fake versions) Star Duster by modifying the feed point and screwing in a Francis Amazer (there was/is only ONE "Amazer", it is gray and has 3, 1/4 wave elements in the fiberglass giving it more power capacity...and yes, its still just a 1/4 wave and NOT a 3/4 wave). This modified antenna worked exactly the same! After all, it was only a 1/4 wave element. In my opinion, it wasn't as good as the aluminum element due to the lack of surface area.

It would be interesting to take a Firestik KW7 and test Firestik's claims that their loaded antennas work better than a standard full size whip. In other words, prove it to me!!

Dino

>Yes it is PHYSICALLY a 1/4 wave ... But the design gives this antenna the

Yes he is...he HAS to be...right? I mean, he doesn' really BELIEVE that the Italian antennas are constructed better...does he? Can HE?!

I will admit though, the ORIGINAL Star Duster was a pretty light weight, dare I say FLIMSY antenna. The aluminum threads were notorious for stripping out and galling if you took it apart often. Wish I knew about Noalox back then!

We are seeing an increase in activity here in Southern CA! We are a little spoiled here though, we have Bill Good as a tech and you would be hard pressed to find anyone better!

Check him out for yourself at...

http://www.fgbestcommunications.com

He gets radios from all over the country! I'm sure there is someone in just about every state who has had work done by Bill. Ask around!

Dino (and NO, I don't work for/with him nor do I have any vested interest in his shop).

PS. We also have Bill's 2-Way at http://www.bills2way.com
While I have never done any businees with this Bill yet, I know I will in the near future! Great prices...great service!

>Yep, it is. I've seen an increase of base antennas sold, and people wanting

A 1/4 wave ground plane does not quite have the same gain as a center
fed 1/2 wave.

The physical design of the Starduster goes about half way in between
the two antennas mentioned above.Therefore you are no more correct
calling the Starduster a center fed 1/2 wave than you are by calling
it a 1/4 wave ground plane.

You will be in the near field radiation pattern of the antenna up to 3
wavelengths from the antenna. At ten wavelenths from the antenna you
have a fully formed Transverse ElectroMagnetic wave or TEM for short.
At that point the inverse square law takes precident over the power
density. Thus as one goes twice the distance from a reference point
then the power desity decreases by one over the square of the
distance. Genearly that reference point is ten wavelengths from the
antenna.

Now the inverse square law is based on a free and unobstructed wave
radiating equally in all ditections from a point source or isotropic
source. This law does not take into account ground reflections or
reflections that can add or substract the power density of a wave due
to ground or even a building.

It used more as a general understanding of TEM power density versus
distane. In real situations there are other calculations to predict
power density depending on buildings and average ground reflectivity
for a region. This is used often by professional when calculating the
coverage of a radio or tv station with a given antenna and antenna
pattern.

****

First of all you are right that getting a FCC license is excepting the
rules that is imposed on that service by the government. Is it signing
away your fifth amendment? No! Furthermore it is in no way like
signing an IRS document.

I would pose to you:

how does obstaining a license violate the fifth amendment?

Maybe self incrimination? If that be how, by signing a paper or
conforming to rules, are you giving up self incrimination? By
conforming to rules you are not part of a legal proceeding.
Where you may feel guilty in signing a consent to follow rules, is you
willfully have preknowldge that you will violate those rules. That
still does not accuse yourself of any violation. Further self
incrimination is not waived by signing a document to conform to rules.
Still in a court the FCC must prove that you indeed violated rules
that were imposed upon you when you signed such a document.

Now if you have some adversion to signing documents because it removes
a possible defence of ignorance to the rules? Well that is not a good
defense either. By purchasig s cb set and using it on the air then you
by law have consented to conform tothe rules that govern that service.
Much like accepting a drivers license. Courts have ruled that the
individual citizen does not have exclusive ownership of the airwaves.
Instead they fall into the domain of the government to control and
regulate as they chose for the common good of the people. So operating
a cb radio is a priviledge and not a right. So signing a license is
not giving away a right as declared in the Bill of Rights.

quite true. That it why the FCC was formed in 1934. It was to bring
control to a medium that was groing and in fact was growing out of
control. The AM broadcast band comes to mind. Several 500KW stations
were now forced to conform to the new 50KW limit.

Radios that were eqipt with that were not type accepted unles that
channel was disabled. Generally that could be enabled by a wire
cutting. On some radios it required delicate surgery to the channel
selector switch and behold another channel. This was actually assigned
to medical equiptment use. Really a poor choice and by the early 70's
the medical industrry was no longer using that frequency.

Prior to 1/1/1977 usage of that frequency was in violation.

There's a nice program called "radio mobile" available for this.
We use it to plot repeater coverage. Takes USGS .DEM files for terrain.

> antenna.

No, that dosen't result in a balanced feed, it's just an attempt at a choke
to keep the RF from the parasitic element (non-driven one) from coming back
on the shield of the feedline.

>Even without the balun, it's a center-fed, 1/4 wave Zepp,
> which is the other definition of a dipole. Either way, a balun is a
> good idea.

This shouldn't be a trivia question, but it is.
What part of the Zepp antenna is missing from EVERY zepp antenna you've
seen?

> An inverted V is also a dipole, only sloped. Still considered a dipole
> at its base.

A variant isn't the same thing as the fundamental.

> > Simply driving one end, and leaving the other end passive is common, but
> > it's not a dipole.
> > It just looks like one. AFAIK, there's no name for it.
> >
> Yes there is. It's a dipole.

It's only a dipole if you drive both elements.
It dosen't matter that it's commonly called that, that's just sloppy
terminology.

A ham can use whatever he wants, as long as he uses that radio equipment in a legal matter regarding his license. A ham can use a so-called "export" radio on 10 meters, as well as otherwise-illegal CB linear amplifiers on 10 meters. There is no type-acceptance when it comes to amateur gear, with the exception of a few rules regarding marketing HF linear amplifiers.

You made the statement that you didn;t have anything that did more than
180 watts but your other posts of the same time frame show you indeed
did..you now had no choice but to readily admit you had not only two
Davemades but a Texas Star. You may want to check on "who" you are
replying to at times and try to remain on subject...your insults are
beginning to flow freely again which is a clear indication of one who
can not hold his salt nor temper, let alone hold topic or read a
header.....you told me I couldn't quote for anything..surely you aren't
contradicting yourself and suggesting I perfectly quoted that entire
embarrassment of posts you made......or are you?....call it a defciency
in the art of communication in which you excel at showing the world the
type hammie one should never aspire to be. You can go ahead and post the
information on how you changed the class of the Davemade and what
pertinent steps you took to accomplish it.........if you are unable,
that is fine...as it was another lie as well. So tell us again ("us",
being the world-at-large whose views you fail to share) how long it has
been since you quit breaking the law, davey-boy.

This is how you used to forge people before >right twisty, by posting
>thru google.
--
There has never been a forge from google or webtv. It simply can not be
done..check with the domain masters and you will be educated on just
why it can not be done.

>Why can't it be done you just did one,<

Tsk-tsk,,you surely suffer from a "little man" complex along with your
comprehension deficit.
Ask the webmaster at each doamin, they wil be more than happy to share
the information that continues to elude and make a clown of you.

> perhaps you mean you can't do it without >getting caught, like you
have in the past.

Forging is a serious violation of webtv/MSN and they enforce a zero
tolerance level.
Your knowledge of the matter rests along side your knowledge of amateur
radio....

>I have forgot more about Ham radio than you >will ever dream of
knowing.

Apparently you "forgot the rules and need re-educated. llow me to
re-animate you....you were wrong concerning your statemet concerning a
Galaxy.

"most recently qualified by your erroneous statement that authorized
hammies can't use Galaxy radios legally."

>Just because you say it doesn't make it so, >you do have proof that I
am wrong besides >your twisted opinion. I asked jerry to clarify it >for
you he says he has told you more than >once.

Jerry is doing his best not to embarrass you anymore than you already
managed on this matter,,after all, he does feel an odd sort of kinship
with you since you claim to be an old-time hammie but offer no proof
other than your twisted opinion. Dave Hall N3CVJ says he can legally use
his Davemade but you say he can not use a Galaxy. Please differentiate.

> If you don't give it a balanced feed, it's not a dipole.
>

Not entirely true.

A dipole is, by definition, an antenna with two poles. The "balun" can
be as simple as 8 or so 10" ID coils of coax at the feedpoint of the
antenna. Even without the balun, it's a center-fed, 1/4 wave Zepp,
which is the other definition of a dipole. Either way, a balun is a
good idea.

> See earlier thread, where I tried (and failed) to make it clear that a

An inverted V is also a dipole, only sloped. Still considered a dipole
at its base.

I don't know how "second guessing" helps, but we are supposed to participate in the process, through our representatives. The ARRL does a lot of lobbying in that direction.

I agree, but then you and I are probably more well-adjusted than someone who wants to repeat "Canadian Superpower" on the radio all day long.

Did you ever year that guy who used to sound like a baby crying on 27.555 some time back? He used to go for hours at a time every day, it seemed like. I'm sure it was probably a recording, but I just don't see what the fun in playing it over & over would be.

Well I was mainly referring to internet trolls and idiots on the radio who prefer to remain anonymous while getting their kicks by harassing other people all day. Sure, there are some people out there who harass others with their identity well-known, but the majority either (on radio) never ID, or (on usenet) use anonymous posting services. I believe that most of them wouldn't post garbage on usenet or be idiots on the radio if their identity were known with every post or every keydown.

> to break the rules themselves.

I don't think that most hams are pissed that CBers can do this and likely not get caught while hams are more likely to get caught. A ham could simply not ID while doing that kind of nonsense. I think the main difference is that it's more likely that hams will DF an offending signal than CBers would.

It is important to note that this is one of the main reasons that most hams look down on CBers. While hams are supposed to play by the rules and is usually a "gentleman's club," CB tends to be like the wild west where just about anything goes. Personally, I really don't care what happens on the CB bands, but a lot of hams do for some reason.

A business could not be held liable for any rules violations you make. If you can find any instances where a business was cited for a rules violation made by a customer, I'd like to see it. If Universal Radio, for example, sells an HF rig to Joe Blow and he modifies it and uses it on CB freqs, it's Joe's fault and not Universal's.

I've bought amateur gear for the past ten years and have never once been asked for my ham license. And what about someone who just passed the test and are waiting for their license to arrive? Or what about someone who is still studying for his license and wants an incentive to pass? Should they be denied the ability to purchase a radio that they'll eventually use?

I believe in Canada, there is a rule against non-licensed ownership of amateur gear. But here in the US, it's perfectly legal.

That's kind of like saying that Ford Motor Company (or whatever) is liable
if you get a speeding ticket. Or like the other point he was trying to
make, they can't sell you a car if you don't have a valid driver license.

It is perfectly OK to second-guess the Federal government. And there are, of
course, ways to get
objectional laws changed. The rules governing radio came about thru trial
and error, and actually
work quite well to prevent interference and allow the most people to make
the most use of radio.

BTW, the USA is NOT a democracy, it is a republic.

>Wadda ya mean, modified?
>How? Why?
It's not Top Secret! Texas Star changed the amp design to keep the FCC happy.
The amps are manufactured as CW amps. A simple mod (adding or removing a wire i
forget which) and it is ready for voice.

"Got RF?"

3883. Which moblie cb radio antenna with big coil is the best

Newsgroup: rec.radio.cb

Which moblie cb radio antenna with big coil is the best out of these monkey,skyhawk,workman sp2000 or sp3000, megatron,sparrow/penetrator or any other good mobile big coil cb radio antenna. I what to know which one works will with low or high power. I have a uniden pro 510xl mobile radio and want to get a big coil antenna that is no more than 4 & 1/2 to 5 ft high. Looking for what u think I should get. I know some might say that a big coil is a waist of money for what I have but I still want to get a good one because I like the way they look.

service other than >Amateur.
>Now, what that means is that, even though a >radio MAY be intended for sale
by a >manufacturer in
>the Amateur Service, it STILL must be >approved by FCC according to
certain criteria >set up by FCC's own labs.

When you say "certified" and "approval" are you referring to "type
acceptance"? If you are, since when did amateur gear need type
acceptance? If you are not referring to such, then what ARE you
referring to?

The term "type acceptance" is not used any more. If you will notice, when
you see a new Yaesu,
Icom, or Kenwood Amateur transceiver about to be introduced, you will see a

small disclaimer down at the bottom of the ad that says, "has not received FCC approval for sale to the public"--or
something to that affect. Regardless of what service a radio is targeted towards, it must meet certain requirements set by FCC for commercial manufacturers in order to be approved for sale
in that particular service. While there is no "type certificate" for Amateur Radios, commercially
produced radios for that market must meet certain baseline requirements before the Fed will allow
it to be imported/sold in the US. That is the "rub" with those alleged 10 Meter "ham" radios sold in
truck stops; they do not meet FCC's criteria, they are too easy to modify, they have "band" switches which allow the radio to cover SEVERAL "bands" of frequencies. Ten Meters is O N E
band, so a 10 Meter radio doesn't NEED switches to cover one band. Ten Meter ham radios,
the REAL ones, don't have incremental "channel" positions or echo, or even those banal squeaks
and beeps.

>Any OTHER radio marketed to OTHER >services must be FCC-approved, and >as a proof of said sale authority, have a sticker >so stating that (para) "This device meets all >FCC re-
>quirements for spectral purity according to >Part XXX, Title 47, US Code....."

So. Manufacturers were never mentioned. The 100 watt radios could have been Icoms for all you know.

Icoms sold in the domestic market have the required approval for sale; Galaxy's do not.

>Those
>Galaxy, Connex, Magnum so-called "10 >Meter" trash has NO such authority, no such >sticker, and
>appear on a list of equipment (which I will >once again post here in the faint hope that you >might grasp the reasons why said equipment

.....and I can't wait! Hehe!

Hey, the cb shop can be owned by a licensed ham and cater to cb. Dave Hall N3CVJ did it with his hack shop. Mods and all.
The cb shop could legally sell Icons, Yaesu, etc. See, many hammies do cb work,,,more cash than in hammie stuff, especially if you get a good name among drivers...tin' fo' good buddy?

He still may NOT legally sell those radios that appear on the list.
Legally, he can
sell the regular ham radios to anyone. Me, I wouldn't sell one without
proof of license.
Legal is legal, illegal is illegal, no matter WHAT "license" one has.

It's not exactly the same thing. Incidentally, there is no such thing as
"type" acceptance anymore.

While radios for other services have to meet certain technical standards for
sale and use in
that service, Amateur rigs don't have to meet the same standards. For
example, a radio being
approved for CB service has to be "channelized" and have no "VFO". Power is
to be 4 watts
AM and 12 watts SSB. While it is misleading to say that Amateur equipment
doesn't have to
be "appproved", actually it DOES have to be approved for sale in the US.
For example, if
a proposed Amateur rig were to be able to cover all Amateur HF bands and

transmit on CB
out of the box, FCC would nix its sale in the US. The standards (VFOs vs channels, power
requirements, and bands covered) are just different. Therefore, you are right.

This is true, but it applies only to radio equipment being manufactured & sold. If I built an HF rig that had full 1500-30000 KHZ coverage transmit & receive, I could still use it on the ham bands without having to have it approved by anybody. Or if I had a marine or military HF radio for instance, I could legally use that on the ham bands also, providing I stayed within the power limit, etc. Same goes for those 10 meter or export radios that the FCC put on their banned import list. If I wanted to use one on 10 meters, I could.

> people were wrong.
>

I never bought into the "hype" of the Starduster. For what it actually
is, is nothing more than a 1/4 wave antenna (A 9' vertical section, and
3 slanted 9' "radials"). I don't know how they managed to rate it for
5db gain (Even 5 dbi is a bit optimistic). I would have thought A/S
would be a little more honest about their gain ratings.

All that aside, the Starduster antennas weren't that physically strong
either. The center element would eventually break off, due to winter's
abuses, and the plastic spacers on the "radials" would also break off,
which then leads to the eventual failure of the radials.

A "Big Stick" is nothing more than half wave vertical without radials.
Like the A-99, these are a poor substitute for the "big metal" antennas
that we used to see so commonly.

My favorite commercially made omnidirectional antenna was the Hy-Gain
Penetrator. A behemouth of a ground plane with, 4, 1/4 wave radials, and
a 5/8th wave vertical section. They got scarce around here at one point
(When I tried to buy one) and I ended up with a Sigma 4. From my own
comparisons, this 3/4 wave Sigma 4 antenna, was easily my best
performing Omni antenna, although I never have the opportunity to do a
direct comparison with the Penetrator, but the Sigma 4 easily
outperformed the common 3 radial 5/8th wave (CLR 2 type), as well as
Astro Planes and 1/2 wave types.

There was also a regionally produced (Sort of like Dave Made is today) antenna called a "Super Starburst". It had either a 5/8th or 3/4 wave radiator (I'm not totally sure), and 10 1/8th wave radials. Many people in my area had them then, and every one of them talked well. This was back in the early to mid 70's. I never got the straight scoop about who and where these antennas were made. I was told once that they we're made by a guy in a wheelchair, and that he eventually had failing health or died, and that's why the antennas suddenly disappeared. If anyone has a better story, I'd love to hear it.

> constantly thrown out to the unsuspecting operator.

Also known as caveat emptor, buyer beware. Sure, it could have "7 db" of gain. A "db" is a relative measurement. It could very conceivably have 7 db of gain over a wet noodle, or a 6 inch rubber ducky.

For a "db gain" measurement to have any validity, it needs to be referenced to a standard. Most antennas are rated in either "dbi" (db over a theoretical isotropic source), or "dbd" (db gain over a reference dipole). Since a dipole has about 2.1 db gain over an isotropic source, any ratings that are in "dbi" will be 2.1 db higher than those that are "dbd" rated. Which is why most CB antenna makers use "dbi". At least those that are somewhat "honest".

Beware of any rating that is just in "db", as it lacks any meaningful standard by which a relative comparison can be made.

> elements to facilitate impeadance matching.

Actually the Starduster more closely resembles a quarter wave groundplane. In its simplest "classic" design, a 1/4 wave GP has a 1/4 wave vertical element, and 3 or 4 1/4 wave radials, which are normally drooped at about 45 degrees from vertical, which lowers the feedpoint impedence. Im not sure what the steeper radial droop of the starduster, does to the impedence or the angle of radiation. I supposed I could model it on EZNEC, to see......

I've owned both, and did a side by side comparison and there's no way
that an Astro Plane out guns a 5/8th wave. I fell for the gain hype
(Which was 4.46 dbi at the time), but when I got the AP, it didn't do
any better than the 1/2 wave radio shack GP that it replaced. I later
replaced it with a Hustler 5/8th wave GP, and saw a significant
improvement.

>
> They did make a 5/8 wave version of the Astro Plane (coils on the 4 elements)

> After all, it was only a 1/4 wave element. In my opinion, it wasn't as good
> as the aluminum element due to the lack of surface area.

I've been involved with similar experiments. Only we used a Big Stick as
the test bed. Taking off the top element, and replacing it with a
firestick, or any number of other "performance" mobile antennas, yielded
inconclusive results. Sometimes we saw a little better, sometimes not.

>
> It would be interesting to take a Firestik KW7 and test Firestik's claims that
> their loaded antennas work better than a standard full size whip. In other
> words, prove it to me!!

Conventional wisdom says no way. A loaded antenna may be electrically a quarter wave, but the surface area will be less. They might be able to play games with the radiation angle, such that it may be able to concentrate the major E plane lobe (Smaller as it may be) in such a way as to enhance certain performance characteristics (like DX or low angle distance). But like anything else, when you give to one side, you take away from another, so overall, I'd still say that a quarter wave whip is still the best overall, for mobile use.

Try www.google.com

Fax on Demand list, well that didn't com in as a link but its there.

Just type in Motorola Mocat 40 in the search line and there you go.

Lots of data on the web.

I've never had much faith in Galaxy radios. There were many little
technical quirks in them. But they usually did their rated output power.

Most radios do their rated power out of the box, provided you supply the
proper voltage and current to them.

I'd stick to the Uniden Grant, if I were you. Much less problems.

There are many societal and psychological reasons why this seems to be
the case (I too, have witnessed the same).

To put it simply, If you were a hot chick, would you spend your social
time on a CB radio? Or would you be cruising the yuppie circuit? From
the female point of view, many of the guys on the CB radio aren't very
appealing either........

I don't think that most hams are pissed that CBers can do this and likely not get caught while hams are more likely to get caught. A ham could simply not ID while doing that kind of nonsense. I think the main difference is that it's more likely that hams will DF an offending signal than CBers would.
It is important to note that this is one of the main reasons that most hams look down on CBers. While hams are supposed to play by the rules and is usually a "gentleman's club," CB tends to be like the wild west where just about anything goes. Personally, I really don't care what happens on the CB bands, but a lot of hams do for some reason.
Tom
--

I don't think *most* hammies are pissed over that either, but some that are in the minority are, which is why I chose to illustrate that certain hammies view. Some are here simply to start trouble and argue....condemning behavior tantamount to their own (freebanding, dx, and what they have called "basement" amps) and using it as a poorly disguised premise to attack is transparent to all but themselves..
Cb has it's problems, but is inherent of this forum and it's participants.

And if citizens never second guessed the government it's governing laws
and blindly conformed to all we would live in a totalitarian government
and not a democracy.
I don't know how "second guessing" helps, but we are supposed to
participate in the process, through our representatives. The ARRL
does a lot of lobbying in that direction.
--

Check this intersting fact out: The ACLU had a record number of
enrollments since 911 compared to all previous years.
You may not realize those "second-guessers" were even around, but if
they were gone, you would know it very soon.
Concerning the ARRL,,,,,,,like cb, their original intentions were
valiant and noble, but they are quite removed from their point of
origination.

To this group....Rec.Radio.Cb:

On the personal advice of my Attorney, Mr. Levon King, I am making this public statement reguarding this newsgroup and my activity in it.

It appears that Mr. Doug Adair of Toledo, Ohio and some his "friends" have taken it upon themselves to start a smear crusade against myself. Well, in some respects, they have achieved what they've have set out to do.

Doug, I've got one thing to say to you. You're a low-life scum of the earth. you come back to this NG, and started this stuff again, after we shook hands and agreed on a truce. you had no intention of stopping and you know it... You're a low-life scum, without a job or a real life.

after some serious consulting with my attorney, I have decided it is best that I refrain from posting or reading this NG for a while... These people have gotten what they've wanted...and I hope they're sasified.

on conclusion I will say this.... Doug, I will continue to be attending the local and otherwise Hamfests. I hope to run into you again.

73 and Farewell for now....

-Chuck Adkins K8CPA

Lincoln Park, Mi...

Dino, the word dipole means 2 legs. A 1/4 wave ground plane antenna works
against a counterpoise, the counterpoise is formed from 1/4 wave radials
radiating from the base of antenna. The counterpoise ground currents flow
along
the ground radials instead of the earth.

> >The antenna is a quarter wave Tony, you need to look at where it is fed.

BINGO!!!!!! That is the whole jist of it Tom, those "Export Radios" are not
built by amatuers.

>If I built an HF rig that had full 1500-30000 KHZ coverage transmit &
> receive, I could still use it on the ham bands without having to have it
> approved by anybody.

No one ever said likewise, It will still need to meet certain requirments.
It is those export radios clearly marked 10 meter which are not allowed to
be sold or used by amatuers.

Or if I had a marine or military HF radio for
> instance, I could legally use that on the ham bands also, providing I
stayed
> within the power limit, etc. Same goes for those 10 meter or export
radios
> that the FCC put on their banned import list. If I wanted to use one on
10

How could you use it if it is on the banned list? They are not to be sold
they are illegal. How did you get one?

3932. Re: Need schematic for mute circuit

Newsgroup: rec.radio.cb
Date: 2002-12-10 17:23:08 UTC
From: Skipp hates spam <getajob@yahoo.com>
Message-ID: <at57ts$o5i$2@woodrow.ucdavis.edu>
Source record: 146468

The audio sense - detect circuit for the CB is no big problem, I could probably help you with that... even a rude audio detector circuit can be made from one transistor/fet and some descrete parts.

The issue is how are you going to deal with muting the car stereo. Two methods come to mind... first is dealing with it at the low level audio point (at the volume control), the second is at the speaker level (output) point.

You have to be concerned with the audio output leads of the stereo, often hybrid IC circuits are "bridged" to get more output and there is DC on the leads which means one or both speaker leads should not ever be grounded.

So any circuit for each speaker lead you make will have to be isolated or "floating".

Then there is the issue of how much power the car stereo outputs...

The end result is, how practical is it going to work... your CB will pop on noise and the radio level will bounce up and down, ie drive you crazy.

It would be a fun circuit to build, but it will drive you crazy in the long run...

cheers
skipp

It is simple....

To find out if yer gay ask yerself...

1.Do you own an illegal CB radio or transceiver that works as one?

2.Do you use illegal power levels?

3.Do you operate on illegal frequencies?

If yes to any of these...now ya know. Time to keep a home aids test around the house.

>.I will let his own words haunt you.

(snip)
Interesting selection of terminology you employed.......his words are
fine..as usual,,,your deficit in communication has manifested and is
responsible for your inept interpretation.

Tell me what Jerry meant then when he made this statement:

"The term type acceptance" is not used any more. If you will notice, when
you see a new Yaesu,
Icom, or Kenwood Amateur transceiver about to be introduced, you will see a
small disclaimer down at the bottom of the ad that says, "has not received
FCC approval for sale to the public"--or something to that affect.
Regardless of what service a radio is targeted towards, it must meet certain
requirements set by FCC for commercial manufacturers in order to be approved
for sale in that particular service. While there is no "type certificate"
for Amateur Radios, commercially
produced radios for that market must meet certain baseline requirements
before the Fed will allow
it to be imported/sold in the US. That is the "rub" with those alleged 10
Meter "ham" radios sold in
truck stops; they do not meet FCC's criteria, they are too easy to modify,
they have "band" switches which allow the radio to cover SEVERAL "bands" of
frequencies. Ten Meters is O N E band, so a 10 Meter radio doesn't NEED
switches to cover one band. Ten Meter ham radios, the REAL ones, don't have
incremental "channel" positions or echo, or even
those banal squeaks and beeps."

3946. Newbie question

Source record: 146482

Hello everybody, I just started CB when i found in my basement a quite recent CB that is working. The probleme is that I dont have any money to spend in an antenna or even tos-meter (maybe tos-meter) and i heard about wire antenna. I just want to chat with a frien who is about 1-2 mile away from my flat (4th and last floor) so I dont think i need a very complex model (even though I have all the DIY material needed). I can use the roof of my building but (2nd question) I dont know if i am too far from it or no (I have to use about 15-20 meters of wire to connect it).
So if anybody can give me wire antenna plans & answer to my wire question it would be nice!!
Thanks

Marc

yeh dave........chicks don't dig wrecker drivers, security guards, ssi
recipients, police officer impersonators, child molestors, inbred
hayseed hicks, truck drivers, unemployed goober smoochers,
homosexuals, trailer park trash, junky old car drivers, drunks,
excons, guys with bad teeth, bad hair, and body oders, etc,
etc.......yeh they are real funny about stuff like that.......but i
ask you...who does???? however,......this radio shit gets in your
blood.........what can i say???? i just don't talk about it to
females...........they just would not understand..........how can you
explain to them that you just got off channel 6 and told all of the
blacks that this is george bush country and they need to go get a
fucking job.........?????

Antennas havent changed much at all in the last 50 years, just the hype, Starduster was a good antenna but nothing special. Antennas work best when they are located as high as u can get them, Get it out of the attic and on a pole. I had mine back in the 70's if I rember right it was a 1/4 wave antenna that I replaced with a 5/8ths. The 5/8ths worked much better. Could be wrong though maybe the Starduster was the 5/8ths.Anyway I cant remember if it was the 5/8ths or the 1/4 wave I replaced t with a 5/8ths. if it is about 10 ft tall get rid of it, if is about 20 ft tall u have a good antenna.

Was given a New in the box Cobra 18LTD radio. How old is this radio, I am guessing mid to early 80's. Seems to work good, modulation could use some help(as came from factory). Is this a good radio. Im thinking a power mike is all it really needs.
TIA

The Motorola T4000A, T4005A, T4009A, T4010A, T4020A, T4022A, T4025A & CM540
had no adjustment for AMC. It did share the chassis with a SM5104 chip with
the Midland 77-825/77-861 the output controlled by T4, T5 & L3 or L14, L16
& L18. It was the same design as many of the cheaper AM mobiles of the era
like the Kris XL, Utac's & Panasonics. It was also the same board as in the
Fannon 880 Base and Radio Shack TRC-455(?). I looked through all my books
and that's all I could come up with.

As long as you have good coax, an antenna on the roof would be fine. To the wire question: I have a dipole antenna made from the type of wiring used for electrical wiring in your house (can't remember athe AWG off-hand) that I think is 26 feet long. I cut this in half and attached one of the wires to the center wire of the coax and the other wire to the outer coax wire. Then just hag it up like this:

```
--------------|--------------- -wires
| -COAX
|
```

It can make for a good antenna, but I would recommend getting an outdoor antenna.

HAHAHAHAHA Very well put. Now I guess most of the guys on CB radio don't like the truth. The thousands of times that I put this question out on Channel 19 just for survey sake I have always gotten some guy (For lack of better terms) either wanting to beat me up HAHAHA I'm 6'3" and weigh in a 250 or I get some guy For lack of better terms telling me about the beautiful girl he just got off the radio with in New Jersey. Or that his wife is beautiful and she talks on the radio. I asked him if he needed glasses and he didn't come back. HAHAHAHA I laughed at that one for miles. I think your right about the socail seen. What pretty girl in her right mind would want to hang out with a rough looking CB guy, All stereo types aside most dudes who talk on CBs are not the cream of the crop.
I geuss if your a fat girl and you want a man to think that your pretty when your not get you a CBer or a CB trucker. And Merry Christmas

3960. FT 920 For trade and more!

Newsgroup: rec.radio.cb
Date: 2002-12-10 22:48:33 UTC
From: Oris <orisnospam@dirtball.com>
Message-ID: <3DF66DEF.5040409@dirtball.com>
Source record: 146496

Hello
I have a FT 920 with the AM filter and FM board. The FT 920 is 100
watts HF + 6 Meters. It has a Auto tuner and the MC 100 Desk Mic. I
also Have the 3 KW Roller Inductor Antenna Tuner. They are in good shape
I will trade both for a FT 990 or a FT 1000.. I have been using the FT 920 as a backup rig.
If you have a FT 1000D I will add a Henry Radio 2KD-5 Amplifier to
the deal. 100 watts in gets you about 1000 watts out. I will trade this 2KD 5 Henry amp for a FT 990 or a FT 1000. It has new caps
and a pair of Emac 3-500. It is wired for Single Phase 240. The same
voltage that runs your dryer and electric range.
I also have a Icom AT 500 auto tuner. This tuner will handle 500 watts. It works fine and I have no use for ICOM equipment. My station is all Yaesu at this time. I will trade this tuner for a Kenwood TS 50, or other small HF Gen. coverage rig, or a good Short wave receiver. I also have a Pentium III 500 Mhz computer for trade. It has 128Mb ram, CD burner 52X CD rom S3 Virge video card, 1Gb hard drive, 10/100 Mb network card, Motorola SM 56 modem, Yamaha sound card in a ATX tower. Of corse keyboard and mouse included. I will trade this computer for 350 bucs plus shiping or a good HF moblie rig.
I am will to travel 100 miles from Athens GA. Drop me a email so we can work out the deal.
oris@dirtball.com
Happy Holidays
73 and thanks for reading

Why do I have to peak it if I run an amp, moron? Besides, peaking it from 4
watts to 5 or 8 had little effect, from what I hear.

I asked the question in a way to get information. If you can't give the
information, then shut the fuck up.

Thanks for the response!

This helps me make some design goals.
If I remember correctly the schematic I had just grounded out speaker
level to two resistors in paralel to make 8 ohms.

My buddy who owns a shop says he has a working example... I plan to
check out, but I'm looking for more functionality.

May I email you? I may need to take you up on your offer of some help at
sometime on this project.

BTW, I run debian.

Best,
Armand

I'm gonna find wheres you lives, muthafuka!
Keep talkin dat shit and you gonna gits yo ass beat!
So , Shut The Fuck Up, You Krazy KracKer!!
I gots me a white woman!
She be suckin' on my black dick!!
I be afta them white gals who got them big breastisis and big ass!
I be slidin' dat cock in dem asses and them big titties!!
So, you better watch yo self and what yo say on this hare NG!
That why dem white gals be runnins to a black man fo protection from the
white man these days!
Like the sayin' goes
"Once a white gal go black you ain't ever gonna git her ass Back!!"
So, you better RUN, muthafuka!
Or I'll pop a cap in yo white ass!!
And them white gals be laffin!!
Then I make'em suck my dick!!
They LOVE black dick!!!
YEEEEAAH, BOYEEEEEEE!!!!!
IN YO FACE!
CLICK- CLICK- ***BOO-YOW!***

I will cut yo coax one night when you least expects it, BOY!
So, when you goes to sleeps tonight, keep one eye open and yo hands on yo
dick!! IF YOU GOTS ONE!
BWAHAHAHAHAHAHAHAHAHAHAHAH!!!!!!!!!

Don't waste A DIME on any "big coil" antenna. Big coil means it can handle
BIG power. You don't have that, so it is a waste of $$$! Get a 4 1/2'
Francis, Hustler or a 5' Firestick ort a 5 1/2 Francis, and save $$$! Or
If you want a 6 1/4' long one that works better than ALL everyone mentions,
e mail me direct !

No, power mic a waste of money. Needs to be tuned up. Does it have a date on the back of it? I don't think the 18's did. The 18's had 3-4 different boards in them through time. If it has the 2nd last one in, it is the worst one. If it is from the 80's, it is a better one (less problems). I don't recommend anyone buy any 18's.
Dave!

If the radio is working good and you have a good antenna and your happy, then its a good cb.

If you want a power mic ok, just be sure that the radio has not had the modulation clipped.

It is better to have it properly tuned and forego the mic as they tend to pick up a lot of background noise if not adjusted properly (the mic's)

The newer 18 however are not good in rough riding vehicles as they have vertical circuit boards mounted that tend to break in the middle of the L solder.

I hope that answers your question. Have the antenna you intend to use tuned to the vehicle and it will work fine. Run it first to see if it will do the job for you before you spend a lot of money on it. Get a good antenna and if you want to upgrade or spend money on your 18 then you will be even more pleased.

Deb

this antenna works great. i put my dipole about 20 ft high . so it
pays to experiment whith wire antennas.

3975. ILLEGAL CB TRANSCEIVER LIST

Newsgroup: rec.radio.cb
Date: 2002-12-11 08:13:37 UTC
From: W7DVJ <w7dvj@hotwax.com>
Message-ID: <DkDJ9.464$3F.101143683@news.inreach.com>
Source record: 146511

ILLEGAL CB TRANSCEIVER LIST

The FCC's Office of Engineer and Technology (OET) has evaluated the devices listed below and has concluded that these devices are not only amateur transceivers but can easily be altered for use as Citizens Band (CB) transceivers as well. As such, OET has further concluded that these devices cannot legally be imported or marketed within the United States for the reasons discussed below. Further, the FCC General Council has issued a decision in a specific case involving one manufacturer and has concluded that dual use CB and amateur radios of the kind at issue may not be approved under the Commission's rules and are in violation of several rules including the RF power level limits of 47 CFR 95.639. (letter from Christopher J. Wright, FCC-OGC to John F. Atwood, US Customs Service, dated May 17, 1999).

Transceivers used in the Amateur Radio Service below 30 MHz do not require FCC authorization prior to being imported into or marketed within the United States, but transceivers for other services, including the CB Radio Service (CB), do require Commission approval. The transceivers listed herein and other similar models operate in the amateur "10-meter band" and are often referred to as "10-meter" radios or "export" radios. The amateur 10-meter band uses frequencies that are very close to the channels set aside for use in the CB service. Some of the transceivers that manufacturers call "10-meter" radios either operate on CB frequencies as manufactured and imported or are designed such that internal circuits can readily be activated by a user, a service technician or a dealer to operate on CB frequencies. According to Section 95.603(c) of the Commission's rules, a CB transmitter is a transmitter that operates or is intended to operate at a station authorized for the CB service. 47C.F.R. § 95.603(c). The Commission's equipment authorization experts in the FCC Laboratory have determined that the transceivers listed herein and other similar models at issue here are intended for use on the CB frequencies as well as those in the amateur service because they have built-in capability to operate on CB frequencies. This capability can be readily activated by moving or removing a jumper plug, cutting or splicing a wire, plugging in a connector, or other simple means. Thus, all the transceivers listed herein and similar models fall within the definition of a CB transmitter. See 47C.F.R. § 95.603(c). A CB transmitter must be certificated by the FCC prior to marketing or importation. 47 C.F.R. §§ 95.603(c); 2.803.

Moreover, the dual use CB and amateur radios of the kind at issue here may not be certified under the Commission's rules. Section 95.655(a) states: "§.([CB] Transmitters with frequency capability for the Amateur Radio Services § will not be certificated.)" See also Amendment of Part 95, Subpart E, Technical Regulations in the Personal Radio Services Rules, FCC

88-256, 1888 WL 488084 (August 17, 1988). This clarification was added to explicitly foreclose the possibility of certification of dual use CB and amateur radios, see id, and thereby deter use by CB operators of frequencies allocated for amateur radio use.

In addition, the Commission's equipment authorization experts have determined that these devices violate or appear to violate a number of the rules governing CB devices. For example, they may use emission types not permitted, or emit RF power at a level in excess of the levels permitted in the CB radio service. See 47 C.F.R. § 95.639.

In view of the foregoing, the following "10-meter" transceivers are not acceptable for importation or marketing into/within the United States. Importation and marketing of these units is illegal pursuant to Section 302(b) of the Communications Act and Section 2.803 of the rules. Willful violations of the Rules and the Act may subject the violator to a monetary forfeiture of not more than $11,000 for each violation or each day of a continuing violation. The Commission continues to review this type of equipment, and additional makes and models may be added to this list in the future.

LIST OF TRANSCEIVERS

ILLEGAL TO IMPORT OR MARKET

GALAXY - models: DX33HML, DX 44V, DX55V, DX66V, DX 73V, DX 77HML, DX 88HL, DX99V and Saturn Turbo

CONNEX - models: 3300, 3300HP-ZX, 3300 PLUS and CX-3800

MIRAGE - models: 44, Galaxy 88, 9900 and 2950EX

NORTH STAR - models: NS-3000 and NS-9000

PRESIDENT - models: Grant, J.F.K., Jackson, Lincoln, HR-2510 and HR-2600

PRO STAR - model: 240

RANGER - models: AR-3500, RCI-2950 and RCI-2970

TEK - model: HR-3950

UNIDEN - models: HR-2510 and HR-2600

SUPER STAR - model: 121

For further information concerning the listed transceivers or similar models, contact Ray LaForge or Gary Hendrickson at the FCC Laboratory, 7435 Oakland Mills Road, Columbia, MD 21046, (301) 362-3041 or (301) 362-3043 respectively, or E-mail: rlaforge@fcc.gov and ghendric@fcc.gov

Message-ID: <at73uiirv1@news7.svr.pol.co.uk>
Source record: 146515

The other day I went up to a local Christian bookstore and saw a honk if you love Jesus bumper sticker.

I was feeling particularly sassy that day because I had just come from a thrilling choir performance, followed by a thunderous prayer meeting, so I bought the sticker and put in on my bumper.

I was stopped at a red light at a busy intersection, just lost in thought about the Lord and how good He is and I didn't notice that the light had changed.

It is a good thing someone else loves Jesus because if he hadn't honked, I'd never have noticed.

I found that LOTS of people love Jesus. Why, while I was sitting there, the guy behind started honking like crazy, and when he leaned out of his window and screamed, "for the love of God, GO! GO!" What an exuberant cheerleader he was for Jesus.

Everyone started honking! I just leaned out of my window and started waving and smiling at all these loving people.

I even honked my horn a few times to share in the love. There must have been a man from Florida back there because I heard him yelling something about a sunny beach...

I saw another guy waving in a funny way with only his middle finger stuck up in the air. When I asked my teenage grandson in the back seat what that meant, he said that it was probably a Hawaiian good luck sign or something.

Well, I've never met anyone from Hawaii, so I leaned out the window and gave him the good luck sign back.

My grandson burst out laughing, why even he was enjoying this religious experience.

A couple of the people were so caught up in the joy of the moment that they got out of their cars and started walking towards me.

I bet they wanted to pray or ask what church I attended, but this is when I noticed the light had changed.

So, I waved to all my sisters and brothers grinning, and drove on through the intersection.

I noticed I was the only car that got through the intersection before the light changed again and I felt kind of sad that I had to leave them

after all the love we had shared, so I slowed the car down, leaned out of the window and gave them all the Hawaiian good luck sign one last time as I drove away.

Praise the Lord for such wonderful folks!

Have a great Christmas.

Peter.

I'm sure you realize, though, that you'll lose a lot of gain by mounting the antenna horizontally if everyone else is using vertical antennas. But if the other stations you want to talk to are also using horizontal antennas or if you're shooting skip, you're good to go.

above.
Tell you what, I will point to where I feel your mistake is.

--
JerryO wrote:
"The term type acceptance" is not used any more. If you will notice,
when you see a new Yaesu,
Icom, or Kenwood Amateur transceiver about to be introduced, you will
see a small disclaimer down at the bottom of the ad that says, "has not
received FCC approval for sale to the public"--or something to that
affect. Regardless of what service a radio is targeted towards, it must
meet certain requirements set by FCC for commercial manufacturers in
order to be approved for sale in that particular service. While there is
no "type certificate" for Amateur Radios, commercially produced radios
for that market must meet certain baseline requirements before the Fed
will allow
it to be imported/sold in the US."

Is this your crutch, George? These "baselines" he speaks of are of a
general nature and not limited to radios but of all imported goods.

JerryO continued with:
"That is the "rub" with those alleged 10 Meter "ham" radios sold in truck stops; they do not meet FCC's criteria, they are too easy to modify, they have "band" switches which allow the radio to cover SEVERAL "bands" of frequencies. Ten Meters is O N E band, so a 10 Meter radio doesn't NEED switches to cover one band. Ten Meter ham radios, the REAL ones, don't have incremental "channel" positions or echo, or even those banal squeaks and beeps."

Again, nowhere in his post does he say an authorized hammie can not legally use a Galaxy. And please differentiate between Dave Hall N3CVJ claiming he can legally run a Davemade but you claiming he can't do the same with a Galaxy. Or you can make an attempt to explain why it's legal for N3CVJ to run one of those radios in his mobile but illegal for everyone else. Still waiting for either of you fraudulent defenders of truth, justice, and the American way to shed some light on that. Neither of you care to discuss or touch upon thy situation that has thou dining ornithologically once again. Dave is so sore that he took to making up imaginary playmates again.......as he sits in his cell and finger paints with his feces on the wall screaming "You're crazy twistedhed, you're CRAZY twistedhed" over and over again, as a mantra, smearing the cell wall and himself methodically, almost hypnotically with bile.....the acts of one who fancies himself skilled in psycholinguistics, the self-titled and self-described psychopathologist, eventually gives way to his own deafening and maddening wicked laughter echoing off of cold empty Halls.... his cries and pleas eventually drowned out by his own repetetive pathetic pleading... .....again comes echoing thunderous laughter.

Seems they all consider the Confederate flag a necessary piece of equipment. Can't figure out tho what Dixie has to do with the airwaves... but a Stars-&-Bars bumper sticker will DEFINITELY keep the LAPD from pulling you over & hassling you, especially if you venture anywhere near Culver City. Just don't drive it near Watts...

If you're in LA, hit the TRW swapmeet sometime... two freaking million toothless old geezers dealing in every sort of radio. There are a few attractive 30-ish females there though, so they're not all ugly... but they're usually there just to tag along with the husbands/bf's who are buying or selling stuff. And no, the cute teen blondies serving donuts & coffee are strictly off-limits.

One exception that stands out is this very cute nerd chick, a 6m ham, who used to show up there... she wouldn't have looked half bad if she would've ditched those Coke-bottle glasses.

Guy

What you're saying is essentially the same as "guns should be illegal except for by the cops." Non-related and certainly not pertinent.

>The Stardusters are great antennas.

True

>Antennas haven't progressed much if any in my opinion.

We all have a right to our opinion even if it is flawed. The Interceptor 10K is the best antenna ever made (Vertical Omni). It uses NEW technology and has "progressed" substancially over antennas of the past!

>Metal is always better (than) fiberglass.

I agree! If fiberglass antennas were "better", than all the amateur radio antenna manufactures would be building fiberglass antennas. Fiberglass has it's advantages, but signal strength is not one of those.

>They stopped using metal for safety reasons (power lines - etc.) The
>starduster, maco 5/8 wave , and the penatrator are the BEST antennas ever
>made.

Actually, they stopped making metal CB antennas because the manufactures were tired of getting sued when Billy Bob CB'er dropped it in the power lines. Lawsuits and lawyers are the reason.

The Penetrator was a very good antenna. I believe the Avanti Sigma 5/8 was even better, but that is just my opinion.

The Maco is OK. Their quality of build is lacking in my opinion. But it does perform like a 5/8 should. The Starduster isn't even in the same league as the Sigma, Penetrator, or the Maco. How can it, its only a half wave antenna.

Dino

With all due respect Dave...and believe me, I very much respect what you have to say! I want to clear up some issues...

The Starduster is a 1/2 wave center fed dipole with 2.1dbi gain.

The Sigma IV is also a half wave antenna. I know I'm going to ruffle some feathers, but I have spoken with the original engineer from Avanti specifically about the Sigma IV.

The Sigma IV, while being 3/4 wave LONG, is only electrically a 1/2 wave antenna. Its basically a big J-Pole in the sky. The lower 1/4 wave is part of the matching circuit. Only the part above the loop radiates. I know its hard to swallow, but it is the truth.

Who out here has replaced a good 5/8 ground plane with a Sigma IV? I replaced my Avanti Sigma 5/8 with the Avanti Sigma IV (both original designs!). The Sigma 5/8 was better locally and in skip land!

This winter, I will be towing the tower trailer out to an undisclosed location in the desert to test the following antennas..

Interceptor 10K
Avanti Sigma IV
Avanti Sigma 5/8
Hy-Gain Penetrator
Maco 5/8 and/or V5000
IMAX 2000
A-99

It will be open to invited guests. If anyone wants to bring an antenna, not listed above, that will be considered. I have been collecting the above antennas for the comparison. They will be tested at the same heigth with the same coax and transmitter. There will be a spectrum analyzer at the other end. More on this later.

Dino

I messed up! I didn't mean to type "Astro Plane". Since we are talking about the Astro Plane though, I agree that it is NOT better than a 5/8 ground plane.

I also experimented with the Big Stick and a Fransis Amazer. I should have tried a 9' metal whip!

And I agree, the best mobile antenna is a full size 1/4 wave antenna. I run a Wilson 1000 and 5000...but they are a compromise.

Thanks for qualifying your desire for a big coil antenna! You like the looks and thats whats important to you.

A Wilson 1000 will perform better and I'll explain if you want to know why...but it also has its disadvantages too.

That little 510XL is an excellent little radio! No bells and whistles, but plenty of modulation!

It will be interesting to read the responses you get!

Dino

Chuck,
I told you in email I had no idea who was doing it. If I wanna diss ya
I can do it without being anonymous. Whoever jumped yer case
undoubtedly got what they wanted outta you. You are very predictable.

For once be honest. You are "leaving" because you have been
humiliated. 1.You lie about what you do, who your "pals" are, etc.
2.You get called on it and proven to be a liar. 3.The humiliation is
too much to take so ya book.

The solution is don't be a threatening, lying piece of trash. It has
already gotya facing a criminal charge, and you are STILL too dumb to
stop.

You live in a fantasy world where you are a gun toting badass, calling
policemen "pigs", hanging out with bikers and drug gangs, and having
people beaten and shot by the meanies you sic on them. None of it is
real. You are a coward, not a badass. You have never done any of it,
and you are a pathological liar who talks big to feel big. Just like
my 12 year old nephew. In fact worse, since he admits it isn't real.

I suggest you shut your sissy face before you find out what else you
can get charged with. I can't wait to see you in court and hear your
bad self call the judge a "pig". You are gonna be a crying little
sissy boy begging for mercy.

Come on, idiot. Make another threat.

PS, I am gonna look up your lawyer and see if he is real and ask him
if he has your sissy self for a client. Probably another lie...Stay
tuned people, I'll find out.

The FCC is like an old dog, all they do is lay around and let out a fart now and then. These radios are easily available on the net, and at radio shops all over. The same goes for so called 10m amplifiers. Look into 10 big trucks and see how many have a radio on the list. What's the point of posting this crap here?

antenna.
>
> Dino
>

The Starduster is a quarter wave ground plane. The radials are lowered to bring the impedance closer to 50 ohms. Vertical antennas mounted on poles are simply not called dipoles. In effect and operation, they are similar. If you want to make it dipole, remove two of the radials. Of course, then you don't have a symmetrical radiation pattern. That is why they are referred to as ground planes...you have artificially created "ground" at antenna height. Lose the half wave dipole moniker. It does not apply.

Another correction:

Aluminum antennas were outlawed. It has previously been researched and posted in this group, along with the links to back it up. It is now illegal to offer for sale an aluminum "CB" antenna.
